Vestil Manufacturing Corporation

is an industry leader in the manufacturing and distributing of industrial material handling equipment. We feature over 1,000 different product lines, many of which are in stock and ready for immediate shipment. We stand behind our products with people that listen to our customer's needs and find the best solution for their application. We deliver value to our customers by engineering new designs and products which increase productivity, improve workplace ergonomics, and decrease worker injury. Vestil presently has 415+ employees and over 1,000,000 square feet of warehouse and manufacturing space. We provide a broad product line to our customers in an efficient manner allowing for the best possible customer experience.

A LOOK AT THE PAST...

Vestil Manufacturing Corporation is a third-generation family-owned and operated manufacturer of industrial material handling equipment. We were founded in 1958 in Albion, Michigan when the owners of T & S Equipment started a new company with the intention of manufacturing truck and rail dock equipment. T & S Equipment started with 20 employees and 11,000 square feet of manufacturing space. The dock seal division of United Tractor was purchased in 1968 for the purpose of expanding the product assortment. During the 1970's, the company redefined its product strategy to include material handling equipment. A concerted effort was made to focus specifically on custom-made electric/hydraulic equipment.

In 1982, Vestil moved from Michigan into a new larger building in Angola, Indiana to allow for future growth opportunities. As the material handling market continued to grow and present new opportunities, Vestil built a new manufacturing facility in Angola in 1989. This addition addressed immediate space needs and laid the foundation for additional growth. 6 expansions followed from 1990-1997. A third plant was constructed in 1998 and an expansion in 2005. A fourth plant was purchased in 2010 to further warehouse and manufacturing within the same industrial park.

A LOOK AT THE PRESENT...

Vestil Manufacturing Corporation currently has four facilities totaling over 1,000,000 square feet of manufacturing and warehouse space. Today, Vestil employs over 415 people and continues to grow in number year after year. We have 15 full-time engineers focusing on mechanical, fluid power, electrical, and industrial disciplines. 17 sales people and 10 support staff members are dedicated to providing the best customer experience possible. We also take pride in being a leader and frontrunner in providing the best content and quality product data in the industry. A team of 12 employees are dedicated solely to providing the highest quality content in the industry. This includes a state-of-the-art photo/video studio, product specification validation, digital imaging, portal management, and photo/video management. Vestil offers the most diverse product line in the industry through continual product line improvement and new product development. We believe that new product development and being first-to-market is the lifeblood of our organization. We offer the entire spectrum of product from our in-stock 48-hour quick ship items to custom product manufacturing to fit your unique applications. Vestil products are manufactured using over 100 different pieces of equipment. That list of equipment includes 2 lasers, 2 CNC plasma tables, CNC lathe, 2 CNC mills, 3 CNC band saws, 4 press brakes, 4 shears, 106 steel and aluminum MIG welders, a state-of-the-art machine shop, over 80 welding stations, 2 robotic welders, and the largest fully-automated powder coat finishing system in the Midwest.

A LOOK AT THE FUTURE...

The future for Vestil Manufacturing Corporation is bright! 2017 was another record sales year for the 60 year old company. We are currently constructing a 255,000 square foot fulfillment center with a scheduled completion date of October 2018. This building will offer same-day shipping on many in-stock items. Vestil is making this investment in response to customer demand. We are optimistic that growth will continue for us in the future. Outstanding, dependable people and continued loyalty from our customers will lead the way.

Terms And Conditions Of Sale

1. **Orders and Acceptance.** All orders are subject to acceptance by Vestil Manufacturing Co. ("Seller"). Unless otherwise agreed to in writing by Seller and Buyer, all sales transactions are expressly limited to the terms and conditions set forth below. ALL TERMS AND CONDITIONS CONTAINED IN ANY PURCHASE ORDERS OF BUYER OR OTHER DOCUMENTS SUBMITTED BY BUYER ARE EXPRESSLY REJECTED AND SHALL NOT BE BINDING ON SELLER UNLESS AGREED TO IN WRITING BY AN OFFICER OF SELLER. BUYER'S ACCEPTANCE OF SHIPMENT AND/OR PAYMENT FOR THE EQUIPMENT CONSTITUTES ACCEPTANCE OF SELLER'S TERMS AND CONDITIONS. NO WAIVER OF THESE TERMS AND CONDITIONS OR ACCEPTANCE OF OTHER TERMS AND CONDITIONS SHALL BE CONSTRUED FROM SELLER'S FAILURE TO OBJECT TO THE SAME. ALL SALES ARE FINAL. EQUIPMENT CANNOT BE RETURNED WITHOUT SELLER'S PRIOR WRITTEN CONSENT.
2. **Quotations. Published Prices and Pricing.** All written quotations shall automatically expire on the expiration date listed on the quotation, but in no event later than sixty (60) days after issuance, and are subject to withdrawal by notice within that period. Seller, at its sole option, may extend the effective date of written quotations. Prices shown on published price lists and other literature issued by Seller do not represent unconditional offers to sell, and are subject to change without notice. Prices do not include costs or fees associated with installation or final on-site adjustments. Prices also do not include shipping charges. All prices are F.O.B. Seller's point of shipment, unless otherwise specifically set forth on the quotation or order acknowledgment. Prices stated are subject to change without notice. No discount will be allowed unless specifically set forth on the face side hereof. Until the purchase price and all other sums due are paid in full, Seller retains a security interest in the materials described on the face hereof (the "Equipment") and in all proceeds of said Equipment.
3. **Prepayment.** Seller may, at its sole discretion, require full or partial payment in advance. Upon Buyer's failure to submit full or partial payment upon request, Seller may cancel or delay any or all orders and adjust those prices in effect at the time of delayed shipment.
4. **Terms of Payment.** Payment terms are net thirty (30) days from the date of Seller's shipment, unless otherwise expressly stated on Seller's quote, order acknowledgement, or invoice. Amounts past due are subject to a service charge of 1.5% per month (or fraction thereof) or the maximum rate permitted by law. All payments are to be made in U.S. funds at par. Unless otherwise specifically agreed upon in writing, exported orders shall be accompanied by a confirmed irrevocable letter of credit for Seller's account with an accredited United States bank, subject to Seller's draft, with railroad shipping tickets attached, payable in U.S. funds at par. Buyer shall handle all export shipping arrangements through its own forwarding agent, unless specifically agreed otherwise. Orders and shipments are subject to the approval of the Seller's Credit Department. The Seller reserves the right to decline to make shipment whenever, for any reason, there is doubt as to Buyer's financial responsibility and Seller shall not in such event be liable for breach or nonperformance of this contract in whole or in part.
5. **Taxes.** Prices do not include federal, state, or local taxes, including sales, use, property, import/export, excise, VAT or similar tax payments. Seller shall bill as a separate invoice line item all such taxes and Buyer agrees to pay and/or reimburse Seller for any such applicable taxes.
6. **Substitutions.** Seller reserves the right to substitute the latest superseding design and manufactured equivalent Equipment, where interchangeability does not materially affect form, fit or function.
7. **Order Changes and Cancellation.**
 - (a) **Changes requested by Buyer** — Changes to orders are subject to Seller's approval and acceptance. Buyer shall reimburse Seller for all additional costs and expenses related to any such change. Orders will not be subject to cancellation by Buyer, either in whole or in part, without the written consent of Seller, and then only under terms that will reimburse Seller for all costs incurred by it, including, without limitation, preparation costs, costs of purchased materials, engineering costs, total factory costs of the items produced up to the date of acceptance of cancellation including direct labor and overhead, cancellation charges from Seller's subcontractors and sellers, any other expenses, and an amount equal to Seller's customary profit, less refund, if any, actually received by Seller on any purchased items which can be returned to vendors.
 - (b) **Changes by Seller** — Seller reserves the right to change or cancel any order: 1) Whenever Seller deems said change necessary to comply with laws, regulations, or other mandatory authority; or 2) events require reallocation of production and/or delivery resources. Seller additionally reserves the right to change materials and/or design of Equipment.
9. **Shipping.** Equipment shall be shipped F.O.B. Seller's point of shipment. Title to & risk of loss/damage to the Equipment passes to Buyer upon delivery to the carrier. Buyer shall make claims for losses or damage directly with carrier. Seller reserves the right to apply its discretion regarding the manner and routing of shipments. Seller shall not be responsible for insuring shipments unless specifically requested by Buyer. Any insurance so requested shall be provided at Buyer's expense. If Seller is obligated to pay freight on shipments, Seller may opt to add to the price of Equipment any increase in freight paid by Seller arising subsequent to acceptance of Buyer's order may.
- 9.1 **Packaging.** Prices stated are based on Seller's standard packaging. Seller reserves the right to package material in pallets, bulk or individual cartons. Packaging will be standard commercial package acceptable to commercial carrier. Special packaging will be used only when specified at Buyer's cost.
- 9.2 **Acceptance and Inspection.** Upon Buyer's receipt of shipment, Buyer shall immediately inspect the Equipment. Buyer must note damage/incompleteness of Equipment on the delivery receipt before signing for the Equipment. Unless Buyer provides written notice to Seller of any claim for incompleteness of or damage to the Equipment within 48 hours of receipt, such Equipment shall be deemed finally inspected, checked and accepted by Buyer.
10. **Delivery/Access.** All delivery/performance dates are approximate and shall not be deemed to represent fixed or guaranteed delivery dates. All such dates are contingent upon prompt receipt of all necessary information from Buyer regarding Equipment and/or Services ordered. Seller will use reasonable efforts to meet the indicated delivery/performance dates but shall not be held liable for any loss or damage caused by delay resulting from labor disputes, damage to facilities, failure of contractors, subcontractors, or suppliers to fulfill scheduled deliveries, or any other cause outside Seller's reasonable control or causes which make Seller's performance commercially impracticable.

In the event of delivery delay caused or requested by Buyer, Seller will store & handle all Equipment ordered at Buyer's risk and will invoice Buyer for the unpaid portion of the contract price plus storage, insurance & handling charges on or after the date on which the Equipment are ready for delivery. Buyer shall pay such bill within 30 days of the mailing date of the invoice.
11. **Security Interest & Repossession.** Until Seller is fully paid for Equipment shipped, Buyer will grant Seller a purchase money security interest in the Equipment. Equipment will remain personal property. Buyer shall execute & deliver to Seller security agreements & financing statements evidencing Seller's security interest. Buyer authorizes Seller to file financing statements relating to the Equipment without Buyer's signature as Seller deems appropriate. Buyer appoints Seller as Buyer's attorney-in-fact for the limited purposes of executing financing statements in Buyer's name & performing other acts Seller deems necessary to perfect its security interest & to preserve and protect the goods.
12. **Default.** Upon submitting this instrument to an attorney to collect past due payments or repossess the Equipment, Buyer shall reimburse Seller for attorney's fees, court costs, & other expenses incurred by Seller to enforce the terms & conditions stated herein.

13. Warranty.

(a) Limited Warranty Applied to Equipment. Seller warrants to Buyer that on the date of delivery to the carrier, the Equipment is free from defects in material and workmanship. Seller's product specific Limited Warranty applies to the Equipment for a period indicated in said Limited Warranty.

(b) Warranties of Other Sellers for Equipment Incorporated into Seller's Equipment. "Other Equipment" means equipment provided by third party sellers ("Other Sellers") that is part of the Equipment sold by Seller. The sole and exclusive warranty applied to Other Equipment is the express written warranty of Other Seller. Seller's sole responsibilities to Buyer for Other Sellers' Equipment are limited to assignment of such warranties to Buyer and assisting Buyer to enforce such warranties.

(c) Buyer's Exclusive Remedy. If the Equipment does not meet its warranty standard, Seller will apply the appropriate Limited Warranty (see part 13(a) above). Seller may, at its sole option, either: (1) repair or replace any defective Equipment; or (2) refund the amount received by Seller for defective Equipment, if, after the Equipment is returned to Seller, Seller determines repair or replacement is not feasible. The foregoing are contingent upon Seller receiving Buyer's written notice in accordance with the terms of the appropriate Limited Warranty and, at Seller's request, return of the defective Equipment (F.O.B. Seller's point of shipment) at Buyer's cost. The warranty set forth herein does not extend to any Equipment or Service (including Other Sellers' product and service) which has been misused, modified, repaired, improperly installed or otherwise abused.

(d) Disclaimer of Implied Warranties; Sole Remedy. EXCEPT AS PROVIDED IN THIS SECTION, SELLER MAKES NO OTHER WARRANTY, EITHER EXPRESS OR IMPLIED. ALL WARRANTIES OF MERCHANTABILITY & FITNESS FOR A PARTICULAR PURPOSE ARE HEREBY EXPRESSLY DISCLAIMED. THIS WARRANTY CONTAINS SELLER'S SOLE LIABILITY AND BUYER'S SOLE AND EXCLUSIVE REMEDIES AND IS EXPRESSLY IN LIEU OF ALL OTHER REMEDIES BASED IN LAW OR EQUITY.

14. Intellectual Property/Drawings and Confidentiality. (a) All specifications, drawings, designs, data, information, ideas, methods, patterns and/or inventions made, conceived, developed, or acquired by Seller incident to procuring and/or carrying out an order shall vest in and remain the property of Seller. (b) Should it be necessary during the performance of an order for Seller to supply technical information to Buyer, then Buyer agrees (i) that the disclosure of such information is in confidence; (ii) such information is the sole and exclusive property of Seller and is subject to return upon demand; and (iii) such information is not to be used by Buyer, its employees or agents, nor copied or disclosed to third parties without the express written consent of Seller, except that prohibitions against disclosure shall not apply to information which is or becomes publicly available or is or becomes available to Buyer from a third party through no fault of Buyer. Similar undertakings shall exist on the part of Seller for confidential information received by Seller from Buyer.

15. Compliance with Standards. Buyer is solely responsible for identifying and complying with laws, regulations, ordinances, national standards incorporated into law or regulation, and all other authority applied to the Equipment where it is used.

16. Limitation of Liability. SELLER SHALL NOT BE LIABLE FOR ANY LOSS, CLAIM, EXPENSE OR DAMAGE CAUSED BY, CONTRIBUTED TO, OR ARISING OUT OF THE ACTS OR OMISSIONS OF BUYER OR THIRD PARTIES, WHETHER NEGLIGENT OR OTHERWISE. IN NO EVENT SHALL SELLER'S LIABILITY FOR ANY CAUSE OF ACTION WHATSOEVER EXCEED THE COST OF THE EQUIPMENT GIVING RISE TO THE CLAIM, WHETHER BASED IN CONTRACT, WARRANTY, INDEMNITY OR TORT (INCLUDING NEGLIGENCE AND STRICT LIABILITY) OR OTHERWISE. IN NO EVENT SHALL EITHER PARTY BE LIABLE FOR ANY SPECIAL, INCIDENTAL, CONSEQUENTIAL OR OTHER SUCH INDIRECT DAMAGES (INCLUDING, WITHOUT LIMITATION, LOSS OF REVENUES, PROFITS OR OPPORTUNITIES), WHETHER ARISING OUT OF OR AS A RESULT OF BREACH OF CONTRACT, WARRANTY, TORT (INCLUDING NEGLIGENCE), STRICT LIABILITY OR OTHERWISE.

18. Force Majeure. Delivery dates are approximate and are subject to confirmation. Seller shall not be responsible for excusable delays, nor shall Buyer refuse to accept delivery because of any such delays. "Excusable delays" include, without limitation, delays resulting from accidents, acts of God, strikes, fire, floods, weather disturbances, acts of terrorism, governmental controls, inability to obtain materials from sellers, failure of materials correctly ordered by Seller to meet specifications, or other causes reasonably beyond Seller's control, including any delay attributable to the carrier or third party seller. If Buyer delays shipment, Buyer will accept title to the Equipment, the Equipment will be invoiced and payment in full nevertheless shall be due thirty (30) days after the date of such invoice and the Equipment shall be held at Buyer's risk and subject to reasonable storage charges. Any delays caused by Buyer will not extend the stated start-up or warranty period.

19. Waiver. No condoning, excusing or waiver by any party of any default, breach or nonobservance by any other party, at any time or times with respect to any covenants or conditions set forth herein shall operate as a waiver of that party's rights with respect to any continuing or subsequent default, breach or nonobservance, and no waiver shall be inferred from or implied by any failure to exercise any rights by the party having those rights.

20. Severability. Should any provision of these terms and conditions be declared invalid or unenforceable, the remaining provisions shall not be affected thereby, it being the intent of the parties that they would have executed the remaining portion without including any such part or portion which may for reason be declared invalid.

21. Governing Law. This Agreement shall be governed by and construed in accordance with the laws of the State of Indiana (excluding its conflict of laws provisions), including the provisions of the UCC in the State of Indiana. Any proceeding pertaining to any such claim shall be venued in Angola, Indiana.

22. Entire Agreement/Amendment. Seller and Buyer agree that the terms and conditions set forth herein constitute their complete and exclusive agreement regarding the subject matter of Buyer's order and supersede any prior communications, representations or agreements of the parties, whether oral or written and cannot be altered, amended, or modified except in writing executed by an authorized representative of each party.

23. Assignability. Neither party may sell, assign, or transfer its rights, duties, or obligations under this Agreement without the prior written consent of the other; provided, however, that Seller reserves the right to (a) assign its rights, duties and obligations to any party purchasing substantially all of Seller's assets and (b) subcontract the manufacture of Equipment. To the extent that assignment is permitted, this Agreement shall inure to the benefit of and be binding upon each party and its permitted successors and assigns.

24. Headings. Captions or headings are inserted only for convenience and shall not be construed as part of the foregoing terms and conditions or as a limitation upon the scope of the particular section to which they refer.

25. Buyer's Default. If Buyer defaults in any payment of performance hereunder or becomes subject to any insolvency, receivership or bankruptcy proceeding or makes an assignment for the benefit of creditors or, without Seller's consent, voluntarily or involuntarily sells, transfers, leases or permits any lien or attachment on the Equipment and/or parts delivered hereunder, Seller may terminate the order with Buyer and treat all amounts then or thereafter that Buyer owes hereunder to be immediately due and payable (subject only to credits required by law) or Seller, at its option, without prejudice to any other lawful remedies, may defer delivery or cancel any order then outstanding or repossess said equipment and/or parts by any means available by law. Seller shall be entitled to receive reimbursement for its reasonable and proper cancellation charges, plus, in any proceeding or action relating to a default by Buyer, Seller shall be reimbursed by Buyer for Seller's attorney's fees and cost incurred by Seller in respect thereof.

26. Assignability: No assignment of this order by Buyer without the consent of Seller in writing shall be binding. Seller reserves the right to (a) assign its rights, duties and obligations to any party purchasing substantially all of Seller's assets and (b) subcontract the manufacture of Equipment. To the extent that assignment is permitted, this Agreement shall inure to the benefit of and be binding upon each party and its permitted successors and assigns.

27. Errors. Any clerical errors are subject to correction.

DISCLAIMER

Vestil Manufacturing Corporation reserves the right to make changes in design or specifications consistent with product improvement without notification. Vestil Manufacturing Corporation strongly believes in continual product improvements to maintain a competitive advantage and bring the best value to our customers. Every effort has been made to ensure accuracy of products and specifications contained in print and on the website. Although the information represented here is presented in good faith to be correct, all measurements were taken by hand and are approximate; slight variations occur and tolerances may vary. If dimensions are critical, please contact factory for accurate tolerance.

RETURNED GOODS POLICY

- Authorization must be obtained from the factory prior to returning any merchandise.
- Authorization must be in writing (Returned Goods Authorization).
- Only standard items are considered for return.
- If your product arrives damaged, please contact the carrier that delivered your shipment within 24 hours of receipt to report damage. Please contact the carrier before contacting Vestil.
- Standard items are subject to a 20% restock fee for the term of original RGA (30 days past shipment date).
- Items will not be accepted for return after 30 days past shipment date.
- Product restock fees and return consideration are variable and are determined based on resale potential, frequency of purchase, and condition.
- Merchandise must be returned to the factory within 30 days from the date of issue of the Returned Goods Authorization or will be void thereafter.
- No special products or products that were subject to an approval drawing are eligible for return unless sent to the customer as the result of an error at the factory.
- All returns must be sent back using the specified carrier when Vestil is responsible for the return freight. If the stated carrier is not used, the return will be accepted at the customer's expense.
- All returns must have the Returned Goods Authorization paperwork prominently displayed on the largest package. Mark the Returned Goods Authorization Number on all other packages.
- The issuance of an RGA shall not be construed as an acceptance of any responsibility or liability on the part of Vestil or as a waiver of any right to make a determination as to Vestil's responsibility.
- All claims for loss, damage, or delays in transit are to be transacted by the consignee directly with the carrier.
- Claims for shortages, corrections, or deductions must be made within Five (5) days after receipt of material.
- Returned merchandise must be in resalable condition and in the original factory packaging.
- Credit will not be issued for any portion of the merchandise that is not considered resalable.
- Vestil reserves the right to inspect all returned merchandise and issue final determination as to its condition.
- Vestil reserves the right to refuse credit for returned product damaged as a result of improper customer packaging.
- Items returned to a Vestil location other than the site specified on the RGA paperwork will be assessed a \$50 re-routing fee.
- It is Vestil's discretion whether to replace, repair, or issue a credit for non-conforming products.
- Warranty verification will be determined by a technical validation of the product once the "non-conforming" item is received by our factory.
- Material shipped to Vestil without authorization and an RGA number will be accepted at the customer's expense.
- Only those materials listed on the RGA will be accepted for conditional return.

PROP 65 WARNINGS

California's "Safe Drinking Water and Toxic Enforcement Act of 1986" also known as "Proposition 65" requires businesses to provide a clear and reasonable warning before knowingly and intentionally exposing California consumers to one or more chemicals known to the state of California to cause cancer and birth defects or other reproductive harm. Just because a product bears a Proposition 65 warning does not mean that the product itself is unsafe. Proposition 65 is a "right to know" law rather than a product safety law. The intent of the law is simply to inform Californians before they possibly are exposed to chemicals that cause cancer or reproductive harm. We hope the following information helps you make well-informed buying decisions.

Premium Truck Scissor Dock Lifts

Save time and reduce man-hours where there are no docks with a Truck Scissor Dock Lift. Engineered and designed for maximum safety and efficiency. The diamond plate deck is made of heavy gauge steel for years of use. Hydraulic cylinders feature safety velocity fuse if line breaks. It comes complete with upper travel limit switch and overload relief valve. The push button control is on a 20 foot long coil cord. Pre-wired control box includes magnetic starter with overload relay. High visibility safety yellow removable handrails with fixed toe boards are standard. Includes beveled toe-guards and electric toe-guards around perimeter of platform. Standard external 6.5 HP 460V, 3-phase, 60 Hz motor can be located up to 8 feet away from lift (weighs 300 lb.)

Premium Truck Scissor Dock Lift Options

SPLIT ALUMINUM TRUCK BRIDGE: Ideal for government applications. 72"W x 18"L. For 5K & 6K units. (110 lb. additional bridge)
Replacement of standard steel bridge. **Model WL-SATB**
Additional split aluminum bridge. **Model WL-ADDSATB**

SPLIT STEEL BRIDGE (additional): Split Steel Bridge that can be added to the opposite side of the Truck Scissor Dock Lift. 72" wide x 18" long. (180 lb. additional bridge) **Model WL-SSTB**

REMOVABLE HANDRAILS/TOEBOARDS: Used on a Truck Scissor Dock Lift that is mounted in a pit. This allows the platform to be flush with the floor for fork truck cross traffic. Please deduct 7½ (in.) from overall width for usable width. **Model WL-RHT**

ADDITIONAL HYDRAULIC LINE: Allows you to locate power unit further away from the lift. 8 foot of hose is standard.

Model WL-HH-(LENGTH) PER FOOT

APPROACH RAMP FOR 8" LOWERED HEIGHT: 48" wide x 65" long. 7° ramp angle. 386 lb. **Model WL-AR8-48**

APPROACH RAMP FOR 8" LOWERED HEIGHT: 60" wide x 65" long. 7° ramp angle. 397 lb. **Model WL-AR8**

APPROACH RAMP FOR 10" LOWERED HEIGHT: 60" wide x 82" long. 7° ramp angle. 517 lb. **Model WL-AR10**

APPROACH RAMP FOR 14" LOWERED HEIGHT: 60" wide x 116" long. 7° ramp angle. 788 lb. **Model WL-AR14**

COLD GALVANIZED COATING

Premium Truck Scissor Dock Lift Options

WARNING BEEPER: Sounds during the lifting and lowering operations. 80 decibels. **Model WL-WBO**

WARNING STROBE LIGHT: Light flashes during the lifting and lowering operations. **Model WL-WLO**

WARNING BEEPER & STROBE: Sounds and flashes during the lifting and lowering operations. 80 decibels. **Model WL-WB**

50,000 lb. ROLLOVER CAPACITY (25,000 lb. per axle): Adds additional structural channel supports for the deck. Increases lowered height 2". **Model WL-50**

MOBILE WHEEL KIT: Kit may be used on the 5,000 and 6,000 lb. capacity units only. System includes casters and handle. (400 lb.) **Model WL-WK**

SPECIAL RESERVOIR MOUNTING: Available in a wall mount or a handrail mount (non-removable). **Model WL-RMB**

STOP SIGNAL SIGN: Optional Stop Sign Signal that raises up to let the driver know when to stop for safe loading/unloading. This is only available on surface mount units with fixed toe boards. **Model WL-SSS** (reduces usable width by 3")

KEY SWITCH LOCKOUT: Avoids unauthorized use of the lift. This option will lock out the controls at the power unit. **Model WL-KL**

TWO SPEED PUMP: Increase lifting speed by 55% when lift is unloaded. Ideal for unloading applications. **Model WL-TSP**

VOLTAGE CHANGE: Change the power from standard 460V, 3-phase to 208/230V, 3-phase. **Model VCC-208/230-3**

3 HP SINGLE PHASE ELECTRIC MOTOR: Replace standard 3-phase power unit with 208/230V, 1-phase, 60Hz power unit (approx.: 1½ gallons per minute pump speed). **Model WL-3HP**

7-1/2 HP POWER UNIT: Power unit is wired for 3-phase. 208-230/460V, 60Hz, unit will pump approximately 6 gallons per minute. **Model WL-7HP**

10 HP POWER UNIT: Power unit is wired for 3-phase, 208-230/460V, 60Hz, unit will pump approx. 8 gallons/min. **Model WL-10HP**

SAFETY ACCORDION SKIRT: Keep people and debris from getting under the lift. Contact factory.

COLD GALVANIZED LIQUID COATING: For application usage visit www.zrcworldwide.com. **Model SPO-WL-LS-ZRC**

STEEL-IT™ COATING: Visit www.steel-it.com for application usage. **Model SPO-WL-LS-SSC**

IMMERSION OIL HEATER: For cold weather applications with a built in metal reservoir & thermostat for automatic heat control. 208-230V, single or 3-phase power, 250 watts. This option can only be used in steel tanks. **Model IOH-230V**

Use with 460V, 3-phase power unit, 500 watts. **Model IOH-460V**

Truck Actuated Dock Levelers

- 55,000 psi high strength checker plate deck
- 12" long lip (extends 6½" into truck)
- Toeguards on each side
- Service range of 12" above through 8" below dock
- (2) Molded Bumpers; 5"W x 16"H x 2"D
- Lift By-Pass for Safety

This is a fully automatic loading ramp where there is no dock attendant needed. It consists of a lift by-pass for safety and toe guards on each side. As the truck backs against the twin actuating arms (bumpers) it pushes the carriage back. As the carriage goes back the deck goes up. When the carriage bumpers contact the dock, the deck floats down to rest on the trailer. When the truck pulls out, the deck returns to level supported position automatically.

EASY OPERATION

Mechanical Dock Levelers

Mechanical Dock Levelers are constructed of heavy duty diamond plate deck (55,000 PSI) steel for long term support of the steel channel understructure. The dock leveler allows for easy truck loading and unloading. The leveler is engineered and designed for minimum maintenance and features a smooth pull chain operation. Lip is 16" long. Service range 12" above and below dock. Includes two (2) 1014-4.5 laminated bumpers. Other capacities available, contact factory.

CONTACT FACTORY FOR CUSTOM-BUILT APPLICATIONS

Electric Hydraulic Dock Levelers 460V 3-PHASE STD

Electric Hydraulic Dock Levelers are ideal for high usage dock areas. The hydraulic design consists of a simple push of the button operation. The operator pushes and holds the "raise" button, which activates the hydraulic pump and raises the deck. When the deck reaches the raised position the lip automatically extends. The operator releases the "raise" button and the deck descends to rest on the trailer. The control box includes a red emergency stop button standard. When the truck pulls away, the deck descends to full down position, trips the limit switch, and returns automatically to the level cross traffic position. Includes telescopic steel toe guards on both sides, flush with platform edge, service range of +/- 12", and two (2) 1014-4.5 laminated bumpers. Uniform capacities available up to 80,000 pounds, contact factory.

STATE-OF-THE-ART HYDRAULIC DESIGN

DOCK LEVELER SURVEY SHEET CAN BE FOUND ON PAGE 48

Edge-O-Dock Levelers

Edge-O-Dock Levelers permanently attach to the face of dock. It is recommended for docks to be at least forty-eight (48) inches high. When the trailer departs, the lip drops automatically behind the face of the bumpers. Concrete recess is not required. It comes complete with two (2) 2" x 8" x 18" bumpers and installation instructions. Standard ramping is twenty-seven (27) inches, with a thirty-six (36) inch long ramping length available for smaller grade. A steel dock edge or approach ramp is required for proper installation.

The **Mechanical Edge-O-Dock** is operated by placing the actuation handle into the pocket of the inner lip and pulling down toward the floor. The operator then pushes the handle forward until the lip rests on the truck bed. As the trailer departs, the lip retracts behind the bumper face automatically.

The **Hydraulic Hand Pump** system is used to lift the leveler and extend the lip. The operator rotates the relief valve allowing the deck to descend down and rest upon the trailer. Unit comes complete with hand pump, wall-mount brackets, cylinder, 15 feet of hydraulic line and oil. Truck must pull out for leveler to return to stored position.

The **Electric Hydraulic Edge-O-Dock** is the easiest to operate. After the truck is backed against the dock, push and hold the control button. The leveler raises and the lip will extend. 115V, 1-phase power standard. Unit comes complete with motor, pump, control box, cylinder, lines, and oil. Truck must pull out for leveler to return to stored position.

Trailer Lock Systems 115V 1-PHASE

The Trailer Lock Systems are designed for installation directly in front of the loading dock. The electric hydraulic system captures the ICC bar on the back of semi-trailers. To ensure maximum safety the unit comes standard with an accumulator that allows the lock to follow the trailer up and down as it is loaded/unloaded. A beeper and flashing light warns the operator if the lock does not engage the trailer properly. A visual indication of the restraints status is shown at all times by the traffic light outside and the control panel inside. It comes standard with light package, control panel, and three (3) large visual signs. Draw pull shear strength is 22,500 pounds per foot.

Dock Traffic Systems

Our Dock Traffic Systems feature flashing red and green lights. Prevent accidents and injuries by providing clear communication between dock personnel and truck drivers. Built-in eyebrow type sun visors increase light visibility.

Deluxe, model DTS-10, consists of one (1) yellow aluminum traffic light with both a green and red lens (for outside), and an illuminated push-button control (for inside). Light measures 14"W x 21¾"H and features an 8" hood over each lens (recommended for west and south exposure). 60 Watt. 115V AC. Four (4) procedure signs are included. Features incandescent lights.

Economy, model DTS-5, comes with two (2) yellow polypropylene traffic lights, 6½"W x 11½"H, each having a green and a red lens. The light containing a toggle switch is placed inside the dock area for the dock attendant and the other is placed outside for the truck driver. Four (4) signs are included. LED model never needs bulb replacements.

Weather Stripping (for pit mounted dock levelers)

The dock leveler Weather Stripping keeps out pests and rodents and maintains the proper working environment. The kit includes: two (2) precut side strips, one (1) precut foam insulator for the rear of the pit, and installation hardware.

The Dual Vinyl has a white dual-seal that attaches to the side of dock levelers with self-tapping sheet metal screws. The replacement vinyl slides into extruded channel that is attached with self-tapping screws. The easy to install Brushes bolt on to the aluminum extrusion sides of the leveler. Then simply slide brushes into aluminum extrusion channel.

Dock Leveler Insulation Blanket

The Dock Leveler Insulation Blanket helps improve heating efficiency while using less energy. Prevents cold air from entering your warehouse from cracks that surround the dock door and leveler. The blanket includes aluminum extrusion, anchors, and hangers that fit most standard doors. The hangers allow for a secure raised blanket position. The blanket will pay for itself many times over by controlling heat loss.

Dock Barricades - Designed to Prevent Loading Dock "Run Off's" 115V 1-PHASE STANDARD

Dock Barricades represent the next generation of innovative loading dock safety systems. The electric/hydraulic power unit provides quick and effortless operation. It can stop a four thousand (4,000) pound loaded truck at four (4) miles per hour. It is electronically operated and consists of an electrical bumper-style safety stop circuit to sense obstructions when lowering. Installation is simple: anchor the unit to the floor, mount the control on the wall, and plug in. Mechanical unit, model DJG-100MW, features a manual hand crank winch to raise/lower barricade arm. All units include a lock bar on the arm post to restrict rotation of the barricade arm. Padlock is NOT included.

*ELECTRIC HYDRAULIC POWERED UNITS

Safety Lift Gates

Simply lift and the self folding action folds the gate in a vertical position. With the assistance of the air assist cylinder, the gate can be lifted with the slightest effort. The Lift Gate is manufactured of steel tubing with yellow baked-in powder-coated toughness. Unit can be either wall or floor mounted. Ideal on loading dock doors to help reduce the possibility of people falling.

SLG-10	10'	4" x 4"	42 ⁵ / ₈ "	159"	33

Economical Safety Swing Gates

An economical way to protect people from dock falls. Durable railings are constructed from schedule 10 pipe (1⁵/₈" O.D.). Units have a top rail height of 46¹/₄" and a 25" mid-rail. 4" poly-on-poly wheel allows units to be swung out of the way. Foot release lock keeps the railing from being moved when in use. Cast single socket is included. Yellow baked-in powder-coated toughness.

MODEL NUMBER	MATERIAL	OPENING WIDTH	HEIGHT	WEIGHT (POUND)
SSG-9	STEEL	108"	46 ¹ / ₄ "	105
SSG-11	STEEL	132"	46 ¹ / ₄ "	138

Dock Chain Bollard Barrier Systems

Dock Chain Bollard Barriers create a safe environment for both personnel and products. The steel constructed double chain design adds extra security for doors up to 10'. Unit is designed with a safety yellow baked-in powder-coated toughness for clear visibility and a bolt-on chain hook-up enabling a quick installation or removal. Chains are mounted at 21" and 41" high on the bollard and the chain can be cut to size upon request. Series DCBB-42 includes two (2) bollards, two (2) 127" long chains and one (1) DCBB-B-KIT. Concrete anchor hardware available separately.

Model DCBB-B-KIT is for use with existing bollards. Kit includes four (4) mounting brackets, four (4) quick links for chain, one (1) chain post handle, and hardware.

Swivel Dock Gates

Swivel Dock Gates are ideal for securing loading docks, parking lots, or pathways. The gate features steel construction for durability and a yellow powder coat finish for clear visibility. An attachable swing stop is added to the base of each bollard to reduce the swing length of gate arm, and to change the direction of gate swing. A chain slot is also attached to the end of each gate arm for the option of added security. All models come in pairs. Units have pre-drilled mounting holes for easy installation.

Clearance Bars

Clearance Bars are low maintenance, highly visible, and simple to read. These easy to install clearance bars are made of ¼" nominal wall low density polyethylene. Comes with eye hooks attached, chain not included. Standard lettering is "CLEARANCE" and specified height. Other colors and specified lettering available, contact factory.

Overhead Door Warning Barriers

Protect overhead doors from fork truck damage. Heavy-duty PVC construction is light-weight and will not rust. Highly visible black and yellow safety stripes and two American flags serve as a visual warning. Includes two (2) 15' long chains with quick connects to hang barrier from ceiling or existing overhead door track.

Model ODG-133-BL features built-in warning sirens and flashing lights that activate when the barrier is bumped or contacted. Provides an audible and visual warning before damage to overhead door is caused. 76 DB at 9 feet. Requires (4) 9V lithium batteries, not included.

Light Duty Swinging Traffic Doors

These Light Duty Traffic Doors are assembled with rotationally molded cross-linked polyethylene. This extremely durable construction is capable of withstanding the wear and tear associated with high volume traffic areas. These doors are known for their long term value in supermarkets, retail establishments, and food service operations as they provide a visual separation, sound barrier, and thermal separation. The door is designed to comply with all USDA sanitation requirements and is NSF approved. The corrosion resistant panel is ideal for wash down applications as it has no gaps or joint seams. The total width of the light duty traffic doors are 1½" thick.

MODEL NUMBER	DESCRIPTION	SIZE (W x H)	WEIGHT (POUND)
LDSW-37	SINGLE DOOR PANEL	3' x 7'	200

LDSW-68	DOUBLE PANEL DOOR	6' x 8'	360
LDSW-88	DOUBLE PANEL DOOR	8' x 8'	400

Heavy Duty Swinging Traffic Doors

These multi-purpose lightweight doors are tough enough to take the abuse of personnel, stock carts, and motorized pallet jacks. The door panels are constructed with 1/8" thick rotationally molded cross-linked polyethylene outer shell and foamed-in-place Non-CFC urethane foam core. The panels are corrosion resistant, making it ideal for washdown applications as it has no gaps or joint seams. The door comes standard with 24" black bumpers on both sides of the door. Double acting V-cam hinging system operates smoothly and is virtually maintenance free with its permanently lubricated needle bearing roller assembly. There is a 1/8" thick polycarbonate window with black aluminum frame recessed a minimum of 1/8" from the face of the panel to protect the window's surface from abrasion caused by passing loads.

MODEL NUMBER	DESCRIPTION	SIZE (W x H)	WEIGHT (POUND)

HDSW-88	DOUBLE PANEL DOOR	8' x 8'	400

Economical Overhead Door Warning Barriers

Protect overhead doors from fork trucks and other traffic coming and going throughout each day. Intended for use as a warning system - not a fork truck stop. Constructed with tubular steel uprights and a 4" x 4" wooden beam across the top of the guard. The wooden beam can be easily and inexpensively replaced when damaged. Guard will not interfere with overhead door. Complete unit is painted high visibility OSHA safety yellow. Concrete installation kit available.

Dock Seals

The superior 36 oz. nylon reinforced vinyl facing has a higher tear strength than equivalent weight hypalon. The chemically sealed ends prevent moisture infiltration. It is mounted on and bonded to durable wolmanized wood and contains a full height air escape tunnel. The unit consists of a three (3) piece construction (12" high header - sides beveled with 9½" width at the wall and 12" width at the face) and a through the wall installation kit that is included. 5" maximum compression is recommended. Application with a flush dock to building in conjunction with an Edge-O-Dock, use a twenty (20) inch projection Dock Seal. Units are non-returnable.

Dock Seal/Shelter Combinations

Dock Seal/Shelter Combinations are used with a 96"W x 120"H door. The top header is constructed of wolmanized lumber and is built with a slope to allow for water run-off. Header measures 114"W with a 30"L drop curtain. Side (verticals) measure 120" tall and contain high density foam mounted to treated lumber. The verticals are mounted on wooden boards (the face of the vertical measures 12"W and tapers to 9½" at wall) allowing wall mounting down the length of the vertical pieces. Application with flush dock to building in conjunction with an Edge-O-Dock, use a 20" projection Dock Seal. Units are non-returnable.

Dock Shelters

The Dock Shelters are used with doors up to 10'W x 10'H. The dock shelter reduces oversized doors to match truck openings. The long wear fabric is highly resistant to abrasion and tearing. Fiberglass staves are sewn into the flaps. Seal is formed along the sides and top of trailer when the vertical and top panels are pushed inward by the trailer. Recommend minimum 10" trailer penetration for a good seal. Supporting structure is made of 2" x 4" wolmanized lumber. The top header piece measures 132"W and contains a drop curtain which measures 36"H. Two vertical pieces measure 126" tall with vertical flaps measuring 21"W. When installed, the shelter will close the door opening down to 90"W x 90"H (between flaps). Includes two (2) yellow steel guide protectors and foam-filled corner pads for extra sealing action. Units are non-returnable.

DOCK SEAL & SHELTER SURVEY SHEET IS ON PAGE 48

Retractable Dock Shelter

The Retractable Dock Shelter fits up to a 120"W x 120"H door. Independent spring loaded scissor mechanism allows shelter to retract with the trailer keeping the shelter square. The design also eliminates the need for rigid steel guide protectors. The reinforced 40 oz. black vinyl-coated nylon flaps close the opening down to 90"W x 90"H. The 36" header curtain has armor pleats for extended wear. Shelter is black with aluminum edge trim. Optional Draft Pads, model D-520-24-DP, help prevent air from coming up underneath the dock flaps. Units are non-returnable.

LED Loading Dock Guides
series DGL-LED-Y

LED Loading Dock Guide Light Sets

LED Loading Dock Guide Light Set, series DGL-LED-Y, provides drivers with visual target to align a truck trailer with the dock door. The LED guide light is especially useful in low-light environments like enclosed dock bays, but it's bright enough to improve visibility of the dock opening in daylight. The light may also be installed indoors to mark door openings for forklift operators and other warehouse personnel. It's a versatile safety product, at a low price!

Dock Bug Screen Doors 115V 1-PHASE STANDARD

Improve employee comfort, while increasing productivity. It is used at loading docks, garages, and food processing facilities. Keeps birds, flies, moths, mosquitoes, wasps, and other insects out while providing fresh air ventilation, sunlight, and increased security. It is constructed of durable, all weather vinyl coated polyester that is fire retardant as well as mildew and UV resistant. Easy to install. Operation involves a simple manual roller and track system that allows the screen to slide smoothly from side to side, or easy roll up and down. Standard color is blue with yellow pockets.

Dock Bug Wire Mesh Doors 115V 1-PHASE STANDARD

Stop trespassing, and at the same time, let in natural sunlight and fresh air with the Wire Mesh Dock Door. Doors are made with a 15 gauge aluminum with a 1/2" coil wire mesh, and heavy duty extruded aluminum "C" channel guide track, which is 1.25" wide x 4" deep. Safety yellow and black strips are standard on the interior edge of the panel. Horizontal stiffeners are constructed with 3/4" fiberglass wind load rods and are inserted into specially constructed coils for horizontal stability, visibility, and increased safety.

Vinyl Strip Doors

Vinyl Strip Doors help control noise, dust, fumes, and smoke while minimizing drafts, illnesses, and accidents. The strip doors offer visual clarity without sacrificing safety and the fire resistant material is self-extinguishing. The material design also deters UV rays during direct sunlight when applied to loading docks and external doorways. The simple low cost design is easy to maintain, while reducing heating and cooling costs. Standard material meets USDA requirements and is great for refrigeration applications up to -10 degrees Fahrenheit. All doors are shipped pre-assembled and ready for installation. Installation hardware not included. Custom door sizes and material available, contact factory.

The low temperature strips (see bottom of page) are made of a softer PVC compound, which remains pliable in temperatures as low as -40 degrees Fahrenheit.

- Ribbed Material (8" & 12")
- Low Temperature Material (-40°F) (4", 6", 8", 12" & 16")
- Bronze Weld Screen Material (8" & 12")
- Orange Opaque Material (6", 8", 12" & 16")

STANDARD MATERIAL WORKS IN CONDITIONS -10° TO 140°F

Steel Yard Ramps

Quickly load and unload trucks, trailers, and rail cars from ground level when no freight dock exists. Increase productivity while reducing material handling costs. Great for construction sites. A manual two-speed hand crank for easy one person height adjustment offers a service range of 45" to 62". Available in 30 foot of straight ramp or 36 foot overall length; 30 foot of straight ramp and 6 foot level off. Standard features include: 8 5/8" steel wheels, positive traction open steel grating, safety locking chains, 4" high steel safety curbs, rubber bumpers, 14" usable overlap lip, tow bar pocket, and welded steel construction. Painted neutral earth-tone brown. All units must ship flatbed truck.

MANUAL HAND CRANK AND 8-5/8" STEEL WHEELS

SAFETY LOCKING CHAINS WITH 14" USABLE OVERLAP LIP

TOW BAR POCKET INCLUDED

Mechanical Edge-Of-Dock Leveler. Ramp height is fixed at 50". Leveler offers service range of +/- 5".

YARD RAMP OPTIONS CAN BE FOUND ON PAGE 22

Stationary ramps, series YRDS, include an Edge-Of-Dock Leveler at the truck end. Ramp height is fixed at 50". Leveler offers service range of +/- 5".

Aluminum Yard Ramps

Portable Aluminum Yard Ramps have a unique design that allows one person to position the ramp, adjust its service height, and load or unload trailers from ground level. Available with steel or rust resistant aluminum grating. Standard features: hand pump hydraulic lift, safety pressure relief valve, 18" x 5" mold-on-rubber tires, 4" high curbs, service range of 45" to 62", anchor chains, and tow bar pocket. Yard Ramps ship flatbed truck.

