Rail Hanging Systems

IDEAL SYSTEMS FOR WORKSTATIONS

COLOR
Gray

HOW TO CHOOSE: Rails vs. Louvers

Rails: Constructed of individual steel rails that span between uprights. Weigh less than louvered panels, more economical, small footprint, easy to remove bins from rails.

Louvers: (Page 28) Steel panels with rows of punched louvers. More storage capacity, greater selection of styles. Panels can be attached to the wall, freeing floor space. Rivet racks come with the panels already riveted to the frame.

FEATURES

- 1 14-gauge steel rails securely support AkroBins®, 19-Series Cabinets and InSight® Ultra-Clear Bins (sold separately)
- 2 Heavy-duty steel for strength and durability
- 3 Durable powder-coated finish

PRODUCT HIGHLIGHTS

- **EFFICIENT** – Allow for fast, easy organization and parts retrieval
- **SINGLE-SIDED** – Units are ideal for placement against a wall to save space
- **DOUBLE-SIDED** – Units can “float” in any room environment and can be picked from both sides
- **MOBILE KIT** – Available to mobilize two-sided rack
- **STEEL RAIL** – Wall mountable rail is ideal for supply rooms and workstations

IT'S ALL ABOUT THE WHEEL

Those that depend upon platform trucks, carts and dollies to do their jobs understand that the right caster makes ALL the difference.

For example, not all 3" polyolefin casters are built the same, even if they look similar. Akro-Mils gives you more:

- ➔ **Double Ball Race vs. Single Ball Race.**
This provides better rotation and control.
- ➔ **Sealed Wheel Hub Ball Bearings vs. Plain Bore.**
This provides better overall roll ability.
- ➔ **More Structural Wheel Profile.**
Allows the wheel to be stronger under impact.
- ➔ **Heat-Treated Plate Raceway vs. Non Heat-Treated.**
This provides better support under load conditions.
