# A World of Options...

Lifting Performance since 1940

# A WORLD OF OPTIONS...

## Local root. Global reach.

Logitrans was founded in 1940 in a small smithy and has a long history with a lot of traditions. Today the company is world-wide and exports 95% of the production to more than 55 countries in the whole world!

### Logitrans is a Good Partner!

- Safety
- Durability
- Customer-adapted solutions
- Ergonomics
- Customer Service

### Lifting performance!

The promise of Logitrans is to fulfil the needs of the customers to be able to handle goods in an efficient and ergonomically correct way! With unique handling solutions, Logitrans helps to increase the performance of the customers!

### Man in focus!

“We have the relationship between man and machine at heart - as well as the working environment and the well-being of our employees and customers.”

*Gitte Kirkegaard, CEO*

### Focusing on ergonomics and efficiency!

The Logitrans range of products ensures that the user always has the correct equipment when transporting, handling or lifting goods on pallets or in boxes, reels, drums etc.

The good and flexible working conditions help to increase the efficiency of the user!

### Perfect for all areas

Logitrans products are available for all areas in a company, e.g. production, storage and shopping areas, and for all industries; also when good hygiene is required. The product range is wide – including both standard and custom-built products which solve the specific needs of the customer.

### Visionary, Unique and Ergonomic

Easy handling, optimum space utilisation and ergonomically good working conditions are always in focus at Logitrans.

*"We are very satisfied with the Logitrans products! They help us to fulfil our objectives concerning maximum safety, efficiency and working environment"*

*Jean-Paul Wauters, Supervisor for Health and Safety, Caterpillar Distribution Services, Belgium.*

## REEL HANDLING

**Transport, rotate and lift reels - find the equipment perfect for your handling situation and avoid strain on arms and back!**

**Reel Rotator**

### **A World of Options:**

- Smooth, soft, hard and heavy reels
- Reels with different reel diameters, lengths and weights
- Efficient, gentle and safe reel handling

**Reel handling is often a complicated job, which has to be estimated in each case in close cooperation with the customer.**

### Reel Rotator

can handle vertical reels from floor/pallet and horizontal and vertical reels, clear off the floor. Available with manual or electric rotation, reel fastening and lifting.

### Reel Lifter

has a compact design, ensuring optimum access in limited areas, e.g. when reels are to be placed inside a production machine.

### Unique partners

The Reel Lifter is a perfect partner to the Reel Rotator, which can take a reel from e.g. a pallet, rotate it and place it on the Reel Lifter. The Reel Lifter places the reel in the machine.

## BOXES AND CRATES

Correct lifting methods when transporting, lifting, filling and emptying boxes, containers and crates...

**Rotator  
with box holders**

### A World of Options:

- Standing and sitting working position
- Easy access to the contents at the bottom
- Ergonomically correct working positions
- Minimum strain of back, shoulders and joints

**Avoid strain**

Logitrans offers a unique range of equipment for the handling of boxes, containers and crates etc. ensuring a minimum strain of back and shoulders.

**HL 1006**

**SELS**

**Logitrans has the solution**

Work satisfaction and efficient work flow are always in focus when choosing a Logitrans solution!

## DRUM HANDLING

**A drum is not just a drum... It is a fact that the market consists of a number of drums with different forms and measurements!**

**Multi drum turner**

### **A World of Options:**

- Handling of drums in horizontal and vertical position
- Emptying, rotating and transporting drums
- Handling of steel and plastic drums
- Special solutions for drums with different materials and dimensions

**Logitrans helps you find the best way to handle your drum!**

**The Multi drum turner**

Handles steel and plastic drums from Ø300 to Ø600 in horizontal or vertical position.

**The drum forks**

Lift and transport horizontal drums. The drum forks are available for both stackers and pallet trucks

**The drum turner**

Handles drums in the horizontal or vertical position and can rotate these 360°. Available in a manual or electric rotation model.

**Drum turner for steel drums**

**Drum forks**

# TRANSPORT AND LIFTING OF PALLETS

Transport of pallets in the company, in vans, stacking of goods on shelves in storage areas...

## A World of Options:

- Ergonomically correct working conditions
- Manoeuvrable in restricted areas
- Efficient and quick intra-logistics

Panther Maxi

Panther Mini

**Logitrans covers your handling needs!**

**Pallet trucks**

Easy and silent transport of very heavy pallets!

**Highlifters**

With only one truck, a pallet can be transported and lifted to the correct working height – a unique combination!

**Stackers**

As an additional benefit to the combination of correct working height and transport of pallets, it is also possible to lift up to large heights!

**EHL 1004**

**SELF MINI**

## ...ALSO IN ENVIRONMENTS WITH SPECIFIC REQUIREMENTS

**Does your company operate in an environment with specific requirements for the material handling equipment?  
Logitrans can also be a help!**

**Panther Inox Plus**

### **A World of Options:**

- A large range of stainless products
- Products being easy to clean and corrosion resistant
- Long lifetime in aggressive and salty environments
- Optimum ergonomic working conditions in special environments

When choosing a product, the specific requirements have to be clarified between the customer and Logitrans.

**Specific requirements:**

**Aggressive environments**

The material has to be resistant to corrosion, acids, salts and scratches.

**Strict hygiene requirements**

The construction has to fulfil the strict requirements of hygiene and cleaning.

**Environments, sensitive to static electricity**

Surface tension has to be avoided and conductivity has to be optimised.

**Clean rooms**

The material handling equipment has to fulfil the requirements concerning dust particles in the air.

**Explosive atmospheres**

The material handling equipment has to conduct away static electricity, fulfil the stipulations of the ATEX-directive and may not be a source of ignition.

## ...CUSTOM-BUILT SOLUTIONS

**Show us your handling problem, and together we will find the right solution!**

### **A World of Options:**

- Adjustment of our standard products
- Product variations
- Creative solutions for different requirements and industries

**Flexibility is the key word!**

## Close cooperation with the customer

If the handling situation cannot be solved by one of our standard products, we will make you a custom-built solution based on our standard products.

Both CE marking and technical documentation are matters of course.

Also our custom-built solutions are designed, so that they ensure the user ergonomic and safe working conditions. The user will get the best and most safe handling experience!