Steel Railroad Dockboards

- Auto Drop Locks (add 13" to overall width)
- Steel Rectangular Board
- Safety Curbs are 4" High
- Structural Steel Support Beams
- Pop-up Fork Lift Loops
- Overlap Style Plate (both ends)
- Tread plate for Better Traction

Steel Railroad Dockboards have a rectangular-style with a deck that is made of high-strength raised diamond steel treadplate with structural steel support beams for high strength cross traffic. Treadplate provides increased traction; overlap-style lip on both dock and rail car ends gives maximum versatility. Fork truck pop-up loops are built into deck - automatically pop-up when board is set on floor. Automatic drop-locks on both sides of board are designed to keep the board in place between dock and rail car. Non-returnable. *Contact factory for pricing.*

Aluminum Hand Truck Dockplates

Aluminum Hand Truck Dockplates are designed for use with two (2) wheel hand trucks. It is a convenient, safe, and easy way to access loading docks from trucks. This dockplate is lightweight and easily transported by just one person. The tread plate surface ensures skid-resistant safe traction and the locking legs secure the plate for safe loading and unloading. Complete with bolt-on zinc plated carrying handles and locking legs. The bend is 11° and located 9" from edge.

Aluminum Economizer Dockplates

Aluminum Economizer Dockplates are an economical way to speed up truck loading and unloading. Spans the opening between the dock and trailer to allow pallet or hand trucks, along with pedestrian traffic to safely move in and out of the trailer. The dockplate is constructed of high strength, non-skid aluminum alloy tread plate. The lightweight design with bolt-on zinc plated legs and handles on each side makes portability easy. Locking legs for OSHA compliance. The bend or crown is 11° and located 9" from edge of dockplate. Not for use with fork trucks.

Aluminum Truck Dockboards (Welded Aluminum Curbs)

Aluminum Truck Dockboards are engineered and built to maximize safety while handling heavy fork trucks and loads. The beveled edge is designed for smooth entry and exit. Locking legs prevent movement during loading and unloading operations. Locking legs are uneven to allow the dockboard to sit canted, while not in use, for easier pickup by fork trucks. Welded aluminum safety curbs prevent accidental runoffs and provide a visible driving lane. When using three-wheeled fork trucks order dockboard with capacity at least four-times the lifting capacity of fork truck. The width of the dockboard should be at least 15 (in.) wider than the load or equipment passing between the curbs. Bend is 11° and 9" from the edge and the legs are 12" from the edge. Manufactured in compliance with OSHA.

CAPACITY is based upon the heaviest type of equipment used plus the maximum load carried times the single axle rating of total load. Dynamic loading, driver tendencies, speed, and frequency of use must be considered. Steel (TS-series) dockboards recommended for high use docks.

EQUIPMENT	SINGLE AXLE RATING OF TOTAL LOAD
TWO-WHEEL HAND TRUCKS	100%
FOUR-WHEEL PLATFORM TRUCK - (NON-TILT)	50%
PALLET TRUCKS - HAND	75%
PALLET TRUCKS - ELECTRIC	66%

Aluminum Truck Dockboards with Steel Safety Curbs

Aluminum Truck Dockboards with Steel Safety Curbs are designed for portability and safety. The deck is made of tough high strength aluminum diamond tread plate. The edges are beveled for smooth entry and exit. Safety curbs are yellow baked-in powder coated for toughness and are constructed of steel with cast tapered ends. Steel legs are bolted on for increased durability. Legs are located 11" from the beveled edge. The legs are canted for easier fork truck portability. The bend is 11° and 9" from the beveled edge. Manufactured in compliance with OSHA. When using three-wheeled fork trucks order dockboard with capacity at least four-times the lifting capacity of fork truck.

Aluminum Hand Truck Dockboards

The Aluminum Hand Truck Dockboards are lightweight and can be carried and positioned by one person. Provides a safe and convenient bridge between dock and truck. Welded aluminum diamond tread plate surface and beveled edges provide safe and smooth entry and exit. The 12° bend is located 6" from edge and is designed to keep ramp edges flush with the dock surface and the truck floor. The unit is equipped with bolt-on locking legs and full length aluminum curbs that provide hand holds and reduce chance of roll off. 800 lb. uniform capacity. Designed for use with two-wheeled hand trucks. 3/16" plate thickness. Manufactured in compliance with OSHA.

Steel Truck Dockboards

Steel Truck Dockboards are constructed of high strength (55,000 psi) steel for long life. Beveled edges on both ends permit smooth entry and exit. Deck is diamond plated for safe, efficient use. Welded safety curbs for maximum strength. Locking legs minimize ramp movement and are uneven to allow the dockboard to sit canted for easier floor pickup by fork trucks when not in use. Legs are located 12" from the edge of the dockboard. The bend is 11° and 9" from beveled edge. Standard with Lever Lift for quick portability with fork truck. Manufactured in compliance with OSHA. Optional accessories: lifting chains, span locks, span pins/holes, and removable pickup loops.

Steel Truck Dockplates

Steel Truck Dockplates are constructed of high strength (55,000 psi) steel. Safety locking legs prevent slippage between truck and dock. Safety tread plate helps provide positive traction. Beveled edges for smooth entry and exit. Chain pickup comes standard. Designed with an 11° bend located 9" from the beveled edge. The legs are 10" from the beveled edge. Manufactured in compliance with OSHA. When using three-wheeled pallet trucks, select capacity +20% due to concentrated load center of board.

Aluminum Wheel Risers

Elevate semi-trailers to loading docks for maximum serviceability during loading and unloading operations. Manufactured from heavy-duty aluminum tread plate for positive traction. All welded aluminum construction. 30,000 lb. uniform capacity per pair (sold each). Wheel Risers are designed to raise the trailer for loading and unloading to facilitate compliance with OSHA/ANSI B56.1 part 3 sec 7 requirements for maximum grade of ascending or descending loaded fork trucks.

PORTABILITY KIT, model ATWR-WL, allows one person to transport and place wheel riser. Features 5" x 2" mold-on-rubber wheels. For use with aluminum wheel risers only.

FORK POCKETS ARE STANDARD ON STEEL WHEEL RISERS FOR EASY TRANSPORTATION

ADD A WHEEL TO A SINGLE ALUMINUM WHEEL RISER FOR PORTABILITY. MODEL ATWR-WL

OPTIONAL WELDED FORK POCKETS, 7 1/2"W x 2 1/2"H, MODEL ATWR-FP

*PORTABLE WHEEL RISER CADDY, MODEL R-CAD-18, for 18" wide units, (1) Caddy, (1) pair of brackets

*PORTABLE WHEEL RISER CADDY, MODEL R-CAD-24, for 24" wide units, (1) Caddy, (1) pair of brackets

*ONE PAIR OF BOLT-ON BRACKETS AND HARDWARE, MODEL R-CAD-KIT

ANCHOR BRACKETS (4 PER RISER) TO BOLT RISER TO GROUND, MODEL ATWR-ABRK

Steel Wheel Risers

WHEEL RISERS ARE PRICED AND SOLD EACH

Steel Wheel Risers are equipped with fork slots for ease in fork truck transporting. Ramps may be stacked for compact storage when not in use. Fork pockets are 7 1/2" wide by 2 1/2" high usable. These fork pockets add approximately 15" to the overall width of the riser. Wheel Risers are designed to raise the trailer for loading and unloading to facilitate compliance with OSHA/ANSI B56.1 part 3 sec 7 requirements for maximum grade of ascending or descending loaded fork trucks. Made of heavy-duty welded steel construction. Uniform capacity per pair is 40,000 lb. (1/4" thick material) (sold each).

*ONE PAIR OF WELD-ON BRACKETS AND HARDWARE, MODEL R-CAD-KIT (FACTORY INSTALLED)

ANCHOR BRACKETS (4 PER RISER) TO BOLT RISER TO GROUND, MODEL SWR-ABRK, (FACTORY INSTALLED)

CENTRAL PICKUP LOOP, MODEL SWR-CPL, (FACTORY INSTALLED), ADDITIONAL WEIGHT 98 LBS.

CENTRAL PICKUP LOOP, MODEL SWR-CPL-SM, (FACTORY INSTALLED), for models SWR-18-6-48 & SWR-24-6-48, ADD'L WT. 108 LBS.

model R-CAD-KIT

*PORTABLE WHEEL RISER CADDY, series R-CAD, move steel or aluminum risers out of the way with this easy to use mover. Snap roller into riser and away you go. *Only available for lengths up to and including 72" units.

CENTRAL PICK-UP LOOP is used to connect two wheel risers (factory installed). Allows fork trucks to easily position and move risers as one. Overall width is 89" on 18"W risers vs. 101" on 24"W risers.

Aluminum Walk Ramps

Aluminum Walk Ramps enable delivery personnel, shippers, and receivers to load and unload trucks when docks are unavailable. Ramps feature a 1½" high safety curb on each side. Heavy-duty steel chains with steel grab hooks are attached to each side of ramp for safely securing ramp to truck. Constructed of strong aluminum alloy with non-skid tread surface. The ramp is lightweight and easy to handle. Available in either an overlapping style that rests on the truck bed, suffix "A", or steel hook style that mounts onto the truck extensions, suffix "B".

Aluminum Walk Ramps with Handrails offer the same durable ramp as above with more stability and security. Railing sections are 40¼" high with a 18⁷/₁₆" mid-rail. Handrails are included for both sides and may be attached to one or both sides of the walk ramp. Aluminum construction with unpainted finish. Installation brackets and hardware included.

Aluminum Walk Ramps with Adjustable Height Wheel, is ideal for use with aluminum ramps 10 feet or longer. Height is adjusted with a manual hand crank mechanism. Wheels are 10" x 3½" pneumatic and are located at balance points on the ramp. Simple bolt-on installation.

Aluminum Grip-Strut Walk Ramps

Load and unload trucks when docks are unavailable. The open deck design allows snow, ice, and water to fall through ramp providing a positive grip for delivery personnel, shippers, and receivers. One hundred percent welded aluminum construction is lightweight and will not rust. Ramps feature a 2" high safety curb on each side. Overlap style end lip rests on the trailer bed to provide a smooth transition. Each unit includes two (2) safety chains to connect the ramp to the trailer for safety. Not for pallet trucks or three-wheeled carts.

Aluminum Grip-Strut Walk Ramps with Handrail, offer the same durable ramp as above with more stability and security. Railing sections are 40⁷/₁₆" high with a 18⁷/₁₆" mid-rail. Handrails are bolted onto the aluminum walk ramps. Handrail may be attached to one side or both sides of ramp. Installation brackets and hardware included. Handrails are included for both sides of the ramp.

Aluminum Walk Ramps with Adjustable Height Wheel, is ideal for use with aluminum ramps 10 feet or longer. Height is adjusted with a manual hand crank mechanism. Wheels are 10" x 3¹/₂" pneumatic and are located at balance points on the ramp. Simple bolt-on installation.

Ramp Cart Option

Ramp Cart Option, provides for easy one-person ramp positioning and transporting. Pull handle up to vertical position to rotate and lock wheels in down position. Push handle down to unlock and lift wheels so ramp can be used to service lower trailers. Hard rubber wheels measure 10" x 2¹/₂". Minimum ramp service height is 14" with this option. Easy bolt-on installation to any size AWR. Walk ramp sold separately.

Aluminum Truck Mounted Walk Ramps

Ramp includes steel pocket frame for under-truck mounting. Frame includes linkage to prevent ramp from falling out. Manual spring-loaded lock secures ramp into frame. Handle loops are included to help with deploying the ramp. Overlap style end lip rests on trailer bed and provides smooth transition. Each unit includes two (2) safety chains to connect ramp to trailer for safety. Curb height is 2". Solid treadplate deck type features non-slip serrations for extra grip. 100% welded aluminum construction is light-weight and will not rust.

Heavy-Duty Fiberglass Walk Ramps

Load and unload equipment from trucks using these Heavy-Duty Fiberglass Walk Ramps. Reinforced fiberglass construction provides up to 3,000 pounds capacity. Abrasive surface provides good traction in wet or dry conditions. 1" high curb on each side of ramp. Not for use with fork trucks or pallet trucks.

Aluminum Vehicle Twin Ramps

Provide a safe means for driving vans, pick-up trucks, and some passenger vehicles from ground level into and out of high building entrances. Ramps can be securely fastened to dock with two (2) 3/4" chains each with hook on the end. To avoid hang-ups, measure under clearance and wheelbase of vehicle. The usable width is 14". Side curbs are 1 1/4" high. Welded aluminum construction. Sold in pairs.

Wheel Chair Ramps

The Americans with Disabilities Act requires that all buildings must be accessible to disabled persons. Failure to comply may result in monetary damages and civil penalties. According to ADA rules and regulations, for every inch of rise you must have a foot of ramp in length.

A) TELESCOPIC RAMP is constructed of lightweight aluminum extrusion. Top surface is serrated for positive traction.

B) FOLD-A-WAY RAMP easy, one person storage and handling. Slip-resistant surface provides extra traction. Each ramp comes with 2 handles for easy positioning.

C) GRATE RAMP is a semi-permanent ramp that is ideal for high traffic areas. Handrails are available.

D) ROLL-O-RAMP provides access over curbs. Wheels installed on curb of ramp for portability. Beveled edges create smooth transition between ramp and ground.

Multi-Channel Cable Protectors

The fast and easy way to guard and protect valuable electrical cables and hose lines from damage and abuse while providing a method of safe crossing for vehicle and pedestrian traffic. Three (3) channel design is ideal for construction sites, sporting events, and warehouses. Constructed of synthetic rubber with a yellow plastic lid. Ends include interlocking tabs for creating longer assemblies. Left and right sections ends are at 22½ degree. Four (4) left or four (4) right sections joined together form a 90 degree turn. Maximum weight loading capacity is 20,000 lb.

Molded Rubber Hose & Cable Crossovers

Designed to protect cables and hoses from pedestrian and rolling traffic. The top surface of each crossover includes serrations for extra traction. Optional connectors may be used to interlock individual units together to form wider crossovers. Simply lock together as many units as required.

Model MRBR-24 has carrying handles molded into the ramp.

Fits over cables to protect hoses from punctures and kinks.

*Series RHC*B is ideal for people who are always switching out cables, but do not want to move the ramp. The model RHC-B-A features an aluminum tread plate insert to protect hoses and cables (for light traffic and slow applications only).

Multi-Purpose Ramps

High impact ramps are perfect for a variety of work environments: postal routes, schools, hospitals, warehouses, and delivery routes. These ramps make it simple to move loads onto a curb or over hoses and cables. The textured non-skid surface allows for sure footing on the incline and decline. The lightweight and completely portable unit handles hand trucks and other wheeled equipment with ease.

Sidewinder Cord Protector

Sidewinder Cord Protectors are an innovative new solution for protecting cords that run across a floor. The new design articulates left and right allowing the system to turn corners and adapt to the layout of the room, while maintaining full protection for the cords and trip protection for pedestrians. The cords can be left in the system and coiled around a three foot diameter for ultimate portability, or left in place indefinitely. There is no longer a compromise between safety and flexibility.

Hitch Lift

Heavy-duty 12 volt DC motorized hitch lift. Standard 2" receiver bar has multiple pin positions for different tailgate depths (extends out 52" when lowered and 47" when raised). Built-in adjustable limiting device to allow the matching up of the deck plate to the truck bed level or to ground level. 21 foot long cable set for battery connection. Two stage outrigger assemblies for added stability. Be sure to fold the deck plate up before driving away. Tie down straps should be used to secure load. Steel construction.

Heavy Duty LED Dock Loading Lights 115V 1-PHASE STANDARD

Rugged, heavy duty LED Dock Loading Lights provides brighter light than an incandescent light source while only using 18 watts of power. Encased in a cast aluminum housing with shatter resistant polycarbonate lens cover, this unit instantly reaches maximum light output. Light head is IP66 rated; can be sprayed down. Expected life of 50,000+ hours; 3 year warranty. UL listed.

model LL-HD-LED-24

LED Dock Loading Lights 115V 1-PHASE STANDARD

Reduce broken bulb and high maintenance costs with LED Dock Loading Lights. These use 80% less energy than incandescent or halogen bulb. Achieves maximum light intensity instantly, and light is optimized for trailer illumination. These LED lights have no fragile filaments to break, eliminating the shattered glass of broken incandescent bulb. Light bulb included.

model LL-LED-40

Flexible Gooseneck Dock Lights 115V 1-PHASE STANDARD

Low profile, flexible task light, ideally suited for loading dock applications. It's 27" flexible stainless steel neck can be easily rotated and positioned to light with minimal obstruction to the loading dock area. The dock lights narrow profile and flexibility enable it to be mounted between two (2) neighboring loading dock positions. With the simple mounting method and ability to be positioned precisely, it is an ideal task light for use around work stations and machinery. UL listed.

model LL-GN-LED-27

Dock Loading Lights 115V 1-PHASE STANDARD

Lights minimize freight damage, while expediting loading and unloading operations. Designed to provide uniform visibility inside trailers or around dock areas. Model LL-SAI and LL-SAF are ETL C/U.S. listed, while all others are UL listed.

Incandescent Lights, series LL. offer good color, low replacement cost, and turn on instantly even in cold environments. It utilizes a 90 watt bulb, model *PAR-38-90*, sold separately. Adjustable arm knuckle joint allows vertical and horizontal positioning.

Spun Aluminum Dock Lights, series LL-SAI, stay cool to the touch even with a 300 watt incandescent light. Features strut arm with both horizontal and vertical adjustment. Available in a standard incandescent lamp head and a fluorescent lamp head. Fluorescent units include a bulb and head.

Halogen Light, model HLG-40, typically provides more lumens/watt, better energy efficiency, has a longer service life, and experiences less light depreciation over its lifetime. It is supplied with a 500 watt bulb. Full illumination is instantaneous.

High Pressure Sodium Lights, series LLS and AALLS, offer much higher lumens/watt output and a very long lamp life. Its illumination color rendition (yellowish) is not as desirable as an incandescent. They typically require several minutes to fully illuminate, and even longer if in a cold environment. Low operating cost.

Cargo Bars

- Keep trailer contents in place - eliminate damaged goods
- Simple mechanical lock - will not vibrate loose

During transport, keep trailer contents securely in place with these easy to use Cargo Bars. Constructed of 1½" square tubing, unless specified. 14 gauge wall construction is lightweight, yet extremely strong. Square articulating steel end plates feature rubber pads for positive gripping action. End plates measure 4" x 4" on models CL-15, CL-16, CL-17 & CL-20. End plates measure 4" x 2¾" on model CB-5, CB-7 & CB-7-S and 3¾" x 3¾" on model CL-18 and CBH-32. End plates measure 2¾" x 3" on model CB-PU-3. Bars fit between trailer walls.

Rubber Wheel Chocks

Constructed of reinforced rubber to provide a sure grip on virtually any surface. Curved surface contours to fit tires. Rubber resists tearing, abrasion, ozone weathering, etc. Functional design is durable in all weather conditions. Series RWC-8 is constructed of a mix of virgin and recycled, no reinforcement cords.

The Airline Chocks are suitable for small and large aircraft. Model AC-13 includes a 36" long polypropylene rope, while model AC-18 has a 14" long polypropylene rope between the chocks.

Plastic Wheel Chocks

These plastic wheel chocks are durable yet light enough to take along when you travel. Series *PWC*, is made of 100% recycled plastic. Resistant to damage from sunlight, oil, salt, and chemicals. Features a molded-in handle with two (2) 1 3/8" thru holes. Holes will accommodate OH-15 chain attachment (not included).

Model *PLWC-Y*, features a molded-in handle. Bottom surface includes three (3) steel cleats for extra traction.

Series *PWC-DS*, features a dual slope. One side has a 45° slope while the other side has a 60° slope. 100% recycled plastic construction is chemical and sunlight resistant and delivers a strong grasp to a number of surfaces. Comes standard with an eyebolt.

Steel Wheel Chocks

- G) Textured tread plate to provide maximum traction.
- H) Open face radius allows chock to be used with any size tire. Includes 10 ft. chain.
- I) Formed chock utilizes a saw tooth bottom for traction.
- J) Features grip slot for easy pick up and positioning.
- K) Slope design contours to truck wheel.
- L) Rugged all welded construction. Works in mud, sand, or concrete.
- M) Serrated steel wheel chock, grate style, 14"D including handle, galvanized finish, includes positioning handle with grip.

Wheel Chock Accessories

Chain and Hangers - Discourage theft and misplacement of wheel chocks. Facilitate safety in the dock area. 15' chain attaches to the hanger. Hanger is then secured to the dock wall. Chain is fastened to the chock with cold shut. OH-15-YEL bright color for clear visibility.

Nylon Straps - Bright red / yellow in color for ease to see. Strap end includes large loop for easy pulling and carrying. Easily attach to chock using small choker loop. Longer 15' strap includes second loop for attachment of second wheel chock. Both chocks can be removed from the same side of the trailer.

Wheel Chock Holders - Keep wheel chocks safe and prepared for use at any moment. The holder features steel construction for long life and durability, baked-in powder-coated toughness for visibility and predrilled mounting holes for easy attachment. Model WC-H-R includes a vinyl sticker attached to front of holder which reads "The Law Says CHOCK YOUR WHEELS".

Wheel Chock Warning Signs - Warn truck drivers and dock workers to chock their wheels as required by law. Weather resistant. Bright red lettering provides high visibility. Sign has four (4) mounting holes. Reflective sign is available for docks open at dawn and dusk. Signs and Vinyl Sticker measure 11³/₄"W x 9³/₄"H. More signs available in Facility Maintenance section.

Universal Steel Rail Chocks

Single Steel Rail Chocks fit most standard size rails. The baked-in powder-coated toughness steel construction is designed to sustain longevity through use in a variety of harsh environments. The double sided flanges keep chocks on track and the hardened steel spurs that are located on the bottom side of the chock, are used to maximize a positive grip.

Model SRC/SRC features a 30" long chain which connects the combo sets together for added security. Handle length is 9¹¹/₁₆".

Model FRC-2 & SRC/FRC has a handle projection of 36". Handle height is 14". The adjustable support legs are used to balance the Flag Rail Chocks. Chain length is 30" on combo units. The Aluminum "Chock Your Wheels" sign is visible from both sides. Steel construction.

Magnetic Rail Car Wheel Chock

Magnetic Rail Car Wheel Chocks are designed to stabilize railcar wheels while loading and unloading. Standard features include: rail track attaching magnets for extra grip, pick up holes for easy transportation, a nylon material design for durability and longevity, and orange color for safety. Model RC-WC-HOOK allows you to pick up the Rail Chock without bending over.

Industrial Rubber Wedges

Excellent for safety when stacking cylindrical objects. These extruded rubber wedges offer several advantages over wooden blocks or other forms of wedges: its resilience avoids creasing or wrinkling paper as well as scratching or marring surfaces; it increases its grip as weight is increased.

Trailer Jacks

The Trailer Jacks adjustable lift range provides easy hitching and unhitching of a loaded trailer. Use for a wide variety of lifting, leveling, and adjustment applications. Ideal for industrial, utility, construction, or agricultural equipment trailers. Heavy-duty construction. Available with a side or top crank position. Mounting bracket attaches in a variety of ways in order to meet your application needs. Scissor jacks provide stability and leveling to unattached trailers and equipment.

Trailer Stabilizing Jacks

Jacks are used to prevent up-ending of semi-trailers when they are not connected to a tractor during loading and unloading operations. Also used to level trailers parked on sloped ground and to prevent landing gear from sinking into a soft surface. High strength steel construction. Flush-type zerk fitting for lubricating ACME screw. Meets OSHA regulations when used with wheel chocks. Baked-in powder-coated toughness. Includes reflective collar for visibility at night.

Laminated Dock Bumpers

Laminated style dock bumpers provide durable, economical protection for your loading dock and trailers. Units are constructed of fabric reinforced rubber from recycled truck tires. Pads are laminated between painted structural angles and held together with 3/4" steel tie rods. A metal plate is located on the back of the 96" wide bumpers for support. Installation is quick and easy by bolting or welding units to the dock. *Width is measured bolt hole center to bolt hole center*, except type C width is actual, bolt hole center 1014-4.5F is 6", 1214-4.5F is 6 7/8". Bolt holes are 13/16" diameter on type A & C bumpers and 7/8" diameter on type B.

Hardened Molded Bumpers

These pre-drilled bumpers are constructed of fiber reinforced rubber containing nylon and polyester for all weather conditions. Provides high impact resistance. Steel reinforcement rings are molded into each bumper for installation. Uses 5/8" anchor bolts. Sold individually. Order installation hardware separately, see below.

Extruded Bumper Stops

Ideal for building and machinery protection. Bumper Stops are excellent for protecting vehicles when parking places are located next to building walls and trucks at docks. Made of strong, durable, high impact resistant solid rubber. Easy installation either horizontally or vertically. Accepts a 3/8" flat head anchor bolt. Installation hardware available separately, see below.

Economy Trailer King Pin Lock

Trailer King Pin Lock provides security for trailers and RV's. Lock slides onto a trailer's king pin to prevent a thief from pulling up, hitching, and driving off with your trailer. No tools are required, just slide the king pin lock into place and turn the key. Units are baked-in powder-coated toughness and come with two (2) keys, keyed alike.

MODEL NUMBER	DESCRIPTION	HEIGHT	INSIDE DIAMETER	WEIGHT (POUND)
E-TKPL [Ⓢ]	KING PIN LOCK	3¼"	3"	3

POWDER COATED TOUGH

Pallet Busters

Refurbish or remove broken and unsightly pallets quickly and safely. Lightweight and easy to use. Can be utilized to raise a dockboard for fork truck removal. Model SKB-7 features a unique dual prying action with nail puller. Deluxe unit features baked-in powder-coated toughness.

MODEL NUMBER	DESCRIPTION	BAR LENGTH	HANDLE DIAMETER	WEIGHT (POUND)
SKB-7 [®]	PALLET BUSTER	41½"	1¼"	9
SKB-DLX [®]	DELUXE PALLET BUSTER	41"	1¼"	16

Prylever Bars

Provide dock workers, riggers, and freight handlers with the leverage needed to get underneath heavy objects for transporting with fork truck, hand truck, pallet truck, or machinery movers. Two (2) 5" x 2" poly-on-steel wheels. ⅜" thick steel nose plate with beveled edge is bolted to the wood handle units and welded on the steel units. Steel units feature baked-in powder-coated toughness.

MODEL NUMBER	HANDLE TYPE	BAR LENGTH	USABLE NOSE PLATE (W x D)	UNIFORM CAPACITY	WEIGHT (POUND)
PLB-5 [®]	WOOD	60"	7⅞" x 3⅞"	4,250 lb.	31

PLB/S-7 [®]	STEEL	83⅞"	6" x 3½"	5,000 lb.	47

Pallet Pullers

Pallet Pullers are used to pull pallets to rear of trailers for easy fork truck access. Rugged steel construction. Heads are self-cleaning and unaffected by wood particles, paint, or grease. Pallet pullers and chains are NOT designed for lifting.

PAL-12 and PAL-16 - Single scissor action allows for wider jaw opening.

PAL-14 - Cam closing action provides maximum gripping strength and reduces pinch points. Safety handle enables easier positioning and removal. Grips both metal and wood pallets with biting action.

PAL-21 and PAL-LP - One piece curved heads have integral spurs for gripping pallet stringers.

Rumble Strips

A good and audible warning for motorists. These strips have a unique raised dot grip system, and special grooves for improved adhesion and made from a specially formulated glass-filled polymer material. This material is also UV stabilized and cold weather impact protected. Rumble strips can be permanently (epoxy) mounted.

MODEL NUMBER	OVERALL SIZE (W x L x H)	COLOR	QUANTITY	WEIGHT (POUND)

RMBS-24-O	4" x 24" x 1/2"	ORANGE	1	12
RMBS-24-W	4" x 24" x 1/2"	WHITE	1	12
RMBS-ER	EPOXY RESIN, 2 GALLON KIT (installs 30 units)			20

Heavy-Duty Parking Blocks / Speed Bumps

These are a guidance device that provides a physical deterrent or warning for motorists. Ideal for traffic calming, work zones, garages, edge drop off markings, bicycle lanes, parking lots, light rail, and driveways. Durable polymer material is chemical and weather resistant, which outlasts concrete and rubber products. Unique groove system provides easy installation and improved adhesion for epoxy glues. Bolt holes are provided for additional anchoring if needed. Units can be permanently (epoxy) or temporarily (butyl tape) mounted.

MODEL NUMBER	OVERALL SIZE (W x L x H)	COLOR	QUANTITY	WEIGHT (POUND)

Speed Bumps

Help control drivers in dangerous, areas while protecting people and property. One person installation. Can be removed for seal coating, snow removal, or change of location. Resists marring by oil, road salt, sunlight, and chemicals. Feature dual 1"W x 3/4"H cable channels and includes hardware. Constructed of lightweight recycled plastic. Compression strength is 3,200 pounds per square inch. The concrete hardware kit includes bolts, anchors, and washers. Asphalt kit includes spikes and butyl tape. The HD asphalt kit includes anchors and bolts. The HD anchor should be epoxied (epoxy not included) into the ground and then the speed bump is secured to that anchor with a bolt. The glue down anchor plate kit includes anchor plates, T-nuts, bolts, and washers. Requires 2-3 ounces of either 2-part epoxy or heavy duty construction adhesive to the bottom of each anchor plate, which is not included.

Speed Bump Anchor Kits

Speed Bump Anchor Kits are a great addition to the facility maintenance department. The kit supplies a solution to securing speed bumps to a surface. The unit is designed of a strong construction that is resilient and long lasting throughout the harshest environments. Once the anchoring is in place, the speed bumps are ready for use. The kit is available in both glue down and asphalt anchor style.

Rubber Speed Hump Anchor Kits

Anchor Kits are a great addition to the facility maintenance department. The kit supplies a solution to securing speed bumps to a surface. The unit is designed of a strong construction that is resilient and long lasting throughout the harshest environments. Once the anchoring is in place, the speed bumps are ready for use. The kit is available in both glue down and asphalt anchor style.

Car Stops

Protect people and property from drivers in dangerous areas. Constructed of lightweight recycled plastic. One person installation. Can be removed for seal coating, snow removal, or change of location. Resists marring by oil, road salt, sunlight, and chemicals. Resists rotting, termite damage, and corrosion. No costly painting or maintenance. Asphalt kit includes spikes and butyl tape. The concrete hardware kit includes bolts, anchors, and washers. The glue down anchor plate kit includes anchor plates, T-nuts, bolts, and washers. Requires 2-3 ounces of 2-part epoxy to the bottom of each anchor plate, which is not included. Hardware kits sold separately. Units feature notched out bottom surface for laying hoses or cords underneath. Models included in the *CS-TB96* series are designed for use with trucks and other larger tired vehicles.

Model *CS-33-BL* is made of black, recycled rubber.

Expand-A-Gates

Designed to set up quickly and easily wherever and whenever they are needed. Ideal for preventing potential accidents. Lightweight design allows personnel to quickly retrieve the gate and limit access to unsafe areas. Smooth operating scissor action. Interlocking and nestable. Suffix -C features casters. Suffix -W features one swivel caster with a wall/rack mounting kit. Model PEXGATE is constructed of heavy-duty molded yellow and black plastic. One side of gate includes reflectors for better visibility. End pieces are hollow and may be filled with liquid for added weight. Assembly required.

Variable Speed Air Curtains

These Heavy Duty Air Curtains can be used above entry doors and industrial warehouse doors to prevent loss of cool air and maintain a clean environment. These curtains contain a heavy duty 20 gauge rigid steel cabinet, with baked on epoxy powder coat paint for durability. Motor is a heavy duty, PSC, direct drive high efficiency, and signed for use with SCR controllers. Motors are permanently lubricated for long life and have thermal over load protection. SCR speed controller supplied on all units compatible with the motor with low end adjustment for air volume control and savings in power consumption. These heavy duty units have a 3/4 HP motor, 120V power and can go up to a 12' high doorway. Heating options available, contact factory.

Portable Electric Infrared Heaters 3-PHASE STANDARD

Provide instant, odor-free heat for indoor and semi-protected outdoor workstations and warehouse areas. Economical electric infrared heat warms only persons and objects, not the air volume. Durable heavy-duty flat panel emitter heating elements are designed for a variety of applications using no glass materials. All models have gold anodized aluminum reflectors, terminal box, protective wire screens, and reinforced front edge and corner construction. Heaters can be adjusted on the hand cart to operate in a horizontal or vertical position for maximizing the infrared heating pattern. Carts consist of a rugged steel design and are equipped with 6" rubber wheels and twin hand grips. Heaters are factory wired for three phase, but can be converted to single phase for most units.

VCH-48-P	1500	5,120	115	1	30

model VCH-48-P

Portable Infrared Heat Panels

Portable Infrared Heat Panels are a great asset in cold work areas. Units can be rolled easily to an array of areas without the need of additional personnel or lifting devices. The overall height allows the heat to expand more freely through out the workspace and quickly diminishes cold areas. Can fit in confined spaces when not in use.

MODEL NUMBER	VOLTAGE	LAMP ELEMENTS	OVERALL SIZE (W x H x D)	HEATED AREA (W x H)	WEIGHT (POUND)

Manual Brush Sweepers

Use these sweepers anywhere, indoors or out, on concrete, asphalt, tile, and commercial carpets. Great for parking lots, gas stations, theaters, warehouses, schools, etc.

Model JAN-II is faster and more efficient than cleaning with conventional push brooms. The rotation of the wheels causes the brushes to rotate and pick up material. The side broom allows for cleaning along curbs, walls, and in corners. Contains no electric motor. Removable handle for storage is standard. Steel construction.

Model JAN-SM includes two (2) brushes on each front corner with a 1/4" overlap. A retractable handle is ideal for storage.

Model JAN-LG is a deluxe brush sweeper. The two (2) 11" diameter brushes, one on each front corner, come with independent 1/2" height adjustment. The bottom center brushes also features 1/2" height adjustment. Those brushes measure 17 1/2" x 5 1/2". A folding handle for easy storage is standard.

MODEL NUMBER	OVERALL SIZE (W x D x H)	SWEEPING AREA	CAPACITY (GALLONS)	POWERED	WEIGHT (POUND)
JAN-II	29" x 48" x 37 ⁷ / ₈ "	27"	10	BELT DRIVEN	81

JAN-LG	32 1/2" x 30" x 41 1/2"	32 1/2"	9	BELT DRIVEN	35

Magnetic Push Sweepers

Magnetic Sweepers are ideal for manufacturing facilities and construction sites. The sweeper is ergonomically friendly with an efficient handle controlled release. The design and capacity can accommodate large and small materials. While the standard handle allows for comfortable upright position during use, the wheels allow smooth rolling for quick and easy collection of objects.

Model MPSR-24-B and MPSR-36-B have a bent handle for more ergonomic handling.

Model TAM-30 is constructed of aluminum frame for lightweight strength. Other features include a telescoping handle for easy storage and length preference, a manual release for safe disposal, and a rotatable base for maneuverability.

MODEL NUMBER	REMOVAL PROCESS	SWEEP WIDTH	WEIGHT (POUND)

Fork Truck Mounted Brush Sweepers

Fork Truck Brush Sweepers are ideal for interior and exterior commercial sweeping. Great for cleanup applications; docks, warehouses, and parking lots. Lightweight aluminum body with polypropylene bristles. Powder coat finish. Attach unit by sliding forks into pockets and securing with locking screws.

Optional **Magnets** are a great asset to manufacturing and construction facilities. Enables the user to collect material in fewer passes. For best use, attach the magnet to the front of the existing broom and fasten to the forklift. Once in place, while traversing the desired area the magnet will detect metal items before they get caught in the bristles of the broom. Works with series VSWP and VPS.

The optional **Edge Markers** work with the deluxe brush sweeper series VPS. The 36" high markers are a visible indicator of the edge of the room for safety precautions. The units height allows the user to be informed while still maintaining the proper drive position.

Optional **Dust Mop** attaches to collect dust and fine particles on smooth floors. Works with series VSWP and VPS.

Hanging Magnetic Sweepers

Hanging Magnetic Sweepers are ideal for cleaning industrial settings, parking lots, and loading areas. The design is durable, yet lightweight, for easy maneuverability and portability from work area to work area. A release lever on series MS and HFMS is located in the sweeper for simple, safe discarding of fragments. Constructed with heavy gauge steel and aluminum. Comes completely assembled.

Hanging Magnetic Sweepers, *Chain Hang-Type* with eyebolts and chains for hanging units from a vehicle.

Hanging Magnetic Sweepers *with Forklift Hang-Type* can be suspended from a fork lift for smooth and efficient gathering of material, both large and small. Fork pockets measure 5"W x 1¹/₄"H.

Floor Tape Applicators & Floor Tape

Model TPA-10 - Designed to apply tape as you walk. Solid steel construction, comfortable hand grips, and durable rubber wheels allow for easy operation and maintenance. Features a soft rubber applicator head. Holds tape rolls with a 3" diameter core and widths between 1" minimum and 4" maximum.

Model TPA-20 - Applicator head adjusts quickly to apply tape in circular path or in a long straight line. Rear stabilizer adjusts right and left to allow for marking next to walls and pallet racks. Holds tape rolls with a 3" core and width between 1" minimum to 4½" maximum.

Reel Mover Handle

A reel mover handle is the perfect way to transfer wire reels throughout the workspace. The long handle allows the user to walk/stand in the proper upright position which diminishes the amount of time bending and twisting while moving reels manually. The strong construction gives the user the ability to secure the reel to the handle and transport throughout the designated working area. Works well in manufacturing and construction facilities.

Welding Curtain Roll

Welding curtains promote safety throughout manufacturing and construction facilities. The strong flame retardant vinyl design keeps materials from passing into other work areas. The unit includes a pregrommeted top side for simply hanging in the designated work space. An assortment of colors are available.

Trash Receptacles

The Economy 22 gallon receptacles represent both value and quality in a space-saving design. Made in America of 100% post consumer recycled plastic, it is available in (3) three slat colors with a black top. It is not only a sustainable product, it can be used for trash or recyclable items with custom engraving available on the top, contact factory.

The large capacity 33 and 49 gallon receptacles can be used for trash or as part of a recycling station. Made in America of 100% post-consumer recycled plastic, includes an inner plastic liner and are available in (3) three colors with a black top. Stainless steel fasteners ensure a rust resistant, long life and are internal to provide a clean, blemish-free appearance. Keep your environment clean and keep plastic out of the landfill at the same time.

We've added flare to utility with our Round Flare Top Receptacle! The unique design has an inner liner and 33 gallon capacity. Made in America of 100% post-consumer recycled plastic. It's eco-friendly while helping keep trash/recyclables in their place.

Tree Grates

Tree Grates are the perfect addition to any facilities landscaping resources. The grate provides safety to the vegetation while maintaining the quality of the surrounding environment. The units are available in both square and round shapes to better fit the users landscaping needs. With a lightweight design, the units are able to be easily installed without the use of additional personnel. As the tree grows, the inside grate diameter can be expanded for a better fit. For best use, place each half of the grate around the tree on a flat surface and lock in place with the included hardware. ADA compliant.

Tree Grate frames delivers great support to any existing or new grates. For best use, place each portion of the frame under the surface edge and fasten into place. Once in place, a new or existing grate can be fitted inside the frame for a smooth, uninterrupted surface.

Frame comes complete with four (4) 1 ½" square pre-drilled plastic frames (42" length for use with 48" square grate or 54" length for use with 60" square grate).

Salt Boxes

A salt box is a great addition to any business or public facility. The box is constructed of a durable polyethylene that withstands the harsh effects of salt and other ice melting products. The bright color with lid provides great visibility in the work area during times of need. The unit is lockable for both safe transporting and to ensure the only users are authorized personnel. The large capacity allows for great amounts of material to be placed in the box for space saving efficiency.

The heavy duty scoop is perfect for the business or at home when handling salt and other winter related snow melting material. The polyethylene construction is both lightweight and durable for continuous use during the harsh winter months. The unit is brightly colored for simple visibility and quick locating during times of use.

Tilt Trucks

Durable plastic construction withstands extreme summer heat and allows collecting waste from multiple bins at a collective time. Great for high traffic areas such as: warehouses, fairs, ball parks, schools, etc. Strong, one-piece molded polyethylene body with steel base tip support and a balanced design to allow for simple dumping by one person. Easily portable on 2 large rubber wheels and two swivel wheels. Tapered front makes it easier to pour materials into yet another larger container. Rust resistant powder coated frame for strength and durability. Keep your waste out of sight in our medium duty and easy-to-move tilt trucks. Not for use with fork trucks.

Skid Steer Buckets

Skid steer buckets provide an easy way to transfer products, both big and small. The universal mounting system allows the unit to be utilized in conjunction with a variety of skid steers on the market. A high strength front cutting edge resists wear and cuts through the toughest of terrain. With a reinforced bottom plate and sides, and an all welded steel construction, this bucket will perform at the highest levels. The back plate is designed to move liquid materials like concrete. An anti-slip step guard is functionally placed at the top edge of the bucket for safe exiting of the skid steer. Excellent for landscaping, farming, and residential operations.

Good for handling lightweight materials such as: *dirt, mulch, snow, and sand.*

Specialty Wheelbarrows

Ideal for use in both commercial or agricultural settings. Exceptional for use in "green" construction zones and/or maintenance zones. Will not puncture or sink into surfaces that otherwise might be susceptible by metal leg-brace supports. Weight is distributed via 4 wheels, which create a balanced movement of load.

Optional Ergonomic Handles, model WLB-HDL, reduces wrist torque while you manage heavy loads. The patented pivot-point allows the user to carry and lift loads with greater control reducing strain on the wrists, elbows, and lower back. Durable nylon construction.

Storage Buildings

Modular Storage Buildings are ideal for keeping valuable items secure. Constructed of maintenance free galvanized corrugated paneling. The door measures 45"W x 74"H usable and features a right-side hinged lock (padlock not included). Modular design is easy to assemble. Once assembled, unit can be moved with a fork lift. Each unit features a wooden floor 5¾" high to help keep products dry. Built-in rain gutters for water drainage is standard.

Utility Steel Storage Sheds

The Utility Steel Storage Sheds are used for holding all kinds of materials or tools. The hinged door provides access to the shed and the slanted roof helps with rain run-off. The shed has an open floor design (floor is not included) and a lockable door latch (padlock not included). Unit has a zinc-plated finish that prevents rust. The easy to assemble design ships knock-down with installation instructions and hardware included. Model SHED-5932-F has a front opening door design that enables the shed to be used in spacious areas, while model SHED-5932 includes a side door design for use in long narrow spaces.

Driver Cages

Driver Cages are an application that is placed around an entrance in a warehouse. This is used to keep truck drivers, and delivery personnel secluded in one place when entering the warehouse or making a delivery. Each driver cage includes a key lock on the driver side (48" side), a push bar on the warehouse side, and a 2' x 1' 8" slide up service window with shelf. Driver Cage prevents people from wandering throughout the warehouse, getting lost or hurt in the warehouse, as well as additional security. Cages consists of rectangular 2" x 1" mesh, 10 gauge woven wire, and a wet enamel gray finish. Optional colors available, contact factory.

Light Bulb Recycler

The Light Bulb Recycler crushes used fluorescent lamps of any length into 100% recyclable material, while capturing over 99.99% of the vapors released. The system, which is mounted to a 55-gallon drum (not included), can hold up to 1,350 4-foot fluorescent lamps.

This unit is equipped with a side-mounted dust filter unit containing the highest quality H.E.P.A. filter available. This works in conjunction with an activated carbon filter located in the steel canister. The activated carbon filter actively captures and neutralizes the mercury vapor released from the lamps during crushing. In addition to providing EPA and OSHA compliance, this unit frees up valuable storage space normally filled with boxes of used lamps and reduces handling and labor costs.

A Permit is required in NJ and MI and an application is required in TX.

These states are prohibited from bulb crushing: CA, MN, MO, ME, VT, NH, CT, RI, PA, and WV. Additionally, the nations of Canada, United Arab Emirates, Philippines, South Africa, and Brazil are prohibited too.

LBR-55-UC includes: T12 entry tube, U-Tube chute, combo kit of filters, and entry tube storage rack.

Portable & Permanent Sign Bases

Sign Bases are perfect for parking garages, parking lots, retail establishments, school crossings, and high traffic pedestrian walkways. A lightweight and more durable option to steel, these signs are designed to take vehicle impacts and low speed roll-overs without causing damage to the post or vehicle. The recycled base, series FSP-BASE, is perfect for short term applications or when a rapid deployment is necessary. Permanent sign posts with circular bases can be anchored with $\frac{1}{4}$ " lag bolts (not included). Other post heights and signs are available, contact factory for pricing. For more bases and posts please see *Protective Barriers* section. Signs available on pages 80-92.

Introducing Our **NEW** Industrial Signage Solutions

About Our Print On Demand Signage Process

Print On Demand allows Vestil to keep fewer, less popular industrial and OSHA signs in stock, further reducing storage space and handling costs. And because your inventory levels can be kept low, Print On Demand helps reduce the chance of being left with product that has become obsolete. With our Print On Demand sign manufacturing process, we are able to react to your demand quickly. Our technology is also environmentally friendly.

Ask Us About Our Unique Two-Sided Bilingual Signage

We Use UV Ink Technology

With the increasing demand for quick turnaround on production runs, Vestil has adapted the use of UV ink devices that were developed specifically for the signage industry. These inks are formulated to cure quickly and offer many years of outdoor durability, as well as resistance to water and abrasion. The inks are applied directly to the substrate, thus eliminating costly additional labor traditionally associated with other sign manufacturing.

Safety Sign Categories

- Chemicals & Haz-Mat
- Entrance & Exit

- Glow-in-the-Dark

ONLINE CUSTOM DESIGNER

Vestil can affiliate integration to our internet web-to-print solution allowing for direct customization of all types of industrial signage.

Anti-Graffiti Coating!

Anti-Graffiti is made with Tedlar®, providing an extremely durable polyvinyl fluoride (PVF) film surface for use as an anti-graffiti film. It is washable and resistant to a large number of detergents and solvents. This film provides excellent UV protection. Anti-Graffiti is recommended for both outdoor and indoor applications. UV light inhibitors aid in stopping discoloration from the Sun.

Sign Material Choices

Economy Value

.011 Vinyl Label Decal Sign

For general labeling or extreme conditions; Vinyl labels offer moisture, chemical, and UV resistance making them ideal for labeling indoors. If you're looking for a economical solution that's easy to apply to most surfaces then vinyl adhesive is your answer.

Economy Value

.040 Polystyrene Sign

Polystyrene signs are the ideal sign choice for indoor signage. We offer polystyrene signs in .040" gauge thickness. This material is made from a form of plastic and long lasting when used indoors. If your business or school needs indoor signage or directional signage, then polystyrene is the solution.

Standard Value

.040, .063, & .080 Aluminum Sign

Aluminum never rusts. Aluminum withstands wash-downs, harsh elements, abusive conditions, and feature good chemical, abrasion, and impact resistance. Aluminum is excellent for indoor and outdoor usage, making it ideal for a wide variety of industrial strength applications.

- Standard Thicknesses are .040", .063", & .080"
- Protected by UV resistant clear *Anti-Graffiti coating!*
- Withstands harsh cleanings
- Endures outdoor environmental conditions
- Service temperature range -40° to 250°F
- Signs are round cornered and provided with holes for mounting
- Signage - Exterior long-term application life

Premium Value

.130 Aluminum (ACM) Sign

Aluminum composite material (ACM) is comprised of two pre-painted sheets of .130" aluminum with a solid polyethylene core. Provides excellent durability in outdoor applications, is lightweight, and is approximately one half the weight of our aluminum signs. Won't bow or warp. Interior or exterior long-term application life. Made In USA. With *Anti-Graffiti coating!*

Made to Last

Our safety signs are available in all popular sizes including oversized, colors, or shapes. Vestil assures that all signs will exceed consumer expectations. All of our signs are imaged using our state-of-the-art Print On Demand process with UV inks that won't dissolve or fade over time.

Anti-Graffiti UV Laminate is applied over the surface of all our aluminum constructed signs to prevent fading & increase longevity. Also available as a option on other available materials.

Our categories of signs include safety signs, security signs, first aid signs, safety banners, and many more.

You can get all of the signage you'll ever need to hang throughout your warehouse and facility including ANSI signs, OSHA signs, warning signs, danger signs, caution signs, notice signs, and more.

NOTICE SAFETY SIGNAGE

OUR MOST POPULAR REQUESTED Signs!

SI-N-01

NOTICE Model Number Format:

(sign #) - (size) - (material)

Example: SI-N-01-A-AL-040

When ordering your signage follow these steps:

STEP 1 - Select your sign number.

STEP 2 - Select your size:

(A) 10.5" x 7.5" (B) 12.5" x 9.5" (C) 14.5" x 10.5"

(D) 18.5" x 12.5" (E) 20.5" x 14.5"

STEP 3 - Select your material:

(AL-040) .040" Aluminum Sign

(AL-063) .063" Aluminum Sign

(AL-080) .080" Aluminum Sign

(AC-130) .130" Aluminum Composite (ACM) Sign

(PS-040) .040" Polystyrene Sign

(LB-011) .011" Vinyl Label Decal Sign

All signs will receive installation kits.

*Specify sign type ("C" Caution, "D" Danger, "W" Warning or "N" Notice).

**Vinyl label adhesive is permanent and adheres to most smooth clean surfaces, indoor or outdoor applications.

Signs are provided with four (4) .25 inch diameter punched holes located in corners for mounting (labels not included). Other configurations available.

SAFETY SIGNAGE *How to Order - It's Simple!*

Available Materials

.040" Coated Aluminum - It's a flat, rigid metal substrate that is lightweight with a baked enamel finish made to withstand the elements for long-term outdoor and indoor use. Our custom aluminum signs are also available in many standard sizes and colors. Our custom aluminum signs are generally used for commercial, industrial, informational, and directional signage. It can be used with many different frame systems and will not rust.

.040" Polystyrene - Is one of the most widely used plastics. It is a rigid sheet of plastic. It is durable, low moisture resistance, and has good impact strength. Uses: Long-term indoor or short-term outdoor uses.

3 mm Premium Composite Aluminum (ACM) - A lightweight aluminium composite 3mm board, which is flat and rigid making it ideal for signage, display, presentation, and point of sale applications. It is corrosion resistant and very stable to changes in temperature, making it ideal for outdoor signage. The black core is UV stable and will not warp or delaminate.

Vinyl Pressure Sensitive label - Our least expensive option. Can be used on any clean smooth surface, indoor or outdoor applications.

All of our OSHA basic signs come in extended sizes so you get the most from your space and purchase.

Each sign is carefully manufactured to ensure long-life.

Don't see what you want exactly, visit us online at www.myvsigns.com to CUSTOMIZE ALL of these messages or choose and customize from hundreds of others designs!

Electric Hydraulic Scissor Lift Tables

460V 3-PHASE STD, OPTIONS ON PG. 108

Full featured Electric Hydraulic Scissor Lift Tables are used by all types of manufacturing and warehouse facilities. Safety features include: electric toe guard to protect pinch points during lowering of the table, safety velocity fuse to maintain platform height in event of hose or fitting failure, 24V AC push-button hand control, maintenance prop, and upper travel limit switch to stop table at maximum height. 2HP, 460V, 3 phase, 60 Hz totally enclosed motor standard, other voltages available. 3000 psi hydraulic component rating. See options on page 108 & 109. Survey sheet available on page 150.

Radio Remote Control

Put the power in your hands with the Radio Remote Control. This lightweight, two-button, remote control gives you the freedom to control your scissor table from a range up to 150 feet. Unit is also available in a four-button model for lift and tilt tables. The remote control is 4" wide x 6" high x 2" thick.

Approved to meet part 15 of the Federal Communications Code. Designed to prevent crosstalk and false triggering from stray radio frequency.

Model RRC-2PB works with model series: EHLT, HDD, EM1, TL-100-F, and HBD.

Model RRC-4PB works with model series: EHLTT, ZLTT, and HLD.

Integral Scale for Scissor Tables

- Validate number of pieces or parts
- Know exactly how much weight is on your table
- Bolt-on corner retainers
- No holes or bolting required
- Installs and removes in seconds
- Expedite your shipping & palletizing process
- Available in 36" x 36", 36" x 48", 40" x 48", 48" x 48", and 48" x 60" platform tops (rests on top of table)
- Adds approximately 3½" to overall height
- Scale functions: zero weight and tare weight
- Weighing units: pounds or kilograms
- Indicator mounted on pedestal, 110VAC
- Scale capacity, maximum 5,000 lb.
- Scissor table not included, select next higher capacity scissor table

Programmable Height

Eliminate unnecessary bending and "land control jogging" by presetting multiple working heights at the touch of a button

- Set height function: Programmable up to 4 preset heights
- Incremental height adjustment for jogging lift at preset increments
- Raise/lower push-button on the keypad
- Fully integrated controller with LCD display
- A 15-button keypad on the panel display
- Excellent for repeat repositioning applications
- Hybrid technology linear sensor is used to control positions at any preset height
- Scissor Table not included

Rotary Air/Hydraulic Scissor Lift Tables

Utilize the convenience of factory air to power these lift tables. Simply connect to an 80 CFM & 80 PSI (minimum) air supply (minimum 3/4" supply recommended) through a filter, regulator, lubricator and you now have a lift table suitable for a wide range of applications and operating environments. Features pneumatic upper travel limit switch, safety toe guards, cylinder with safety velocity fuse, two button hand control, and life-time lubricated sleeve bearings. See options on page 108 & 109. Survey sheet available on page 150.

CONTACT FACTORY FOR SPECIAL SIZES AND CONFIGURATIONS

Custom Finish Available

Heavy-Duty Air Bag Scissor Lift Tables

Air Bag Scissor Lift Tables use factory air for clean, dependable, maintenance free operation. Designed to raise products up to an ergonomic working height. Safety features include pressure relief valve and pinch point guard. Models ABLT-1000 and ABLT-2000 come standard with a foot control. Incoming air must be clean, dry, and regulated to 80 psi (min.). Requires 1/2" incoming airline. Standard features include adjustable upper travel limit valve, state-of-the-art lifetime lubricated bearings, and maintenance prop. Filter required.

MODEL NUMBER	PLATFORM SIZE (W x L)	UNIFORM CAPACITY	RAISED HEIGHT	LOWERED HEIGHT	WEIGHT (POUND)
ABLT-1000	48" x 32"	1,000 lb.	33"	9"	357
ABLT-2000	48" x 32"	2,000 lb.	33"	9"	630

Low-Profile Air Bag Scissor Lift Tables

With the lowest collapsed height air lift table on the market, you can achieve a 4" lowered height. This low height allows for more material to be placed on the lift and still be in reach of the operator. These units have pressure relief valves to prevent over inflation of the air bag, as well as a captured scissor track to provide stability and safety while raising and lowering. Air requirements are 60-120 psi, with a minimum 3/4" pipe or rubber hose. Hand controller, joy stick style included. Various optional components (up/down foot control, safety skirt, and larger platforms) are available, contact factory.

MODEL NUMBER	PLATFORM SIZE (W x L)	UNIFORM CAPACITY	RAISED HEIGHT	LOWERED HEIGHT	WEIGHT (POUND)

Air Bag Scissor Lift Tables

Improve ergonomics and productivity with our Air Bag Scissor Lift Tables. The Air Bag Technology helps raise pallets, bins, and other materials to your desired working height. These units have pressure relief valves to prevent over inflation of the air bag, as well as a captured scissor track to provide stability and safety while raising and lowering. Air requirements are 80-100 psi @ 15 CFM's. Hand pendent control included. Various lift options are offered, contact factory.

Shorty Scissor Lift Tables 460V 3-PHASE STD, OPTIONS ON PG. 108

Built with the same quality as all our lift tables, the EHLTS and EHLTSD maximize safety and durability. Designed to raise products up to an ergonomic working height. When tight spaces are what you have, consider a Shorty Scissor Table. Available in both a single and double leg styles, these tables offer smaller deck sizes customized to your space requirements. Design features include full perimeter pinch point guard and emergency safety velocity fuse. External power unit and hand control is standard. See options on page 108 & 109. Survey sheet available on page 150.

TRAVEL TIME BASED ON 3 PHASE POWER

REMOTE POWER UNIT

Low Profile Electric/Hydraulic Scissor Lift Tables

Load and unload skids with a pallet truck without the need for a pit when using the optional approach ramp. Superior engineered features and rugged dependability. Safety features include electric perimeter pinch point guard, safety velocity fuse in cylinders, fused 24V AC hand held control, and maintenance supports. Remote power unit (32¹/₂" x 12" x 12") with 8 foot of hose and cable comes complete with a plastic cover to protect the motor from dust and debris. See options on page 108 & 109. Survey sheet available on page 150.

Low Profile Electric Lift Tables 115V 1-PHASE STD

The open center on the "U" Type Electric Lift Tables, series EHU, enable a pallet truck to place a load on the platform. Series EHE center support beam helps to prevent the pallet from deflecting downward in the center. Units feature an external power pack equipped with a pressure relief valve that prevents overloading and a flow control valve that controls the lowering speed. Remote power pack comes complete with a cover to protect the motor from dust and debris. Raise and lower the unit using the UP and DOWN push buttons on the 24V control box. Safety features include electric toe guards, safety velocity fuse in cylinders, safety maintenance props, and an emergency stop button on the control box. Inside width is 29³/₄" by 41¹/₄" long. Power supply is 115V single phase with pedestal mounted push buttons.

Ground Lift Scissor Tables 460V 3-PHASE STD, OPTIONS ON PG. 108

Designed for use when fork trucks are not available. Pallets can be loaded onto the platform with pallet trucks and raised to an ergonomic working height. Lowered height is 1/2". Safety features include; entry-side electric toe guard to protect pinch points during lowering of the table, safety velocity fuse to maintain platform height in the event of a hose or fitting failure, foot control, maintenance prop, and upper travel limit switch to stop table at maximum height reducing motor wear. 2HP, 460V, 3-phase, 60 Hz totally enclosed motor is standard, other voltages available. Remote power unit can be located up to eight feet away from table. 3000 psi hydraulic components rating. Optional accordion skirting available, contact factory. See options on page 108 & 109.

Lift & Tilt Scissor Tables 460V 3-PHASE STD, OPTIONS ON PG. 108

Performs both lifting and tilting operations. 45° and 90° tilt available. Restraining chain and 12" high lip to keep the load in place during tilting. Safety features include: electric toe guard to protect worker from pinch points during lowering of table, safety velocity fuses to hold platform position in event of hose or fitting failure, 4 push-button hand pendant control on an 8 foot coil cord, upper limit switch to stop travel at maximum height reducing motor wear, and maintenance prop. Optional accordion skirting available for both the lifting and tilting portions of the table, contact factory. See options on page 108 & 109.

Single Scissor Lift & Tilt Tables 460V 3-PHASE STD, OPTIONS ON PG. 108

Designed to position containers within easy reach of assembly line workers and machine operators. This unique design reduces fatigue by minimizing repetitive bending and stretching required to obtain components from containers. 96" x 48" unit accommodates two (2) 48" x 48" containers, ideal for parts transfer and assembly. Platform includes a 12" high lip on tilt side. A selector pedal allows the operator to lift while tilting or tilt, then lift. 2HP, three phase, 60 Hz totally enclosed motor is standard, other voltages available. Other standard features include: a two-button handheld control, integrated maintenance lock, pressure plated pump, pressure compensated flow valve, lowering valve, independent oil return, and an adjustable upward travel limit switch. Internal power unit standard. Unit must be lagged to floor. See options on page 100 & 109.

Lift & Tilt Workstation Tables 460V 3-PHASE STD, OPTIONS ON PG. 108

Design of unit allows platform to lift & tilt at the same time for easy operation. Maximum tilt angle is 44° for better ergonomics and operator safety. Service height range is 10" to 24" (to lowest point of platform surface). Platform end includes 12" high full-width lip to support containers. Internal power unit includes electric motor, hydraulic pump, and control box. Standard features include a 2 HP 460V AC power unit with a 24 volt two button hand held pendant control, other voltages available. Welded steel construction with yellow painted finish. See options on page 100 & 109.

USABLE FORK POCKETS ARE 7½"W x 2½"H

Hinge & Sliding Tilt Tables 460V 3-PHASE STD, OPTIONS ON PG. 108

Hinge and Sliding Tilt Tables offer the rugged durability of the standard Efficiency Master line of tilters, plus they offer an extra low platform height. A 12" lip without side gussets allows for loading and unloading on three sides. Standard features include a 2 HP 460V AC power unit with a 24 volt two button hand held pendant control, other voltages available. A pressure plated pump coupled to an application specific manifold features counterbalanced valves and modulated flow control for maximum efficiency. See options on page 100 & 109.

The Sliding Tilt Table incorporates a patented sliding link-tilt design for maximum stability while occupying minimum space. As the table is tilted, the front edge of the container moves away from the operator. The center-of-gravity of the load remains closer to the center of the frame. Side gussets are required when ordering optional accordion skirt.

EHTT - Stationary with four (4) lag down points.

EHTT-L - Base includes 7½"W x 2½"H usable fork pockets on 28" centers for portability.

Ground Tilter 460V 3-PHASE STD, OPTIONS ON PG. 108

The Ground Tilter is the best product for tilting applications which require the use of a pallet truck for loading and unloading. Tilt containers up to 45° from floor level to provide better access to parts in containers. Platform includes a 17½" high lip on tilt side. A removable positioning bar is provided for use with smaller containers. Designed with worker safety in mind, pinch point guards are provided on loading side of the unit. 2HP 460V motor standard, other voltages available. Remote power unit with a protective cover measures 24"W x 24"L x 8"H. Hand pendant control standard. Optional foot control available. See options on page 100 & 109.

FOOT CONTROL, MODEL FC-2

Bench Top Tilters

Heavy-duty steel Bench Top Tilters tilt loads from 0° to 45° (3" & 5" lip). Easily attached to most industrial table tops, work benches, and mobile lift tables of sufficient load capacity and surface size. Unit slides back as it tilts to maintain the center of gravity over the frame. Manual units can be adjusted only when unloaded. Linear actuated units are equipped with a push-button hand pendant control, located on an 8 foot cord. Flat base plate with slotted holes for installation.

Efficiency Master Tilt Tables 460V 3-PHASE STD, OPTIONS ON PG. 108

The model EM1-200 tilts pallets, crates, boxes, or baskets 45° to facilitate easy container loading or unloading. Tables feature all welded steel construction for years of durability. Unique design minimizes pinch points to meet OSHA requirements. Units are equipped with an industrial quality, 56 frame 2 HP motor. This motor delivers best torque with minimal amperage draw for maximum life. Standard voltage is 460V 3 phase, other voltages available. A 24V push button hand control is standard. Base includes 7½"W x 2½"H usable fork pockets on 30" centers for portability with forklift. [Survey sheet available on page 152.](#)

The model EM1-500 incorporates many of the same quality features found in the Series EM1-200, but features a full 90° of tilt. Unit is ideal for upending products in shipping and receiving operations. Standard with double acting cylinder for controlled tilt and return. Unit must be lagged to floor.

Multi-Purpose Tote Dumpers 12V DC STD, OPTIONS ON PG. 108

Collect, transport, and dump materials while saving time and reducing work related injuries. Ideal for schools, hospitals, commercial, and industrial applications. One person can easily and safely empty loads weighing up to 600 pounds. To use, roll the tote into dumper, secure tote in place, and depress the 24V hand control. The tote will rotate over 135° to dump contents. Dump time is approximately 25 seconds. Standard features: Two (2) 8" x 2" glass filled nylon front wheels, Two (2) 8" x 3" phenolic rear casters, floor lock, 12V DC power, hand pendant control on 8 foot coil cord, and one (1) MPT-1 polyethylene tote. To operate under full capacity, purchase model MPT-2.

series TMS with model TM-PTDS

Tilt Master & Tilt Master Straddle

Lift and position filled tote boxes or baskets without the need of a fork truck or lift table using the newly designed heavy-duty Tilt Master. These 90° tilters will function as transporters by moving completed products from work station to work station without waiting for a fork truck.

A folding ergonomic handle comes standard for quick and easy maneuverability. Unit has a thin profile to allow the user to get as close to the load as possible. Units roll easily on 8" x 3" phenolic steering wheels. Floor lock standard. Series TM is designed to be used with open bottom pallets or skids only. The Tilt Master Straddle units, series TMS, can be used with virtually any kind of container or pallet. Units come standard with a hand pendant control on an 8 foot coil cord.

Three power options to choose from.

Suffix -AC is 115V, 1 phase power with a push-button hand control.

Suffix -DC includes one (1) 12V battery, push-button hand control, on-board charger and battery charge indicator gauge.

Suffix -AIR features reciprocating air/oil power with a heel/toe foot treadle control.

*6½" WITH STIFFENER

Air Corner Tilters FACTORY AIR POWERED

The floor level airbag powered tilters provide ergonomic loading and unloading of bulk containers, gaylords, or crates. Pallet truck and fork truck accessible. Tilts up to 45°. Activated by a hand operated control lever or foot pedal. By adjusting the air regulator to a predetermined pressure, the air bag inflates tilting the container automatically as it is unloaded. As the container becomes lighter, it automatically tilts and the material shifts to the corner of the container where it can be easily removed by manual or mechanical means. The adjustable regulator is factory preset to begin rotating the container when the weight reaches approximately 900 pounds. Pressure is easily adjustable for the weight of your application.

Portable Pallet Inverters 24V DC STANDARD

Tilt and rotate loads with our durable Pallet Inverters. Low profile design of 3½" allows the operator to stand on the rider platform and steer the load from workstation to workstation quickly and easily. DC power lift and drive makes operation safe and efficient. The ergonomic handle features easy to operate throttle with infinite forward and reverse speeds, tilt/lower controls, safety belly reverse button, and horn. Features an electromagnetic disc brake with automatic dead-man feature that activates when user releases handle. Includes four (4) 6V batteries, an on-board battery charger, battery level gauge, emergency battery disconnect, and horn. Ideal in loading dock areas as a power pallet truck, pallet tilter, or as a turntable. Rolls smoothly on polyurethane steer and load wheels.

Electric/Hydraulic Box Dumpers 460V 3-PHASE STD, OPTIONS ON PG. 108

Designed for controlled dumping of material from boxes, crates, and other types of containers. Lowered height of only 3/8" allows for pallet truck loading and unloading. Retaining bar adjusts every 2" to accommodate a wide range of container heights. Each dump height has a hold down range, see chart. Maximum rotation is 135° yielding a 45 degree dump angle. Unit may be stopped at any point during the dump cycle. Chute reach is 10" when fully rotated. Internal 2HP power unit and hand held control standard (5.5 HP power unit on 6,000 pound models). Protective mesh side screens included. Heavy-duty welded steel construction. *Standard duty cycle equals maximum 15 starts per hour in a normal environment. Duty cycle is calculated by starts per hour or number of times "up" button is pushed. Jogging (bouncing of the chute) is NOT recommended. Survey sheet available on page 151.*

Manual & Electric Hydraulic Trash Can Dumpers

Trash Can Dumpers are designed so one person can easily dump contents of trash cans. Available in AC or DC powered operation with hand control. DC powered units include one (1) 12V battery, an on-board battery charger and a battery charge indicator gauge are standard. Heavy-duty steel construction with 8" x 2" glass filled casters; two (2) rigid and two (2) swivel. Two adjustable floor locks are also included. Maximum dump angle is 135°. Versatile, adjustable unit works with only the trash cans listed below or approved equal. Works with Trash Cans which do not feature the foot lid lifter located on page 107.

Universal Trash Can Dumpers

These innovative products allow one person to easily load, maneuver, and dump heavy trash cans of various sizes. The large squared chute and hold-down fingers allow this product to dump and retain most trash cans. Works with trash cans measuring 17½" to 34¾" wide, 20½" to 35¾" long, and 27" to 53" high. Operations available; 115V AC, and DC power with one (1) 12V battery, on-board charger and a battery charge indicator gauge are standard. Unit rolls smoothly on two (2) swivel and two (2) rigid 8" x 2" glass filled nylon casters. Two (2) adjustable floor locks are also included. Ships fully assembled. Works with Trash Cans which do not feature the foot lid lifter located on page 107.

Trash Can Carts

No more lugging heavy trash cans around instead transport them with a Trash Can Cart. Transport up to three trash cans at a time. Each unit is secured in place with a heavy duty chain and chain retainer. The push handle is located at an optimum ergonomic height of 40-11/16". Tow bar on one end for towing with a golf cart or similar service vehicle and a pitch hitch on the other end to attach multiple units together for towing. Rolls smoothly on 8" x 2" glass filled casters two (2) rigid and two (2) swivel with brakes. Trash cans available below.

Trash Cans

Durable polyethylene construction withstands subzero cold and extreme summer heat. Great for high traffic areas such as: warehouses, fairs, ball parks, schools, etc. Each container includes two wheels for easy portability. Hinged lid keeps rain out. Keep your waste out of eyesight in our heavy-duty and easy to move refuse containers. Available with or without hands free foot operated lid lifter.

Trash Cans with Lifter Pockets

The Poly Tote has a multi-system design that includes a lifter pocket to fit all lifter types. The strong walls increase cart durability and wind stability. Capacity is 340 pounds. The oversized wheels roll easily while providing greater stability. Comes with a one piece attached lid with a water tight design that eliminates leaking and reduces odors. The unit meets ANSI standards.

OPTIONS FOR ELECTRIC HYDRAULIC EQUIPMENT

Available at the time of sale for most of the powered products listed in the Ergonomic Solutions section. Consult the factory for details. For the acronyms LHL, DA, and L&T noted in the descriptions below:

LHL denotes a "Lift-Hold-Lower" power and control scheme (ex: EHLT, HDD, EM1-200)

DA denotes a "Double-Acting" power and control scheme (ex: EM1-500, TL-100-F, HBD-6)

L&T denotes a power and control scheme in which the platform, chute, etc. will both lift & tilt (ex: EHLTT, ZLTT, HLD)

HICYCLE-EHLT	HIGH CYCLE BEARING PACKAGE, EHLT (MAXIMUM CAPACITY IS 4,000 LB.)
EHLT-POWCAR	POWERED CAROUSEL (MIN DECK SIZE 54" x 54", INCREASES LOWERED HEIGHT BY 3½")
PLATF-MTG-CA	MOUNTING OF CONVEYOR OR CA-SERIES CAROUSEL TO PLATFORM

When adding an option to a standard unit, deduct the weight of the option from the units capacity to get the current working capacity.

Accordion Skirting

Accordion Skirts have a functional purpose as well as a safety purpose. Accordion skirts serve to keep debris from damaging the operating mechanism, hydraulic components, or electrical parts. Safety is enhanced by keeping arms, legs, fingers, and toes out from under the table. Vinyl skirts meet NFPA 701 code. Skirting comes with easy aluminum extrusion mounting rail and self tapping fasteners. Skirting is 23 ounce vinyl with reinforcing metal rods every other convolution. Standard electric toe-guards are not included when scissor table is fitted with accordion skirt option. Skirting is not meant to be used on a unit being installed in a pit or with a ramp. Skirts comply with the OSHA pinch point specifications. Accordion skirts are special and not returnable.

Deluxe Roller Stands

Designed for use as an extra hand when working with long materials. Each stand includes 2" chrome plated rollers and heavy-duty cast-steel base. Choose either v-groove roller design or flat single roller design. The height of each stand is adjusted with a friction lock screw or a gas charged cylinder. Great for use in machine and wood shops. Ships knockdown. Model STAND-T is ideal for most tubing and bar stock applications. The STAND-T ball roller span is infinitely adjustable from 1 7/8" to 6 3/8" on either side. Roller plates can also be rotated 180 degrees to create different offsets and to handle larger diameter tubing. Blue baked-in powder-coated toughness. Does not work with STAND-MF.

Linear Actuated Mobile Tilting Work Table

Working in a comfortable position reduces fatigue and risk of injuries. Designed to bring work to an ergonomically correct position, helping to foster a more comfortable and productive work environment. Platform height and tilt angles are adjustable with a 115V electric linear actuator with a hand control. Four (4) 4" x 1 1/4" polyurethane swivel casters (two (2) double locking) allow unit to be transported from one work area to another while loaded. All steel construction.

High Rise Lift Trucks

Ergonomic lift truck increases worker and machine efficiency and productivity. Reduces muscle fatigue and body injuries by bringing material closer to actual worker height. 12V DC power features an on-board battery charger and battery charge indicator gauge. Heavy loads can be lifted by electric hydraulic power and manually moved until auto brake engages at approximately 8". Push buttons to raise and lower lift are located on power unit. Unit rolls smoothly on phenolic 8" x 3" rear swivel casters and dual 3" front guide wheels.

Three power options to choose from.

Suffix -AC is 115V, 1 phase power with a push-button hand control.

Suffix -DC includes one (1) 12V battery, push-button hand control, an on-board charger & battery charge indicator gauge.

Suffix -AIR features reciprocating air/oil power with a heel/toe foot treadle control.

Dual Power Tote Lifter

Designed to lift open bottom skids, boxes, and baskets. Lifter is DC powered with rocker switch to raise or lower. This DC powered unit includes an on-board battery charger. The side stabilizers lock lift in place when load is raised to 15¾". Ideal for maintenance and commercial applications. This unit can be used as manual hand pump lift or electric powered lift. Ideal when power is not available. High quality hydraulic pump and DC lift system. Compact design and strong steel profile construction. Powered with one (1) 12V battery. Integral battery charger, battery level gauge, and adjustable lowering speed. Single stage cylinder, no risk of leakage and sudden dropping of 2nd stage cylinder. The compact structure with battery and power unit positioned between body and lifting cylinder resulting in a low center of gravity and excellent maneuverability. Ergonomic design handle for simple and comfortable operation.

L-270-DP-HD	27" x 47"	31½" to 31"	2,200 lb.	415

Tote Lifters

Designed to raise open bottom skids, boxes, and baskets. Two operations available: hand pump and DC power with rocker switch to raise or lower. Hand pump design features an ergonomic pump handle with two lifting speeds to accommodate for light or heavy loads. DC power units include one (1) 12V battery and on-board battery charger. Side stabilizers lock lift in place when load is raised above 20½". Rolls smoothly on poly-on-steel wheels. Suffix "SS" stands for stainless steel units. Stainless steel units roll on nylon wheels.

STAINLESS STEEL 12V DC POWERED model L-270-DC-HD-SS

High Lift Trucks

Ideal for skids, baskets, and work applications. Electric pump has chrome plated piston. Features a very steady working platform, minimizing rocking and movement in all directions. Stabilizers positioned at the rear improved balance, making work easier when lifting and working with heavy loads. DC powered with 12V battery and a bench top charger. Individual fork width is 6½".

High Tote Lifter 12V DC STANDARD

A High Tote Lifter is a perfect asset for any food handling atmosphere. The stainless steel construction is easily cleaned due to its smooth finish. An open fork design allows for simple inspection for overall complete hygiene. Products can be raised or lowered by utilizing the 12V DC powered hand pump. When the unit has been raised, it minimizes the amount of bending and twisting that can occur when products are placed in the improper height location. The wheeled scissor base creates a steady base when in position to load or unload merchandise. The overall compact design is easily stored when not in use.

Tote-A-Loads

Designed to lift open bottom skids, boxes, and baskets. The manually operated lift is easy to operate. The foot pump operated lift travels approximately ½" per stroke. To lower unit simply squeeze the bicycle style grip located on the white push bar. The battery operated lift is ideal for positioning products at workstation heights for increased productivity. The up/down lever control is conveniently located on the power unit. DC powered units include one (1) 12V battery, an on-board charger and a battery charge indicator gauge. Polyurethane swivel casters with brake are standard on all units.

Basket & Skid Stackers

Transport open bottom pallets, skids, baskets, and crates with ease. Features an 18" horizontal load center and overall fork width of 26". Units roll smoothly on 8" x 3" swivel phenolic rear casters. Handle height is 40". DC powered units include one (1) 12V battery and an on-board charger. Optional reciprocating air/oil power with foot treadle control available, contact factory.

Reduce worker fatigue and injury with our factory installed Power Traction Drive option. An alternative to costly fork trucks, the PMSS-PTDS-E includes combination throttle / direction and auto reverse emergency "belly" switch. This state of the art option allows a single operator to safely and easily move products. Maximum speed is 2.5 m.p.h. 24V DC system

Pallet Master/Servers

Enables one person to easily move fully loaded pallets without the use of a fork truck. Unique straddle design works well with pallets and skids with and without an understructure. Ideal for loading and unloading semi-trailers. Lowered height is 3". Move the unit around easily on 8" x 3" (8" x 2" locking standard on LL-PMPS) swivel phenolic rear casters. Floor lock standard on PMPS series. Handle height is 36". Outriggers are adjustable on series LL-PMPS. Push buttons to raise and lower lift are located on power unit and hand pendant control on an 8 foot coil cord. All welded steel construction. DC powered units include one (1) 12V DC battery, on-board charger and a battery charge indicator gauge. Optional reciprocating air/oil power available, contact factory.

Reduce worker fatigue and injury with our factory installed Power Traction Drive option. An alternative to costly fork trucks, the PMPS-PTDS-E includes combination throttle / direction controller and auto reverse emergency "belly" switch. This state of the art option allows a single operator to safely and easily move products. Maximum speed is 2.5 m.p.h. 24V DC system.

POWER TRACTION DRIVE SYSTEM, MODEL CB-PMPS-PTDS-E

Counter-Balanced Stackers

Move small loads from one place to another without the need for oversized fork truck equipment. Counterbalance design allows the operator complete access to three sides of the load. The open front enables the forks to be next to workstation for easy loading and unloading. Includes counterbalance. Forks measure 3" wide by 25½" long. Units roll smoothly on 6" x 2" swivel glass filled nylon rear casters. Handle height is 40-13/16". Hand control on coil cord standard. DC powered units include one (1) 12V battery and an on-board charger. Optional rotary air/oil power available, contact factory.

LT-LIGHT-4

LED Pedestrian Warning System

Help reduce accidents with our LED Pedestrian Warning System. (4) 4¾" x 1" high powered yellow LED warning strobe lights can be mounted to a variety of industrial devices in any location for multi-directional visibility. Lights illuminate floor surface to warn pedestrians of traffic. Units are multi-voltage (12V DC - 48V DC) and each light comes with 4½ feet of cord. Warning system includes: (4) LED strobe lights, flasher box, voltage regulator and inline fuse.

MODEL NUMBER	CORD LENGTH	LIGHT SIZE (W x H)	VOLTAGE	WEIGHT (POUND)
LT-LIGHT-4	4½'	4¾" x 1"	12V DC / 48V DC	3

Manual & Electric Stackers

Stackers are designed to meet the most challenging tasks. Ideal for use in various workstation and workplace applications. Maintenance free and easy to use. Full height push handle for easy steering and excellent visibility through welded mesh guard. Suffix AA stands for adjustable forks (works with pallets and skids) while FF stands for fixed forks (skids only).

Manual Hand Winch Stackers feature a heavy duty mast and a unique winch design for easier and safer lifting. Lift and lower by hand winch and steel cable mechanism. 1" lift per handle revolution. Two (2) rigid and two (2) swivel wheels with brakes for easy maneuvering.

Manual Hydraulic Hand Pump Stackers are sturdy and compact to fit through standard doors. Forks are raised by manual hydraulic hand pump operation and released by a lever situated on the handle. 1" lift per handle pump. Two rigid and two swivel wheels standard.

Electric Winch Stackers feature a heavy duty mast and a DC winch for easier and safer lifting. Lift and lower by DC winch and steel cable mechanism. Full height push handle for easy steering and excellent visibility through welded mesh guard. DC winch has one (1) 12V battery. Two (2) rigid and two (2) swivel wheels with brakes for easy maneuvering.

Combination Hand Pump and Electric Stackers

An economical alternative DC powered lift stacker. Ideal for maintenance and commercial applications. This unit can be used as manual hand pump lift or electric powered lift. Ideal when power is not available. High quality hydraulic pump and DC lift system. Compact design and strong steel construction. An economical lift to handle tasks such as transporting dies, molds, and skids. Powered with two (2) 12V AGM batteries. Integral battery charger, battery level gauge, and adjustable lowering speed. All models are easily maneuverable using the standard pull handle. Forks measures 26¾" wide by 42" long. Individual forks are 6" wide.

Model SE/HP-63-AA-AIR requires 80-100 psi factory air supply for operation.

Narrow Mast Stackers with Powered Drive and Powered Lift

Narrow Mast Fully Powered Electric Stackers transport loads throughout warehouse facilities quickly and with less effort. High torque 24VDC drive and lift motor handles heavy-duty jobs. Ergonomic handle features easy-to-operate throttle with infinite adjustment of forward and reverse speeds, lift/lower controls, **proprietary safety-enhancing emergency reverse function**, and horn. Includes an electromagnetic disc brake with automatic dead-man feature that activates when user releases the handle. Powered lifter has two (2) 12V batteries, integral battery charger, and battery level gauge. Stacker rolls smoothly on poly-on-steel steer and load wheels. Features 1.0 KW drive and 2.0 KW lift motor. 3-4 hour operation at full charge - 8 hours when used intermittently.

Proprietary safety-enhancing emergency reverse function

When actuated, the emergency reverse belly switch instantly reverses direction and moves the unit forward (away from the operator) until the switch is released or after five seconds have elapsed. The built-in safety circuit will automatically disable the entire unit if the emergency reverse belly switch is activated for more than 5 seconds after which the unit must be reset to return to normal operating conditions. **This state-of-the-art safety device provides a level of operator protection which is unmatched by any unit on the market today.**

Counter-Balanced Powered Drive Lifts

Counter balance design is ideal for die loading, machine feeding, and for loading and unloading trucks. High torque 24VDC drive and lift motor handles heavy-duty jobs. Ergonomic handle features easy-to-operate throttle with infinite adjustment of forward and reverse speeds, lift/lower controls, **proprietary safety-enhancing emergency reverse function**, and horn. Includes an electromagnetic disc brake with automatic dead-man feature that activates when the user releases the handle. Powered lifts have four (4) 6V batteries (except S-CB-62 & S-CB-118, which uses two (2) 12V batteries), an integral battery charger, and battery level gauge. Stacker rolls smoothly on poly-on-steel steer & load wheels. Features 0.7 KW drive and 2.0 KW lift motor. 3-4 hour operation at full charge - 8 hours when used intermittently. Adjustable forks suitable for different pallets. Individual forks are 3 3/8" wide on series S-CB and 4" on series S-2CB. Overall size is 32¼"W x 78"L on series S-CB and 35½"W x 110"L on series S-2CB. A high level of serviceability simplifies maintenance and prolongs equipment life. Easy access battery compartment simplifies battery maintenance.

Proprietary safety-enhancing emergency reverse function

When actuated, the emergency reverse belly switch instantly reverses direction and moves the unit forward (away from the operator) until the switch is released or after five seconds have elapsed. The built-in safety circuit will automatically disable the entire unit if the emergency reverse belly switch is activated for more than 5 seconds after which the unit must be re-set to return to normal operating conditions. **This state-of-the-art safety device provides a level of operator protection which is unmatched by any unit on the market today.**

Battery options are available; Absorbed Glass Matt, suffix AGM. Batteries are completely maintenance free. Sealed construction eliminates periodic watering and corrosive acid fume spills.

Powered Stacker with Power Drive, Power Lift, & Power Fork Reach

Powered Stacker with Power Drive, Power Lift, and Power Fork Reach is ideal for distribution and shipping facilities. The stacker is equipped with extendable forks, which can be utilized to reach 25" and lift objects in a condensed area where room to maneuver is limited. The stacker is power driven with simple controls that allow for precise positioning of products. Features two (2) 12V batteries with on-board charger. To use, align forks in the desired position and extend the forks to reach the product safely. Once the unit is in place and the product is secured, the stacker can be driven to the preferred workspace.

*UNIFORM CAPACITY WITH FORKS RETRACTED AND EXTENDED AT SPECIFIC RAISED HEIGHT

model AWS-50

Adjustable Height Work Stand

The Adjustable Height Work Stand is ideal for a variety of working capacities such as manufacturing, welding, and aircraft engine repair. The heavy duty steel construction with internal hydraulic jack is designed to work, withstand, and sustain the most substantial of weights during use. Additionally, the 360 degree rotation allows for easy maneuverability and ergonomic constancy to decrease the amount of lifting and turning. A single release lever permits the raising and lowering of platform for perfect platform height.

MODEL NUMBER	PLATFORM DIAMETER	SERVICE RANGE	CENTER LINE CAPACITY	WEIGHT (POUND)
AWS-50	8"	38" TO 54"	600 lb.	154

model PALL-200

Portable Aluminum Load Lifter

Portable Aluminum Load Lifter is durable, lightweight, and constructed of corrosion resistant aluminum. Ideal in shipping and receiving areas to load and unload pallet racking and to move parts. This unit folds up and down for compact storage and easy transportation. Ultra low profile design with ramp is great for appliance, office, and furniture stores. Uniform capacity is 200 lb. Features a foot actuated brake.

MODEL NUMBER	PLATFORM SIZE (W x L)	SERVICE RANGE	LOAD CENTER	STRADDLE WIDTH	WEIGHT (POUND)
PALL-200	17" x 14"	0" to 61"	7"	17½"	105

model KLIFT-220

Fully Portable Aluminum Load Lifter

Ideal for the traveling salesperson as well as service and installation crews. Weighs a modest 59 pounds, yet safely lifts and positions up to 220 uniform pounds. Stores easily in a truck or a car. Rolls smoothly on 4" x 2½" rear swivel casters and 3" x 1" front wheels. The overall size of the unit is 22¾"W x 30¾"L x 55"H.

MODEL NUMBER	PLATFORM SIZE (W x L)	SERVICE RANGE	LOAD CENTER	STRADDLE WIDTH	WEIGHT (POUND)
KLIFT-220	21¾" x 19¾"	6½" to 47"	9¾"	21½"	59

model ULM-WMS-550

Stainless Steel Manual Load Stacker

The Stainless Steel Manual Load Stacker is a great way to transport products in sanitary settings. The compact stainless steel design not only helps transport heavy loads around the work area, but also fits in a compact area for space saving when not in use. The unit is raised manually for a more precise height positioning which diminishes bending and twisting when loading/unloading materials. Due to the cradle design, goods can be placed on the stacker from three sides without the need to change the placement of the stacker. Cradle adjusts in 1" increments up to 16" wide. Rolling casters are attached to provide a smooth transfer of products, while the braking system maintains safety once the unit is in place.

MODEL NUMBER	CRADLE SIZE (W x L)	MAXIMUM ROLL DIAMETER	SERVICE RANGE	CAPACITY	WEIGHT (POUND)
ULM-WMS-550	16" x 16"	24"	5½" to 62"	440 lb.	195

DC Powered Quick Lifts 24V DC STANDARD, OPTIONS BELOW

Quiet, lightweight units transport and position loads quickly with just the push of a button. Battery operated. ½" High density polyethylene platform. 9" horizontal load center. Features low profile design for maneuvering in narrow aisles and confined spaces. Poly casters; two swivel and two swivel-locking are standard on all units with the exception of the PEL-400 units. The PEL-400 comes standard with rigid front wheels and swivel rear wheels with locks. DC system has two (2) 12V AGM batteries and 115V AC on-board charger. Steel units have a baked-in powder-coat finish. A detachable handheld control with coil cord for remote operation is optional. The optional Programmable Height Indexing option allows you to preset multiple working heights at the touch of a button. Custom end attachments available.

Hefti-Lifts

The Hefti-Lift units provide reliable powerful lifting when moving and positioning loads. The manual hydraulic foot pump yields $\frac{3}{4}$ " of platform travel per stroke, auto-shift models feature a two speed foot pump. The units roll smoothly on two (2) rigid and two (2) swivel poly-on-steel casters with foot operated brake. The units are designed of welded steel construction with chrome platform uprights. Each fork is $4\frac{1}{2}$ "W x $2\frac{1}{2}$ "H, the fork length is the same as the platform length. Overall fork width is 22". Not for use with pallets.

Stainless Steel units are compact, lightweight, and capable of turning in a small radius when space is limited. A built-in automatic load check valve is included for improved safety. Model HYD-5-SS features a hydraulic foot pump, while model HYD-10-DA-SS comes with a dual acting manual hydraulic hand pump.

Air Powered units are great in manufacturing or distributing facilities when space is limited. The single speed foot pump and hand held push button control (reciprocating air/oil power) raise forks to the desired location. The foot pump can be utilized to maneuver the table height to a precise position. Air powered units require a minimum hose diameter of $\frac{1}{4}$ " and air pressure of 72 to 100 psi.

DC Powered Hefti-Lifts

DC powered portable hydraulic lifts are user friendly providing reliable, powerful lifting when moving and positioning loads. Ideal for working in confined spaces and eliminates manual handling problems and injuries. Includes removable platform for operations requiring forks. Not for use with pallets. Each fork is $4\frac{1}{2}$ "W x $2\frac{1}{2}$ "H, the fork length is the same as the platform length. Overall fork width is 22". Units roll easily on two (2) rigid and two (2) swivel poly-on-steel casters and include a foot operated brake. All welded steel construction with chrome platform and uprights. Units are powered by one (1) 12V battery. Includes battery charger, battery charge indicator and emergency on/off switch. Attachments available.

304 stainless steel unit are ideal for food, pharmaceutical, chemical and clean room applications. Unit rolls easily on (2) two rigid and (2) two total lock swivel casters.

Lite Load Lifts

Lift and transport loads from delivery trucks to docks or use to inventory storage systems. Operate with either a hand winch or foot pump. The platform lifts approximately 1" per winch rotation or foot pump stroke. Available in steel or aluminum construction. Models with the suffix -FW roll smoothly on 6" x 2" poly-on-poly rear wheels with 2" semi-steel front wheels. Models with the suffix -4SFL have 8" x 2" poly-on-poly rear wheels, four swivel casters, and a hand operated floor lock. Located on the handle are two rollers to ease loading into delivery trucks. Model LLCB-202058 rolls on two (2) front 4" x 2" mold-on-rubber, two (2) back 4" x 1 1/4" hard rubber swivel wheels and a foot operated floor lock. Horizontal load center is 10". Low Profile units have a deck height of 1/4" with 2" high side lips.

Versatile Quick Lifts

An economical alternative DC powered lift. Ideal for light industrial or commercial applications. Features durable belt over pulley design. This lifter has a 60 3/4" high service range and four swivel casters to provide great versatility and convenience. White high density (HDPE) plastic platform is scratch resistant, easy to clean, and retains an attractive appearance. Just 18 seconds for the 55 3/8" platform travel. Top wheels facilitate loading into a pick-up or van. Uniform capacity is 330 pounds. Tool tray and remote battery charger are standard.

Manual & DC Work Positioners

These lightweight lifts are designed to take the strain out of any lifting job. Ideal for use in narrow aisles and confined spaces. Platform height is adjustable with a manual hand winch. An auto brake system allows for controlled lowering. Two (2) 3" swivel load casters and two (2) 5" total locking swivel steering polyurethane casters standard. Quick change attachments available. Model MWP-330-DC-SS is constructed of 304 stainless steel. Includes two (2) 12V AGM batteries with an integral battery charger.

Tiller - Portable Lift Truck

Electric lift truck provides ergonomic solution to heavy lifting problems. Operates like a standard hand truck with power electric lift. After platform raised height reaches 2" the drive wheels engage. Use S the fingertip controls. The 24V DC battery pack will cycle approximately 300 times at full load before a recharge is needed. External 110V AC battery charger is included. Steel construction with painted finish. Capacity is 165 pounds.

Adjustable Box Stacker

The Adjustable Box Stacker is specially designed for transporting, stacking, and lifting plastic crates and similar types of containers. All models are compact and light weight. Both fork width and box clamps are adjustable to fit different size boxes and containers. All box clamps are rubber coated for extra grip. Uniform capacity is 380 pounds.

MODEL NUMBER	FORK LENGTH	SERVICE RANGE	OPERATION	WEIGHT (POUND)
ABS-130 [⊕]	19½"	2¾" to 42¼"	FOOT PUMP	210

Hand Winch Lift Trucks

Compact lift trucks are designed to lift material to and from shelves, move office equipment, and install ceiling/wall appliances. Constructed of durable steel and aluminum. The rugged 4" wide by 1 3/4" thick steel forks measure 22" long (20 1/2" O.D.). Operated by a hand-crank winch that features a reversible handle and a hold-down device for securing the carriage during transport. Forks raise 1" per complete hand crank rotation. The non-adjustable forks can be inverted to provide different height ranges. Two (2) non-marking rear wheels, two (2) front swivel casters.

Optional aluminum ladder can be retrofitted or ordered with A-LIFT. Ladder retracts into unit upright when not in use. Model A-LIFT-LAD is 20 1/2"W x 57 1/2"H, while model A-LIFT-EHP-LAD is 20 5/8"W x 69 1/2"H with 11 3/4" rung spacing. Ladder capacity is 250 pounds.

Hydra Carts

Transport loads in the lowered position and maneuver work materials to an ergonomic height. Ideal in compact work areas. Safe and easy one person handling of loads up to 1,000 pounds. An efficient way to unload heavy objects from semi trailers. Rugged steel construction for years of service. Dependable precision built hydraulic system is activated by easy action foot lever. Additional rollers on the handle make loading into a delivery truck easy. Steel construction. Approximately 1" of lift per pump. HYDRA-HD has (2) two swivel casters with brakes. Units come standard with a single wheel brake.

Spring Scissor Tables

Spring Scissor Tables are ideal for distributing and shipping facilities. The unit allows the user to transfer products from work space to work space, while holding an ergonomically friendly position. The frame is designed of a steel construction, which allows for strength and durability. Uniform capacity is 400 to 4,500 pounds. The scissor mechanism raises the unit to the desired height, while the internal spring provides support when unit is being loaded and unloaded. Service range is 9" to 27³/₄". The 43³/₈" diameter top can be manually rotated 360 degrees for improved packaging and handling capabilities. Base size measures 36"W x 36³/₄"L with 6³/₄"W x 1¹/₂"H fork pockets.

Model SST-45-PSS is constructed of partially stainless steel base frame, spring, legs. Model SST-45-PSS-ST is constructed of partially stainless steel as above and a solid top.

Auto-Hite Carts

The Auto-Hite Carts raise or lower as materials are removed or added to the platform, keeping material at an ergonomic work height. Increase efficiency, while reducing potentially harmful bending and twisting motions. Carts utilize tension springs, which can be adjusted in order to fit each particular application. All steel construction with removable handle. Polyurethane casters are 5" x 2", two (2) rigid and two (2) swivel with brake. *Approximate ratio.

STATIONARY KIT OPTION, model SCSC-SL5-MF

Self-Elevating Lift Carts

Automatic height adjustment provides ergonomic work positioning to increase productivity and decrease work related repetitive motion injuries. Model SCSC-400-2032 has one spring, while the SCSC-800-2040 has two springs. Heavy-duty steel construction with removable bolt-on handle. Two (2) rigid and two (2) swivel 5" x 1" poly-on-poly casters with brake standard.

MODEL NUMBER	PLATFORM SIZE (W x L)	UNIFORM CAPACITY	SERVICE RANGE	OVERALL SIZE (W x L x H)	WEIGHT (POUND)
SCSC-400-2032	20" x 32"	400 lb.	13 ³ / ₄ " to 30 ³ / ₈ "	19 ³ / ₄ " x 40" x 30 ¹ / ₂ "	213

Self-Elevating Spring Tables

Designed to automatically raise or lower as materials are removed or added to the platform, keeping material at an ergonomic work height. Increase productivity, while reducing potentially harmful bending and twisting motions. The counter balance springs can easily be added or removed to adjust weight-to-height sensitivity. This feature allows the user to conveniently set the table to fit each application. The ETS-230/460 has poly-on-poly casters, while the ETS-840/1120 rolls smoothly on mold-on-rubber casters.

MODEL NUMBER	PLATFORM SIZE (W x L)	UNIFORM CAPACITY	SERVICE RANGE	CASTER SIZE	OVERALL SIZE (W x L)	WEIGHT (POUND)

Linear Actuated Elevating Carts 24V DC STANDARD

Transport materials from workstation to workstation with ease. Platform is raised and lowered with an electric linear actuator for precise positioning. Linear actuator will not allow platform to drift down - a common problem with hydraulic carts.

Model *CART-400-LA* & *CART-400-D-LA* are powered with (2) 12V AGM batteries and features a bench top charger. Emergency stop button on control box is standard.

Model *CART-500-LA* & *CART-500-LA-PSS* is powered with lithium battery and features an on-board battery charger.

Adjustable Pallet Stands

The Adjustable Height Pallet Stands are designed to manually adjust to three different ergonomic working heights. Unit includes a three position manual adjusting bar with spring assist to help raise and lower the deck. The Pallet Stand must be empty when adjusting the height. Unit is welded steel construction with baked-in powder-coated tough finish. The optional bolt-on manual carousel, suffix CA, is 40" in diameter by 2" tall and rotates 360°. The caster feature, suffix CK, consists of 6" x 2" glass-filled nylon two (2) rigid and two (2) swivel casters with brake.

PS-RF-CK	Casters to retro onto existing pallet stands						57

Die Tables

Designed to reduce back injuries and cumulative trauma disorders. Lifts heavy equipment to ergonomic working height. Manually operated hydraulic foot pump and lift cylinder. All welded steel construction will provide years of service and hard work. Small frame size allows unit to access hard-to-reach locations. Two (2) rigid and two (2) swivel casters with side brake standard. Suffix "C" stands for chrome top platform on foot pump operated models.

Air Hydraulic Post Tables

Air Hydraulic Post Tables are great in manufacturing or distribution facilities when space is limited. The single speed foot pump and hand held push button control (reciprocating air/oil power) raise platform to the desired location. The foot pump can be utilized to maneuver the table height to a precise position. The unit requires a minimum hose diameter of 1/4" and air pressure of 72 to 100 PSI.

MODEL NUMBER	PLATFORM SIZE (W x L)	SERVICE RANGE	UNIFORM CAPACITY	WEIGHT (POUND)

Linear Actuated Post Table

The Linear Actuated Post Table provides an economical option to industrial and commercial applications. The table can be maneuvered to a precise position during raising and lowering. The linear actuator does not allow the table to drift down during use. Powered by one (1) 12V DC battery and features an on-board charger and rolls on two (2) rigid and two (2) swivel casters with brake. The hand held pendant control connects to the power unit with a six foot coil cord for easy use when distance from the unit is required. An emergency stop button is standard on the hand control.

MODEL NUMBER	PLATFORM SIZE (W x L)	SERVICE RANGE	UNIFORM CAPACITY	WEIGHT (POUND)
HT-02-1616-LA	16" x 16"	31" TO 49"	200 lb.	126

Mechanical Post Tables

Adjustable height portable tables are well suited for a wide variety of material handling applications. Moves smoothly on two (2) rigid and two (2) swivel 5" x 2" poly-on-steel casters with floor lock standard (Floor lock not included on AC & DC units). All welded steel construction (1/4" deck) is blue. Provides positive height adjustment without downward drift. Features a two-speed manual gear mechanism to move heavy loads at 1/8" per crank rotation or lighter loads at 5/16" per crank rotation.

Long Deck Carts

The Long Deck Carts are perfect for sheet and strip handling, ergonomic load positioning, and handling long awkward material loads. Platform height is adjusted with manual hydraulic foot pump. Structural steel base helps to distribute the load evenly. Unit comes standard with four (4) swivel 5" x 2" poly-on-steel casters and dual floor locks. (1/4" thick deck)

Battery Transfer Platforms

Battery Transfer Platforms are designed to load, unload, and transfer fork truck batteries. Features roller deck for easy battery movement. Front locking safety tabs to secure battery in cart. Welded steel construction with baked-in powder-coated toughness. Cart capacity is 4,000 lbs. and the winch capacity is 1,200 lbs. Models BTC-PJ and BTC-PJ-WINCH are to be used with pallet trucks, sold separately, page C40. Models BTC-CART and BTC-CART-WINCH include casters for portability. Not pallet truck accessible, but can be lifted with a fork lift. Optional winch attachment, model BTC-WINCH, can be installed easily to either BTC unit with the supplied hardware. The manual winch is designed to pull battery out of fork truck.

Hydraulic Post Tables

Hydraulic Post Tables are ideal in material handling facilities. The unit can be of use in a variety of environments from lifting dies and castings to moving machine parts. The corner posts are telescoping to help stabilize and fully support the load during operation. The tables roll smoothly on two (2) locking swivel casters with brakes and two (2) rigid. The tables can be lifted/lowered with a single speed foot pump, two-speed foot pump, or a two speed auto shifter that automatically shifts when the table is loaded. DC units include one (1) 12V battery to raise and lower the platform. They also include a battery, on-board charger, and a hand control on an 8 ft. coil cord. *PP stands for poly-on-poly casters. PS = poly-on-steel casters. PP = polypropylene casters. Model HT-02-1616A and HT-03-1616A includes a platform that swivels 360° for use as a turntable. Model HT-02-1616A, HT-03-1616A and HT-05-1818A standard with a removable rubber platform cover. Partially Stainless Steel Post Tables feature a zinc plated pump assembly and leg posts while the platform, base frame, handle, casters rigs, and hardware are stainless steel.

Mechanical Scissor Carts

Raise and lower material quickly and easily with Mechanical Scissor Carts. Carts roll smoothly on two (2) rigid and two (2) swivel with lock poly-on-poly casters. Mechanical screw drive provides precise positioning with no downward drift. The partially stainless steel cart features a stainless steel platform, frame, handle, caster rigs, and hardware. Crank assembly and scissor legs are zinc plated/painted.

Scissor Carts with Built-In Scale

Ideal for parts counting, inventory rooms, or shipping weights at the loading dock. Provides an ergonomic workstation, while sitting or standing. Scale accuracy is 0.1% of the applied load. Partially stainless steel carts are available. The platform, frame, handle, caster rigs, and hardware are all stainless steel. Pump assembly and scissor legs are zinc plated. Wheels are poly-on-poly.

Premium Scissor Lift Carts

Constructed of heavy duty steel and designed to withstand the most demanding industrial environments. Ideal for lifting and transporting loads, order-picking, die handling, and for use in support of assembly operations. Little exertion is required to raise and lower the deck with the high quality, foot-actuated, single-speed hydraulic pump. The hydraulic system is equipped with an overload protection valve. The hand operated carts have safety stops to prevent an empty deck from lowering while performing maintenance. The foot operated carts have a unique tilt-up table top that allows for safe and easy maintenance. Two (2) rigid front casters and two (2) rear swivel polyurethane casters with brake provide a high degree of maneuverability; each swivel wheel is protected by guards and is equipped with brakes.

Low Profile Scissor Lift Cart

Manual two speed foot pump, doubles up the lifting speed when pedal is turned to the left. Equipped with speed control valve. Prevents the table from moving downwards at a fast speed. Hydraulic pump pedal makes operation easier. Equipped with a built-in automatic load check valve. Simple design, powerful parking brake, and compact with small turning radius.

Stainless Steel Scissor Carts

Our fully welded Stainless Steel Scissor Carts resist corrosive and wet environments. All parts are made from 304 grade stainless steel, including the hydraulic pump and foot pedal. These carts are suitable for most food, medical, and pharmaceutical industries. Also suitable for wash-down applications. Two (2) rigid and two (2) swivel polyurethane wheels with brakes standard. Units feature a high quality actuated, single-speed hydraulic pump. Models CART-550-SS and CART-1100-SS, two-speed hydraulic pump.

Foot Pump & DC Powered Scissor Lift Tables

Foot Pump Scissor Lift Tables are used by all types of manufacturing and warehousing facilities. Features torsion tubes for side to side stability, pressure flow control valve for controlled lowering, and foot pump. Rugged welded steel construction. Painted blue finish.

DC Scissor Lift Tables utilizes (1) 12V battery. On-board charger and battery charge indicator included. Power options are located on page 108.

Pneumatic Tire Elevating Carts

Pneumatic Tire Elevating Carts are designed to be used at nurseries, gardens, construction sites, and gravel pits. Large front and rear pneumatic tires allow for movement over most surfaces. Great for moving loads over terrain. These carts minimize operator bending and lifting. Hydraulic system includes a soft-lowering down valve. Little exertion is required to raise and lower platform. The simplicity and compactness of these carts make them ideal for lifting and transporting loads. Rugged welded steel construction. Baked-in powder-coated toughness.

Hydraulic Elevating Carts

Hydraulic Elevating Carts are well suited for manufacturing and distributing industries. Material can be easily loaded onto a cart from a table, lowered to safe transporting height, and raised to unload at a destination. Foot pump includes a soft-lowering down valve for precise positioning and the perfect ergonomic height. The unit rolls on (4) polyurethane casters; two (2) swivel with brakes and two (2) rigid. The tables can be raised and lowered with a single speed foot pump, two speed foot pump or a two speed auto shifter that automatically shifts when the table is loaded. Steel construction with chrome platform and handle on all models, except model CART-200-ALUM which includes an aluminum platform surface. Power options are located on page 108.

Auto-Shift Hydraulic Elevating Carts

Auto-Shift Hydraulic Elevating Carts minimize worker bending and lifting through its ergonomic design and portability. Material can be easily loaded onto a cart from a table, lowered to a safe transporting height, and raised to unload at destination. The two (2) speed auto-shift foot pump includes a soft-lowering down valve. The unit moves easily on four (4) polyurethane casters; two (2) swivel with brakes and two (2) rigid. Model CART-550-AS # of strokes without weight is 13 and with weight 25. Model CART-1000-LD-AS # of strokes without weight is 15 and with weight 62.

12V DC POWER

DC Powered and Manual Scissor Carts

Tables provide unparalleled ergonomic support in lifting, palletizing, loading, and unloading applications. Carts are raised or lowered with either a 12V DC powered motor or a manual two-speed auto shift foot pump. Units roll smoothly with two (2) rigid and two (2) swivel 4" x 2" phenolic casters with brakes. Push handle is removable. Internal DC powered electric motor and one (1) 12V battery is included on DC units. Built-in battery charger is included (115V AC power). Push buttons to raise and lower lift are located on the power unit. Hand control on coil cord is also standard. Platform is equipped with perimeter pinch-point guard for OSHA compliance. Baked-in powder-coated toughness. See more units on page 452.

24V DC STANDARD

Powered Drive and Powered Lift Hydraulic Scissor Carts

Fully powered carts provide users with motorized variable-speed travel, as well as powered lifting capability. Carts roll smoothly and quietly on low-friction pneumatic and poly-on-steel wheels. High torque 24V DC drive and lift motors handle heavy-duty jobs. Standard features: easy-to-operate throttle that adjusts forward and reverse speeds over a range of 0-3.7 mph, deck level control buttons (raise and lower), emergency reverse function, automatic braking, horn, key switch, integrated battery charger, and battery charge indicator. These carts use two (2) 12V batteries.

Traction Drive Electric Hydraulic Elevating Carts

The Traction Drive Electric Hydraulic Elevating Carts make maneuvering heavy loads virtually effortless. A twist style throttle with reverse facilitates the maneuverability of this cart. The push of a button will raise and lower the platform. Includes two (2) 12V battery system with a 115V AC on-board charger and battery charge indicator. Standard features include: powered front industrial 6" x 2" poly-on-steel drive wheels. Power options are located on page 108.

Lift & Tilt Carts with Sequence Select

Models **CART-500-LT**, **CART-1000-LT**, and **CART-1000-LT-PSS** have a unique design which allows the user to RAISE and TILT materials to an ergonomic position for better posture and operator comfort. The manual hydraulic foot pump controls the platform lift, lower, and tilt. A manual selector valve is used to control the lift/lower sequence independently from the tilt sequence. The platform includes a 6½" high retaining lip on model **CART-500-LT** and 7" high on **CART-1000-LT** series. Rolls on two (2) rigid and two (2) swivel 5" poly casters.

Models **CART-400-LT** and **CART-600-LT** are elevated by means of a foot actuated hydraulic cylinder. As the table is raised, it simultaneously tilts to an angle of 45° at full elevation. Built-in retaining lip keeps containers in place. Units roll on 5" polyurethane casters, two (2) rigid and two (2) swivel with brakes.

MODEL NUMBER	PLATFORM SIZE (W x L)	UNIFORM CAPACITY	MAX. TILT	SERVICE RANGE	WEIGHT (POUND)

Conveyor with Retractable End Stops

Provide smooth and easy flow from cart to workstation. Attaches to any scissor table, cart, or work bench with a deck length of 32". Allows you to position objects easily. Features retractable end stops so items won't slide off during transit. Ideal for use at feed tables for sheet metal working machines, press brakes, and machine centers. Adds 3¾" to lowered and raised height of cart. Fits model CART-750-TS and CART-1000-TS.

Expandable Roller Conveyors

Expandable Roller Conveyor is the perfect asset for packaging and distributing facilities. The conveyor provides the user an ergonomically friendly way to transfer goods while minimizing the bending and twisting during shipping and handling. A strong construction provides strength for transferring large awkward products. The conveyor can be expanded to reach greater distances between packaging points. Once finished it can be retracted to fit in a condensed area.

Full Featured Pallet Trucks Ships with the Handle Detached Standard

An economical way for one person to move heavy pallet loads without the use of a fork truck! Includes two articulating steering wheels and two front load rollers. Ergonomic design requires only 75 pounds of pulling force when fully loaded. Steering wheels include bearing dust covers for added life. Nose wheels are located on the front edge of each fork to assist in clean pallet entrance and exit. Reinforced triple-formed steel forks provide twice the strength of standard single-formed forks. Forks are 7" wide each (model PM10-2245 are 8¼" wide). Equipped with internally mounted solid steel adjustable push rods. Spring loaded handle automatically returns to vertical position when not in use. Hydraulic pump design facilitates easy-access seal replacement. Chrome-plated hydraulic pump piston for long seal life.

Model PM5-2748-FP raises and lowers with a foot pump mechanism.

Ergonomic Power Assist Pallet Trucks

Anyone who has operated a fully loaded pallet truck knows the most strenuous part is getting the wheels rolling. These Pallet Trucks solve the back breaking problem.

Model PM5-2748-PA-Y: Pumping the handle of the pallet truck serves two purposes. First, it serves the traditional purpose of lifting the forks. Secondly, the travel direction is selected. By squeezing the hand-grip and pumping the handle, the truck will move in a reverse direction. When the hand-grip is in the downward position, raising the handle will propel the truck to move in a forward direction (direction of the forks), thus reducing the pushing/pulling force.

Model PM5-2748-ER-Y: Once powered drive is engaged by oscillating handle up and down, the truck accelerates with a minimum of operation force. Ideal in confined spaces making horizontal transportation of heavy loads easy and safe.

MODEL NUMBER	UNIFORM CAPACITY	OVERALL FORK SIZE (W x L)	SERVICE RANGE	WEIGHT (POUND)
PM5-2748-PA-Y [Ⓢ]	5,000 lb.	27" x 48"	3" to 7 ¹ / ₂ "	220
PM5-2748-ER-Y [Ⓢ]	5,500 lb.	27" x 48"	2 ⁷ / ₈ " to 7 ³ / ₄ "	265

Pallet Trucks with Digital Scale

The Pallet Truck with Digital Scale allows you to weigh your load on the spot for maximum efficiency. The frame uses heavy-duty steel construction for maximum strength and durability. This model is very user friendly and is suitable for low height lifting. The built-in scale allows you to weigh your load as you are handling it. The scale is selectable in a variety of increments to adjust to the size of your load. It has keyboard calibration and functional setup with automatic zero capabilities. Digital filtering is used to help compensate for vibration and motion to make the Pallet Truck with Digital Scale smooth and accurate. Scale accuracy is +/-0.1% of the applied load. Forks are 7" wide each. Factory calibrated for shipping destination. AC adaptor included.

NTEP Pallet Trucks are approved legal for trade, certified for commercial transactions, and are supplied with certificate of compliance.

Stainless Steel Pallet Trucks

Stainless Steel Hydraulic Hand Pump Pallet Jacks are a superb addition to the food handling and other hygienic environments. The stainless steel construction is not only strong, but also simple to clean with its open fork design for thoroughly detailing the unit before/after transferring products. 304L Stainless Steel construction, including hydraulic cylinders as well as the piston. The height of the ergonomically friendly handle diminishes slouching and can be rotated for simple maneuvering of products down narrow corridors and pathways. All bearings are sealed for waterproof protection during both use and cleaning.

ADJUSTABLE model PJ-2001

Pallet Jockeys for "Walkie" Trucks

The Pallet Jockeys are simple devices that allows drivers and warehouse personnel to efficiently unload sideways pallets with their "Walkie" powered pallet trucks without wasting valuable time and resources. Maximum capacity is 4,000 pounds.

The Non-Adjustable unit is ideal for warehouse distribution centers that have one particular electric pallet truck model. To use, simply place the Pallet Jockey hooks into the fork wheel openings. Fits popular sizes of walkie trucks (verify your fork width and end of fork dimensions) and our electric pallet truck, model EPT-2547-30.

The Adjustable unit is designed to fit various types of electric pallet jacks. To use, simply loosen wing bolts and slide adjustable brackets to proper slot, then tighten wing bolts.

Roller Work Positioner

The Roller Work Positioner is a wonderful addition to material handling and shipping facilities. The positioner allows the user to transport heavy large rolls of material with ease. The simple cradle design of the platform prevents any movement during transporting. A foot pump operation give the user the ability to adjust the height to an exact measurement for smooth loading/unloading. The attached handle stands at an ergonomic height to diminish the chance of bending during operation. For best use, simply slide the product onto the cradle platform and use the foot pump to adjust the height that best suits the environment.

Roll Lifters and Transporters

Roll Lifter and Transporters allow single users to maneuver heavy duty rolls onto the lifter and then directly onto the printer feeder. Extended nylon strap provide leverage to help guide the roll into the trough and ensure materials are secured for transport. Concave trough design of the media tray stabilizes rolls for transit. Foot pump allows for smooth and effortless lifting. Heavy duty swivel casters allow users to maneuver through standard doors and narrow passages. Maximum roll diameter is 15¾".

Stainless Steel Hydraulic Foot Pump Roll Handler

A Stainless Steel Hydraulic Foot Pump Roll Handler is great for an assortment of areas including the food handling service industries. The design is sleek, smooth, and easily washable for before and after use in hygienic areas. The raising and lowering of the platform to the precise position is made easy by the hydraulic foot pump design, which diminishes needless bending when loading/unloading material. A rounded handle style allows for a proper two handed grip when maneuvering around work areas, while the perfect open cradle platform lets the user load material from three sides. Cradle adjusts in 1" increments up to 16" wide. The handler rolls smoothly on four swivel casters with two attached rear brakes for safe functionality when in a resting position.

Recyclable Pallet Truck with Galvanized Pump

The innovative recyclable pallet truck has high strength and low environmental impact. For use with cargo handling, logistics, warehouses, supermarkets, or anywhere a pallet truck is needed. Light, quiet, maneuverable, and innovative. 1-ton is the only lifter in the world made with the aid of non-metallic materials. This truck is based on the most modern technologies and provides stiffness and strength. The recycled polymer offers the following benefits; lightweight, no permanent deformation, use in wide range of temperatures, surface integrity even in the presence of corrosive agents. Individual fork width is 6½".

PMC-PPM-2045-G	2,200 lb.	20½" x 45"	3¾" to 7⅞"	131

Electric Pallet Truck

Designed to make the operator's task extremely easy. This truck combines the compactness and versatility of a hand pallet truck with the ergonomics of an electric pallet truck. It is suited for moving loads in confined spaced where larger electric pallet trucks will not fit. Overall dimensions are 20" x 60", with a turning radius of only 50". Individual fork width is 6½". Machine's stability is guaranteed by the lateral stabilizing wheels. Ergonomic handle offers ease of use with battery charge LED indicator. Features "Tortoise" push button for slow motion and a safety punch button with warning buzzer. Utilizes (2) two 12V batteries.

Stainless Steel Electric Pallet Truck 24V DC STANDARD

The Stainless Steel Electric Pallet Truck is an ideal supplement to food service and other sterile settings. The stainless steel construction provides not only a strong structure for transferring heavy loads between work areas, but is also easily washable. An enclosed shelter for electronic components that is simple to access for general upkeep, while the humidity resistant electronics are great for working in difficult conditions. The adjustable height handle with built in horn helps maintain an ergonomic posture of the user during use. The emergency stop is perfectly located near the driving position of the unit for a rapid shut-down in the case of a crisis. During use the unit maneuvers efficiently on its waterproof roll wheels. 304L Stainless Steel construction, including hydraulic cylinders as well as the piston. (316 Stainless Steel is an option, contact factory for pricing). Battery is 24V.

MODEL NUMBER	UNIFORM CAPACITY	OVERALL FORK SIZE (W x L)	SERVICE RANGE	WEIGHT (POUND)
ULM-EPT-2745-44	4,400 lb.	27" x 44½"	3¾" to 7⅞"	1130

Electric Pallet Truck 24V DC STANDARD

The Electric Pallet Truck's compact, smart, and light weight design is suitable for a variety of low duty applications in warehouses or delivery applications. Low service weight is ideal for tail lift use. Designed for downtown deliveries. It has a low noise, high quality, Italian drive motor. Robust design. All parts are easily accessible and easy to maintain. Non-marking rubber drive wheel gives better traction. It is equipped with two (2) powerful 45Ah maintenance free AGM batteries. Battery pack is interchangeable for continuous usage. Optional battery packs are available. Fast and easy battery exchange. Storage bins included on both sides of the truck. Effortless operation and low turning radius. Ergonomic tiller with battery indicator.

MODEL NUMBER	UNIFORM CAPACITY	FORK SIZE (W x L)	SERVICE RANGE	OVERALL SIZE (W x L x H)	WEIGHT (POUND)
EPT-2748-26	2,600 lb.	27" x 48"	3.2" to 7.8"	27" x 69" x 51"	375

Fully Powered Electric Pallet Trucks 24V DC STANDARD

Fully Powered Electric Pallet Trucks for easy and quick operation. Raise and lower loads with a push of a button. Maneuvers loads in warehouses and trailers. Reinforced welded forks with adjustable tie-rods give long service. High-torque 24V DC drive & lift motors handle heavy-duty jobs. Ergonomic handle features easy to operate throttle with infinite adjustment of forward and reverse speeds, lift/lower controls, **proprietary safety-enhancing emergency reverse function**, and horn. Includes an electromagnetic disc brake with automatic dead-man feature that activates when the user releases the handle.

3,000 and 3,300 pound units use two (2) 12V batteries, integral battery charger, and battery level gauge. The truck rolls smoothly on poly-on-steel steer and load wheels. 3-4 hour operation at full charge - 8 hours when used intermittently.

4,500 pound unit uses four (4) 6V batteries, integral battery charger, battery level gauge, and emergency battery disconnect. The truck rolls smoothly on poly-on-steel steer and load wheels. Features 1.2 KW drive and 1.3 KW lift motor. 6-7 hours operation at full charge - 8 hours when used intermittently.

When actuated, the emergency reverse belly switch instantly reverses direction and moves the unit forward (away from the operator) until the switch is released or after 1.5 seconds have elapsed. The built-in safety circuit will automatically disable the entire unit if the emergency reverse belly switch is activated for more than 1.5 seconds after which the unit must be re-set to return to normal operating conditions. **This state-of-the-art safety device provides a level of operator protection which is unmatched by any unit on the market today.**

Ergonomic Worker Seats

Ideal for any industrial environments. The CPRO-100, CPRO-200, CPRO-600, and CPRO-600S models are adjustable in 2" increments from a low crouch to a standing position with the simple cross bar attachment design. The units are constructed with four rubber "shocks" under the seat base which allows the seat to tilt forward, left, and right so it can accommodate our body movements and a more natural posture position. Additionally the CPRO-600S model features a swivel seat for added maneuverability. The CPRO-100 includes casters for portability from work station to work station.

The CPRO-800LP model is not only convenient but easy to use. Simply unfold the rear legs and slide the contoured padded seat to the desired ergonomic height using the infinite adjustment for optimum work posture. Folds up to a 4" profile for easy portability and storage.

Folding Arm Chair

The Folding Arm Chair is ideal for a variety of industrial environments. The lightweight steel construction with a powder coat finish is durable and easily moved from area to area. The unique folding design features an integral arm support system that offers assistance while transitioning from a sitting to standing position. To fold, simply push the front of the seat up and back, while the unit collapses onto itself. The unit includes vinyl cushioning for comfort, plastic caps on the steel legs to protect against floor damage, and is self-standing when folded for areas of limited storage space. Color is black.

MODEL NUMBER	IN USE SIZE (W x L x H)	FOLDED SIZE (W x L x H)	UNIFORM CAPACITY	WEIGHT (POUND)
FAC-260	20½" x 18" x 28"	20½" x 9" x 33¼"	220 lb.	18

Assembly Chairs

High quality durable seating is ideal for production lines, workstations, and industrial/commercial environments. Pneumatic seat height adjustment. Easy to clean seats. The ergonomic style of model WSS-60-N features a five foot pad design and a 14" wide by 13½" depth seat. The worker stool, model WLPS-2, has a soft foamed polyurethane seat with a five foot pad base design with casters and a 13½" depth seat.

WLPS-2 [Ⓢ]	15" to 20"	300 lb.	15

model WSS-60-N

model WLPS-2

Back Support Cushion

There is more stress placed on the lower back than on any other part of the body. Provides support for the lower back to relieve and prevent back pain and fatigue. The S-shaped frame comfortably conforms to the natural S-curve of the spine to guide the back into correct alignment and promote proper sitting posture. Lightweight and portable. Designed for use in any seat; in the office, vehicle, fork truck, or at home. Model BACK-COMBO attaches with hook and loop type fasteners.

Ergonomic Pack Carrying Belt

The Ergonomic Pack Carrying Belt provides back support and an extra hand when carrying loads. The most ergonomic position to carry a package is with both hands. However, often an application requires a worker to open doors or distribute material while carrying a load. This can lead to awkward, stressful, and potentially damaging situations. These sturdy belts allow workers to rest the container on the adjustable holder at their waist freeing a hand for use while keeping the load at an ergonomic position close to the body. The comfortable belt utilizes dual straps and strong plastic buckles.

Plastic Floor Grid

Ideal for storing product at an elevated height above cold and damp floors. Alternatively used as an ergonomic work surface to provide an anti-fatigue worker friendly environment. Snap together, abrasion resistant "GRID" sections are ideal for wet floors such as paint booths, car washes, or general work areas. Lightweight units are only 2 pounds per section. Easy to attach, no hardware necessary. Sold 15 per box.

HOW TO ASSEMBLE

Add-A-Levels

Raise workers to an optimum ergonomic height. Constructed from a heavy-density polyethylene resin which is 100% recycled. The flow-through grid design permits liquids and small scrap to drain away. Also good for use as storage platform to keep products off wet floors. Add-on units come standard with vertical connectors to allow units to be stacked and locked together. Many different configurations available, contact factory.

Electric Order Pickers 12V DC STANDARD

Model EOP-440: Reduce strain, while increasing safety and productivity during repeated order picking applications. Manually pushed unit is easy to position with its 6" x 1½" poly-on-poly casters two (2) rigid / (2) two swivel. The lift operates with one (1) 12V DC battery and includes an on-board charger.

Model EOP-500: All steel, manually-propelled EOP-500 allows personnel to access material stored in elevated locations faster, safer, and more efficiently than traditional means. Includes bubble levels for proper leveling and safety stops to mechanically prevent the platform from lowering during maintenance. Designed to maneuver in tight spaces and to provide simple, push-button elevator activation. Manual platform emergency lowering valve and slip-resistant deck standard. Rolls on 8" polyurethane swivel and fixed casters. Lift time loaded is 20 sec. / unloaded 14 sec. Includes one (1) 12V battery.

ERGONOMIC ANTI-FATIGUE MATTING

Posi-Crank Worker Platforms

With a simple turn of a crank, the Posi-Crank Worker Platform height may be adjusted to the optimum ergonomic level suitable for each operator. The Posi-Crank incorporates the use of ACME threaded rods and a series of gears for simple yet effective height adjustment. The crank handle may be removed for maximizing the operating space. The deck is constructed of steel tread plate for better traction.

Fork Truck Jacks

Manual Hydraulic Fork Truck Jack

Designed to raise your fork truck for maintenance. Features high-quality seals, chrome plated internal components, and rugged steel construction. Maximum lift of 16" provides room needed to perform a variety of repairs. Manually raised by hand pump lever. Removable handle and compact size makes it easy to maneuver and transport. Includes two jack stands (13 ton capacity per pair) with holding pins for adjustable heights.

Air Powered Fork Truck Jack

Air-assist motor quickly raises saddle to lift point and then lifts load to desired height. Air powered for quick and easy operation. Uses standard coupler hook-up to a shop air compressor with air regulator control lever handle. Pressure relief valve is located on top of handle for metered control and load height adjustment.

Mechanical Machinery Jacks

Mechanical Machinery Jacks are good for repairing vehicles, lifting trucks, railway maintenance, construction, mining, and agriculture. Compact design with collapsible lever offers easy operation and simple maintenance. A self locking, anti-kickback operating lever reduces injuries. Standard features include: folding handle, two carrying handles, and a large base plate. Lifting and lowering speed is controllable. No seals to leak. Will not drift down even after an extended period of time.

Linear Actuated Adjustable-Height Work Bench

Increase productivity by allowing the body to reposition to a more comfortable position. The Linear Actuated Adjustable-Height Table allows anyone, regardless of their height, to easily use the table as a workstation or desk. Cantilever design optimizes foot, knee, and leg room. The 36" wide x 36" deep platform is large enough for small parts assembly and will hold up to 500 pounds evenly distributed. A hand-held raise and lower control is attached to the understructure of the table; no more misplacing the remote. Durable hardwood platform standard. Powered with lithium battery and features a battery charger.

Low Profile Stretch Wrap Machine **115V 1-PHASE STANDARD, OPTIONS BELOW**

The Low Profile Stretch Wrap Machine features a thin-spin carousel with the added benefit of a stretch wrap machine with powered rotation. The rotation is controlled by a foot switch, while the power input has a variable AC motor that allows adjustable deck speed and includes soft-start/stop. RPM is variable from 3 to 12. The loading and unloading is possible by the use of a manual or powered pallet truck. The unit has a built-in perimeter ramp and comes standard with a manual stretch wrap mast. The film-wrap tension is controlled with an adjustable, friction-brake assembly. Film placement is controlled manually by moving the carriage assembly up and down on the vertical mast. An easy-to-release, hand operated carriage-brake allows the carriage to move freely, making film application fast and easy. Optional 115V, 1-phase AC powered mast option (PMO) includes hand control with up and down buttons. Maximum load is 64¹¹/₁₆" in diameter (wrap height is 83¹/₄" high).

Powered Stretch Wrap Machines **115V 1-PHASE STANDARD, OPTIONS BELOW**

Powered Stretch Wrap Machines increase productivity in the shipping department or at the end of a production line. This unit is complete with a powered turntable (RPM is variable from 3 to 12) and counter-balanced stretch film mast. This Stretch Wrap Machine is easy to operate, depress the foot pedal and manually move the mast up and down. The film-wrap tension is controlled with an adjustable, friction-brake assembly. Film placement is controlled manually by moving the carriage assembly up and down on the vertical mast. An easy-to-release, hand operated carriage-brake allows the carriage to move freely making film application fast and easy. The system will accept 10 (in.) to 20 (in.) material. The unit ships with mast disconnected to connect raise mast and clamp into place. The standard manual film wrap delivery can be upgraded to 115V, 1-phase AC powered mast option (PMO). The hand held control is used to raise/lower the film. The foot control is used to operate the turntable. Optional Approach Ramp allows the operator to load and unload the machine with a pallet truck.

Medium Duty Powered Stretch Wrap Machines

Our Medium Duty Powered Stretch Wrap Machines offer the same great features as our standard duty machines in a 5,000 pound capacity unit. Complete with a powered turntable (RPM is variable from 3 to 12) and counter-balanced stretch film mast. To operate, depress the foot pedal and manually move the mast up and down. The film-wrap tension is controlled with an adjustable, friction-brake assembly. Film placement is controlled manually by moving the carriage assembly up and down on the vertical mast. A hand operated carriage-brake allows the carriage to move freely making film application fast and easy. The system will accept 10 (in.) to 20 (in.) material. The unit ships with mast disconnected—simply raise mast and clamp into place.

The standard manual film wrap delivery can be upgraded to 115V, 1-phase AC powered mast option (PMO). The hand held control is used to raise/lower the film, while the foot control is used to operate the turntable. Please contact factory for Approach Ramp options on these models.

Powered Stretch Wrap Machines

Increase productivity in the shipping department or at the end of a production line. These units come complete with a 48" diameter powered turntable and counter-balanced stretch film mast. Easy to operate, simply depress the foot pedal and manually move the mast up and down. Powered by a 115V, 1/2 HP motor with soft start/stop and variable speed control. Variable R.P.M. 3-12. Units come with one film rod with special spacers that can be used with any height roll of stretch wrap material between 10" and 20". Ships with mast knock-down. Some assembly required.

The Approach Ramp option allows the operator to load and unload the machine with a pallet truck (model SWA-48 only).

SWA-48-PMO is the SWA-48 with a powered mast. Comes with a 24V hand control to work with those taller loads. The hand held control is used to raise/lower the film while the foot control is used to operate the turntable.

Medium Duty High Performance Auto-Wrap Stretch Wrap Machines 115V 1-PHASE STANDARD

Medium Duty High Performance Auto-Wrap Stretch Wrap Machines have a user friendly control center that provide workers with efficient control of the wrapping process. The state of the art digital control circuit allows the operator to set the number of pallet rotations and film wrapping patterns, with four (4) standard multifunction wrapping patterns. The operator ties off the film wrap on the carousel and presses the start button. When the unit has completed the wrapping process, the operator can cut film or use the auto brake feature and remove the wrapped pallet. The powered carousel has variable speeds 0 to 13 with a soft start and stop feature. Photocell sensors automatically adjust to different pallet heights. Uniform capacity is 4,000 pounds.

Material Pallet Stretch Wrap Machines (2) TWO 24V DC STANDARD

The Material Pallet Stretch Wrap Machines provide the flexibility to apply stretch wrap film at any work station. This portable walk around stretch wrapper has electronic touch sensitive controls to make packaging tasks easier. The DC battery powered lift moves film wrap up and down as operator walks around the packages. Designed to help wrap large and tall packages that could not be wrapped on the standard carousel stretch wrappers. Features an easy reload film system. The holder will accommodate rolls of wrapping material up to 20" long. The upright is constructed of aluminum while the rest is steel construction with powder coat yellow finish. Includes four (4) 3" swivel casters. Film not included.

Stand Alone Powered Carousels 115V 1-PHASE STANDARD

Stand Alone Powered Carousels easily rotate pallets, skids, and other large objects. Carousels include a 48" round diamond plate turntable that is supported with inverted casters for use as bearings. Also included; turntable, base, 115V, 1-phase power unit, and variable-speed control (electric/hydraulic unit has fixed speed control). Turntable is operated with a foot control. Heavy-duty steel construction.

Low-Profile Powered Carousels 115V 1-PHASE STANDARD

Low Profile Carousels feature a heavy-duty steel non-skid diamond plate platform. Model POW-CAR-AR5 features 300° built-in ramp allowing access for pallet trucks, approach ramp is not necessary. Model POW-CAR-50 is easily accessible with a fork truck; optional approach ramp available for use with pallet trucks. A foot control with a variable speed control (8 foot power cord), cushion start/stop, and rugged 3/4 HP motor with belt drive are standard. Units are pre-wired to work on 115V, 1-phase power.

Heavy-Duty King Pin Carousels

Heavy-Duty King Pin Carousels have all the ergonomic benefits of the standard carousel with a diamond top plate and stabilizing center pin. These carousels will handle a wider variety of loads and includes a heavy-duty maintenance free bearing. The king pin design allows off set loading up to fifty (50%) percent of the capacity on at least fifty (50%) percent of the deck. Standard top plates are square with rounded corners. Survey sheet available on page 176.

Thin Spins - pallet truck loadable carousel

Thin Spins are a pallet truck loadable carousels. When confronted with minimum floor space and only a hand pallet truck, the Thin Spin low-profile carousel is ideal for loading and unloading pallet applications. The unit is pallet truck loadable because of its sleek overall height. The detent lock restricts carousel rotation when not in use. The Carousel requires a starting force of approximately thirty-five (35) pounds and a maintaining force of twenty-five (25) pounds. Stainless Steel Thin Spins are constructed of type 304 stainless steel mill finish.

Steel Manual Carousels

The Manual Carousels rotate materials with the assistance of an operator. Now loading and unloading operations can be done more efficiently; minimizing fatigue and risk of back injury. The carousel may be added to an existing work bench, scissor table, or placed on the floor. Constructed of two (2) pieces of rolled structural angle (3/16" thick). A series of sealed ball bearings transfer the load smoothly and evenly to the supporting surface. Four (4) guide rollers keep the rings aligned.

Heavy-Duty Manual Turntables

Heavy-Duty Manual Turntables maximize workspace and minimize wasteful motion. Bench top turntables allow workers to stay in one position and rotate items for access from all sides. No need to walk around the table to access areas out of view. Easy and smooth bearing motion. Used in hundreds of applications: displays, paint spraying, assembly units, repairs, etc. Easy, smooth rotation won't jostle delicate parts. Rugged $\frac{5}{16}$ " steel plate construction. The double tier units feature a stationary shelf for storing parts and tools.

Turntables with Powered Height Adjustment

Turntables with Powered Height Adjustment allow the operator to raise or lower the turntable to an ergonomic height. Each unit has a 360° manual turntable. DC powered with a lithium battery and hand control for height adjustment and features an on-board charger. Hand held pendant control connects to power unit with a coil cord. Height is adjusted with a linear-actuator. Rugged 5/16" steel plate construction.

MODEL NUMBER	DIAMETER	HEIGHT RANGE	UNIFORM CAPACITY	WEIGHT (POUND)

PT-750	18"	6 ³ / ₁₆ "	750 lb.	2	66

OPTIONAL 1 OR 2 R.P.M., model PT-1/2RPM (NOT available on PT-100)
COUNTER-CLOCKWISE ROTATION, model PT-CCW

Powered Photography Carousel 115V 1-PHASE STANDARD

The Powered Photography Carousel is ideal for photographing products, both large and small. Designed with a steel construction for added strength and resilience in a variety of settings. The unit is powered by a variable speed, belt driven motor and can be turned 360° for full view of the product. To use, simply place the intended product on the turntable and activate the carousel motor. When moving the carousel from workstation to workstation, it is best to utilize the fork pockets attached to the underside of the unit for safe, ergonomic transporting. The fork pockets measure 7 1/2"W x 2 1/2"H on 22" centers.

Electronic Digital Floor Scales 115V 1-PHASE STANDARD

These scales have a low profile, allowing easy loading and unloading of heavy equipment. The rugged design has a tread plate top surface. Customer is responsible for contacting the local Weights and Measures Department or a state certified scale dealer before putting Legal for Trade (NTEP) scale into service for certification and is responsible for re-certification as required by local codes by certified personnel. Indexing accuracy is +/- 0.1% of applied load or 1 division. The digital display stand is adjustable to 42" high and powered by four (4) C cell batteries (included) or 115V, 1-phase AC power, cord included. Optional Approach Ramp for pallet truck accessibility - order two (2) for drive-on, drive-off convenience. Color may vary.

"U" Shaped Platform Scales 115V 1-PHASE STANDARD

Constructed of heavy-duty steel to withstand the most demanding industrial environments, this scale is designed to handle pallets and is easy to move and store. Ideal for moving around the work place where there is not enough room for a fixed scale. Scale is suitable for weighing in a warehouse, storehouse, or general use. The scale is light weight and can be easily moved by one person with its two (2) wheels and handle. The scale comes equipped with four (4) heavy duty load cells and a deluxe indicator head. The mobile digital display stand is adjustable to 42" high and powered by six (6) AA batteries or 115V, 1-phase AC power, cord included. Individual sides are 5" wide. Accuracy is +/- 0.1% of the applied load.

MODEL NUMBER	UNIFORM CAPACITY	OVERALL SIZE (W x L x H)	ACCURACY OF APPLIED LOAD	WEIGHT (POUND)
VPU-1	1,000 lb.	48" x 56" x 4 3/4"	+/- 0.1%	176

VPU-6	6,000 lb.	48" x 56" x 4 3/4"	+/- 0.1%	176

Portable Floor Scales 115V 1-PHASE STANDARD

Portable Floor Scales are ideal for easy transportation and weighing of goods at multiple locations. The scale has a non-slip diamond plate surface. Fold Down low gradual ramps are fixed to the platform. Ramps make the scale ideal for wheeling pallet trucks, dollies, carts, and containers on and off the platform. Four (4) alloy steel load cells and deluxe scale indicator head. Display powered by six (6) AA batteries or 115V, 1-phase AC power, cord included. Indexing accuracy is 1.1 pound.

MODEL NUMBER	UNIFORM CAPACITY	PLATFORM SIZE (W x L)	OVERALL SIZE WITH SLOPES (W x L x H)	WEIGHT (POUND)
VPFS-3B	3,000 lb.	47 3/4" x 39 1/2"	60" x 78 3/4" x 2 3/8"	460

Low Profile Scales & Ramps 115V 1-PHASE STANDARD

Low Profile air freight (pancake) scales come standard with wrap-around ramps. Units feature 1/2" deck plate, grid core, and a 3/8" bottom skin with three (3) center supports to prevent sagging. Suspension consists of fully electronic load cells on shock absorbing spherical washers. Ramps are constructed of heavy duty diamond plate with a 10° or 20% slope. Indexing accuracy is +/- 0.1% of applied load or 1 division. The digital display stands 42" high and is 115V, 1-phase AC power, cord included.

MODEL NUMBER	UNIFORM CAPACITY	PLATFORM SIZE (W x L x H)	WEIGHT (POUND)
SCALE-LP-44-5K	5,000 lb.	48" x 48" x 3"	185
SCALE-LP-44-10K	10,000 lb.	48" x 48" x 3"	242
SCALE-LP-44-20K	20,000 lb.	48" x 48" x 3"	430

Wash Down Floor Scales 115V 1-PHASE STANDARD

Ideal for food, chemical, and pharmaceutical applications, these scales can withstand daily wash down. Non-metallic deck insert, type 304 stainless steel frame, feet, and bolts standard. Also comes with stainless steel NTEP load cells and junction box. Easiest "clean-in-place" scale on the market. Just lift out the 1" thick polyethylene deck insert, leaving the stainless steel scale frame in place, and hose down! Accuracy to NIST H44. Indexing accuracy is +/- 0.1% of applied load or 1 division. The digital display is powered by 115V, 1-phase AC power, cord included.

MODEL NUMBER	UNIFORM CAPACITY	PLATFORM SIZE (W x L x H)	WEIGHT (POUND)
SCALE-LT-44-5K	5,000 lb.	48" x 48" x 4"	296
SCALE-LT-55-5K	5,000 lb.	60" x 60" x 4"	336

SCALE-LT-55-10K	10,000 lb.	60" x 60" x 4"	391

Stainless Steel Scales 115V 1-PHASE STANDARD

All purpose stainless steel floor scales are designed to withstand the widest variety of demanding industrial applications, including pharmaceutical, heavy wash down, food processing, chemical, and hazardous areas. Heavy duty Type 304 structural steel construction with stainless steel enclosure, hardware, and feet. Uses four hermetically sealed, stainless steel NTEP load cells. Indexing accuracy is +/- 0.1% of applied load or 1 division. The digital display is powered by 115V, 1-phase AC power, cord included. Smooth top standard, diamond plate available.

MODEL NUMBER	UNIFORM CAPACITY	PLATFORM SIZE (W x L x H)	WEIGHT (POUND)
SCALE-ST5-44-5K	5,000 lb.	48" x 48" x 3½"	384
SCALE-ST5-55-5K	5,000 lb.	60" x 60" x 3½"	419
SCALE-ST5-44-10K	10,000 lb.	48" x 48" x 3½"	439
SCALE-ST5-55-10K	10,000 lb.	60" x 60" x 3½"	474

Heavy-Duty Domestic Floor Scales 115V 1-PHASE STANDARD

Heavy-duty, 10,000 pound capacity bases utilize a strong 2" channel perimeter and 7" at 9.8 pounds per foot channel understructure. Plate features up to 3/8" tread and the load cells are 5K-LE.

20,000 lb. capacity bases utilize ½" thick diamond plate with 10K-LE load cells.

SCALE-SC20-44-20K utilizes 7" at 9.8 pounds per foot channel under structure and the same perimeter, while the SCALE-SC20-55-20K uses 8" at 20 pounds per foot channel understructure and perimeter. These are the ultimate, all around heavy bases! Contact factory for ramp options. Indexing accuracy is +/- 0.1% of applied load or 1 division. The digital display is powered by 115V, 1-phase AC power, cord included.

Quick Wrapper

The Quick Wrapper is designed to allow for quick wrapping of pallets, while improving ergonomic posture during the wrapping process. Also allows for improved efficiency versus standard hand dispensers. The wrapper has a hand-operated tension/brake for film stretch. Ships knocked down.

48 Hours to Ship

MODEL NUMBER	CONSTRUCTION	CORE ID	WRAP LENGTHS	WEIGHT (POUND)
QW-1	ALUMINUM	3"	11" - 20"	5

Hand Held Stretch Wrappers

Hand Held Stretch Wrappers are lightweight, freewheeling dispensers that maintains precision tension control that insures a tight, smooth application. The ergonomically bent, foam covered handle reduces both bending and fatigue, while allowing operators to apply the bottom row of wrap just as tight as the top. Accommodates rolls up to 8" in diameter.

The compact Stretch Wrap Knife is small enough to fit in your pocket. Specially angled cutting head easily slices through stretch wrap material without sticking or binding. Safety design will not cut user or products. Made of high-density plastic. Replacement blades available.

model STRAP-VH

Vertical/Horizontal Strapping Cart

Unique cart allows the operator to apply strapping both vertically and horizontally around the load. For use with both steel and poly strapping. To use, engage outer detents (disengaging inner) and turn the removable handle until strap is in the horizontal position. Once in the horizontal position, disengage the outer detents and engage the inner detents. The strap can now be raised and lowered from 28" down to 8" with the same handle. Each unit comes standard with 10" x 2½" semi-pneumatic wheels. The equipment tray measures 14"W x 6"L x 4½"D. Works with strapping core sizes of 16" x 3", 16" x 6" and 8" x 8", available on page 168.

Manual Pallet Probe Strapping Cart

- Increase Productivity • Economical, Fast, Easy • Low Maintenance

The Manual Pallet Probe Strapping Cart is a quick answer to a long time dilemma - getting poly strapping through your pallet. To use, transport cart to your loaded pallet, extend arm, and run strapping to end clip. After strapping is secure, roll cart probe into pallet along center stringer. The strapping arm will then protrude out the other end allowing the operator to pull the strapping up and over the pallet. Unit accepts polypropylene strapping. Tray size is 19"W x 5¾"D. The maximum core width is 5", while the minimum core width is 2½". Overall material diameter is 16" with a minimum of 13¾". Works with poly strapping core sizes of 16" x 3", 16" x 6" and 8" x 8", available on page 168.

Strapping Carts

Universal strapping carts are designed for use with Poly and Steel strapping.

STRAP-PS-HD features unique multi-tier discs for use with strapping core sizes of 16" x 3", 16" x 6" and 8" x 8". Cart includes storage tray and two (2) 8" x 2" hard rubber wheels for easy portability. Powder coat finish. Poly and steel strapping available separately on page 168.

STRAP-PS-P is a lightweight strapping cart with plastic disc and integral tool tray. Designed for use with poly strapping that has a core size of 8" x 8" see page 168. Great for everyday use around the warehouse, including box sealing and bundle applications. Two (2) 8" x 2" plastic wheels for easy maneuvering.

MODEL NUMBER	ACCEPTABLE STRAPPING	OVERALL SIZE (W x D x H)	WEIGHT (POUND)

Semi-Automatic Pallet Probe Strapping Machine 115V 1-PHASE STANDARD

- User Friendly
- Tension up to 175 pound
- 40" Foldable Pallet Probe
- Uses 3/8", 1/2", and 5/8" Poly Strapping

The Semi-Automatic Pallet Probe Strapping Machine eliminates hand strapping and speeds up the process of pallet strapping. This Strapping Machine is user friendly and automatically feeds the desired polypropylene strap through the pallet, tightens, and seals the strap around the pallet. The pallet strapping process is as follows: (1) unfold pallet probe, (2) push pallet probe into pallet, (3) feed polypropylene strap, (4) insert tip of strap into strap way, (5) adjust tension by pulling automatically into heat seal, (6) strip is then cut off to feed the strap out, (7) one-cycle automatically complete, (8) remove machine and insert into next pallet. Polypropylene strapping available separately on page 168.

Semi-Automatic Strapping Machine 115V 1-PHASE STANDARD

- Minimize Packaging Time
- User Friendly Controls
- Portable for Convenience
- Secure Contents Effectively
- Stainless Steel Strapping Surface
- Easy Access for Reloading Strapping

The fully portable strapping machine dispenses, tightens, and seals economical polypropylene strapping around packages or bundles. This Strapping Machine automatically tensions strap and joins the ends with a secure heat weld for content security. The unit features a stainless steel strapping surface and easy access for reloading strapping. The motor automatically switches off when not in use. As the strap is inserted, the motor automatically restarts. Strap tension is adjustable 11 to 140 pounds. Strapping core size is diameter/width (in.) 8" x 8" or 9" x 8". Polypropylene strapping available separately on page 168.

MODEL NUMBER	OVERALL DIMENSIONS	STRAPPING WIDTH	POWER SUPPLY	CASTER SIZE	WEIGHT (POUND)

High Speed Strapping Machine 115V 1-PHASE STANDARD

- Dispenses 3/8" or 1/2" polypropylene strapping
- Heat welds polypropylene strapping
- Strap tension is adjustable 15 to 150 pounds
- Strapping core size is 6" to 8"
- Automatic strapping operation
- Up to 30 cycles per minute
- User friendly controls
- Easy access for reloading strapping

The High Speed Strapping Machine is a productive solution to most polypropylene strapping tasks. The automatic Arch Strapping Machine features the "Auto-Feeding" function that automatically feeds polypropylene strapping to arch and is ready for each application. The "Auto-Positioning" system automatically positions and secures the polypropylene strapping efficiently for each cycle.

The "Jam-Free" feature ejects missed strap cycles and resets the unit. The user friendly controls allow the operator to choose between panel mounted controls, foot pedal, or table top ball switch. Actual production will vary depending on package size, chute size, and operator dexterity. The unit has heat welded polypropylene strapping, easy access for reloading strapping, and portability for convenience. Polypropylene strapping available separately on page 168.

Pneumatic Strap Sealer

Pneumatic Strap Sealer is a pressure type sealer which tightens, and seals economical polypropylene strapping around packages or bundles. The overlapped polyester band is welded by heat pressure in approximately 2 to 5 seconds. Requires an air-filter-regulator, a minimum hose inside diameter of 1/4", and air pressure of 72 to 100 PSI. The green poly strapping has a coil size of 16" x 6" core. Strapping length per roll is 4200 feet. Tensile strength is 1,400 pounds.

Propane Powered Shrink Wrap Heat Guns

Propane Powered Shrink Wrap Heat Guns are lightweight and easy to use. It features an adjustable regulator so power is controllable to suit all types of film. The 26' hose comes with a swivel connector so it does not become twisted. An unlimited position stainless steel nozzle rotates 360° and remains cool so there is no risk of burns. Comes in its own storage case. Propane container and shrink wrap film is not included.

Model SH-GUN-P-D features a replaceable igniter (no-tools needed) behind the trigger plus a spare located in the hand guard. The tool box can support up to 265 pounds on the lid.

Edge Guards

Rubber for cargo straps - The Rubber Edge Guards stay in place even if cargo shifts. ¼" thick.

Steel for chain and cargo straps - The Steel Edge Guards are great for sharp and rugged edges. Use on crates to increase sturdiness.

Plastic and Nylon for carton straps and cargo straps - These carton strap guards prevent plastic strapping from "cutting" into cardboard cartons. The cargo strap guard is an economical way to protect cargo and prevent strap damage.

Tarp Corner Guard - This guard is specifically made to protect tarp corners from possible rips or tears. Three-leg, molded plastic construction. Double-sided tape is included for adhesive purposes. Hole may be used to tack corner guard in place.

Optional Electric Pressure Washer
model OEPW-1700

Pallet Washing Cabinet & Optional Pressure Washer

The stainless steel Pallet Washing Cabinet makes it easy to rinse, clean, and remove debris that can accumulate on plastic pallets. Constructed entirely of stainless steel, simply plug in your existing pressure washing hose using the snap connector provided. Minimal installation requirements include a connection to a minimum of 6GPM at 2500 PSI. With no moving parts, this washer is perfect for low volume applications involving slightly soiled pallets. Optional Electric Pressure Washer available, contact factory.

Multi-Height Container

Increase flexibility and accessibility with our Multi-Height Container. As the user loads or unloads the height can be increased or decreased. Includes one (1) pallet base (with four way entry) and four side sections. Pallet base measures 47³/₁₆"W x 31³/₈"L x 5⁷/₈"H with fork openings: 8⁵/₁₆"W x 3⁷/₈"H on 14¹/₈" centers and 13³/₈"W x 3⁷/₈"H on 19" centers. Polyethylene construction with steel corner hinges. Multiple units are not stackable.

Recycled Nestable Presswood Pallets

Nestable presswood pallets are great for hundreds of applications. Special nestable design allows for stacking - 50 pallets only 86" high. Meet ISPM 15 export specifications. Rounded corners increase life expectancy. Lightweight design weighs 60% less than conventional wood pallets. Does not contain any nails or staples and is manufactured from recycled wood, which is environmentally responsible.

Low Profile 90° Self-Dumping Steel Hoppers

Units feature a full 90° dump angle with a cushioned rubber bumper stop. The low profile design is essential for convenient loading. Dumping with a fork truck is quick and simple. A cable is pulled from the seat of the fork truck to dump the hopper. The unit returns to an upright and locked position when lowered to the ground. A safety restraint is provided to secure the hopper to the fork truck. 22" L usable fork pockets measure 7"W x 2"H. Formed base thickness is 1/4". Blue baked-in powder-coated toughness with galvanized base. **Must be attached to fork truck when dumping.** Options below and on pages 180-181.

Self-Dumping Steel Hoppers with Bumper Release

Hopper automatically dumps when bumper release contacts the front of the dumpster. Hopper returns to an upright and locked position automatically after it dumps. Also includes a cable that may be operated from the seat of the fork truck to manually dump the hopper. A safety restraint is provided to secure the hopper to the fork truck. Usable fork pockets are 7½"W x 2½"H. Optional leak proof design sold separately. D-25, D-33, D-50, D-75, and D-100 are stackable if you stack the top hopper turned 90° from the bottom. Blue baked-in powder-coated toughness standard with exception of models D-300-HD-NA, D-350-HD, D-400-HD & D-500-HD. **Must be attached to fork truck when dumping.** Options below and on pages 180 and 181.

Options for "D" Style Hoppers

Sideways Tilt Option, *model D-TILT*, can be used with D-75-LD and D-100-LD hoppers only. User must obtain written permission from fork truck manufacturer prior to use. Factory or field installed. May still use hopper like normal. Adds 3⁵/₁₆" to height.

MODEL NUMBER	DESCRIPTION	WEIGHT (POUND)
D-TILT	SIDWAYS TILT OPTION	130
LEKP	WELDED LEAK PROOF OPTION FOR "D" STYLE HOPPER	5
D-DPLG-75*	¾" THREADED DRAIN PLUG, LOCATED IN LEFT CORNER	2
D-DPLG-2*	2" THREADED DRAIN PLUG, LOCATED IN LEFT CORNER	2
LUG	(4) LIFTING LUGS (WELDED) ONE ON EACH CORNER	23

*H-DPLG OPTION INCLUDES LEAK PROOF CHUTE WELDS

Side Extensions, are great addition for material handling and construction facilities. The extended sides are constructed of steel mesh for high strength durability during transference of goods, while the yellow painted finish delivers great visibility.

Casters for Self-Dumping Hoppers for D & H series Hoppers

Transport loads with portable hoppers. The maximum weight capacity is the lowest weight capacity of either the hopper or the caster. Weight of hopper must be considered when calculating usable capacity. Sets include two (2) rigid, two (2) swivel casters. For the H series 1/4 and 1/2 cubic yard hoppers only three (3) casters are included, two (2) rigid and one (1) swivel, in addition to bolt on stabilizing legs for the back. Casters are bolted-on by utilizing the factory stamped hole in the fork tubes. Casters are shipped uninstalled to prevent freight damage.

H series hoppers: The maximum caster diameter to be used is 6". Added height to standard H-style hopper for 6" casters is 3 3/4"

D series hopper: Maximum caster diameter permitted is 8". Added height to standard D-style hopper for 6" casters is 7 1/2", 8" casters 9 1/2"

Portable Steel Hoppers

Portable Steel Hoppers make handling waste and bulk material safer and more convenient. Fork truck entry openings are designed to move hopper over rough terrain. Usable fork pockets are 7"W x 2"H on 21 5/8" centers (11 5/8" fork pocket centers for 1/2 cubic yard capacity model only). Foot operated caster lock is included. Units tilt with assistance from operator while seated on fork truck. Handle for transporting. **Must be attached to fork truck when dumping.** Welded construction makes them durable. Blue baked-in powder-coated toughness with galvanized base. Options, including leak proof chute welds, model LEKP, 3/4" drainage plug, model H-DPLG-75, and 2" drain plug model H-DPLG-2, leak proof chute welds included with drainage plugs. PLID-H poly lids available page 181.

Hopper must be attached to a fork truck when dumping.

Heavy-Duty Poly Lids for D & H series Hoppers

Keep the contents of hoppers out of sight for a cleaner appearance with our Poly Lids. Constructed from heavy-duty virgin polyethylene material, these lids are lightweight and easy to open. The top of the lid includes a crown for water drainage and a ribbed design for strength and aesthetics. Factory installed when ordered with hopper. May also be easily field installed. Not compatible with LUG option. Ideal for schools, hospitals, and warehouses.

*WORKS WITH PORTABLE HOPPERS P-HOP MODELS

Low Profile Parts Hoppers

These unique products have been designed to function as parts hoppers that may be dumped with the assistance of a fork truck. The low profile design allows the hoppers to be placed underneath machinery as a catch basin for parts. The hoppers reduce the hazards, inconveniences, and time associated with collecting parts off the floor. Blue baked-in powder-coated toughness, galvanized base. The 10 gauge parts hoppers have 7"W x 2"H usable fork pockets for dumping the hoppers 90° with a fork truck. HOP-LP roll smoothly on four (4) wheels, 4" x 2" glass-filled nylon, two (2) rigid, one (1) swivel and one (1) swivel with brake. Model HOP-LP-N rolls on three (3) wheels, two (2) rigid and one (1) swivel with brake. Includes a removable push handle. Once the material is dumped, the hopper will return to the locked position when lowered to the ground. **Must be attached to fork truck when dumping.** Options, including leak proof chute welds, model LEKP, 3/4" drainage plug, model H-DPLG-75, and 2" drain plug model H-DPLG-2 leak proof chute welds included with drainage plugs.

series SLPT

Low Profile Hoppers

Low Profile Hoppers (top chute only 22" high) allows for use under machinery and conveyors. Tapered side allows for easy loading and unloading. Designed for containment of scrap, chips, and waste. Constructed of welded 14-gauge steel for strength and lighter weight. Unit rolls smoothly on two (2) rigid and two (2) swivel with brakes 5" x 2" poly-on-steel casters. Push handle is removable and may be used at either end. Blue baked-in powder-coated toughness. Options, including welded leak proof seams, model LEKP, 3/4" drainage plug, model H-DPLG-75, and 2" drain plug, model H-DPLG-2 leak proof chute welds included with drainage plugs.

Portable Steel Hopper with Power Traction Drive 24V DC POWER STANDARD

Reduce worker fatigue and injury with this 1/3 cubic yard Power Traction Drive Hopper. This factory installed option makes portable equipment easy to maneuver with its 240° turning radius, handle grip/throttle, and auto reverse. This state-of-the-art option allows a single operator to perform tasks safely and ergonomically. Includes built-in electric drive motor and DC battery with on-board charger. Maximum speed is 3 mph. Hopper and fork pockets are included. Fork pockets are 7½" W x 2½" H usable on 18" centers. Hopper has a blue baked-in powder-coated toughness. **Must be attached to fork truck when dumping.**

MODEL NUMBER	VOLUME CUBIC YARDS	UNIFORM CAPACITY	OVERALL SIZE (W x L x H)	WEIGHT (POUND)
HOP-PTD	1/3	1,500 lb.	26" x 67 ⁵ / ₈ " x 45 ⁵ / ₈ "	572

Open Ended Steel Dumping Hopper

Reduce bending and lifting motions while loading items into a hopper. This hopper will allow for convenient and orderly loading at ground level with its open front design. Flat items can be loaded so more can be put into the hopper. Rolls smoothly on 4" x 2" glass filled nylon casters, the hopper can easily be moved from one location to another. Once the hopper is full or the user has finished loading, the hopper can be easily dumped with the use of a fork truck.

Must be attached to fork truck when dumping.

MODEL NUMBER	UNIFORM CAPACITY	OVERALL SIZE (W x L x H)	WEIGHT (POUND)
HOP-OE	2,000 lb.	54½" x 66 ⁵ / ₁₆ " x 53 ¹³ / ₁₆ "	640

Steel Chute Hoppers

Unit is designed for use in areas with limited space. Fixed-position hopper features a full-height front door that opens to dump the hopper contents. Door will automatically close and lock after contents have been dumped. Front door is opened with a release cable that may be operated from a safe distance. Units may be moved with assistance from a fork truck. Usable fork pockets measure 7½" W x 2½" H on 30" centers. Safety restraint is attached for securing unit to the carriage of the fork truck. Not for use with fine grain or high density materials. Welded steel construction with blue painted finish. Uniform capacity is 2,000 pounds.

Must be attached to fork truck when dumping.

MODEL NUMBER	VOLUME CUBIC YARDS	OVERALL SIZE (W x L x H)	GAUGE OF STEEL	WEIGHT (POUND)
C-HOP-200	2	60½" x 56 ⁷ / ₈ " x 67"	7	806
C-HOP-300	3	85 ⁵ / ₈ " x 57¼" x 67"	7	970

Triple-Bin Recycling Hopper

This unique Triple-Bin Recycling Hopper is designed for holding different materials. Bins are painted three different colors; green, red, and blue, and include a manual pull-cable to dump from the seat of a fork truck. Each bin may be dumped independently and returns to upright position when lowered to the ground. Includes a safety strap to secure hopper to forklift. Poly lids are sold separately, see page 181. Hoppers have a baked-in powder-coated toughness. Each bin holds up to 1/2 cubic yard of material. Maximum total weight capacity is 2,000 pounds evenly distributed.

MODEL NUMBER	OVERALL SIZE (W x L x H)	INDIVIDUAL BIN SIZE (W x L x H)	UNIFORM CAPACITY	WEIGHT (POUND)
ENVIR-BIN	80 ⁵ / ₁₆ " x 57 ¹¹ / ₁₆ " x 27 ¹ / ₈ "	24" x 46 ⁵ / ₁₆ " x 23 ⁵ / ₁₆ "	2,000 lb.	900

Shown with optional poly lids, available separately.

Open Side Hopper

An Open Sided Hopper is ideal for the material handling industry. The hopper is designed with a steel construction for strength and durability. The open sides provide an ergonomic solution to transferring and unloading large amounts of oversized items. Hopper automatically dumps when bumper release contacts the side of the dumpster. Hopper returns to the upright and locked position automatically after it dumps. Also, includes a cable that may be operated from the seat of the fork truck to manually dump the hopper. Usable fork pockets are 7½"W x 2½"H on 18" centers. Approximate volume size is 1 cubic yards. **Must be attached to fork truck when dumping.**

Self-Dumping Steel Hoppers with Fold Down Front

These Self-Dumping Steel Hoppers have a low-profile design with a drop-down front for easy shovel loading. The manual hand latches are used to secure the drop-down front. The manual pull cable is used to dump the hopper from the seat of a fork truck. The hopper returns to the upright position when lowered to the ground. Units feature full 90° dumping, steel construction, and a blue baked-in powder-coated toughness. **Must be attached to fork truck when dumping.**

Portable Steel Dump Trucks

Easily move and empty contents with a balanced design making dumping of scrap, chips, and waste easier. Constructed of welded 14-gauge (12-gauge on model SPTT-15) steel for strength and lighter weight. Unit rolls smoothly on two (2) rigid and two (2) swivel with brakes 5" x 2" poly-on-steel casters. Blue baked-in powder-coated toughness. Options, including welded leak proof chute welds, model LEKP, ¾" drainage plug, model D-DPLG-75, and 2" drain plug model D-DPLG-2, leak proof chute welds included with drainage plugs.

Gas Powered All-Terrain Hopper

The All-Terrain Gas Powered Hopper is ideal for transporting up to 3,000 pounds of material over rough terrain and is excellent for landscapers and garden centers. Featuring a 190cc horsepower Briggs & Stratton gas powered motor and a traction drive system for overcoming the roughest of areas. Durable steel construction for added strength and long life. Power dump capabilities for smooth, ergonomically friendly unloading, and an emergency shut-off release for extra safety. An optional Line-X inside hopper coating available upon request. Optional welded leak proof seams and drain plug available. Optional welded leak proof seams, model LEKP, ¾" drainage plug, model H-DPLG-75, and 2" drain plug model H-DPLG-2, leak proof seams included with drainage plugs available.

Steel Self-Dumping Hoppers

All welded Self-Dumping Hoppers handle bulk materials and scrap easily. Must transport and dump with a forklift or make the unit mobile with the optional casters. Self dumping hoppers are engineered to dump when the safety latch is tripped and to return to an upright locked position when empty. All units come with safety retaining chain and a trip rope assembly. The ¼ to 2 cubic yard hoppers have a formed stackable base (8 gauge 1 - 2½ LD to MD and ¼ - 2½ HD is .220 gauge), the 3 to 5 cubic yard hoppers have structural bases (¼" base) with reinforced rockers for heavy use. Options include: casters, lids (1 to 2½ cubic yard), 3-way entry, lifting lugs, and paint colors. Paint finish is vista green. **Must be attached to fork truck when dumping.**

YouTube

Steel Lid Style A
Single hinge in the center of the hopper with the back half welded closed

Steel Lid Style C
Single hinge in the center, but both front and back lids can be opened.

Chip & Waste Trucks

- Heavy-Duty Reinforced Steel Construction
- Use Inside and Outside
- Ideal for Clean Up & Other Material Handling Jobs

Sturdy Chip and Waste Trucks are ideal for collecting and transporting bulk materials or trash. Tapered ends allow easy loading and dumping. Hopper is balanced to maneuver and dump with less effort. All welded 14 gauge steel construction. Options, including leak proof chute welds, model LEKP, 3/4" drainage plug, model H-DPLG-75, and 2" drain plug model H-DPLG-2, leak proof chute welds included with drainage plugs. Blue baked-in powder-coated toughness.

MODEL NUMBER	VOLUME CUBIC FEET	UNIFORM CAPACITY	OVERALL SIZE (W x L x H)	CASTER SIZE	WEIGHT (POUND)

Fabric Hoppers

These hoppers provide an economical and convenient means for storing and moving dry bulk commodities. The coated polypropylene has a polyester webbing for extra strength. The 8 oz. white fabric is UV tested. Fold for easy storage when not in use. The four corner straps provide convenient forklift handling, while the bottom of the unit can be opened for simple release of products.

Bulk Containers

This rugged container maximizes shipping, handling, and storage efficiencies. These units stack three high and safely accommodate up to 700-800 LB. of uniform solid, pourable, granular, and non-regulated material. Molded nesting "lugs" or "ribs" prevent units from jamming together. All are available in a wide variety of colors and with optional permanent, molded-in or raised graphics and logos. Caster and custom options available, contact factory. Lid standard.

Battery Powered Trash Can Dumper and Container

(1) ONE 12V DC POWER STANDARD

One person with a fork truck can safely and easily dump drums into a hopper. DC powered operation with on-board battery charger. Raise time is 10 seconds and lowered time is 8 seconds. Dump height is 55¾". A 2 cubic yard Vestil "D" style hopper is available separately to collect trash. Custom configurations can be made for most trash containers.

Fork Truck Mounted Trash Can Dumper

Save time and reduce work-related injuries caused by lifting and dumping heavy waste containers. This innovative product will allow a fork truck driver to lift and dump refuse containers weighing up to 1,000 pounds without ever leaving the seat of the fork truck! Secure dumper to fork truck with safety chain and run cable to driver's seat. Align trash can with dumper and lock into place. Once locked in place, transport trash can to refuse container, align, and pull chain to dump refuse container contents. Only for use with 64 gallon trash can, series TH-64 or approved equal. Fork pockets are 2⁵/₈" high by 7⁵/₈" wide usable. Steel construction for years of dependable use.

Trash Can Dumper

Lift, carry, and dump trash cans without leaving the seat of your fork truck. Simple design does not have any moving parts. Includes sloped guides to center container as it rotates. Pick-up hooks adjust from 4¹/₄" to 8¹/₄". Fork pockets (ID) 5⁵/₁₆" wide x 2⁵/₈" high on 30" centers. Welded steel construction with baked-in powder-coated toughness. Additional trash cans available.

Pallet Dumper/Retainer

Dump loaded pallets easily without leaving the seat of your fork truck with the all welded steel Pallet Dumper/Retainer. Unit slides onto forks and is secured by a safety restraint. Two retainers hold the pallet in place while dumping the contents into a hopper or dumpster. Once the retainers have cleared the opposite end of the pallet, raise the forks and the retainers will hold the pallet on the forks. Lift the pallet to the dumping height and rest the pallet on the edge of the dumpster. Pull the chain, releasing the fork carriage, allowing the pallet to tilt, and dump the load into the hopper or dumpster. When finished, simply lower to the ground until the carriage latches.

PAL-D/R	7 ¹ / ₂ " x 2 ¹ / ₂ "	52"	33"	2,000 lb.	300

Fork Truck Floor Scraper

Designed to turn your fork truck into a floor scraper. Works well in paint and finish rooms for removing over sprayed paint from floors. Simply slide fork into opening and attach safety restraint to carriage for safety. Features hardened scraping blade for long life and durability. Blade is mounted in pivot assembly to allow it to raise up with contact against a crack or rise in the floor. Heavy-duty welded steel construction. Painted finish.

MODEL NUMBER	BLADE WIDTH	OVERALL SIZE (W x L x H)	USABLE FORK OPENING (W x H)	WEIGHT (POUND)
SCRAPE-1	12"	13" x 36 ¹ / ₈ " x 8 ⁷ / ₁₆ "	9 ¹ / ₄ " x 3 ¹ / ₄ "	162

Work Platforms

Convenient fork truck work platforms quickly and safely raise maintenance personnel where they are needed. Attaches to fork truck by inserting forks into fork pockets and securing platform to fork truck. Fork locks secure platform to forks and a 36" long safety restraint with hook attaches platform to fork truck. 42" high handrail with 21" high mid-rail on three sides. 60" high expanded metal backing on fourth side (84" high backing to meet California OSHA specifications on models with suffix -84B). Includes diamond plate platform. The usable fork pockets are 7¾"W x 3⅞"H in rear and 7¾"W x 1⅞"H in front. A maximum of two people can be in the work platform at one time. Uniform weight capacity is 1,000 lb. evenly distributed. Welded steel construction. Baked-in powder-coated toughness. The Full Featured units include an emergency stop button kit and web lanyard with safety harness.

PIN STYLE TINE LOCK IS STANDARD

Multi-Person Work Platforms

Multi-Person Work Platforms quickly and safely raise maintenance personnel where they are needed. Larger platform accommodates various applications. The work platform attaches to the fork truck by inserting the forks into the fork pockets and securing the platform to the fork truck. This Work Platform is made of square tube construction. Base and side curbs are formed from one piece of heavy gauge sheet for extra strength. Deck has slip resistant surface and fork pocket openings. Units feature safety pins behind each fork and heavy duty chains welded to the back frame of the platform which secure around the fork carriage. Hinged gate on the front of the unit has a pin safety lock built in. Painted safety yellow.

Fold Down Work Platforms

Elevate personnel to overhead racks and shelving for safe and convenient access. When not in use, unit can be folded down and moved out of the way by just one person. Unit stores conveniently in a 4" deep bottom base, with a folded height of 11 5/8". Handrail is 38" high with 23 1/2" high mid-rail on three sides. 70" high expanded metal backing on fourth side (84" high backing to meet California OSHA specifications on models with suffix -84B). Includes diamond plate platform, tine lock, and a safety restraint to attach platform to fork truck. Usable fork pockets measure 7 7/8"W x 3 3/8"H on 27 3/4" centers. The overall size of the unit is 38"W x 38"L x 81 1/4"H (80 1/2"H model WP-3737-FD-84B). Folded size is 38"W x 38"L x 11 5/8"H. Baked-in powder-coated toughness. Steel construction.

Work Platform Options

4" x 1 1/4" Poly-on-Poly Casters, model WP-CA, allows you to move unit without the use of a fork truck. Two swivel casters and two swivel with brake.

Emergency Stop Button Kit, model WP-SB, allows the operator to shut off fork truck power from the work platform. Works with both gas and electric fork trucks.

Fluorescent Tube Caddy, model WP-TC, holds fluorescent light bulbs and other maintenance equipment.

Sliding Tool Tray, series WP-TT, available in 36" or 48" wide. Holds maintenance tools. For use with single door platforms.

Web Lanyard with Safety Harness, series WP-LH, protects worker in the event of a fall.

Lift Master Booms

Unique performance, convenience, and safety features are built into every Lift Master Boom. Fabricated from structural steel with welding to meet AWS creates a rugged and durable boom that will provide long term service. Telescopic units come with an infinitely adjustable locking screw (except orbit booms which feature a locking detent). Fork pockets for 4,000 pound uniform capacity models measure 7½"W x 2½"H usable on 24" centers. Usable fork pockets are 7¼"W x 2¼"H for 6,000 and 8,000 pound uniform capacity models. Optional fork pocket centers available, contact factory. A safety restraint secures the boom to the fork truck for safe operation. Each unit includes two lifting hooks.

Hoisting Hooks

Convert your fork truck into a hook with anchor in a matter of seconds. The easy to attach Hoisting Hook does not require the assistance of special tools. Secured to the fork truck by means of a 48" long safety restraint and screw clamps. Available in single or double fork design. Units are zinc plated. Hook with shackle included.

Model S-FORK-4-AT, Auto-Tension Hoisting Hook, offers a unique design and adds tension as weight is added. Hook with shackle included. Secured to the fork truck by means of a 48" long safety restraint and tine lock, this unit has a yellow baked-in powder-coated toughness.

MODEL NUMBER	DESCRIPTION HOOK TYPE	USABLE FORK POCKET SIZE (W x H)	UNIFORM CAPACITY	WEIGHT (POUND)

Forklift Lifting Beam

A Forklift Lifting Beam is the perfect asset for maneuvering and transferring heavy objects. The centrally located shackle between two fork pockets allow the user to safely attach to the unit and transport to the desired location. Hooks are also attached to the outside of the unit for a more secure lifting experience. The strong steel construction with a bright finish enables high visibility from both near and far. Secure to the fork truck by means of a 48" long safety restraint and screw clamps.

MODEL NUMBER	OVERALL SIZE (W x L x H)	USABLE FORK POCKET SIZE (W x H)	UNIFORM CAPACITY	WEIGHT (POUND)
FLB-D-10	4¾" x 40" x 15"	7" x 2½" (13" centers)	10,000 lb.	112

Hook Plates

Hook Plates enable any fork truck to safely lift a load using chains, cables, or slings. Features slanted fork openings measuring 6½" wide by 1¾" high to prevent the hook plate from being used upside down. A hook with anchor shackle is included. A safety restraint secures the unit to the fork truck.

Fork Truck Bases with Optional Tow Balls & Pintle Hook

Convert your fork truck into a tow truck for moving trailers and other portable equipment. Simple design slides onto forks and secures into place with pin style tine locks and a safety restraint. Welded steel construction with blue baked-in powder-coated toughness. 5"W x 2"H usable fork pockets. Optional pintle hook, tow balls, lifting hooks and hitch (see below) available. Bolt on design. *Never exceed the 4,000 lb. capacity of the hook base. An attachment does not increase the total capacity of the unit.*

Forklift Hitch

Forklift Hitch is a superb addition to most manufacturing and maintenance facilities. Strong steel construction allows for long term use, even in the harshest of conditions. 3-ball hitch attachment can be removed and rotated to desired ball. Maximum push capacity for each ball size; 1⁷/₈" = 2,000 lb., 2" = 3,500 lb., 2-5/16" = 7,500 lb. The hitch includes a yellow finish for clear visibility. To use slide the forklift forks in to the unit and secure safety chain to forklift. Once in place, the unit is ready to be hitched to the desired equipment. Includes 56" long chain to secure to forklift. Not intended for pulling.

Bag Lifter

The Bag Lifter is ideal for industrial and manufacturing settings. The unit is constructed of powder coated steel for durability and added strength. The lifter can be used with the center mounted hook point for balanced lifting capabilities with an overhead hoist or with a forklift by utilizing the attached fork pockets (retaining strap included). After choosing which lifting style is best, secure the loops of the bag to the four strap points for safe maneuvering and transporting.

STANDARD LOOP STYLE

HOT DIPPED GALVANIZED FINISH SHOWN. OTHER SPECIALTY FINISHES AVAILABLE, CONTACT FACTORY.

PIN STYLE • Suffix P

REAR SPACER • Suffix RS

Rear Spacer (suffix RS): Load pallets into rear of trailer conveniently and easily. Practical for pushing pallets two or three deep into a trailer. This option is factory installed and must be ordered with fork extensions. Contact factory for pricing.

Fork Extensions

Provide the extra support needed to lift long or large objects with a fork truck. Welded steel construction with cast steel tips. Steel retaining strap (loop style) prevents fork extensions from sliding off forks during use. Baked-in powder-coated toughness. OSHA regulations require that extensions are no more than 150% of the existing fork length. (e.g. 48" existing forks, the fork extension should not exceed 72"). Maximum uniform capacity is 4,000 pounds evenly distributed per pair.

Loop Style: Insert loop at the tip of the fork and slide it up at a 45° angle. Then, lay it down over the existing fork.

Pin Style (suffix P): Remove pin and lay extension over fork or drive fork truck into the extension. Re-insert the pin behind the heel of the fork to secure extension.

Roller Forks

Mechanical forks designed to reduce costs through pallet-less handling. Ideal for FIBC bags, (large bulk sacks), slip-sheeted goods, and corrugated bundles as well as regular pallets. Use with standard lift truck forks providing greater operational versatility. The unique series of dual-roller cartridges allow the forks to place and retrieve heavy loads quickly and easily. See website for additional sizes.

Fork Lift Loading Attachment

The Dock-Pro™ can increase company productivity and reduce injury. The unit is easy to use, involves low maintenance, and comes with a 96" long conveyor and safety lock. It is adjustable to 30½" below dock height and is adaptable to most fork lifts with custom designs available. The Dock-Pro™ is a fork lift attachment designed to help load and carry material from loading dock fork lift to pickup truck. It is designed to be safe, productive, and cost effective. Safety restraint is included to secure unit to fork truck.

Fork Truck Fork Caddy

Transport fork truck forks easily and safely. This caddy allows the user to easily remove and install forks onto a fork truck. This is usually a dangerous and time consuming process, but our fork caddy makes this a breeze. Baked-in powder-coated toughness.

After transporting the fork to the fork truck, rotate the handle 90°. Slide the fork onto the mast. The Fork Caddy has easy-grip handles and rolls smoothly on two swivel casters. A star knob secures the fork into the caddy to keep it in place while transporting. The comfort-grip handle pivots up to 180° to allow for easier mobility. The Fork Caddy is lightweight and small enough for easy storage as well.

Fork Truck Mounted Brush Sweepers

Fork Truck Brush Sweepers are ideal for interior and exterior commercial sweeping. Great for cleanup applications; docks, warehouses, and parking lots. Lightweight aluminum body with polypropylene bristles. Powder coat finish. Attach unit by sliding forks into pockets and securing with locking screws.

Optional Magnets are a great asset to manufacturing and construction facilities. Enables the user to collect material in fewer passes. For best use, attach the magnet to the front of the existing broom and fasten to the forklift. Once in place, while traversing the desired area the magnet will detect metal items before they get caught in the bristles of the broom. Works with series VSWP and VPS.

The optional Edge Markers work with the deluxe brush sweeper series VPS. The 36" high markers are a visible indicator of the edge of the room for safety precautions. The units height allows the user to be informed while still maintaining the proper drive position.

Optional Dust Mop attaches to collect dust and fine particles on smooth floors. Works with series VSWP and VPS.

Hanging Magnetic Sweepers

Hanging Magnetic Sweepers are ideal for cleaning industrial settings, parking lots, and loading areas. The design is durable, yet lightweight, for easy maneuverability and portability from work area to work area. A release lever on series MS and HFMS is located in the sweeper for simple, safe discarding of fragments. Constructed with heavy gauge steel and aluminum. Comes completely assembled.

Hanging Magnetic Sweepers, *Chain Hang-Type* with eyebolts and chains for hanging units from a vehicle.

Hanging Magnetic Sweepers *with Forklift Hang-Type* can be suspended from a fork lift for smooth and efficient gathering of material, both large and small. Fork pockets measure 5"W x 1¹/₄"H.

LED Pedestrian Warning System

Help reduce accidents with our LED Pedestrian Warning System. Four (4) 4¾" x 1" high powered yellow LED warning strobe lights can be mounted to a variety of industrial devices in any location for multi-directional visibility. Lights illuminate floor surface to warn pedestrians of traffic. Units are multi-voltage (12V DC - 48V DC) and each light comes with 4½ feet of cord. Warning system includes: (4) LED strobe lights, flasher box, voltage regulator and in-line fuse.

Lift Truck Safety Light

A safety warning spot light is a wonderful asset in shipping and manufacturing facilities with intersecting walkways. The light is utilized to provide a warning to people that a vehicle is approaching the surrounding area. The unit is easily mountable to the front or back of a forklift or other moving equipment. The closer to the ground the light is mounted the less distance it will travel, therefore adjusting the model to best fit the user's needs is crucial. A centrally located pivot point can be maneuvered for precise light positioning.

Fork Leveler

Designed to aid the fork lift driver in determining when the forks are level. Unit reduces the risk of damaging or piercing product when removing it from pallet racking. Fasten the steel leveler to the mast of the fork lift. While tilting the forks to the desired angle, the fork leveler will tilt as well, showing that the forks are not currently in a horizontal position. When forks are moved back into a safe level angle, the leveler will be perfectly horizontally.

Fork Mounted Snow Plow Blades

Designed for use with your fork truck, these Snow Plow Blades are multifunctional to work with your existing equipment. No more waiting for daytime snow removal. Simply place the snow blade onto your fork truck and away you go! Installation is as easy as sliding the forks into the fork pockets and securing them to the fork carriage. Prevent damage from obstacles and uneven surfaces with trip springs. Easy angling and backgrade capabilities for optimal performance. Constructed of 5/16" rollplate with steel ribs on back. The blade edge is 3/8" x 6" hardened steel. Optional counterbalance shipped empty.

Salt Boxes and Scoop

A Salt Box is a great addition to any business or public facility. The box is constructed of a durable polyethylene that withstands the harsh effects of salt and other ice melting products. The bright yellow color provides great visibility in the work area during times of need. Includes a lockable lid for both safe transporting and to ensure the only users are authorized personnel. The large capacity allows for great amounts of material to be placed in the box for space saving efficiency.

Fork Truck Drum Carrier/Rotators

Easily transport and rotate 55 gallon steel drums using a fork truck. Each unit is provided with a 15 foot long chain to allow the drum to be rotated up to 360° from the fork truck operator's seat. Fork pockets measure 7 $\frac{7}{8}$ "W x 2 $\frac{5}{8}$ "H usable, except DCR-205-8 and DCR-205-15 usable is 7"W. DC powered units include two (2) 12V batteries, on-board charger, and hand held control on a 4 foot to 20 foot long coil cord. Safety restraint is used to secure unit to fork truck. Bung Nut Wrench, model BNW-I, is included.

DRUM MUST BE FULL TO ROTATE AT RATED CAPACITY

Drum Positioners

Allows fork truck driver to rotate standing drums to the horizontal racking position and vice-versa. Positive latching system ensures safe handling of drums weighing up to 800 pounds. Slide the positioner extensions over the vertical drum. With the aid of the Drum Positioner, rotate drum to horizontal position. Latching system will engage to allow horizontal positioning of drum. It's now ready to slide into the rack. Mechanical operation relies on fork truck to rotate and lift drums. Fork pockets measure 7 $\frac{7}{8}$ "W x 2 $\frac{9}{16}$ "H usable on 20 $\frac{1}{2}$ " centers. Units now feature a welded spacer to protect drum fixtures from damage when rotating.

Automatic Eagle Beak™ Drum Lifters

This time tested and proven design allows a fork truck operator to easily secure, move, and release drums without leaving the seat of the fork truck. For use with open (lid installed and secured) and closed head 30 and 55 gallon plastic, steel, and fiber drums with a top lip strong enough to support the weight of the drum. Choose single-drum or double-drum configuration. Includes safety restraint to secure unit to the fork truck. Welded steel construction. Baked-in powder-coated toughness. Fork pockets measure 7 $\frac{7}{8}$ " wide x 2 $\frac{9}{16}$ " high usable. A ratchet strap is supplied to secure the drum to the unit when traveling over rough terrain. FMDL-1 and FMDL-2 meet OSHA 1910-178 requirements.

MODEL NUMBER	NUMBER OF DRUMS	UNIFORM CAPACITY	OVERALL SIZE (W x L x H)	WEIGHT (POUND)

Fork Mounted Poly Drum Handlers

These easy to use plastic drum handlers are designed to handle odd-shaped plastic drums. Includes safety restraint for securing unit to the fork truck. Baked-in powder-coated toughness.

Model FPDL-8-L has adjustable arms that are designed to fit 55 gallon plastic drums secured at bottom. Low drum attachment point allows for use with both open and closed head drums. A ratchet strap is supplied to secure the drum to the unit when traveling over rough terrain.

Model FPDL-11-H is a top lip plastic drum lifter for use with 30 and 55 gallon plastic closed head drums. 7 $\frac{7}{8}$ " wide x 2 $\frac{9}{16}$ " high usable fork tubes on 20 $\frac{1}{2}$ " centers. High drum attachment point for use with top lip at least $\frac{3}{16}$ " high. Will also work with steel and fiber drums with open (lid installed and secured) and closed head drums, with open (lid installed and secured) and closed head drums.

model DRUM-LUG

Overhead Drum Lifter

This Overhead Drum Lifter is designed for lifting drums with an overhead crane or similar lifting device. Integral fork pockets are also included for transportation with forklift. Steel saddle is designed for use with 30 and 55 gallon steel, plastic, and fiber drums with a maximum diameter of 24 $\frac{3}{8}$ ". Unit comes complete with a ratchet strap for securely holding the drum in place. With a non-tilting style, this lifter is made for straight vertical lifting only. Features a durable yellow baked-in powder-coated toughness.

MODEL NUMBER	ACCEPTABLE DRUM TYPES	UNIFORM CAPACITY	WEIGHT (POUND)
DRUM-LUG [Ⓞ]	PLASTIC, STEEL, & FIBER DRUMS	1,000 lb.	151

model HDDL-55

Heavy Duty Vertical Drum Lifter

The Heavy Duty Vertical Drum Lifter makes it virtually impossible for a drum to break loose. Designed to lift 55 gallon open head (with lid installed and secured) and closed head steel drums in the vertical position. An industrial ratchet load-binder is used to clamp the unit to the top of the drum. Uniform capacity is 1,500 pounds. Lifter features integral fork pockets for use with fork truck forks/tines as well as lifting points for attachment of slings or chains. 9A safety restraint is included to secure the drum lifter to a carriage when being used with a fork truck.

MODEL NUMBER	ACCEPTABLE DRUM TYPE	UNIFORM CAPACITY	WEIGHT (POUND)
HDDL-55	OPEN & CLOSED HEAD STEEL DRUMS	1,500 lb.	91

model HDT-500

Horizontal Drum Positioner

Ideal for loading/unloading drums stored horizontally on drum racking and stands. Suitable for loading drums onto vehicles. Fork opening is 24 $\frac{1}{2}$ " apart and fork pockets are 5 $\frac{1}{2}$ " x 2". Accommodates 22 $\frac{1}{2}$ " diameter by 36" high steel, plastic, and fiber drums.

MODEL NUMBER	ACCEPTABLE DRUM SIZE	OVERALL SIZE (W x L x H)	UNIFORM CAPACITY	WEIGHT (POUND)
HDT-500 [Ⓞ]	55 GALLON	29" x 55 $\frac{1}{2}$ " x 4 $\frac{3}{4}$ "	650 lb.	115

Drum Grippers

Drum Grippers make it easy to pick up one (1) or two (2) open head (with lid installed and secured) and closed head steel drums without leaving the seat of the fork truck. Simply slip the forks into the fork tubes, fasten the safety restraint and the Drum Gripper is ready to go. The knuckle gripping system is lowered around the drum, gripped tightly, and then lifted into the air. Drum is automatically released by lowering the forks. All models feature hinged folding design for storage. Safety restraint included. Welded steel construction with a baked-in powder-coated toughness.

Model DGS-A, DGD-A, and DGS-A-PSD features adjustable-width arms for use with both 30 and 55 gallon steel and plastic (with top ring or top ridge) drums.

Adjustable Steel Gantry Cranes

Adjustable Steel Gantry Cranes are designed for positioning materials along the beam's length. Facilitate easy mobility from one area to another with four (4) 8" swivel casters with four-position locks. 2K-4K models have glass filled nylon casters, 6K-8K models have phenolic casters, and 10K model has steel casters. Ratchet for easy one person height adjustment. Height is adjustable in 6" increments. Do not move units while loaded. Painted blue finish. Designed for semi-permanent or permanent applications. Requires assistance from fork truck to set-up. Hoist and trolley can be ordered separately, see pages 210-214.

Adjustable Steel Gantry Cranes - Knockdown

Adjustable Knockdown Steel Gantry Cranes are uniquely designed to be disassembled when not in use for compact storage and easier transportation / shipping from one job site to another. Facilitate easy mobility from one area to another with four (4) 8" swivel casters with four-position locks. 2K-4K models have glass filled nylon casters, 6K-8K models have phenolic casters, and 10K model has steel casters. Features quick setup design. Height is adjustable in 6" increments. Do not move units while loaded. Painted blue finish. Requires assistance from fork truck to set-up. Caster options are located on the bottom of page 202. Hoist and trolley can be ordered separately, see pages 210-214.

Note: All products should be inspected frequently to insure safe operation. Final testing and inspection is left to end user after final assembly has been completed. For further details see ASME B30.17.

FIXED HEIGHT STEEL GANTRY CRANES - KNOCKDOWN series FHSN

New

KNOCKDOWN DESIGN ALLOWS FOR COMPLETE CRANE DISASSEMBLY FOR LOWER FREIGHT AND TRANSPORTATION COSTS

FACTORY INSTALLED OPTION ONLY

Fixed Steel Gantry Cranes

Industrial Steel Gantry Cranes are designed for positioning materials along the beam's length. Solid steel construction will provide years of service. Facilitate easy mobility from one area to another with four (4) 8" swivel casters with four-position locks. 2K-4K models have glass filled nylon casters, 6K-8K models have phenolic casters, and 10K model has steel casters. More economical and flexible than permanent cranes. Features quick setup design. Designed for semi-permanent or permanent applications. Requires assistance from fork truck to set-up. Do not move units while loaded. Painted blue finish. Caster options are located on the bottom of page 202. Hoist and trolley can be ordered separately, see pages 210-214.

Steel Gantry Crane Power Traction Drive Options

Power Traction Drive Options for a gantry cranes are ideal for industrial manufacturing environments. The power traction drive allows the gantry crane to be moved to a desired position without need of extra personnel. The unit is maneuvered by a three (3) button push button control for precise movements, while being driven by 460V, 3 phase power. Do not move units while loaded.

MODEL NUMBER	DESCRIPTION
GPTD-2	2,000 TO 4,000 LB. UNIFORM CAPACITY/STD. WITH 3 BUTTON HAND CONTROL
GPTD-4	6,000 TO 8,000 LB. UNIFORM CAPACITY/STD. WITH 3 BUTTON HAND CONTROL
V-TRACK	10 FOOT SECTION OF V-GROOVE TRACK (ONE SIDE ONLY)

ADDITIONAL BUTTONS ON HAND CONTROL FOR HOIST & TROLLEY AVAILABLE, CONTACT FACTORY

Adjustable Height Aluminum Gantry Cranes

Adjustable Height Aluminum Gantry Cranes combine lightweight and rigid construction into one unit. The all aluminum construction of this gantry crane makes it corrosion resistant and perfect for outdoor use. The lightweight I-beam allows height adjustment without the need of a hoist or fork truck. Features quick setup design. Included are two (2) straps, allowing transport of the gantry crane in one neat package. Facilitate easy mobility from one area to another with four (4) 8" swivel casters with four position locks. 2K-4K models have glass filled nylon casters and 6K models have phenolic casters. Height is adjustable in 6" increments. Do not move units while loaded. Hoist and trolley can be ordered separately, see pages 210-214.

Adjustable Height Aluminum Gantry Cranes with Pneumatic Casters

Adjustable Height Aluminum Gantry Cranes are ideal for the manufacturing and maintenance facilities. The aluminum construction is lightweight, yet strong for long lasting durability through the harshest of environments. The pneumatic casters allow the user to quietly move the crane from workstation to workstation and smoothly roll over rough surfaces, while not marring. The four-way locking pneumatic casters permit the user to place the crane in preferred transporting and stationary positions. Do not move units while loaded. Uniform capacity is 1,500 pounds.

Fixed Height Aluminum Gantry Cranes

Fixed Height Aluminum Gantry Cranes are ideal for variety of industries including maintenance and production. The aluminum design is easily manageable and can be simply assembled for immediate use. A fixed height is perfect for working in a permanent or semi-permanent environment where the surrounding seldom change. Casters provide a smooth way to transfer units when unloaded and if changing locations is needed. Four (4) 8" swivel casters with four position locks. 2K-4K models have glass filled nylon casters and 6K models have phenolic casters. A strong construction allows for long lasting strength through the harshest of environments.

Self-Supporting Bridge Cranes

The system is composed of modular units so that the components can be reused when the layout is changed. The system does not require any electrical power. The overall height is 14 feet. Festoon for electric hoist is not included. Contact factory for pricing.

Work Area Portable Steel Gantry Cranes

Designed to maximize material handling requirements in light-duty lifting applications. Lightweight fixed height design allows for easy mobility. Includes (4) 5" x 2" poly-on-steel swivel casters with brake. Overall I-beam length is 79¾" with a usable length of 69¾" (FPG-20 usable length of 67¾"). Do not move units while loaded. Steel construction with blue baked-in powder-coated toughness. Bolt together installation. Hoist and trolley can be ordered separately, see pages 210-214.

Mini Overhead Cantilever Jibs

Utilize this unique jib in work cells and work areas. Unique fixed-height design allows for the 39¾" long outriggers to be mounted underneath a work bench. Easily lift product from cart to workbench. Straddle width is 47¾" (ID). I-beam usable length is 54". Hoist and trolley can be ordered separately, see pages 210-214. Steel construction with painted blue finish.

MODEL NUMBER	UNDER I-BEAM TO GROUND	OVERALL HEIGHT	I-BEAM FLANGE WIDTH x HEIGHT	UNIFORM CAPACITY	WEIGHT (POUND)

Extra Travel Tri-Post Jibs

These unique jibs were designed for use in workstations. Place over the top of your workbench. Extra travel fixed-height I-beam overhangs workbench to allow lifting of products from cart to bench. I-Beam flange width is 2-11/16" and the height is 4". Usable I-beam length is 79¾". Hoist and trolley can be ordered separately, see pages 210-214. Steel construction with painted blue finish.

Floor Mounted Jibs

These fixed height Floor Mounted Jibs adapt well to many applications. Full 360° rotation allows personnel to completely utilize their workstation. Solid steel construction with blue finish assists workers in lifting awkward material. The overall I-beam length is 80". Requires reinforced concrete pad for installation. Hoist and trolley can be ordered separately, see pages 210-214.

model JIB-CB-18-B

Portable Jib Cranes with optional counterbalance base

Unique design allows for easy transportation of jib crane with a fork truck. Empty base models include instructions for proper filling with concrete. Base measures 42-3/16"W x 42-3/16"D x 18" or 36"H and includes built-in fork tubes. Fork tubes are 7 5/8"W x 2 5/8"H usable on 24" fork centers. Fixed length I-beam will pivot 360° for complete access. Under I-beam clearance is 10'. Upright vertical column bolts to base. Steel construction with blue painted finish. Units ship knocked down. Unit not for use as a fork truck attachment.

Portable Offset Jib Cranes

Offset base design allows for larger usable work area beneath I-beam. Allows for easy transportation of jib crane with fork truck. Fixed length I-beam will pivot 360° for complete access. Empty base models include instructions for proper filling with concrete. Offset base size is 42-3/16" W x 42-3/16" L x 18"H or 36"H. Built-in fork tubes, measuring 7 1/2"W x 2 1/2"H usable on 24" centers, for transportation with fork truck. Steel construction with blue painted finish. Units ship knocked down. Not for use as a fork truck attachment. 10' under I-beam.

Festoon System

Festoon System

Designed to keep power cords out of danger when using electric trolleys and/or hoists. Easily retrofits to any gantry or jib crane up to 240" (20 ft.) in length. Includes 22 feet of wire rope. 115V AC cord supplied. Works with both Steel and Aluminum Gantry Cranes.

MODEL NUMBER	DESCRIPTION	WEIGHT (POUND)
FES-KIT [®]	KEEPS POWER CORDS OUT OF DANGER	16

Multi-Station Transportable Jib Cranes

Designed for use in multiple locations, includes jib crane and one base socket. Extra base sockets may be purchased for use in other locations. Friction brake design allows positive locking and controlled rotation of heavy loads. 360° continuous rotation of heavy loads. Handles most applications up to 1,000 uniform pounds. Standard 6" high I-beam with 4" flange width. Rugged welded steel construction with painted blue finish. Hoist and trolley can be ordered separately, see pages 210-214. Requires reinforced concrete pad for installation.

model JIB-P-B

Tie Rod Jibs (for high ceilings)

Achieve maximum floor space and utilize wasted air space. Mount to walls or columns to increase hook coverage over workstations. Unit rotates 180°. Usable I-beam length is 79³/₄" while the overall length is 86". All steel construction with painted blue finish provides years of service. Hoist and trolley can be ordered separately, see pages 210-214.

series JIB-HC

Wall Jibs (for low ceilings)

Designed to assist workers in the maneuvering of materials, as well as achieving maximum headroom where low ceilings are of concern. This cantilever style jib crane mounts to true vertical wall members. Increases personnel productivity by lifting awkward materials. The overall I-beam length is 88" with a usable length of 80". Overall length of jib is 96¹/₈". Unit rotates 180°. Steel construction with painted blue finish. Hoist and trolley can be ordered separately, see pages 210-214.

Beam Clamps

Designed to reduce the I-beam flange stress by distributing loads away from the flange edges during overhead lifting applications. These versatile units can be interchanged from one gantry to another in a matter of seconds with the easy mechanical adjustment mechanism. A bar is located at the bottom of the beam clamp for attaching a hoist (sold separately). Steel construction and painted finish.

Quick Install Manual Trolleys

These trolleys are dependable, safe, and easy to use. Designed to easily adjust to the width of virtually any S, H, W, and M type I-beam. Width is adjusted with manual screw mechanism. Includes locking ring to prevent trolley width from changing accidentally. Manual screw mechanism may also be tightened to prevent trolley from moving (similar to a Beam Clamp). Each trolley includes four (4) rollers with sealed bearings for long life. A lifting eye is located at the bottom of the trolley for attaching a hoist (not included). Steel construction and painted finish.

MODEL NUMBER	FITS I-BEAM FLANGE WIDTH	HEADROOM	UNIFORM CAPACITY	WEIGHT (POUND)

Low Profile Manual Trolleys

These trolleys have been designed to quickly install on virtually any S, H, W, and M type I-beam. The width of the trolley is adjusted by rotating the center rod with lifting eye clockwise or counterclockwise. Once hoist is attached, center rod cannot be rotated which prevents trolley width from accidentally changing. The trolley includes four (4) rollers with sealed bearings. Choose either push or geared trolley. Geared trolley is ideal for use when precise positioning is required. A lifting eye is located at the bottom of the trolley for attaching a hoist (sold separately). Steel construction and painted finish. Headroom is measured from bottom of wheel to bottom of hooking eye.

Compact & Lightweight Lever Hoist (disc brake)

Compact and Lightweight Lever Hoists are ideal for use in confined areas when fastening, fixing or positioning of light load is required. High impact aluminum alloy housing with all the main parts made of heat treated alloy steel (more durable and longer life). Advanced gear reduction system (5 gears in the gear box) enables effortless handling and requires low hand-pull force for highly reliable lifting. Withstand 1500 cycles with 110% of rated capacity. Features lightweight high strength grade 100 chain. Heavy duty storage bag included.

MODEL NUMBER	UNIFORM CAPACITY	STANDARD LIFT (FEET)	MINIMUM DISTANCE BETWEEN HOOKS	HANDLE LENGTH	WEIGHT (POUND)

Professional Lever Hoists (disc brake)

Hoists can be used at any angle and feature a 50% wider ratchet gear, high impact restraint gear case, and brake cover. Upper and lower swivel hooks with deformation indicators. Load chain guide system (allows operation in horizontal position). Minimum breaking load is 4 times that of rated capacity. Manufactured to ISO9002 quality standard. Every unit is tested to 150% of rated capacity and is issued with an individual test certificate.

Mighty Mini Lever Hoists (disc brake)

Lightweight Mini Lever Hoists are durable and easy to operate. Single-hand "free chaining" is simple, allowing for trouble-free operation in the vertical or horizontal position. All the main parts are made of alloy steel and heat treated (more durable and longer life). Long life brake discs. Short lever handle can rotate in a complete 360° circle. Each hoist is tested to 150% of rated capacity. Features lightweight high strength grade 80 black finish load chain.

HCH-NS-1-10

Professional Hand Chain Hoists

These lightweight hoists are durable and easy to operate. Compact design and low headroom allow installation in confined areas. Heat-treated spur gear efficiently designed to provide smooth load handling and low hand chain pull. Reinforced double pawl brake system and larger diameter pawl springs ensure reliable braking. Designed with a safety factor 4 times the rated capacity. Individually tested at 150% of the rated capacity. Features lightweight, high strength grade 100 alloy steel load chain 25% stronger than grade 80 chain, galvanized pull chain, and forged steel upper and lower hooks with safety latches. Meets ANSI B30.16-2003 requirements.

Electric Chain Hoists 115V 1-PHASE & 460V 3-PHASE STANDARD

Ruggedly built with power to handle most industrial lifting applications. Includes push-button hand pendant with raise and lower functions on a 6' cord. Single (1) and three (3) phase AC power available. Optional Chain Container stores surplus chain overhead to keep from interfering with operation. Additional lifting heights and speeds available, contact factory.

Manipulator Style Control Electric Chain Hoist 115V 1-PHASE STANDARD

Features in-line hand grip, which allows one handed operation and gives the operator a free hand to easily position the load. Rocker switch above hand grip for quick selection between low and high speed control. Adjustable speeds and single phase power. Lightweight and compact die cast aluminum body. Chain container included.

High Speed Electric Chain Hoist 115V 1-PHASE STANDARD

This high speed single phase electric chain hoist offers the ability to lift heavy loads with ease and precision. Light, compact, and powerful; this hoist can be easily installed, transported and offers high lifting speed. Features include double braking system for added protection, heavy-duty motor for industrial applications, high performance friction clutch to prevent overwinding and corrosion-resistant nickel-plated load chain. Chain container included.

Air Powered Chain Hoists

Heavy-duty air chain hoist can be used as a workstation hoist or as a production line hoist. Lightweight, rugged, and compact design - for ease of portability - makes this hoist perfect for most air hoist lifting applications. Standard lift is 10' assuming 90 PSI air pressure. Variable flow, two (2) lever pendant for precise load spotting.

model EMH-3

Electric Mini Hanging Cable Hoists - Suspension Type

Lightweight and compact design ideal for a wide range of applications for construction sites, rigging, warehouse, storage area, confined spaces and plumbing. Easily mounts to most scaffolding and beams (secured with latch hook). Robust design, strong steel construction and durable powder coated finish. Dual braking systems provides instant and safe braking. Built in raise/lower limit switch prevents excessive winding. 360° swivel hook with safety latch. Thermal overload on the motor for added safety. Quick disconnect power and hand control cord. Low noise and smooth operation. 115V 1-PHASE STANDARD

model MINI-2

Mini Cable Hoists 115V 1-PHASE STANDARD

Use in single-line and double-line lifting applications. Cable length is 36' when used as a single-line - 18' when used as a double-line. Includes electric motor and hand-held push button controls. Installation bracket will fit on 1½" round pipe or 1½" square tubing. Optional Swivel Hook Plate must be ordered for attaching hoist to a trolley (trolley not included). Hand pendant control cord is 5' long.

Gantry Sling Racks

Gantry Sling Racks are a great addition to any manufacturing and industrial facility. The strong steel construction, with a baked in powder coat finish, adds toughness and allows for hanging of items both large and small. The lower rack is adjustable to different heights to better suit the user's needs. The included hooks enable the user to hang items from both sides and in offset positions due to their adjustability. This sling rack can be utilized as a stationary or portable unit. Casters and mounting pads are included for the user to choose the desired function type.

Polyester Lifting Slings - Double Ply

For medium to heavy-duty lifting, these double-ply lifting slings are the practical, economical answer to many lifting problems. TYPE III style with fabric ends has flat tapered eyes at both ends and can be used for all hitch types. Double capacity when used in basket-style. Reduce capacity 20% when used in choker-style. These slings meet DIN-EN 1492-1, ANSI standard B30.9 and OSHA requirements.

Non-Marring Plate Clamps

Designed for lifting and revolving material without marring; smooth or polished plates such as stainless steel, aluminum, pre-lacquered plates, wood, marble, concrete, glass, plastic, or other fragile surfaces. Designed to meet ANSI B30.20-24 standards. Clamps have a permanently attached chain sling with a large oval suspension ring and non-marring polyurethane coated jaws. Lift only one plate at a time.

Positive Locking Plate Clamps

Grips sheet until release ring is pulled. Serrated gripper is hardened tool steel. Forged head and gear. Safety factor is 2 to 1. Baked-in powder-coated toughness. Designed to meet ASME B30.20 standards. Do not use plate clamps to lift loads less than 20% of rated capacity. Lift only one plate at a time. Plate must be clean and free of oil. *Not designed to use on stainless steel or aluminum plates. For use with materials with a surface hardness to 30 RC (300 HB).*

ADJUSTABLE BAIL, MODEL HDP-AB

Overhead Load Lifters

Overhead Load Lifters are designed for lifting and moving pallets, skids, and crates with an overhead lifting crane. Includes an adjustable bail for keeping the load level when moving. Includes (3) three height positions. Welded steel construction with blue painted finish.

Crane Scales 6V DC STANDARD

Accuracy, quality, durability, and affordability are key attributes of the Crane Scales. Our digital hanging scales offer fast and reliable weighing in a compact and durable housing. Designed to withstand the most aggressive and heavy duty industrial lifting applications. Features: hook and shackle, rechargeable 6V battery, AC/DC power adapter, automatic shutoff, and convertible gross/net weight (5 digit) display. Each digit is 3/4" wide by 1 1/4" high for easy readability. Accuracy is +/- 1%.

MODEL NUMBER	DESCRIPTION	OVERALL SIZE (W x D x H)	UNIFORM CAPACITY	WEIGHT (POUND)
SC-06	CRANE SCALES	7 ⁵ / ₈ " x 8" x 14"	600 lb.	22
SC-2	CRANE SCALES	7 ⁵ / ₈ " x 8" x 17"	2,000 lb.	30
SC-4	CRANE SCALES	7 ⁵ / ₈ " x 8" x 17"	4,000 lb.	32
SC-6	CRANE SCALES	7 ⁵ / ₈ " x 8" x 17"	6,000 lb.	33

Digital Load Indicators

Incorporate this high tech gauge into your setup and read off the results. A strong, heavy duty tool which can withstand great weights and is exceedingly robust. Easy-to-read display and easy to use. The LCD display, which can tare as well as show either the gross or net load. Light weight, compact, and ergonomic design. Ideal for difficult conditions: access or sloping ground. It can be used in conjunction with shackles and hooks. Automatic stand-by for a prolonged battery life time. Suitable for operation in ambient temperatures of 14° through 104°F.

Winch Operated Truck Jib Cranes

Installed in your pick-up truck bed, this winch operated jib crane will help lift loads. Lift items from ground to truck bed height, then rotate into cargo area. Includes telescopic boom design with manual hydraulic hand pump to pivot boom up and down. Manual cable winch to lift and lower loads up to 500 pounds. Friction brake winch locks automatically when operator turns the handle counterclockwise to lower load. Cable usable length for all models 24' except WTJ-2 (9' model WTJ-2) with a diameter of 3/16". Unit comes with one (1) fixed hook, one (1) chain slot lock, and one (1) cable sling hook with latch. The crane swivels on a 360° base. Safety yellow, galvanized or stainless steel finish available. Welded steel construction. 12V DC power option available.

Hitch-Mounted Truck Jib Crane

Hitch-Mounted Truck Jib Crane easily mounts in standard Class III or higher 2" receivers. Installation and use requires no modifications to receiver or truck. Unit may be adjusted/ leveled for best use in all conditions. Maximum uniform lifting capacity is 600 pounds. Manual hand brake winch with 25 feet of 3/16" diameter cable and lifting hook included. Offset upright design does not restrict tailgate use while installed. Crane may be installed on either side of truck as required. Rugged, welded steel construction with powder coat black finish.

Positioning of product is provided by a hoist or the Air Balance Jib Lifter.

DOUBLE HOOK model LMEC-DH

Air Balance Jib Lifters

These lifters achieve high performance, excellent safety, and low cost in the handling of heavy materials. Effortlessly handle materials in a three dimensional work space. The push-button hand control operates the pneumatic cylinder, raising and lowering the cable, in turn, positioning the load. Arm rotation is 360°. Air pressure 100 psi.

Power Lift Jib Cranes 12V DC & 115V 1-PHASE AC STANDARD

Designed for material handling applications on docks, in warehouses, or in truck beds. Choose either 12V DC, 1 HP with 6' long non-removable pendant control or 115V AC, 1/3 HP with fingertip switch to raise and lower hook. Powered winches are designed for intermediate lifting. Meets ANSI and OSHA specifications. 12" x 12" mounting plate. Unit is designed for vertical lifting only. Do not use unit for lifting personnel or overhead lifting. Battery not included. Models with suffix -CSA feature a winch that meets Canadian requirements.

- A) Structural Jib Cranes feature rotation hand brakes that offer unlimited 360° manual positioning. Mast mounts permanently. Boom adjusts in 12" increments and can be positioned at 4 elevations. DC models include 46' of 3/16" aircraft-grade wire rope with swivel hook and safety latch. AC units feature 25' of 7/32" cable. Folds for storage. Blue painted finish.
- B) The economical answer to your material handling problems. Offers light-duty, intermittent use. Up to 1,500 pound uniform capacity at 36" boom extension. 360° locking manual rotation, 25' of 7/32" cable with hook on AC units. 46' of 3/16" cable on DC units. Blue painted finish.
- C) These cranes offer the same features as the Type A cranes with a galvanized finish.
- D) These cranes offer the same features as the Type B cranes with a galvanized finish.

Air/Hand Pump Hydraulic Shop Crane

This crane allows one person to maneuver product from location to location, and then lift it with everyday factory air. If air is temporarily unavailable, lift product with the hand pump hydraulic option. Air raises unit 7" to 8" per second. Hand pump raises units $\frac{1}{2}$ " per stroke. Units roll on 3 $\frac{1}{2}$ " x 1 $\frac{1}{4}$ " cast steel casters, (4) swivel in back (2) swivel in front. The hoist offers heavy-duty lifting power, while optimizing space when in the folded position. Standard features: foldable legs, adjustable boom, swivel hook, and steel construction.

Electric Powered Floor Cranes 24V DC POWERED

Fully powered shop cranes (power hoist & power in/out boom) for moving loads quickly, easily, and safely. 24V DC drive and lift motor handles heavy-duty jobs. Ergonomic handle features easy-to-operate throttle with infinite adjustment of forward and reverse speeds, lift/lower controls, proprietary safety-enhancing emergency reverse function, and horn. Includes an electromagnetic disc brake with automatic dead-man feature that activates when user releases the handle. Powered shop crane has two (2) 12V batteries, integral battery charger, and battery level gauge. Poly-on-steel steer and load wheels. 3-4 hour operation at full charge - 8 hours when used intermittently. Includes rigid hook with safety latch.

Model *EPFC-25* features adjustable length legs.

Model *EPFC-25-AA* features adjustable length legs and 36½" to 51½" adjustable width legs.

Model *EPFC-CB-15* features fixed legs and counter balance design.

Counter Balanced Floor Cranes HAND PUMP OR 12V DC POWERED

This Crane has an adjustable boom to allow for maximum adjustment and versatility to lift a variety of loads. Boom is raised with a manual hydraulic hand pump or a push of a button on DC powered units. Boom also telescopes out for greater reach. The counterbalance design eliminates the need for front legs, making the unit easier to maneuver and ideal for reaching tight, hard to reach areas. Units roll on two (2) rigid 8" x 2" glass-filled nylon and two (2) swivel 8" x 3" phenolic caster with side brake. Counterbalance included. Welded steel construction with blue paint finish. Air operation available, contact factory.

Hoist Trailer

Unique hoist may be towed behind a car or truck to job site and then used for hundreds of applications. Includes a class 2 ball coupler accommodating a 1 7/8" ball and safety chains for use with most common hitches. Features two (2) large 16" diameter pneumatic wheels, two (2) swivel casters 4" x 2" in rear, two (2) rigid 5" x 2" in front, and one (1) swivel clevis hook with safety latch at the end of the boom. Telescoping lift arm and legs, as well as a removable jack handle standard. Welded steel construction with painted finish.

OPTIONAL BRAKE LIGHT KIT WITH WIRE HARNESS, MODEL H-TRAIL-HTH

Pallet Truck Hoist

The Pallet Truck Hoist is an affordable and practical alternative for lifting and lowering loads to and from elevated work stations. It provides workers with a mobile lifting jib that quickly secures to a standard 27" x 48" pallet truck. Fork pockets measure 7 3/8"W x 1 7/8"H inside on 19 3/4" centers. Once installed, the pallet truck can still be used with most pallets and skids allowing for transport of heavy pallet loads, while retaining the ability to lift and lower loads to and from the pallet. It uses a clutchless cable winch with 80" of cable (88" with hook and shackle) for easy lifting and lowering. Lower load onto forks before moving. Steel construction with baked-in powder-coated toughness.

MODEL NUMBER	OVERALL HEIGHT	OVERALL BASE WIDTH	BOOM LENGTH	HOOK FROM UPRIGHT	UNIFORM CAPACITY	WEIGHT (POUND)
PJ-LIFT	77 1/4"	30"	21"	21"	500 lb.	210

PALLET TRUCK NOT INCLUDED

POWDER COATED TOUGH

Tripod Hoist Stands

Portable and adjustable height tripod provides a convenient and economical lifting support stand. Independently adjustable legs enable use on uneven surfaces. Adjust leg height in six (6) inch increments. Unit folds for convenient portability and storage. Great for access to confined spaces. Features padded pivots for smooth or spiked feet. The spiked feet are designed to be used in rough terrain. A swivel eyebolt and safety chain are standard. Steel units have a painted blue finish. Chain hoist not included. Meets ANSI safety requirements for confined space Z117.1.

Deluxe Drywall/Panel Hoist

Hoist lifts panels for installation on ceilings or walls up to 11 feet high. Synchronized telescoping mast action for fast and smooth raising/lowering. Easy winch operated and built-in brake mechanism. This hoist is affordable but very dependable with all welded steel and heavy duty construction. Dismantles to fit in the trunk of most cars. 360° swivel cradle to load panels vertically or horizontally.

MODEL NUMBER	SHEET SIZE CAPACITY	LOAD HEIGHT	MAXIMUM HEIGHT	UNIFORM CAPACITY	WEIGHT (POUND)

Hand Winches

Wall Mounted Hand Winches Pulling devices that use a wire, rope, cable, strap or web to move heavy loads. Constructed of steel worm gear drives with zinc plated finish. Pinion gear shaft with lubricated down bushings provide smooth operation and long life.

Stainless Steel Hand Winches are constructed of 304 stainless steel for corrosion resistance. Machine-cut spur gears ensure smooth accurate operation, while protective gear covers keep dirt out and help prevent worker injuries. Winches feature a drum clamp for easy attachment of wire rope (not included), and an automatic brake for positive load control during lifting and lowering operations.

Manual and Worm Gear Hand Winches

Manual Hand-Operated Gear Drive Winch, model HWG-600, is designed for many lifting, lowering, and pulling applications. Equipped with a load pressure brake. This brake holds the load at any required height during hoisting and lowering and prevents any unintentional lowering of the load. Adjustable crank handle for fast lifting of smaller loads, resulting in lowest possible handle effort and rapid winding of the rope. All rotating parts are maintenance-free. Suitable for operation in ambient temperatures of 14° through 120°F. Capacity 600 pounds.

Worm Gear Hand Winch, model HWV-1000, allows for better load control and features a reinforced frame comfort-grip handle. Worm gear provides load holding capability when handle is released. Reel stops automatically, locking load in place whenever the handle is released. High quality enamel paint finish, dipped and baked. Crank handle can be adjusted in length. Winch housing and rope drum are made from robust steel plate. Capacity 1,000 pounds.

MODEL NUMBER	GEAR TYPE	WIRE ROPE	DRUM CAPACITY (FT.)	OVERALL SIZE (L x W x H)	WEIGHT (POUND)

CABLE IS NOT INCLUDED

Galvanized Two-Speed Cable Puller

Great for use in horizontal pulling applications such as positioning equipment, stringing lines, and emergencies. Can be used in both single and double-line pulling applications. Handle ratchets to take up cable. When handle is rotated all the way back, the cable reel will free-spool. Handle length is 30". Minimum headroom is 24". Single-line cable length is 1/4" x 120" (cable length is 60" when used as a double-line). Not for use in vertical lifting applications.

OPTIONAL LADDER SAFETY GATE

CASTER FOOT LEVER

model LAD-6-14-P-EZ shown with LAD-GATE-50-EZ option

Rolling Warehouse Ladders (6 to 11 Step)

Finally an easy and safe solution for reaching products on high shelves. Constructed of square tubing framework, which handles uniform capacities up to 350 pounds. Units feature a 58° climb angle and EZ models feature a 50° climb angle. The handrail height is 30". Each step is 24" wide by 7" deep. Choose either grip strut style or perforated style steps. Front wheels are 10" diameter. Unique design allows ladder to separate for shipping and storage. Welded steel construction with powder coat finish. Manufactured in compliance with OSHA 1910.29 and ANSI A14.7 standards. Units are shipped knockdown, some assembly required.

Optional safety gate sold separately to help keep children and unauthorized personnel off the ladder. Activating the caster foot lever will lift the gate into an upright position and engage the casters on the floor. This deters access to the ladder and allows the ladder to be moved. Pushing the gate forward will disengage the casters from the floor and allow for safe access to the ladder.

Rolling Warehouse Ladders (12 to 16 Step)

Finally an easy and safe solution for reaching products on high shelves. Each ladder is rated at 350 pounds uniform capacity. Units feature a 58° climb angle and the EZ models features a 50° climb angle. The handrail height is 36" from the top step and around the top step a 4" toeboard is included. Each step is 24" wide by 7" deep. Choose either grip strut style or perforated style steps. Front wheels are 3" diameter. Side frame is constructed from welded square tubular steel and offers maximum strength. Unique design allows ladder to separate for shipping and storage. Welded steel construction with baked-in powder-coated toughness. Manufactured in compliance with OSHA 1910.29 and ANSI A14.7 standards.

Optional safety gate sold separately to help keep children and unauthorized personnel off the ladder. Activating the caster floor lever will lift the gate into an upright position. Pushing the gate forward will disengage the casters from the floor and allow for safe access to the ladder.

Standard Slope Ladders

Portable Warehouse Ladders for every-day use applications. Heavy-duty uniform weight capacity is 350 lb. Features 58° standard climb angle. Choose either Perforated or Grip-Strut steps. Step depth is 7" with a top step depth of 14". Welded square tubular steel construction with powder coat blue finish. Rubber feet provided for floor protection. Units with 2-5 steps have two (2) all directional spring-loaded swivel casters and two (2) swivel casters with total locks. Units with 6 to 12 steps have bottom step lock casters for safe use when climbing. Ships knockdown. Ladders comply with OSHA 1910.29, ANSI A14.7 standards.

The ESD-Safe Design features anti-static properties; conductive semi-gloss black baked-in powder-coated toughness, conductive wheels which features gray rubber tread on polyolefin core, and grounding drag chain with resistor, nickel-plated brass construction. Note ladders must be used on conductive floors to comply with ESD properties. Ladders comply with OSHA 1910.29, ANSI A14.7, ANSI S20.20 standards.

Tip-N-Roll Mobile Ladders

These ladders are available in either straddle or non-straddle design. Choose the straddle base for areas with permanent obstructions or non-straddle base for standard applications. When tilted, ladder rolls smoothly on 4" wheels. Uniform capacity is 350 pounds. Straddle base ladders include a removable tool tray that measures 24" x 10". Available with perforated steps or grip strut steps. Blue baked-in powder-coated toughness. Units are shipped knockdown, some assembly required.

FDA Compliant Finish - The square tubular steel Tip-N-Roll FDA Ladder has a special FDA-compliant powder coat white finish that provides a low-cost alternative to stainless steel construction. Rubber feet provided for floor protection. Stainless steel hardware included. When tilted, ladder rolls smoothly on wheels. This ladder has perforated grip steps. Some assembly required.

model LAD-RAF-6-P

Roll-A-Fold Ladders

Portable ladders conveniently fold for storage. Constructed of square tubing framework which handles uniform capacities up to 350 lb. Features 30" high removable hand railing, with 12 step models featuring a 36" removable hand railing, 14" deep top platform, and a baked-in powder-coated toughness (11 and 12 step units are painted). Also features a 58° climb angle with the EZ models featuring a 50° climb angle. Each step measures 16¹³/₁₆" wide by 7" deep and is spaced 10" apart. Models with 8 - 12 steps have steps that measure 23³/₁₆" wide. Unit rolls around on two large 10" x 2½" hard rubber wheels. Units are shipped crated, some assembly required. Complies with ANSI A14.7 and OSHA 1910.29 specifications.

Ladder Tool Trays

Ladder Tool Trays are universal trays that fit different style ladders. This easy bolt-on option measures 10⁵/₁₆" in length with a height of 3³/₈". Width of tool tray options for each ladder are available. Baked-in powder-coated toughness.

* ONLY WORKS WITH STEPS 8 TO 12
 ** ONLY WORKS WITH STEPS 4 TO 7

Commercial Spring Loaded Ladders

Commercial users of rolling ladders now have an attractive and economical alternative to the traditional warehouse rolling ladders. This sleek design also provides maximum safety and convenience. The all directional spring-loaded swivel casters feature steel dome protection and include rubber pad bottoms to minimize movement. Climb angle is 58°. The top step is 16" wide by 11" deep, while the remaining steps measure 16" wide by 8" deep. The baked-in powder-coated toughness provides a durable attractive appearance. Uniform capacity is 300 pounds.

Spring-loaded swivel casters are protected by a steel dome with rubber bottom pads for extra grip.

Maintenance Ladders

Portable ladders for use around warehouses, hardware stores, or inventory rooms. Tilt the unit to allow for portability. Units roll on 4" poly-on-poly wheels. Constructed of square tubing framework, which handles uniform capacities up to 350 pounds. Features 30" high removable hand railing (36" on 12 step models), access chain, 21" deep top platform, and baked-in powder-coated toughness. Each step measures 24" wide by 7" deep and is spaced 10" apart. Models with 5 - 12 steps are shipped crated, some assembly required. Complies with ANSI A14.7 and OSHA 1910.29 specifications.

Modular Style Stairways

Attractive Modular Style Stairways are economical and easily assembled. Steps are 36" wide with non-skid grip strut, which bolt in place and are baked-in powder-coated toughness. Standard climb angle is 31°. Customer must provide their landing height at time of purchase. Handrails and side rails bolt together. The handrail tubing has a powder-coat yellow finish. Units meet OSHA requirements and unit ships disassembled. Concrete Anchoring Hardware available.

Modular Steel Work Platform Systems

Modular Work Platform Systems can be configured to fit any application. Platform legs have a fixed height and provide stability to the entire modular unit. Designed for maximum loading capacity of 500 pounds. Stair / platform configuration has a maximum capacity of 1,000 pounds. Fixed height ladder sections attach to platform. Individual grip steps are 23⅞" wide by 7" deep with 10" step spacing. Each ladder section includes round tube handrails. Each handrail section has a midrail and 4" toeboard. Constructed of industrial grade welded steel with a powder-coat finish. Meets OSHA specification 1910.23. Hardware is included for easy assembly. Concrete wedge anchors available for securing unit to floor. All components are sold separately. Survey sheet available on page 248.

series LAD-FM

Mezzanine Ladders (face mounted/retractable)

The Mezzanine Ladders are used for infrequent usage to access mezzanines. They are ratcheted into climbing angle and back into stored position. The wheels roll on the ground when ratcheted and the handrails mechanically rise into climb position when ladder locks into position. Quickly extend and retract the ladder. The mezzanine ladder allows for quick installation with mounting bracket provided for bolt-on installation or welded installation. Steps are 24 $\frac{1}{4}$ " wide. Collapsed distance from wall is approximately 15 $\frac{1}{2}$ " for all models. Customer must provide their mezzanine height at time of purchase. Baked-in powder-coated toughness. Meets or exceeds all OSHA requirements. Ships knockdown, some assembly required. Survey sheet available on page 247 for mezzanine heights of 60" to 120".

Alternating-Tread Stairs

Alternating-Tread Step design offers a shorter span than traditional steps. Features handrail on each side of unit, dual safety chain at the top of the stair, and formed steel steps with raised surfaces for better traction. Welded steel construction with bolt-on handrails. Baked-in powder-coated toughness. Meets OSHA specification 29 CFR 1910.25 (e). Ships knockdown for lower freight costs.

Cross-Over Ladders

Mount where you need permanent access at crossover points. The upper platform features removable two sided 42 $\frac{3}{8}$ " high handrail with 21" mid-rail and fixed 4" toeboards to prevent objects from rolling off. Serrated steps for extra grip and safety are 23 $\frac{1}{2}$ " wide and 7" deep with a step spacing of 10". The angle of the steps are 58°. The overall ladder width is 29 $\frac{1}{4}$ ". Ground legs include floor mounting pads. Units must be anchored to the floor. Units are all steel construction and can be knock-down for storage and shipping. Uniform capacity is 500 pounds. Meets ANSI A14.7 and OSHA 29 CFR 1910.24. Baked-in powder-coated toughness.

USE LESS FLOOR SPACE

Alternating Step Cross-Over Ladders

Mount where you need permanent access at crossover points. Alternating step design for shorter overall span than other units. The upper platform features removable two sided 39" high handrail with 21" mid-rail and fixed 4" toeboards to prevent objects from rolling off. Usable width is 19⁵/₁₆" between handrails. Heavy-duty uniform capacity rating of 350 pounds per unit. Includes lag-down points for securing to floor, mounting hardware not included. Steel construction with baked-in powder-coated toughness. Ships knockdown. Meets ANSI A14.7 and OSHA STD 01-01-011 standards.

Tank Access Ladders

The NTAL Tank Access Ladders have a unique modular design for inspecting storage tanks. The rungs are offset to protect knuckles and are made from non-slip steel material. This ladder has a durable welded steel construction and a baked-in powder-coated toughness. Models with 10 to 15 rungs ship knockdown.

MODEL NUMBER	OVERALL HEIGHT (FT.)	NUMBER OF RUNGS	OVERALL WIDTH	USABLE WIDTH	WEIGHT (POUND)

model NTAL-7

Walk-Thru Style Dock Ladders

Prevent needless dock injuries with Walk-Thru Style Dock Ladders. Constructed of steel pipe. Mount ladder directly to the dock face by either welding or bolting on. The top half of each step is covered with a slip resistant material for extra safety during climbing and descending of the ladder. The extra high handrail provides maximum assistance and safety. All ladders project 8 $\frac{3}{8}$ " out from face of dock. Models with 5 - 10 steps ship knockdown. Some assembly required. Baked-in powder-coated toughness.

model DKL-4

Aluminum Telescopic Ladders

Ideal when storage space is limited. The lightweight and low profile design allows for storage in closets or tight spaces. Each step is serrated and has a spring loaded locking pin that automatically engages to secure step height. The release mechanism provides a smooth automatic closing design. These ladders extend in 12" increments. Top bumper guards and molded rubber feet protect walls and floors against scratches. Meets OSHA and ANSI specifications.

Folding Ladders with Wheels

Locking foldable design saves on storage space when ladder is not in use. Ladder folds after unlocking one spring-loaded detent pin. Once unit is folded, tilt back on wheels for easy portability. Available in either carbon steel or stainless steel. The steps are perforated to provide a non-slip surface. The ladders have 7" deep steps and a climb angle of 58°. Stainless steel models are a 202 grade. Complies with ANSI 14.7 and OSHA 1910.29 specifications.

Aluminum Ladder/Carts

These well built Aluminum Ladder/Carts are great for home, office, or store. Rugged aluminum construction is strong and lightweight. Converts in seconds from ladder to cart. Ladder uniform capacity is 300 lb., while the hand truck uniform capacity is 130 lb. Nose plate measures 15" wide. Units roll smoothly on 4" wheels.

Aluminum Step Stands

Ideal for industrial or commercial applications. Strong design yields a uniform capacity of 500 pounds, but is lighter than comparable steel models. Open step design includes extra heavy duty serrated surface for traction. With rubber tipped legs, this step ladder is ideal for use on many types of floors. Complies with OSHA 1910.24 specifications.

Fiberglass Twin Front Ladders

Fiberglass Twin Front Ladders are made of non-conductive fiberglass industrial material. They are extra-heavy duty, capable of supporting 300 lb. uniform capacity. These ladders are equipped with slip resistant footing, heavy steel hinges, and inside spreader braces. Steps are on both sides of the ladder to make it easy for two people to work on the same project.

Fiberglass Extension Ladders with Aluminum Rungs

These Extension Ladders feature the Pro Top and have a 300 lb. uniform capacity. They are equipped with the exclusive Rung Lock Quickclatch, a quick and easy locking method for securing sections when the ladder is extended. The ladder also has the premium feature of a full metal plate that is wrapped around the rail for protection and durability. Pro Top features V-shape design for stability on corners, and soft non-marking/non-marring rubber tread protects work surface.

Aluminum Folding Step Platforms

Perfect for getting that extra reach when pulling parts, painting, washing vehicles, or maintenance needs. Non-skid feet on each leg provides a secure grip. Will not mar expensive epoxy garage floors. Lightweight construction for easy transport. When not needed, the legs fold under the platform for easy storage. Platform size is 15¹/₁₆" wide by 35¹/₁₆" long. Uniform capacity is 250 lb.

Rolling Step Stools (over 17 inches high)

Convenient and easy to use. Spring loaded casters along with a rubber ring around the base provide the extra grip needed when being used. Each step includes a rubber surface. Steel construction with powder coat finish. Uniform capacity is 500 pounds. Easily assembles without need for tools. Meets or exceeds GSA standards.

model ASP-48-HR

Adjustable Step Stands with Handrail

The Adjustable Step-Mate Stands can be used as either a comfortable worker platform or a semi-permanent step. The serrated surface provides extra traction to reduce the potential for slipping. Individual step depth is 11³/₄". Models feature two (2) bolt-on handrails for added stability during use. Handrail measure 20¹/₄"D x 40⁷/₈"H when installed. The legs adjust individually, by screwing them into or out of the leg base, so the unit can be leveled on uneven floors. Each leg fitted with rubber tip for better grip. The unit has a welded construction with baked-in powder-coated toughness.

Container Step Platform

The Container Step Platform is used to lighten the burden of hand-unloading containers. The 22³/₈"W x 22³/₈"D x 46⁵/₁₆"H dual-coated railings help support your hips. The Platform has an aluminum anti-slip floor featuring deep ribbed plate. It has no sharp corners and is easy to maneuver due to smooth working ball bearings. The 4" non-marking polypropylene swivel spring loaded casters with rubber edges stabilize the platform when weight is added.

Double Sided Step Ladders

These unique Double Sided Step Ladders offer more versatility. The steps are made from perforated steel or grip strut steel. The base includes four (4) feet with rubber tips to protect the floor. Portable units have four (4) spring loaded casters. Individual steps are either 17"W, 24"W, or 30¹/₄"W x 7"D with the top step measuring 14"D. Steps are spaced 10" apart. Uniform capacity 350 pounds. Welded steel construction with a baked-in powder-coated toughness.

Adjustable Step-Mate Stands

Our Adjustable Step-Mate Stands can be used as either a comfortable worker platform or a semi-permanent step. Individual step size is 11¾" deep, aluminum construction 11⁷/₈" deep. Grip strut surface ensures safe footing. Legs adjust individually by screwing them into or out of the leg base. Welded construction. Uniform capacity 500 pounds. Steel units feature a yellow baked-in powder-coated toughness.

Bolt-on portability kit, allows Step-Mate Stands to be tilted and moved. Handle also serves as a single side hand rail for extra stability and balance while standing on top step. Includes handle and two rigid wheels. Steel construction with painted finish. Fits on (2) two step models that measures 24", 36" and 48" wide units.

Portable Adjustable Height Worker Stands

Independently adjustable height legs may be set to level unit on uneven floors. Ergonomic matting on top surface provides a comfortable standing surface. Each leg is fitted with a spring-loaded swivel caster with a protective steel caster cup with rubber bottom ring. All welded steel construction with baked-in powder-coated toughness. Uniform capacity is 500 pounds each. Complies with OSHA 1910.26 specifications.

Adjustable Work-Mate Stands

Minimizes fatigue by elevating workers to heights that are comfortable and ergonomically correct. Especially useful when multiple shift employees operate the same piece of machinery. Grip strut style platforms ensure safe footing in most wet environments. Ergonomic matting deck style provides comfort for the operator who stands all day. The height of each leg can be adjusted individually to ensure proper working height. All sizes have four (4) legs except the 60", 72", and 96" long models which have six legs. Uniform capacity is 500 pounds each. Welded construction. Steel units feature a yellow baked-in powder-coated toughness.

STEEL TOEBOARD fits between VDKR-P101 or VDKR-P102 handrail sockets and bolts to floor using existing/common anchor bolts. Toeboard is 4" high.
series VDKR-TB

Steel and Aluminum Safety Railings

Protect people from uneven walkways and mezzanine drop off's. Safety railings are available in 2 constructions, aluminum and steel. The steel models have a schedule 10 pipe construction while the aluminum models are made of schedule 40. Handrails are 42" high with a 21" mid-rail. Mounting options include: steel sockets, cast steel base, barricade base with feet or wheels, metal sleeves, wall mounted sockets or cast steel sockets for convenient handrail removal. The series VDKR-P sockets accept wood 2" x 4" or 2" x 6" when toe boards are required and two (2) lag down holes for permanently mounting the railing. Series VDKR has a yellow baked-in powder-coated toughness.

VDKR & ADKR series pipe railings satisfy federal OSHA requirements for standard guard rails in 29 CFR 1910.23.

Self-Closing Steel Gates (Adjustable Width)

Customize your safety railings with Self-Closing Steel Gates. Gates can be mounted from the left or right with the included mounting hardware. Mount to horizontal rails that measure up to 2" diameter and are spaced 10" to 21" apart center to center. Choose from galvanized or yellow powder coat finish. Meets OSHA 1910.23(a)(2) requirements. Works with handrail series VDKR and SQ. Railing sold separately.

Mezzanine Safety Gates

Mezzanine Safety Gates provide an OSHA required 42" high handrail, 21" high mid-rail, and 4" high toe board for mezzanines without sacrificing load accessibility. To accommodate the maximum load height of 68", when utilizing a standard 48"W x 48"D pallet (two standard, side by side pallets for models MEZZ-200-DW), load positioning within the gate is critical. For greatest amount of clearance and item placement flexibility, shorter loads are recommended. Gate design is balanced to allow for easy operation without use of springs. Baked-in powder-coated toughness. Welded steel construction.

MODEL NUMBER	OVERALL HEIGHT	OVERALL WIDTH	OVERALL DEPTH	USABLE WIDTH	WEIGHT (POUND)

Crowd Control Interlocking Barriers

Attractive and functional design ideal for directing personnel. Interlocking portable railing has many commercial and industrial applications. Easy to move to meet changing needs. Upright bars are vertically spaced at 5 7/8" intervals for the light-weight style barriers and 5 3/4" for the heavy-duty style. Each railing includes connectors to attach multiple units together to form long runs. Overall size is 102"L x 40"H. Feet are removable so railing will lay flat for shipping and storage. Variety of foot styles available. Rugged welded steel construction.

Semi-Permanent Barriers

These attractive, durable barriers have a powder coat finish over a galvanized finish which provides long life without fading or cracking. Each rail section includes brackets and hardware for connecting to post. Each post can be used to install two straight rails or a 90° configuration. Posts are held in place by pre-drilled, heavy-duty black molded rubber base. Overall size of post base is 11¾"W x 15¾"D. Concrete mounting hardware is included with each post base. Railing height when mounted is 36". Railing and posts sold separately.

Web Barrier Stakes

The unique barrier head design with spring loaded retractable tape allows for quick set up and easy storage. These stakes are very versatile, leaving you the option of direct ground insertion with the spiked end or using the weighted base for use on hard surfaces. The stake has a telescoping function that extended to 42". Bases can be filled with 18 lbs. of water or 30 lbs. of sand in order to weigh them down. Model WBS-WALL (Wall Mount Kit) includes: head wall mount, wall receiver, six (6) wood screws, six (6) wall anchors, and four (4) zip ties.

WBS-CART-Y (Cart Package) includes: five (5) stakes, five (5) bases, and five (5) "CAUTION" reels. Different colors and verbiage options available, contact factory. Parts sold individually.

Guard Rail Systems

Protect personnel and equipment both visually and physically with our Guard Rail Systems. These economical systems can be utilized indoors or outdoors. Ideal for protecting corners of buildings and machinery from fork truck and vehicle damage. Choose between one, two, or three high rail systems. Tubular posts are machined for continuous or perpendicular rail mounting. GR series has rail slotted mounting holes 3/4" x 2 1/2" provided, mounting hardware not included. Floor mounting kit sold separately. Deduct 5" when overlapping on a shared post. Units are rated for 4,000 pounds at 4 mph.

Structural Guard Rails (drop-in and bolt-on style)

Create a modular system to protect equipment, inventory, and individuals from damage or injury. Triple ridge corrugated rails are constructed from 1/8" thick material, made for high impact resistance indoors or out. Posts are constructed of 1/4" thick material with mounting holes on all four sides for use as corner or center posts. Posts measure 4" x 4" with a 10" square steel base plate that is 5/8" thick. Bolts and washers are provided with individual rail sections. Provide easy accessibility with our drop-in style rails. Slide rail sections into post saddles for simple assembly. Each drop-in style rail section includes two brackets. Bolt-on style rails are designed for permanent installation.

Structural Channel Guard Rail Systems

Constructed of structural C-channel 11.5 lb. per foot for maximum strength and protection. Railing can be removed in a matter of seconds. Features 10" x 10" base plate with four (4) pre-drilled mounting holes. Posts include mounting holes on three sides for use as corner or center posts. Drop-in style bracket, and their hardware come with each structural rail purchased. Baked-in powder-coated toughness.

Heavy Duty Guard Rails

Heavy Duty Guard Rails are one of the strongest on the market withstanding multiple hits from a forklift. Stops a 12,000 lb. forklift traveling at 8 mph. Upon impact, guard rail distributes the shock throughout the entire section, resulting in zero deflection. Heavy duty pipe sleeved in durable HDPE plastic, where pipe post is 4" schedule 80 pipe, and pipe rail is 6" schedule 40 pipe. Standard color is safety yellow. The maintenance-free, never paint again system will keep your facility looking clean and new. Units arrive fully assembled. Other configurations and sizes available, contact factory.

Steel Pipe Safety Bollards

Bollards can be used both indoors and outdoors to protect work areas, racking and personnel. Plastic top caps are removable on the 1 3/4", 4 1/2", and 5 1/2" diameter units and bollard may be filled with concrete. Steel caps are welded on the 6 5/8" and 8 5/8" diameter units. Base plate includes four (4) pre-drilled mounting holes. Mounting kits and replacement caps available. Baked-in powder-coated toughness.

Surface Mounted Removable Steel Pipe Safety Bollards

Bollards can be used both indoors and outdoors to protect work areas, racking, and personnel. Surface mounted zinc coated steel base plate allows for quick and easy bollard removal. Steel base plate is bolted in place (padlock not included). Guard is easily inserted into base plate, then secured in place. A padlock may be added to prevent unauthorized removal. Base plate measures 10¹/₄" W x 10¹/₂" L x 2" H and include four (4) pre-drilled mounting holes. Plastic top caps are removable. Baked-in powder-coated toughness. Welded steel construction.

Movable Bollards

Movable Bollards provide a portable visual barrier when an area needs temporary protection. Ideal for use when keeping traffic out of a temporarily hazardous area or area under repair. Can be used indoors or outdoors. Units are 42" high with a diameter of 5¹/₂". 10" mold-on-rubber wheels standard. Yellow baked-in powder-coated toughness for high visibility. Series BOL-MB-JK has a removable plastic top cap, which exposes four chain slots. Series BOL-MB-JKS has a removable bolt-on steel top cap with socket set-screw.

POUR IN PLACE series BOLPP

Steel Pipe Bollard with Chain Slots

Create barriers around workstations, machinery, and outdoor space. Ideal for indoor and outdoor applications. Easy to assemble. Series BOL-JK has a removable plastic top cap, which exposes four chain slots. Series BOL-JKS has a removable bolt-on steel top cap with socket set-screw. Place chain into chain slots, storing any excess chain inside the bollard, and place cap back onto bollard. The chain slots hold chain connected to other bollards. Base plate includes four pre-drilled mounting holes. Heavy duty welded steel construction. Yellow baked-in powder-coated toughness for high visibility.

Pour In Place Bollards

Make your bollards permanent by setting them in concrete. The extra length of the Pour in Place Bollards allow you to maintain the needed height while fixing the bollard in concrete. Bollard comes with slide through lag anchors and a removable cap (except models with outside diameter of 6⁵/₈" are open-topped, no cap) so the bollard can be filled with concrete to increase its strength and durability. Baked-in powder-coated toughness. Assembly required.

Removable Bollards

Removable Bollards include one (1) mounting sleeve and one (1) bollard. Lift the bollard out of the supplied mounting sleeve to remove. To provide added security, choose the Removable Bollard with the key lockout feature. When the bollard is removed, consider the cover sleeve option to prevent debris from collecting in the mounting sleeve. Yellow baked-in powder-coated toughness for high visibility.

Removable Ornamental Steel Bollards

Provide an attractive, yet functional barrier to vehicle access and parking areas. Bollards are 4 $\frac{1}{2}$ " in diameter, while the rings make the overall diameter 6". Padlock not included. Baked-in powder-coated toughness. Includes eyes for attaching chain or rope.

Model BOL-OR-40-BK, locks into galvanized steel socket that is cemented into the ground. When the bollard is removed, a cover plate protects the hole leaving no protrusion above the surface.

Model BOL-OR-40-BK-SM, fits into steel socket that is bolted to ground (mounting hardware not included).

Self Storing Bollard with Door

This unique bollard is designed to slide down into the ground or floor when not needed. Great for preventing access to parking areas. Each unit includes a sleeve that can be set in the ground with concrete. Bollard has a handle in the top to allow for easy lifting and lowering. Lift and twist to lock into raised position. Twist and lower to return to stored position. Includes locking tab for use with padlock (padlock not included) to prevent unauthorized operation. Steel construction with baked-in powder-coated toughness.

Spring Loaded Steel Bollards

Designed to serve as a visual and/or audible warning to personnel. Unique 30° spring-loaded design will bend and not break like rigid bollards. Prevents damage to bollard and equipment. Promotes long life. Order bollard with or without light/siren option. Light/siren option includes sensitive switches that will activate a strobe light and warning siren when contacted. Operates with two (2) 9V batteries (not included). Simply slides into open top of bollard. Each bollard is manufactured from steel and includes baked-in powder-coated toughness. Bollards measure 42" high (45 $\frac{1}{4}$ " model SPBOL-42-BL) with a 2 $\frac{1}{8}$ " O.D.

Aluminum Smokers Bollards

Manufactured from aluminum alloy for an attractive finish. Includes internal storage container for holding cigarettes. Easy to empty design. Floor-mounted unit includes pre-drilled mounting holes. Wall mounted unit includes hardware.

MODEL NUMBER	DESCRIPTION	HEIGHT	OUTSIDE DIAMETER	WEIGHT (POUND)
SMK-F-35A	FLOOR MOUNTED	35"	3 1/4"	13
SMK-W-19A	POST MOUNTED	19"	3 1/4"	4

Downspout Drain Water Disperser

Attaches to most standard down spouts. Easy installation. Fits up and around the end of downspouts. During a rainstorm water collects at the bottom of drains, ruining grass and landscaping. This device evenly disperses the water outward over a larger area. Aluminum construction. Installation hardware not included.

High Profile Machinery Guards

Heavy-duty welded steel construction for protecting racks, building walls, expensive equipment, and hundreds of other applications. All 42" high units include a 21" mid-rail to comply with OSHA requirements. Available with a yellow baked-in powder-coated toughness or 304 stainless steel polished finish. Two (2) base plates with four (4) pre-drilled mounting holes in each plate.

High Profile Machinery Guards with Welded Mesh

High Profile Machinery Guards are ideal for manufacturing and distribution facilities. The unit is constructed of baked-in powder-coated toughness 7 gauge welded steel wire mesh panels for visibility and long lasting durability. The welded mesh inside design allows for products to be protected, while still being visible. To use, place the unit in front of the selected product and attach to surface. OSHA compliant. Includes baked-in powder-coated toughness. Hardware is available separately.

model SMFD-48-Y

model SMFD-48-W

Surface Mounted Flexible Delineators

Ideal for parking lots, islands, work zones, concrete barriers, and bridges. Meet all state specifications for two way and two lane delineators. The flexible base transfers the stress from the impacts to the base, giving longer service life to the HDPE tube. Three times the elasticity of conventional rubber base, polymer base will not crack or split. Can be surface mounted with bolt down plate or epoxy resin. Other colors and styles available.

Stackable Poly Barricades

These portable barriers are ideal for crowd control, area delineation, and security. The unit can be filled with approximately 5.4 gallons of water or sand for added security. Product weight when filled with water is 85 pounds. A centrally placed open handle gives personnel the ability to move unfilled barriers without the need of equipment. Forklift slots on the bottom of the barrier allow for easy transportation while unit is filled. Multiple barriers can be configured and interlocked to make a 90° angle for corner alignment. During storage, barriers can be stacked. Available barrier colors meet ANSI specifications.

Building Protective Column Pads

Protect personnel from workplace injury. Building Protective Column Pads are crafted to maximize protection with three (3) inches of high density foam to compress before any impact. The outside wrap is superior nylon reinforced vinyl. Square beam pads, series V-PAD-S, feature a nylon rope laced through brass grommets to secure the protector to a round or square column. A pleat is folded over and sewn to increase the brass grommet strength. Custom sizes available.

Building Column Protectors

Provide wrap around protection to columns, pipes, and tubing to prevent damage. Constructed of UV protected polyethylene. Units can be stacked two (2) high. Easy to assemble with nylon fasteners included.

MODEL NUMBER	INSIDE OPENING	OUTSIDE WIDTH	OVERALL HEIGHT	UNIFORM CAPACITY (LBS)	WEIGHT (POUND)

Polyethylene Ultra I-Beam Protector

I-Beam Protector allows for installation on beams obstructed by walls or other structures. Four (4) guard units completely cover I-Beam (units sold as each). Install multiple units in a "stacked" mode for higher protection from scissor lifts, raised forklifts, and other high-reaching equipment. Specially designed groove allows for quick and easy installation, no straps or fasteners required.

IBEAM-GRD	7 ¹ / ₂ " x 8 ¹ / ₂ " x 42"	YELLOW	8

Heavy Duty Column Protectors

Two-piece design for protecting in-plant columns and other vertical support members. Hardware is included to connect both pieces together. Heavy-duty welded steel construction. Each base plate includes four (4) pre-drilled mounting holes. Concrete installation hardware sold separately. Baked-in powder-coated toughness.

Modular Guard Systems

Modular Guard Systems can be ordered to fit almost any application. Designed for quick and easy assembly. Railing sections are installed and secured to each post with a single bolt. Select from different railing lengths to custom fit your application. Railing systems are made from heavy-duty 2½" square steel tubing. Wall mounting posts may be used to secure guard assembly to a wall. Baked-in powder-coated toughness. Steel construction. All components sold separately.

Sign Base Systems

Give your property that brand new look for years to come! Save time on installation and no core drilling or anchor assembly required. Pyramid base can be conveniently rolled out of the way for parking lot maintenance and snow removal. Made with 1/4" low density polyethylene, which has ultra-violet and anti-static additives for long lasting, maintenance free use. Bases can be filled with concrete, sand, or up to twenty two (22) gallons of water (1 1/2 gallons model OSB). Steel pipe sleeved with high-density thermoplastic included with bases. Supports various signs (not included), see Facility Maintenance supplement. Post is removable from base for easy storage.

Portable & Permanent Sign Bases

Sign Bases are perfect for parking garages, parking lots, retail establishments, school crossings, and high traffic pedestrian walkways. A lightweight and more durable option to steel, these signs are designed to take vehicle impacts and low speed roll-overs without causing damage to the post or vehicle. The recycled base, series FSP-BASE, is perfect for short term applications or when a rapid deployment is necessary. Permanent sign posts with circular bases can be anchored with 1/4" lag bolts (not included). Other post heights and signs are available, contact factory for pricing.

Corner Protectors

Heavy-duty corner protectors are designed to protect corners from damage. Versatile protection for warehouses, offices, overhead door frames and tracks, or any 90° corner.

Corner Protector, model VCP-42U, stop costly damage to facility corners and walls. Safety yellow, polyethylene unit maintains appearance without constant upkeep. Hardware kit is included to make installation into any wall surface quick and easy.

Molded Rubber Corner Protectors, series MRCG, are made from black molded rubber. A corner protector includes reflective safety yellow tape model MRCG-39, green model MRCG-20 for higher visibility. No pre-drilled holes.

PVC Corner Guards, model YCG-12, has a clean and attractive appearance with black and yellow safety stripes for greater visibility. Multiple guards may be installed end-to-end, 48^{25/32}" overall height, for greater coverage. Sixteen (16) screws/anchors included for installation. Four (4) pieces per package.

Aluminum Treadplate Corner Protectors, series TPCG, provide corner protection with a durable and attractive non-marking diamond plate material. Install with construction adhesive and pre-drilled holes for anchoring (adhesive and hardware not included).

Manhole Guard Rail

The Manhole Guard Rail is perfect for utility maintenance and city officials. The simple set up and take down promotes quick use when on the go and a compact storage when not in use. High rails and an attaching chain limit access and promote safety to the worker in the enclosed area. A brightly colored high strength construction makes the unit highly visible, giving caution to pedestrians and other workers to keep their distance.

Light Pole Base Protectors

Quickly and inexpensively enhance the visual appearance of your parking lot and lower your long term maintenance costs, while offering safety to your customers and their cars. Designed to fit around a 24" diameter light pole base. The ring assembly allows it to fit any height, and the top is easily customized to fit round or square light poles. Each ring is 9¹/₂" high. Unit comes in half circles that are snapped together around the base and then stacked on top of each other. **When ordering specify light pole diameter for top piece.**

model DWB-88

Economical Overhead Door Warning Barriers

Protect overhead doors from fork trucks and other traffic coming and going throughout each day. Intended for use as a warning system - not a fork truck stop. Constructed with tubular steel uprights and a 4" x 4" wooden beam across the top of the guard. The wooden beam can be easily and inexpensively replaced when damaged. Guard will not interfere with overhead door. Complete unit is painted high visibility OSHA safety yellow. Concrete installation kit available.

Overhead Door Warning Barriers

Protect overhead doors from fork truck damage. Heavy-duty PVC construction is light-weight and will not rust. Highly visible black and yellow safety STRIPES and two American flags serve as a visual warning. Includes two (2) 15' long chains with quick connects to hang barrier from ceiling or existing overhead door track.

Model ODG-133-BL features built-in warning sirens and flashing lights that activate when the barrier is bumped or contacted. Provides an audible and visual warning before damage to overhead door is caused. 76 DB at 9 feet. Requires four (4) 9V lithium batteries, not included.

Dock Barricades - Designed to Prevent Loading Dock "Run Off's" 115V 1-PHASE

Dock Barricades represent the next generation of innovative loading dock safety systems. The electric/hydraulic power unit provides quick and effortless operation. It can stop a four thousand (4,000) pound loaded truck at four (4) miles per hour. It is electronically operated and consists of an electrical bumper-style safety stop circuit to sense obstructions when lowering. Installation is simple, anchor the unit to the floor, mount the control on the wall and plug in. Mechanical unit, model DJG-100MW, features a manual hand crank winch to raise/lower barricade arm. All units include a lock bar on the arm post to restrict rotation of the barricade arm, padlock is not included.

TWO SIX FOOT SECTIONS SHOWN

Safety Lift Gates

Simply lift and the self folding action folds the gate in a vertical position. With the assistance of the air assist cylinder the gate can be lifted with the slightest effort. The Lift Gate is manufactured of steel tubing with a yellow baked-in powder-coated toughness. Unit can be either wall or floor mounted. Ideal on loading dock doors to help reduce the possibility of people falling.

Swivel Dock Gates

Swivel Dock Gates are ideal for securing loading docks, parking lots or pathways. The gate features a steel construction for durability and a yellow powder coat finish for clear visibility. An attachable swing stop is added to the base of each bollard to reduce the wing length of gate arms, and to change the direction of gate swing. A chain slot is also attached to the end of each gate arm for the option of added security. All models come in pairs. Units have pre-drilled mounting holes for easy installation.

SECURE GATE IN OPEN OR CLOSED POSITION WITH PADLOCK (NOT INCLUDED).

Dock Chain Bollard Barrier Systems

The Dock Chain Bollard Barriers create a safe environment for both personnel and products. The steel constructed double chain design adds extra security for doors up to 10'. Unit is designed with a safety yellow baked-in powder-coated toughness for clear visibility, and a bolt on chain hook-up enabling a quick installation or removal. Chains are mounted at 21" and 42" high on the bollard and the chain can be cut to size upon request. Series DCBB-42 include two (2) bollards, two (2) 127" long chains and one (1) DCBB-B-KIT. Concrete anchor hardware available separately.

Customers wanting to convert their existing bollards into a barrier system will need to order model *DCBB-B-KIT* and drill holes for mounting. Kit includes four (4) mounting brackets, sixteen (16) self-tapping screws, one (1) post weldment bracket, four (4) quick links for chain, one (1) chain post handle and hardware. Customer will also need to order model *BOL-CHAIN* and specify how many feet they require (sold per foot). Be sure to order more total feet than the opening to allow for some chain slack.

Crushes 55 gallon steel drums to only 6" high.

ROLL-OUT BASE ASSEMBLY model MTC-RB

Hydraulic Drum Crusher/Compactors

Crushes 55 gallon steel drums to approximately 6" high. Full cycle time is 25 seconds crush and retract. This unit is designed for a duty cycle that will allow for crushing or compacting up to 250 drums per week in a typical, non-hazardous, indoor, room temperature environment when operated on a three-phase power supply. 38,000 pounds of crushing force. The included drum compacting feature allows you to compact contents inside the drum by simply removing the drum crushing plate. Crushing feature will work with any drum size up to 55 gallons. Compacting feature will only work with 55 gallon drums. Safety features include a pressure relief valve, which prevents overload, and a double door latch to secure the door when crushing. Plus an interlock system that will prevent the motor from running unless the door is closed. 6.5 hp motor, 3-phase, 60 hz. Choose from 208V, 230V, or 460V. Meets OSHA 1910.212 / ANSI Z245.5 / JIC standards. Built-in fork pockets aid in transporting, Aluminum drip pan for catching any excess liquid that may be expelled during the crushing operation. The pan holds 1 gallon and measures 31½" W x 4½" L x 1⅝" H. Replacement and additional drip pans are available. Crating is recommended for international shipments, contact factory.

Mobile Gasoline Powered Drum Crusher

Take the Drum Crusher to where the drums are! Features an 18HP 4 stroke Briggs & Stratton gasoline engine. Hydraulic reservoir holds up to 30 gallons of hydraulic oil. Power tilt and integral trailer with tail and brake lights are included. Exterior tension mounted twin cylinders eliminate rod buckling and damage. Unit ships flat bed truck.

MODEL NUMBER	DESCRIPTION	WEIGHT (POUND)
HDC-900-GPT	GAS POWERED DRUM CRUSHER	3400

Manual Trash Compactors

This easy to use product is designed for compacting the contents of 30 and 55 gallon drums. Manual ratcheting mechanism has 7,000 pounds of compacting force. Ratchet mechanism is also used to retract compacting plate. Compacting plate direction is adjusted with selector levers. Ratchet lever is secured in the UP position with locking pin. Includes two (2) wheels for tilt-and-roll portability of unit when empty. Drum not included. Baked-in powder-coated toughness.

MTC-RB	OPTIONAL ROLL-OUT BASE ASSEMBLY				60

Polyethylene Drum Racks

Polyethylene Drum Racks capture spills while keeping your workplace clean and safe. All models tilt the drums slightly forward, allowing maximum drainage and optimizing the use of chemicals while minimizing waste. These improve worker safety by keeping slippery chemicals and oils off the floor.

MODEL NUMBER	DRUM CAPACITY	OVERALL SIZE (W x D x H)	UNIFORM CAPACITY	CONTAINMENT CAPACITY	WEIGHT (POUND)
PDR-2	(2) 55 GAL.	53" x 53" x 44¾"	1,500 lb.	66 GALLON	137
PDR-4	(4) 55 GAL.	53" x 53" x 77¾"	3,000 lb.	66 GALLON	189
PDR-SHF	OPTIONAL DISPENSING SHELF (22"W x 17"L x 5"H)				15

Stackable Drum Racks

Steel Drum Racks accommodate 55 gallon drums and feature four-way fork truck access. Not recommended for stacking more than four (4) racks high. All steel construction with 1/4" formed steel cradles. Bolt together assembly with hardware included. Yellow painted finish. Models with suffix -SS are stainless steel. Models with suffix -G are galvanized. Drums, drum racks, and drum carts all sold separately.

Models DR-CART-2 & DR-CART-3 Portable Drum Dollies accommodate one drum rack and feature two (2) 8" swivel casters and two (2) 8" swivel casters with wheel brake.

Models DR-CART-2-HLK & DR-CART-3-HLK Portable Drum Carts feature removable push handle and two (2) 8" swivel casters and two (2) 8" swivel casters with wheel brake.

*DRUM RACKS SOLD SEPARATELY

Drum Storage Racks

Drum Storage Racks provide orderly storage for 30 & 55 gallon drums. Constructed of heavy duty steel angle and cross bracing is provided for extra strength. The uprights keep drums from accidental roll off and allows forklift entry from the front or rear. Four (4) anchor pads help to prevent tipping. Color is yellow with blue cross braces. Survey sheet for model DRK-SRS-2 available on page 334.

MODEL NUMBER	DESCRIPTION	OVERALL SIZE (W x D x H)	UNIFORM CAPACITY	WEIGHT (POUND)

*THREE IS THE RECOMMENDED NUMBER THAT CAN BE STACKED ON TOP OF EACH OTHER.

Pallet Rack Drum Cradles

Pallet Rack Drum Cradles convert standard (42 inch) pallet racks into a versatile horizontal drum cradle. The unit works with either box beams or step beams. Accepts 30 and 55 gallon steel drums. The drum angle is adjustable by using the height-adjustment turn knobs (sloping drum allows user to get 3% more fluid out). Works well with the Hydraulic Drum Stacker and the Drum Positioner. Steel construction with baked-in powder-coated toughness.

Model PRDC-42-R features 3" diameter poly rollers that allow manual drum rotation, making faucet and vent installation more convenient.

Model PRDC-DPN includes brackets and prevents leaks from going onto the floor. Usable dimensions: 9¾"W x 7⅞"L x 4⅓"H.

MODEL NUMBER	OVERALL SIZE (W x L x H)	ACCEPTABLE DRUM TYPES	WEIGHT (POUND)

Drum Positioners

Allows fork truck driver to rotate standing drums to the horizontal racking position and vice-versa. Positive latching system ensures safe handling of drums weighing up to 800 pounds. Slide the positioner extensions over the vertical drum. With the aid of the Drum Positioner, rotate drum to horizontal position. Latching system will engage to allow horizontal positioning of drum. It's now ready to slide into the rack. Mechanical operation relies on fork truck to rotate and lift drums. Fork pockets measure 7⁵/₈"W x 2⁹/₁₆"H usable on 20¹/₂" centers. Units feature a welded spacer to protect drum fixtures from damage when rotating.

MODEL NUMBER	ACCEPTABLE DRUM TYPES	UNIFORM CAPACITY	WEIGHT (POUND)
DRUM-P-55	55 GALLON STEEL	800 lb.	318
DRUM-P-30	30 GALLON STEEL & 55 GALLON POLY	800 lb.	335

Economy Drum Positioner

The Drum Positioner is a unique design to manipulate drums without leaving the fork truck seat. Designed to lift 55 gallon steel drums from the horizontal to the vertical position and vice versa using completely mechanical operation. Ideal for use with drum stands, pallets, and racking. Suitable for loading drums into vehicles. Hinged tines lock automatically when lowered to ground in horizontal position. Fork pockets measure 5¹/₂"W x 2"H usable.

MODEL NUMBER	ACCEPTABLE DRUM TYPES	UNIFORM CAPACITY	WEIGHT (POUND)
VEDP-55	55 GALLON STEEL	800 lb.	209

Portable Hydraulic Drum Carrier/Rotator/Booms

The Drum Carrier allows one person to lift, transport, and dispense fully loaded 55 gallon steel drums with ease. It features a manual foot pump hydraulic lift and rolls on two (2) 5" x 2" swivel poly-on-steel casters and two (2) 8" x 2" rigid glass-filled nylon wheels. There is a hand crank on the 60" model and chain rotation on the other models to rotate the drum 360°. All models feature a lifting boom attachment, which mounts on the outriggers when not in use on models -60 and 72. Optional power units available. See page 291 for options to handle plastic and fiber drums.

MODEL NUMBER	ROTATION METHOD	LIFT HEIGHT	UNIFORM CAPACITY	WEIGHT (POUND)

DRUMS MUST BE FULL TO ROTATE AT RATED CAPACITY

Hydraulic Drum Stackers

Stackers are perfect for positioning 55 gallon steel drums horizontally on shelves. The solid steel construction provides stability during transit. Drums are held in place with a ratchet mechanism. Fully loaded drums rotate 360°. Unit rolls easily on two (2) 8" x 2" glass-filled nylon rigid casters and two (2) 5" x 2" swivel poly-on-steel casters. Comes standard with hydraulic foot pump. Optional power units available.

Hydraulic Drum Dumpers 115 V 1-PHASE STANDARD

Hydraulic Drum Dumpers work with 30 and 55 gallon plastic, steel, and fiber drums. The unit has a solid steel chute. Portable units have two (2) rigid and two (2) swivel casters with floor lock screws. All steel construction.

Standard features include: 56 frame, 3/4 HP motor, 115V single phase, 60hz. Upper travel limit switch, safety velocity fuse in cylinder, and vertical adjustment drum restraints are standard. Dumper is operated with a hand held control on a standard 8 ft. long coil cord. Frame, blue and chute, yellow baked-in powder-coated toughness. Having trouble picking the correct model or do you need a custom design? See page 332 for a survey sheet to fill out and return to the factory for help with your unit!

SSC models include a stainless steel chute and base plate. The chutes are constructed with type 304 Stainless Steel in a Mill Finish. Structure on back of chute is painted with Steel-It™ coating. Adjustable height clamps are stainless steel. Steel frame, blue baked-in powder-coated toughness.

Lift-and-Dump Hydraulic Drum Dumpers 460V 3-PHASE STD

Lift-and-Dump Hydraulic Drum Dumpers are what you need to dump drums at variable heights. The HLD works similarly to the HDD, but includes a lift cylinder that allows you to dump at various heights. Features a four (4) push button pendant, which allows the operator full independent control of both lift height and the dump angle.

Drum & Bin Dumpers

The 304L Stainless Steel Drum & Bin Dumpers are great for the 'clean' workplace as well as manufacturing facilities. The structure is designed of 304L stainless steel, including hydraulic cylinders as well as the piston, which promotes easy cleaning and long lasting strength. Push button functionality allows the user to move to a precise position and stop the movement completely, in an emergency, with the emergency switch. Batteries are waterproof, making maintenance a breeze. The unit rolls easily on poly wheels, while traversing from area to area. Once folded, the unit becomes more compact for utilizing less storage space.

MODEL NUMBER	DESCRIPTION	DUMP HEIGHT	ROTATION HEIGHT	LEVEL HEIGHT	UNIFORM CAPACITY	WEIGHT (POUND)
ULM-PBT-DTC-10	DRUM DUMPER	51"	106"	51⅞"	660 lb.	504
ULM-PBT-BTC-10	BIN DUMPER	51"	106"	51⅞"	660 lb.	452

Hoist Mounted Drum Carrier/Rotators

Rotate and position a fully loaded 55 gallon steel drum with ease. Use with an overhead hoist or a fork truck. Fork pockets measure 5½"W x 1⅝"H usable. Features a chain crank that allows the operator to rotate 360° drums that are out of reach. Drums are held in place with a drum locking system. Meets OSHA 1910.179 requirements. *Model DCT-2000* features gear box operation.

MODEL NUMBER	ACCEPTABLE DRUM TYPES	ROTATION METHOD	UNIFORM CAPACITY	WEIGHT (POUND)

DCT-R-HC	HAND CRANK (IN PLACE OF PULL CHAIN)			1

DRUM MUST BE FULL TO ROTATE AT RATED CAPACITY

Fork Truck Drum Carrier/Rotators

Easily transport and rotate 55 gallon steel drums using a fork truck. Each unit is provided with a 15 foot long chain to allow the drum to be rotated up to 360° from the fork truck operator's seat. Fork pockets measure 7 $\frac{3}{8}$ "W x 2 $\frac{5}{8}$ "H usable, except DCR-205-8 and DCR-205-15 usable is 7"W.

DC powered units include two (2) 12V batteries, on-board charger, and hand held control on a 4 foot to 20 foot long coil cord. Safety restraint is used to secure unit to fork truck. Bung Nut Wrench, model BNW-I, is included.

Plastic & Fiber Drum Adapters and Other Upgrades

Designed to hold and support fiber and plastic drums. The FDA-550 (adjusting arms) or the FDA-800 (adjusting arms with nylon strap) unit must be utilized in conjunction with models HDC-305, DCR-205, DCR-110, and DCT.

Model FDA-800 comes complete with both an adjusting arm (FDA-550) and a high strength nylon strap (FDA-250). Works with steel, plastic, and fiber drums measuring 12" to 21" in diameter and 28" to 36" high.

Model FDC-30, attaches to the inner rim of the drum saddle so a 30 gallon steel, fiber, or poly drum can be used. In any application where it is used with fiber or poly drums, it **MUST BE** used in conjunction with the adjusting arms (either the FDA-550 or FDA-800 models).

Dual Ratchet Strap, *model FDRS*, accommodates 30 and 55 steel gallon drums.

MODEL NUMBER	DESCRIPTION	ACCOMMODATES DRUM TYPE	WEIGHT (POUND)
FDA-800Ⓞ	FIBER DRUM ADAPTER (INCLUDES FDA-550 & FDA-250)	P, F, S	14
FDA-550Ⓞ	ADJUSTING ARM (SOLD SEPARATELY)	P, F, S	13

FDRS-V2	DUAL RATCHET STRAP (for DCR-205 & DCR-110-55)	STEEL	24

Fork Mounted Poly Drum Handlers

These easy to use plastic drum handlers are designed to handle odd-shaped plastic drums. Includes safety restraint for securing unit to the fork truck. Baked-in powder-coated toughness.

Model FPDL-8-L has adjustable arms that are designed to fit 55 gallon tapered round bottom plastic drums. Low drum attachment point allows for use with both open and closed head drums. A ratchet strap is supplied to secure the drum to the unit when traveling over rough terrain.

Model FPDL-11-H is a top lip plastic drum lifter for use with 30 and 55 gallon plastic closed head drums. 7 $\frac{3}{8}$ " wide x 2 $\frac{1}{16}$ " high usable fork tubes on 20 $\frac{1}{2}$ " centers. High drum attachment point for use with top lip at least $\frac{3}{16}$ " high. Will also work with steel and fiber drums.

MODEL NUMBER	DESCRIPTION	UNIFORM CAPACITY	OVERALL SIZE (W x L x H)	WEIGHT (POUND)

FPDL-11-HⓄ	TOP GRIP	1,100 lb.	29" x 48 $\frac{7}{16}$ " x 22 $\frac{1}{2}$ "	196

Deluxe Combination Fork Mounted Drum Lifter

Deluxe Combination Fork Mounted Drum Lifter includes attachments to lift any type of drum; 30 and 55 gallon, steel, plastic, fiber. Designed exclusively for lifting closed and open head steel drums with a secured lid installed. Includes single Eagle Beak™ unit and both bottom and top lip Poly Drum Lifters. Uniform capacity will vary depending on which attachment you use. Fork pockets have an inside measurement of 7 $\frac{1}{2}$ " wide by 2 $\frac{1}{2}$ " high. Includes a safety restraint for securing unit to fork truck. Welded steel construction. Baked-in powder-coated toughness. A ratchet strap is supplied to secure the drum to the unit when traveling over rough terrain.

Automatic Eagle Beak™ Drum Lifters

This time tested and proven design allows a fork truck operator to easily secure, move, and release drums without leaving the seat of the fork truck. For use with open and closed head (with lid installed and secured) 30 and 55 gallon plastic, steel, and fiber drums with a top lip strong enough to support the weight of the drum. Choose single-drum or double-drum configuration. Includes safety restraint to secure unit to the fork truck. Welded steel construction. Baked-in powder-coated toughness. Fork pockets measure 7⁵/₈" wide x 2⁷/₁₆" high usable. A ratchet strap is supplied to secure the drum to the unit when traveling over rough terrain. FMDL-1 and FMDL-2 meet OSHA 1910-178 requirements.

Fork Mounted Drum Lifters

Fork truck attachments utilize a single automatic clamping mechanism for handling any size steel, plastic, or fiber chimed drum. Scales available, contact factory.

Model FMDL-850 is a knockdown unit that bolts together. Fork pockets and safety chain provide quick and easy installation.

Model FMDDL-1700 can lift two drums. It attaches to fork trucks and walkie stackers.

The following are fork mounted drum lifters that enable fork truck operators to install or remove the attachment in seconds without any tools. Totally enclosed fork pockets with attached safety chain and cam lock secures the attachment to the fork truck.

Models FMDL-1500 & FMDL-2000 - Fork truck attachments utilize a heavy-duty single automatic clamping mechanism for handling steel, fiber, and plastic chimed drums in high volume applications.

Models FMDDL-3000 & FMDDL-4000 feature heavy-duty double articulating clamping mechanisms for handling any steel, plastic, or fiber chimed drums in high volume applications. Each drum is gripped with two (2) upper and lower jaws in heads that are spaced about 6" apart.

*LIGHT-DUTY UNIT TO HANDLE 100 OR FEWER DRUMS PER MONTH

Horizontal Drum Carrier

Designed exclusively for lifting closed and open-head steel drums with a secured lid installed. Used to load and unload steel drums horizontally in racks. Safety restraint secures cradle to the forks to maximize safety and productivity. Drum lock engages and disengages automatically as a function of the fork angle. Fork pockets measure 7⁵/₈" wide by 2³/₈" high usable.

model HORIZ-70

Spring Grip Fork Mounted Drum Gripper

The Drum Gripper creates a functional and efficient way to transport drums from workstation to workstation. The welded steel construction with a baked-in powder-coated toughness, durable and long lasting in the harshest of environments. Once the drum gripper arms are placed around the drum, simply use the ratchet to tighten the arms in place for a firm hold on the drum. After moving the drum to the desired location, release the ratchet tension and un-ratchet until drum is free. The unit has a foldable design for less storage space when not in use. Works with 30, 55, and 85 gallon steel, plastic, and fiber drums. 7⁵/₈"W x 1⁷/₈"H usable fork pocket, 19³/₄" on center.

Drum Grippers

Drum Grippers make it easy to pick up one or two steel drums without leaving the seat of the fork truck. Simply slip the forks into the fork tubes, fasten the safety restraint and the Drum Gripper is ready to go. The knuckle gripping system is lowered around the drum, gripped tightly, and then lifted into the air. Drum is automatically released by lowering the forks. All models feature hinged folding design for storage.

Model DGS-A-PSD features adjustable-width arms for use with both 30 and 55 gallon steel and plastic drums (with top ring or top ridge). Safety restraint included. Welded steel construction with a baked-in powder-coated toughness.

Economy Portable Drum Lifter/Rotator/Transporters

Easy to lift, transport, and tilt 55 gallon steel drums. Ideal for use in warehouse environments when moving drums to and from racks. Drums can be locked in a vertical position to avoid spills or a horizontal position for draining through a faucet. A manual hand crank allows the drum to tilt up to 120°. Vertically raise the drums up to 53" with a manual hand or foot pump operation. Horizontal dump height is 58" from floor to bottom of drum.

Model DRUM-LRT-EC has a clamp style cradle which securely grips around the drum. *Model DRUM-LRT-ESJ* features a steel jaw which securely grips the top lip of the drum.

MODEL NUMBER	OVERALL SIZE (W x D x H)	*RAISED HEIGHT	UNIFORM CAPACITY	WEIGHT (POUND)

DRUM-LRT-ESJ	40" x 53" x 78"	53"	550 lb.	450

*DRUM IN VERTICAL POSITION (floor to bottom of drum)

Portable Drum Lifter/Rotator/Transporters

Model DRUM-LRT features a hand pump to lift drums from ground level to a raised height of 62" to bottom of drum in vertical position. For use with 55 gallon steel and fiber drums 24" in diameter. A hand crank gear mechanism provides the controlled 360° rotation of the drum. A floor lock is standard to stabilize the unit in a fixed position. Horizontal dump height is 67" from floor to bottom of drum.

Model DRUM-LRT-II features pivoting straddle legs for access to drums on pallets. Legs will manually pivot and lock into place with locking pin.

Model DRUM-LRT-DC has a 12V DC battery powered lift operation and a manual hand crank gear mechanism rotation (on-board charger standard). Minor assembly required.

Model DRUM-LRT-DC-II features a 24V DC powered rotation mechanism, which provides 360° rotation of the drum. A 24V DC powered mechanism raises and lowers drums (on-board charger standard).

Model DRUM-LRT-DC-SCL has a fully powered drum scale with powered drive, lift, and rotation. High torque 24V DC drive. Ergonomic handle features safety enhanced emergency remote function and horn. Includes disc brake with automatic dead-man control. Two (2) 12V, 70-85 Ah lead acid batteries. Integral battery charger and level gauge. Scale head features automatic turn off and +/- 0.5 pound accuracy. Scale includes (6) six AA batteries and an AC adaptor.

Economical Drum Transporters

Unique portable unit designed to lift and transport steel, plastic, and fiber drums with a top lip. Steel jaw securely grips the top lip of the drum. Available with either a manual mechanical ratchet, foot pump hydraulic, or DC powered lift mechanism. Straddle legs rotate for access to drums on pallets. Units roll on four (4) 8" x 2" phenolic swivel casters. The push handle folds down for easy access to ratchet and foot pump. All welded steel construction. Baked-in powder-coated toughness with a safety yellow finish. Optional scale weighs drums to an accuracy of +/-0.5 pounds. Optional scale includes six (6) AA batteries and an AC adaptor.

Portable Drum Jacks

These Drum Jacks are the perfect solution to any of your drum transporting needs. Compact design allows for maximum maneuverability in restrictive areas. Steel construction.

Model DRUM-55-36 accepts 55 gallon steel and fiber drums with a top lip. The front rigid wheels are 6" x 1½", while the rear swivel casters are 3" x 1½".

Model DRUM-55FP has an adjustable beak design, which allows it to grab 30 and 55 gallon steel, plastic, or fiber drums. Drums can easily be placed on or removed from pallets, spill containers, and scales. Available with built-in scale feature, see below.

Model DRUM-55S has a unique grapple to hold 55 gallon steel drums securely into the steel saddle prior to lifting it vertically. The drum is held in this position during transit, enabling open drums to be handled without spillage.

Model DRUM-55-FSP has a single clamping mechanism, which automatically latches on the drum chime when being elevated or transported. The clamping mechanism is fully adjustable for shorter height drums.

Model DRUM-55-SCL-E can lift, transport, and weigh 30, 55, and 85 gallon steel, fiber, and plastic drums. Scale head features automatic turn-off and +/-0.5 lbs. accuracy. Scale is powered with AA batteries. AC adapter included.

Model DRUM-SCLG & DRUM-SCLF add a scale readout built into Drum Jack model DRUM-55FP. The scale allows the drum to be weighed and moved all with the same piece of equipment. The scale has a capacity of 1,000 lbs. with an accuracy of +/-0.5 lbs. 12V DC operation with batteries and charger included. Stainless steel scale components. NEMA 4 scale read-out housing swivels 360° for maximum viewing convenience.

Stainless Steel Drum Lifter/Transporter

The Stainless steel hydraulic drum lifter is designed to allow the operator to load or unload drums on and off the corner of pallets. Straddle leg design allows the drum lifter to glide over standard pallets and grab most 30, 55, or 85 gallon steel and poly drums. Drums are raised and lowered easily using the foot pump. 304 grade all stainless steel construction. Ideal for wash-down, pharmaceutical, and clean room applications. Highly maneuverable on two (2) rigid and two (2) swivel with brake nylon wheels. Cannot be used with fiber drums.

Pallet Straddling Drum Truck

A single operator can engage, lift, and transport drums stored either on the center of pallets or the corner of containment skids. Works with 55 gallon steel drums. To engage a drum, the truck uses a spring-loaded jaw that securely grasps the rim of the drum. Two (2) rigid and two (2) swivel polyurethane wheels provide a high degree of maneuverability; each swivel wheel is equipped with a brake. Inside leg width adjusts 42" retracted to 47¼" extended to straddle pallets. Steel construction with painted finish.

MODEL NUMBER	OVERALL SIZE (W x D x H)	JAW HEIGHT	UNIFORM CAPACITY	WEIGHT (POUND)

model LPDT

Manual Low Profile Hydraulic Drum Truck

Ideal for loading and unloading 55 gallon steel drums when no fork truck is available. This device allows a single operator to engage elevated drums as well as to transport and position drums. A spring-loaded clamp securely grasps the rim of a drum. To elevate the rim clamp up to 5 feet, the truck incorporates a foot-operated hydraulic pump. Unit rolls smoothly on two (2) rigid 2½" x 1½" front wheels and two (2) 3³/₁₆" x 1¼" poly rear wheels. Truck is easy to assemble/disassemble for storage.

Ergonomic Drum Truck with Scale

The Ergonomic Drum Truck with Scale lifts, transports, and weighs 55 gallon steel drums. Utilizes an automatic grip assembly to effectively grab drums. Scale head features automatic turn-off and +/- .5 pound accuracy. Scale is powered with six (6) AA batteries. AC adapter included. Truck can lift uniform loads up to 500 pounds. Rolls smoothly on two (2) 8" x 2" poly-on-steel wheels and one (1) 5" x 1" phenolic swivel caster with lock. Lifting height is ⅞" per stroke. Maximum lifting height is 10¼" to bottom of drum.

Drum Lifter/Palletizer

This drum lifter/palletizer is an ideal addition to the maintenance and manufacturing facilities. The strong steel construction provides a durable approach to lifting and transporting drums. The upright design diminishes the bending and twisting that may occur when maneuvering heavy drums. For best use, place the unit so it straddles the drum. With the handle raised, place the lifting hooks under the rim of the drum in a secure position and lower the handle. By lowering the handle, the pressure of the down force will lift the drum and allow the user to transport it.

Lo-Profile Drum Caddies with Bung Wrench Handle

Reduce injuries caused by manually lifting and moving drums. Transport one (1) 55 or 30 gallon drum or two (2) 5 gallon pails with the Lo-Profile Drum Caddy. To use: align unit in front of drum, remove handle, and grip drum with the handle. Tip drum up, while guiding the caddy base under the drum. Re-attach handle and transport drum to desired location. Unit rolls easily on two (2) 6" rigid wheels and one (1) 3" swivel caster. The removable handle doubles as a bung nut wrench and seal remover. Cradle height is ½". Inside cradle diameter is 2³/₄". Steel construction. Yellow painted finish. US Patent Number 6682084.

Multi-Purpose Drum Trucks/Cradles

One of the most versatile drum trucks in the industry. This innovative product allows the operator to easily tip back the truck in order to transport drums ergonomically on four (4) wheels. Unit doubles as a drum cradle for storage and dispensing all in one. Top angle is 3° when used as a Drum Cradle. This unique design also allows the operator to place drums and retrieve off of a pallet. Accommodates 55 gallon steel, plastic, or fiber drums. Rolls smoothly on two (2) 10" x 2½" (wheel types see below), two (2) 6" x 2" poly-on-poly casters, and two (2) 3" x 1¼" poly-on-poly swivel casters. Standard with a wheeled undercarriage that positions the drum horizontally for drainage or storage. The drain height is 12^{13/16}" high in the cradle position. An integral self-storing bung wrench is standard. This attractive feature not only opens numerous drums, but helps to keep the drum snug on the truck. Baked-in powder-coated toughness. Optional drip pan with brackets available.

Stainless Steel Drum Trucks

model DBT-SS, Tilt and lower drums to a horizontal position for dispensing. Grips all types of steel 30, 55, & 85 gallon drums and most rimmed plastic and fiber drums. Robust, non-corrosive design - 304 all stainless steel construction. Adjustable chime hook helps to secure the drum. Kickstand for holding the unit in stand-up position. 4-wheel design offers exceptional maneuverability through tight areas. 4½" ground clearance with four (4) 8" x 2" nylon wheels.

model DBT-SS-DLX, Easily, efficiently, and safely lift, move, and maneuver a wide range of steel and plastic drums. Automatic grip can be adjusted manually up and down to suit different heights. Robust design - 304 all stainless steel construction. 50% less input force is required to lift a 1,000 lb drum compared to standard drum trucks. To operate, simply push the truck to drum and attach the automatic grip to the drum rim. Rolls simply and smoothly on two (2) 8" x 2" nylon wheels.

Intermediate Bulk Containers

Space-saving storage containers are great for multi-trip applications. Designed for storage of both hazardous and nonhazardous contents. Easy to fill, stack, and load. Steel cage is hot dipped galvanized material consistent with Food Code requirements for use in non-direct food contact environments. Pallet base is made from both steel and plastic. Includes inner storage tank made from white plastic with UV-blocking additive. Includes 2" butterfly valve with a durable, synthetic fluorocarbon rubber gasket. Top fill cap is 6" diameter with 2" bung. Complete unit is UN approved.

Protect IBC spills with our **IBC Containment Pallets, series ISCP**. All polyethylene construction makes the unit resistant to chemicals and will not rust. Fork pockets for easy lifting and positioning. Meets SPCC and EPA Container Storage Regulation 40 CFR 264.175.

Intermediate Bulk Container Tilting Cart

The Intermediate Bulk Container Tilting Cart is designed of a sturdy steel construction which, provides a secure tilting of containers for complete draining. To use, simply place the container on the cart. When the container is in the secure position, start the draining process. As the fluid flows from the container, the rear of the cart will rise up to 5 degrees creating an angle for a better release of fluids. The cart rolls on casters for smooth transition from workstation to workstation.

Intermediate Bulk Container Heaters

An adjustable wrap around tote tank heater is a great asset to an assortment of container sizes. With the simple modifiable straps, the heater can be applied easily to an existing unit. An adjustable thermometer with a built in max temperature reset is also included for both precise heat allocation and overall safety. To use, easily maneuver the unit around the container and adjust the straps accordingly until secure.

Model IBC-HEAT-TOP is available to protect integral heat from leaving from unprotected areas.

Overpack Containers

Overpack Containers are a great asset when maintaining and moving waste materials. The unit is constructed of low density polyethylene for strength and durability. Suitable for use with 55 gallon steel or plastic drums. The containment can be moved by utilizing a fork truck or other lifting devices. Works with DRUM-ST, DRUM-HD, DRUM-X-H, and DRUM-X-C.

Optional Drum Containment Cover available separately. To attach simply place cover onto the drum containment and snap-on until latched. Units can be stacked/nested for storage and shipping.

Drum Grab

Designed exclusively for lifting closed and open-head 55 gallon steel drums with a secured lid installed. *Not for use on open-head drums without a lid.* This product works on select 55 gallon plastic and fiber drums with a top lip strong enough to hold the weight of the drum. Designed for quick and easy one person operation, with drum in a vertical position. The narrow profile design is great for picking up drums packed close together. The three-arm ductile-iron design offers maximum strength and simplicity allowing the centering of the drum under the lifter. The polyurethane "spring" loop keeps the lifter securely engaged to the drum, which is especially beneficial when using the lifter in a rough environment including swinging, bouncing, and incidental collisions. Unit must be manually disengaged from the drum when finished with use.

MODEL NUMBER	ACCEPTABLE DRUM TYPE	UNIFORM CAPACITY	WEIGHT (POUND)
DRUM-GRAB [®]	STEEL CLOSED & OPEN-HEAD W/LID	2,200 lb.	20

Multi-Purpose Overhead Drum Lifters/Wrenches

Simple three-arm design for use with closed head 30 and 55 gallon steel, plastic, and fiber drums with a top lip. Each removable arm also functions as a wrench for use on drum plugs, faucets, and rim ring bolts. Mechanical operation. Requires assistance from an overhead lifting device. Baked-in powder-coated toughness. Steel construction.

Model PDL-800-M-BR features a bronze, spark resistant alloy.

Vertical Drum Lifter

The Vertical Drum Lifter provides easy lifting and transporting of drums. Solid steel construction. To use, simply lower unit onto the drum and as the lifter is elevated the positive gripping pads secure the drum. When the drum is lowered to the ground, the carriage drops down, automatically locking the drum lifter in an open position, ready for another drum. Use on 55 gallon steel drums with a top lip or chime. Not for use with open head drums.

Steel Drums

Quality cold rolled drums meet most U.N. requirements for shipping and packaging. Drum interior is coated with a corrosion inhibitor. Open head drums have removable lids and 12 gauge bolt ring closure. Drums have a 2" and 3/4" bung. Additional sizes and stainless steel drums available, contact factory. Steel surcharges may apply, contact factory.

Stainless Steel Drums

High quality 304 stainless drums are finished in a 2B polish. Meets most U.N. requirements for shipping and packaging. Excellent corrosion resistance makes these stainless steel drums superior for storage and shipping of foods and chemicals. Open head drums have removable lids and 12 gauge bolt ring closure. 2" and 3/4" bung standard.

Quick Release Lever Option

This option is used with open head drums only. Lever automatically tightens drum lids to U.N. specifications. Replaces standard 12 gauge bolt ring closure.

Drum Heaters

Quickly and efficiently heat-up your steel drums or pails. Easily adjust thermostat set-point: 50 to 425°F. for steel drums and 50 to 160°F. on poly drums. This extra-wide 4" silicone rubber band heater is moisture and chemical resistant. Multi-stranded grounded heating element provides uniform heat and a long service life. Spring closure can be expanded 3". Unit comes with a 6-foot-long power cord, grounded 3-prong. The -CA suffix indicates models that are CSA approved for use in Canada only. Feature a 6 foot long power cord with no plug.

Drum Liners

Flexible Drum Liners revolve around the concept of "no loss of product" and "total recovery of product." The cylindrical 360° shape of the round bottom liner seal prevents product from "lodging" in the wrinkles and creases that are typical in "flat" bottom liners. Product weight is distributed around the entire seal so that seal stress is reduced. Low Density Polyethylene construction unless otherwise noted.

Rigid Drum Liners are constructed from seamless polyethylene unless otherwise noted. Rigid liners make disposing of materials easy, plus they help keep our environment cleaner by ensuring the maximum recovery of product. Saves you money by extending the lifetime of drums and reducing the cost to clean and recondition them. All rigid drum liners are made using prime virgin FDA compliant polyolefin resins.

Manual Drum Deheaders

Convert your closed head steel drums into storage containers with our Drum Deheaders.

The *DD-9* and *DD-9-NS* can be adjusted to open steel drums with different thicknesses. The blade is angled for maximum penetration and flattens the cut edge so there are no sharp or jagged edges. Replacement blades available.

Model *DD-9-NS* features a bronze, spark resistant alloy.

Model *DD-10* features an ergonomic handle allowing smoother operation to cut drum.

Quickly remove the head of a steel drum with our Express-Open Drum Deheader! Unique design, model *D-HEAD-1*, is similar to a household can-opener and is very easy to use. Includes vice-grip style mechanism for securely attaching unit to drum. Inside cutting blade does not leave a sharp edge on the drum. ONLY use either a 1/2" manual ratchet wrench or electric drill to operate the deheader ratchet (ratchet drive not included).

WARNING: Improper use of this drum deheader might result in personal injury or damage to the deheader. DO NOT use a pneumatic or electric impact wrench to operate the deheader ratchet. Replacement blades available separately, model *D-HEAD-B*. Both styles open 30 and 55 gallon steel drums and 5 gallon pails.

Drum Deheaders

Manual Drum Deheader, *model DD-M* is for use with occasional drum deheading. Provides ribbed grip for comfort.

Burr-Free Manual Drum Deheader, *model DD-EZ-M* is a ratchet style manual drum deheader. For use with moderate drum volumes and leaves a burr-free edge.

Electric Drum Deheader, *model DD-EZ-E* is a compact, portable, self-propelled, electric unit. It is also quiet, easy to use, and designed for moderate drum deheading and leaves a burr-free edge. 1/3 HP, 110V, 60 Hz (220V available, contact factory).

High Duty Drum Deheader, *model DD-EX-E (electric) and model DD-EX-A (air powered)* are designed for moderate to high drum deheading. Deheads a drum in less than 1 minute, leaves a burr-free edge, and is long lasting. 1/3 HP, 110V, 60 Hz (220V available, contact factory). 60-100 psi, 25 cfm. FLR is required; not included.

Drum Bung Nut Wrenches

Bung Nut Wrenches are available in several different materials to meet many applications. These multipurpose drum tools not only open and close drum bungs or plugs, they also work as a bung wrench, ring wrench, and faucet wrench all in one! Wrenches are universal because they fit all types of industrial drum plugs and bungs in metal or plastic. The angled handles on models BNW-I-W and BNW-B-W protect knuckles in most positions. Model BNW-SS-W is made of NSF 51 compliant stainless steel and meets 2009 FDA Food Code requirements for non-food contact equipment. These durable wrenches will not bend, break, or chip. Eliminate the need for extra tools with these multifunctional drum wrenches! Patent pending.

Horizontal Drum Tap

This unique product will allow you to open a 2" drum bung, empty the contents of the drum, and close the drum bung, all with the drum in the horizontal position. Eliminates the need to rotate the drum into the vertical position to gain access. Operation is simple: attach Drum Tap to bung with locking ring, push handle towards drum and twist to unscrew bung, pull handle out away from drum to empty drum contents. Reverse operation to close drum and remove Drum Tap from bung. This product saves time, energy, and reduces the risk of spills. May be used to fill drums in the horizontal position with the bung positioned at the top of the drum. Constructed of fiberglass reinforced polypropylene. O-rings are made of nitrile rubber.

48 Hours to Ship

THE TAP-3 WILL ONLY WORK WITH THIS TYPE OF DRUM PLUG.

MODEL NUMBER	DESCRIPTION	ACCOMMODATES	WEIGHT (POUNDS)

Manual Drum Faucets

Quickly and easily dispense drum contents with our Drum Faucets. Available in plastic, stainless steel, aluminum, zinc, and brass.

Polyethylene Drum Faucet, *model VDFT*, is constructed of corrosion-resistant polyethylene. Handles viscous materials. Instant on/off control ensures fast, smooth flow. Padlock not included. Integral hook allows users to hang pail on faucet (51 pounds).

The Jumbo Drum Faucets, *model JDFT*, are ideal for dispensing viscous, non-corrosive flammables such as adhesives, paint, heavy oils, grease, and varnish. Padlock not included. Integral hook allows users to hang pail on faucet (51 pounds).

VDP [®]	POLYPROPYLENE	8 oz.	¾" & 2"	2
VDPX [®]	POLYPROPYLENE	16 oz.	¾" & 2"	2

model RDP-55

model ADP-55

Rotary Drum Pumps

For dispensing and transferring liquids out of 55 gallon drums.

RDP-55 - Ideal for light oils, anti-freeze, and other light non-flammable and non-combustible liquids. Hose included.

ADP-55 - High-speed drum pump for light oils up to 40 weight. Hose included.

RP-90RT - Ideal for soluble, corrosive, volatile, and aggressive chemicals. Suitable for use with Acetone, Ad-Blue and MEK.

RP-90R - For transferring soluble, corrosive, volatile, and aggressive chemicals (esters, alcohols, alkali, acids, hydrocarbons, petroleum based fluid, transmission fluid, and water based chemicals).

RP-90FG - Suitable for most soluble, corrosive, volatile, and liquids which are compatible with PTFE and HFP/TFE.

Electric Drum Pumps 115V 1-PHASE STANDARD

Reduce time required to dispense or transfer liquids. Electric drum pumps allow you to move fluid easily and efficiently. Pumps come complete with tube for 2" bung, hose, and 115V motor.

FHL-PUMP for Flammables & Hazardous Locations

ME I 6 EX motor, Class I Group C&D, Class II Groups F&G (Explosion Proof) with 16 ft. cord, pump tube SS 39" sealless, high volume rotor, 1" SS barrel adaptor, 1" SS nozzle with swivel, 8' conductive chemical tubing with conductive fittings, ground & bonding wires, wall hanger.

ODF-PUMP for Thin-Bodied Oils & Diesel Fuel

B36 motor with 16 ft. cord, pump tube ALU 39" sealless, high head impeller, 316 stainless steel shaft, PP Barrel Adaptor, 1" aluminum nozzle with swivel, 8" PVC hose, hose clamps, and wall hanger.

ABS-PUMP for Acids & Base Solutions

B36 motor with 16 ft cord, pump tube PP 39" sealless, high volume rotor, Hastelloy C shaft, PP barrel adaptor, 3/4" PP nozzle, 8' PVC hose, hose clamps, and wall hanger.

HCB-PUMP for Highly Corrosive Acids & Base Solutions

B55T-5 motor with 16 ft. cord, pump tube PVDF 39" sealless, high volume rotor, Hastelloy C shaft, PP barrel adaptor, 1" PVDF nozzle with swivel, 8' chemical hose, hose clamps, and wall hanger.

Fire Extinguisher Carrier

The Fire Extinguisher Carrier is designed for easily transporting your fire extinguisher up to 8" in diameter. Includes two (2) heavy duty adjustable rubber straps. Sturdy handle with rubber grip and poly casters for tilt-n-go portability. Welded steel construction with painted yellow finish. 4" x 2" stabilizing plate keeps unit upright when empty and helps retain extinguisher. Adjustable EPDM restraining straps keep extinguisher secure and allow for quick access. Wall mount bracket included to store the extinguisher off the floor.

Cylinder Hand Trucks

Fold-down single and double cylinder hand trucks are designed and built to transport gas cylinders with ease. Tilt back design for effortless transportation. Fold-down hand trucks are designed to carry cylinder loads on 4-wheel base, thus minimizing operator fatigue and risk. Gas cylinder hand trucks hold cylinders up to 12". Chains and contoured back cradle provide utmost safety. Fold-down trucks are designed for quick, easy, and safe movement of most types of gas cylinders. Units roll on two (2) 8" x 1¹/₂" and two (2) 3" x 1¹/₈" poly-on-poly wheels with brakes.

Welding Cylinder Torch Carts

Designed for transporting cylinders and cutting torch. Includes two (2) tank compartments with heavy-duty ratchet straps. Brackets are included for holding cutting torch and hose. Sturdy handles and large 16" diameter wheels for tilt-n-go portability. Heavy-duty uniform capacity rating is 500 pounds. Convenient open-top storage tray included on all CYL-E series carts only. CYL-2 models include lockable storage box for regulators. Box includes hose opening so regulator does not need to be disconnected for storage. Lifting eye is 2" maximum diameter, material thickness is 7/16". Fork pockets for transportation is included on CYL-2 models. Usable size of each fork pocket is 7¾"W x 2³/16"H. Units with fire protection include ½" (approximately 13mm) marineite 1 material, which provides a 30 minute fire protection barrier as described by OSHA standards 1910.253 and 1926.350. Welded steel construction with a yellow, baked-in powder-coated toughness. Not designed for use as a storage means for gas cylinders.

Models CYL-2-G & CYL-2-FF-G feature a hot dipped galvanized finish.

LP Tank Lifter

The LP Tank Lifter is a great addition to manufacturing and maintenance facilities. The lifter is constructed of steel, with a baked-in powder-coated toughness, for supreme strength and durability throughout daily use. The unit also contains a bright finish for both security and discernibility, both indoors and out. To use, simply attach the lifter to a lifting device, such as a fork truck, by utilizing the centrally located chain/hook opening. Once the unit is secured, place the arms tightly under the top and base ridges of the LP tank, lift to the desired height, and transport to the preferred location.

Cylinder Storage Cabinets (only for sale in the USA)

Steel cabinets for storage of cylinders. Cylinder storage capacity is based on cylinder size. Sides and door are made of expanded steel, and the bottom, back, and top are made of solid sheet steel. Lockable doors protect cylinders (padlock not included). Base includes lag holes for securing cabinets. Vertical units include chains for securing cylinders. Includes red lettered signage noting "FLAMMABLE NO SMOKING". Meets OSHA sec. 1910.110 (f)(6)(ii), ANSI NFPA 55 + 58, and CGA P-1 design standards. Rugged steel construction with safety yellow baked-in powder-coated toughness.

Cylinder Storage Cabinets (only for sale in CANADA)

Durable steel cabinets for storage of cylinders. Cylinder storage capacity is based on cylinder size. Sides and door are made of expanded steel, and the bottom, back, and top are made of solid sheet steel. Lockable doors protect cylinders (padlock not included). Base includes lag holes for securing unit to floor (hardware is not included). Vertical units include chains for securing cylinders. Includes red lettered signage noting "No Smoking" message in English and French. Meets CSA B-149.2 and OSHA 1910.110 (f)(6)(ii) design standards. Rugged welded steel construction with safety yellow baked-in powder-coated toughness. All units shipped fully assembled.

Galvanized Cylinder Storage Cabinets

Store LP tanks horizontally and acetylene tanks vertically in these heavy-duty Cylinder Storage Cabinets. Made of all steel construction, these rust resistant units have 4 gauge galvanized welded wire sides with sturdy 1½" square steel angle frames. Durable 12 gauge galvanized steel roof. The galvanized rust resistant finish stands up to harsh outdoor environments. Features a padlock hasp for security (padlock not included), "Danger Flammable Materials" sign, and all necessary hardware. Meets OSHA 1910.110 requirements. Assembly required.

Propane Exchange Cylinder Cabinets

Durable steel Propane Exchange Cylinder Cabinets for storage of standard propane gas cylinders. The sides are made of expanded steel, and the bottom, back, and top are made of solid sheet steel. Solid steel or expanded metal door available. Lockable door protects cylinders (padlock not included). Each shelf can hold a maximum of six (6) cylinders. White baked-in powder-coated toughness. Includes red lettered signage noting "PROPANE EXCHANGE, FLAMMABLE, NO SMOKING".

LP Tank Truck

Finally an easy answer to lifting, storing, and transporting problems associated with LP tanks. The built-in crane can be used to safely load full tanks into fork trucks. The crane pivots 360° for maximum versatility. The crane boom is raised and lowered with a manual hand pump hydraulic lift. The tank attachment at the end of the boom automatically clamps to each end of the cylinder. The built-in racks are ideal for LP tank storage-racks. Store two (2) tanks in the vertical position and four (4) tanks in the horizontal position. Unit includes a push handle with two (2) rigid and two (2) swivel with brake casters for portability. Welded steel construction with a painted finish.

Aerosol Can Recycle System

Turn aerosol cans into scrap metal, exempting them from disposal regulations for hazardous waste. This system safely punctures aerosol cans to relieve pressure and then empties any residual contents into your drum. Thread the recycler body into the 2" diameter threaded bung and the filter into the 3/4" bung of your 30 or 55 gallon steel or poly drum. Push the lever to puncture the can, and two piece filter with a carbon cartridge drains out odors and harmful emissions. Unit includes puncturing device, safety goggles, carbon filter, and anti-static wire, which prevents static buildup by grounding the drum as required by OSHA.

Oil Filter Crushers, *CrushMasters* 208-230V, 1-PHASE STANDARD

Recycle used filters and oil quickly, safely, and easily.

The *CM-1* Oil Filter Crusher operates on normal shop air, delivers over 13,000 pounds of crushing force at 120 PSI, accommodates all standard oil filters, and is designed for high volume use. Will crush up to four (4) automotive spin-on filters at one time. Crushing chamber door is prevented from opening if the ram is in any position other than fully raised. Can be connected to a variety of waste oil containers.

The *CM-2* accommodates standard size filters and heavy-duty truck filters up to 16" high. Convenience and safety features include waste oil drain connections, easily located on/off switch for safe operation, and heavy-duty totally enclosed fan cooled 4HP motor delivering 37,500 pounds of crushing force. Electric-hydraulic operation.

The *Tubular Stand* accommodates model CM-1. Requires 29"W x 22¹/₂"D of floor space. The *Deluxe Stand* accommodates both the CM-1 and CM-2. It is designed with a heavy-duty grated top for drainage of filters before crushing. The floor space required is 29"W x 22³/₈"D. Also allows for placement of 55 gallon drum, sold separately, under crusher to contain oil.

Aerol Can Crusher

The Aerol Can Crusher uses air bag technology and is 100% air operated with 15 tons of crushing force, enough to shatter the mixing ball. Crushes 2 aerosol cans by 98%. Equipped with a timer and filter regulator gauge, the crusher has a cycle time of 25-60 seconds and requires air input of 120 psi. An outlet valve allows for draining and capturing liquid. Activated carbon filter absorbs contaminants and odors and a fume extractor directs gases outside of area. Greatly reduces disposal costs.

MODEL NUMBER	DESCRIPTION	OVERALL SIZE (W x L x H)	CYCLE TIME (SECONDS)	WEIGHT (POUND)
CAN-RECY-DLX	AIR OPERATED, 120 PSI	27½" x 27½" x 55"	25-60	550

Pail Lid Closing Press

The Plastic Pail Lid Closing Press quickly and easily secures a cover onto a plastic pail. The lid closure allows for easily pressing lids on plastic pails in a single motion. The 39" long handle provides 14:1 advantage - 50 pounds on handle applies 700 pounds on the pail. The long handle provides leverage, reducing the effort necessary to secure lids to pails. Adjustable height table allows for use with different sized pails. Works with pails from 6" to 22" tall. Compression plate diameter is 16" and is fitted with an adjustable burp plunger. Base frame is predrilled for lagging to the floor (hardware not included). Steel construction with a baked-in powder-coated toughness. Not for use with UN-rated pails for hazardous material shipping.

PLC-CK *Optional Caster Kit* includes four (4) 3" x 1¼" poly swivel stem casters with brake.

Variable Height Pail Dispensers

Variable Height Pail Dispensers provide 24 angle settings for dispensing 5 gallon, 11" diameter, plastic or steel pails. Dispense at any height between 1" and 52" by turning the hand cable winch. Steel construction with a baked-in powder-coated toughness.

Model LLW-PAILD-100, 4" poly-on-poly rear swivel casters with total lock and 2" steel front rigid casters. Model LLW-PAILD-100-SS, is a stainless steel construction.

Model LLW-PAILD-200, 6" rigid poly-on-poly wheels with tilt back "hand truck" design can go virtually anywhere. Includes 2" diameter front steel wheels and 4" rigid poly-on-poly top wheels.

Hoist Mounted Pail Carrier / Rotator

The Hoist Mounted Pail Carrier/Rotator works with both plastic and metal pails. For use with 5, 6, and 6½ gallon pails. It has an adjustable upper bail for easy balancing and allows the user to accurately control and empty pails. 3:1 gear ratio makes for effortless tipping of pails. Meets ANSI B30.20 standard for overhead lifting. A ratcheting nylon harness securely holds the pail in any position.

FPA-450 *Optional Mixer Adaptor Arm* allows pails to rotate 360° for mixing of contents.

MODEL NUMBER	ACCOMMODATES PAIL SIZES	UNIFORM CAPACITY	WEIGHT (POUND)

Pail Dolly

A pail dolly is a great accessory for the home or the workshop by delivering a more ergonomically friendly way to transfer products. Instead of lifting heavy pails, which can put stress on joints and muscles, this unit can be pushed and steered to the designated location. A large weight capacity and a 5-7 gallon pail accommodation, the user can efficiently move objects in a timely manner while minimizing risk of fatigue. The compact design is easily stored when not in use. Strong construction. Lightweight. Maximizes workload proficiency.

MODEL NUMBER	ACCOMMODATES PAIL TYPES	OVERALL SIZE (W x H)	UNIFORM CAPACITY	WEIGHT (POUND)
PDD-5 [Ⓢ]	5-7 GALLON	14 ³ / ₄ " x 3 ³ / ₄ "	80 lb.	3

Ergonomic Elevated Bucket & Pail Dolly

Unique dolly features elevated bucket/pail platform for better ergonomic position. Elevated platform allows for better posture during use, which leads to less fatigue and strain. For use with maximum 10⁹/₁₆" diameter round buckets. Also works with square buckets and boxes with maximum size 10⁹/₁₆" x 10⁹/₁₆". Design folds flat easily for storage when not in use. Portable on four (4) swivel poly casters. Steel construction with a yellow baked-in powder-coated toughness.

MODEL NUMBER	MAXIMUM PAIL SIZE	OVERALL SIZE (W x D x H)	UNIFORM CAPACITY	WEIGHT (POUND)

model PDOL-26

Multi-Pail Dolly

Move your 5 gallon containers with ease. Ideal for job sites, tile and grout work, janitorial and cleaning tasks, and other industrial uses. Designed to work with round and square 5 gallon pails; plastic or steel. Rolls smoothly with all swivel 3" polyurethane casters. Ground clearance is 1³/₈". All steel construction with a blue baked-in powder-coated toughness. Includes a 4 foot long pull strap.

MODEL NUMBER	ACCOMMODATES PAIL TYPES	OVERALL SIZE (W x H)	UNIFORM CAPACITY	WEIGHT (POUND)
MPD-5 [Ⓢ]	5 GALLON	16 ¹ / ₁₆ " x 5"	150 lb.	15

Pail Hand Truck

This Pail Hand Truck allows one person to easily and efficiently move 5 gallon pails or other miscellaneous items. The nose plate can be flipped down and pail retention fingers flipped up in order for this cart to be used as a basic hand truck. Flip the pail retaining fingers down to utilize the pail lifting feature. An arched back allows the pail to fit safely on the hand truck. Units roll smoothly on large 10" x 2¹/₂" diameter wheels. Baked-in powder-coated toughness.

PAIL-T	10 ³ / ₄ " x 7 ¹ / ₂ "	20 ⁹ / ₁₆ " x 16 ¹¹ / ₁₆ " x 55 ³ / ₄ "	500 lb.	48

Steel Pail Pals (PAIL OPENER)

A must-have product for anyone using five gallon plastic and steel pails. The cutter is used to cut a slit in the lid lip of the pail to enable the lid of the plastic pail to be removed. The side guide conveniently slides under the lid lip for easy removal of the lid. The end hook is used to open steel pails. Just hook the lid lip and rotate. The opposite end is used to close and seal the lid by bending the lip back around the steel pail top. Not for UN rated pails.

The PAIL-PAL-UN features the additional torque required to open UN rated pails by hand.

Steel Pail Lid Closing Tool

Quickly and easily secure steel pail lids onto steel pails with the Steel Pail Lid Closing Tool. Manually crimps and closes 16 lugs in a single motion. Long handles provide leverage, reducing the effort necessary to secure lids to pails. Intended for use with non-UN Vestil Steel Lids and Steel Pails on page I45.

MODEL NUMBER	ACCOMMODATES PAIL TYPES	NOMINAL DIAMETER	GAUGE RANGE	WEIGHT (POUND)
PLC-5 [Ⓢ]	5 GALLON STEEL	11 ¹ / ₄ "	26 to 29	27

Hydraulic Pail Crusher 115V 1-PHASE STANDARD

Crush 5 gallon steel pails quickly and easily. Crushes steel pails to approximately 2" high and resets automatically to crush another pail. Reduce storage space and disposal costs. Safety features include: pressure relief valve to prevent overload, door interlock system to prevent the motor from running if the door is unlatched, and mushroom head emergency stop button. Other features include a hydraulic pump that provides 70 second cycle time, 10,000 pounds of crushing force, removable legs for bench top mounting, and 115 volt single phase for "plug in operation". Meets OSHA and JIC standards. Aluminum drip pan, model HPC-DPN, is available for catching any excess liquid that may be expelled during the crushing operation.

MODEL NUMBER	DESCRIPTION	OVERALL SIZE (W x D x H)	WEIGHT (POUND)
HPC-405	STEEL PAIL CRUSHER	27" x 22 ³ / ₁₆ " x 67 ⁹ / ₁₆ "	360

Pail Liners

Pail Liners make disposing of materials easy, plus they help keep our environment cleaner by ensuring the maximum recovery of product. Liners also save you money by extending the lifetime of pails and reducing the cost to clean and recondition them. All rigid liners are manufactured using prime virgin FDA compliant polyolefin resins. Pails sold separately.

Galvanized, Stainless Steel, & Bronze Buckets

Galvanized and stainless steel buckets are for use in industrial and commercial applications where durability is required. Buckets are nestable and come standard with a carrying handle/bail for easy transport.

BKT-GAL: Galvanized steel, 0.4mm thickness.

BKT-SS: Grade 202 stainless steel. 1mm thickness for 3.25 gallon, 2mm thickness for 5 gallon.

BKT-BRZ-250: Bronze pail is ideal for a variety of settings. The aluminum bronze spark resistant alloy construction works well in hazardous conditions. The pail can be used with a range of materials and surroundings such as petroleum, various chemicals, and mining.

Pails

Strong enough for use in shipping applications and durable enough for the most demanding storage applications. Our heavy duty pails come in variety of sizes ranging from 1 to 6.5 gallons in a spectrum of colors. All plastic pails are constructed of 100% prime virgin high density polyethylene (HDPE) and comply with FDA regulations. Can be used with liquids up to 190°F, as well as in freezer applications. Steel pails with rust inhibitor lining are also available. Pails with plastic handles available in bulk, contact factory.

UN Certified when used with UN Rated covers listed on page 330:

PAIL-54: UN 1H2/Y1.5/50

PAIL-SCR-35-W: UN 1H2/Y19/S

PAIL-SCR-5-W & PAIL-SCR-65-W: UN 1H2/Y30/S

PAIL-STL-RI-UN: UN 1A2/Y1.5/70

Closed head steel pails include a 2 1/8" screw cap with tamper-proof metal seal.

PAIL-STL-C5-UN100: features a hole to access contents. UN 1A1/Y1.5/100

PAIL-STL-C5S-UN100: features a metal pull-up spout to help pour contents.

Jugs

For use in industrial and commercial applications. Ideal for storing or transporting a variety of liquids.

JUG: Lightweight, natural color, FDA compliant high density polyethylene (HDPE) construction. HDPE closure with EVA liner.

JUG-W: Lightweight, white color, FDA compliant high density polyethylene (HDPE) construction. HDPE closure with EVA liner.

JUG-S: Tin-plated steel construction with threaded steel closure.

Carboys

General-purpose carboys with rugged design for use in industrial and commercial applications. Used for transporting material, not for long term storage. All carboys are constructed of natural colored FDA compliant high-density polyethylene. Models with "S" suffix come standard with 3/4" polyethylene spigot. NOT designed for use with gasoline, diesel, or kerosene.

CARB-LP: Low profile "briefcase" design for optimum ease for handling. Fits easily into confined spaces, while providing easy transport. Includes 3/4" polyethylene spigot.

CARB-T: Designed for storage and easy dispensing of water. Tilt top design includes pour spout cap, vent, and recessed bottom hand grip for easy pouring. Rectangular shape for efficient use of space. Molded in graduations listed in gallons and liters.

CARB-SSH: Rectangular wide-mouth carboys are designed for easier filling and cleaning. Stainless steel handle is standard for easy, ergonomic transport. Molded in graduations listed in gallons and liters.

Metal Bottles

General-purpose Metal Bottles for use in applications where glass and plastic are too fragile.

BTL-MA: Aluminum bottles are lightweight and rigid. Includes polypropylene (PP) threaded cap with polyethylene (PE) foam liner.

BTL-MT: Tin-plated steel construction is ideal for storing, transporting, or packaging liquids. Includes threaded screw-on cap with polyethylene (PE) liner.

Ergo-Handle Carts

Ergo-Handle Carts are constructed of heavy-duty steel to handle uniform loads up to 4,000 pounds. The patented ergonomic chrome plated handle decreases fatigue by allowing the operator to easily maneuver the cart. It can be inverted for individual height comfort and handling of long loads. Rolls on 8" x 2" casters, two (2) rigid and two (2) swivel with roller bearings. Many caster styles to choose from.

Ergo-Handle Carts with Drain

Ergo-Handle Carts with Drain have the patented chrome plated ergonomic handle that decreases fatigue by allowing the operator to easily maneuver the cart. The chrome plated ergonomic handle has an invertible bolt-on design that is great for individual height comfort and handling. The top shelf has a perimeter retaining edge that is slightly slanted towards the grated drain hole. To use the drain system, simply turn the ball valve to empty liquid into a container of your choice. Each unit rolls on 8" x 2" casters, two (2) rigid and two (2) swivel with roller bearings.

Stockpicker Trucks

Stockpicker Trucks combine the mobility of a cart with the versatility of a steel step ladder. Convenient spring loaded steel step ladder holds the cart securely in place while a person is standing on the ladder. Crutch tip ladder prevents the cart from moving while stocking. Springs then return the ladder to the raised position once personnel exit the step. All shelves have a 2" lip turned up to prevent items from sliding off. Standard casters are 4" x 2" mold-on-rubber, two (2) rigid and two (2) swivel with wheel brakes. Steel units have a blue baked-in powder-coat finish for added toughness. SPA model ladders have a baked in silver powder-coat finish.

Steel Cantilever Stockpicker Truck

This unique cantilever design allows for oversized packages to fit conveniently on the bottom shelf without restricting access. Eliminate the need to move around a clumsy ladder and push a cart while trying to stock or unstock shelves. The step ladders are spring loaded to hold the cart securely in place while a person is standing on the ladder. Two (2) rigid and two (2) swivel 4" x 1¹/₂" poly-on-poly casters standard. Total uniform capacity is 440 pounds per cart uniformly loaded.

Hi-Duty & Hi-Frame Stockpicker Trucks

These oversized units are perfect for large jobs. Ideal for oversized cartons, boxes, parts, and supplies. A spring loaded steel ladder for sure, safe climbing and loading is featured on both the SPA and SPS. Steps have non-skid footing with self-cleaning surface. Each unit features three shelves. Standard 4" x 2" mold-on-rubber casters, two (2) rigid and two (2) swivel with brake. Steel or aluminum construction. Steel units have a blue baked-in powder-coated toughness. SPA model ladders have a baked in silver powder coat finish.

Adjustable Ergo Carts

Adjustable ergonomic carts are the perfect asset to a number of facilities including shipping and handling to hospitality. A strong construction with a tall handle diminishes bending and twisting while loading and unloading products. The top two tiers can be adjusted in height with a simple pull of a pin to let larger sized products be transferred securely. The unit rolls on the users choice of glass-filled nylon or mold-on rubber casters for a smooth transition.

Commercial Service Carts

Commercial Service Carts are ideal for the hospitality industry. The secure grip handles on the strong, yet lightweight frame makes for easy maneuverability. The low noise thermoplastic casters make transportation as quiet as possible. The three paneled construction protects material from outside harm as well as accidental falling. Additionally, the semi-textured surface with perimeter lip prevents sliding of products while still being easily cleanable. Total uniform capacity is 500 pounds. Shelf capacity is 250 pounds.

PNU-3672	36" x 72"	18"	1,500 lb.	PNEUMATIC	249

Steel Folding Handle Platform Truck

Steel platform truck includes a fold-down handle for convenient storage. Handle includes unique fold-up storage pocket for tools, picking slips, or whatever the application requires. Platform features rubber edge guards and a non-slip rubber surface. Trucks roll smoothly on two (2) rigid and two (2) swivel 4" casters. Steel construction with a painted finish.

MODEL NUMBER	DECK SIZE (W x L)	DECK HEIGHT	HANDLE HEIGHT	UNIFORM CAPACITY	WEIGHT (POUND)
SFT-1929	19" x 29"	5¾"	27"	330 lb.	21

Nesting Platform Cart

This steel platform truck is nestable to save valuable warehouse storage space. Ideal for warehouses, shipping and receiving areas, lumber retailers, mail rooms, and other places where multiple platform trucks are needed. The first cart requires a 30½"W x 50⅞"L floor space - each additional truck only adds 12" to the length. Baked-in powder-coated toughness with chrome plated handle.

MODEL NUMBER	DECK SIZE (W x L)	UNIFORM STATIC CAPACITY	CASTER SIZE	CASTER TYPE	WEIGHT (POUND)
NPCT	24" x 48"	1,500 lb.	6" x 2"	RUBBER	182

Nestable Multi-Use Cart with Brake

This cart rolls easily on (2) two rigid and (1) one swivel 6" polyurethane wheels. Brakes automatically lock when cart handle is not squeezed. Ideal in airports, malls, hotels, shipping and receiving areas. A bolt-on 19½" long garment hook is included on model LUG-B-GH.

MODEL NUMBER	OVERALL SIZE (W x D x H)	PLATFORM SIZE (W x L)	UNIFORM CAPACITY	WEIGHT (POUND)

Garden Dollies

Garden Dollies are ideal for a variety of landscaping and industrial jobs. The steel construction is durable while transferring products from area to area. The ergonomic handle diminishes the amount of bending and twisting while maneuvering. To use, place products on front platform and tilt back for comfortable pushing. 10" x 3" Foam filled tires roll smoothly over rough terrain. US Patent Number D678643.

Low Noise Platform Truck with One-Step Brake System

Low noise platform truck rolls smoothly and quietly on heavy duty non-marking low noise wheels, two (2) swivel and two (2) rigid. Great for use in noise sensitive environments. Durable injection molded plastic platform is fitted with slip resistance pads to aid in load retention. Each truck is fitted with corner buffers along with recessed carrying handles. The easy one-step locking break system will ensure a safe operation when transporting loads. Powder coated folding handle allows for easy storage when not in use.

Low Noise & Light Weight Plastic Platform Trucks

Light weight plastic platform trucks handle large loads. Ideal for shops, schools, hospitals, supermarkets, warehouses, and offices. Low start resistance to move the loads; 25-30% less force vs. conventional casters. Designed to move loads with less effort. High quality double ball bearings. Injection molded plastic platform with foldable handle for easy storage when not in use. Anti-skidding surface. Extra strong and durable platform. Foldable handle can be attached to opposite side to pull the cart. Safety protection covers on handle hinges. Two (2) swivel and two (2) rigid low noise casters.

Easy Move Panel Cart

The Easy Move Panel Cart is ergonomically designed for quickly and easily moving sheets of plywood or drywall down small aisles or through doorways. To prevent tipping, casters have been added to the front and back of the unit for support. Includes two (2) 10" x 2½" hard rubber wheels and two (2) 4" steel casters standard. Sloped platform is 21" x 8¹⁵/₁₆".

MODEL NUMBER	UNIFORM STATIC CAPACITY	CASTER SIZE	WEIGHT (POUND)
HT-PANEL®	750 lb.	(2)10" x 2½" & (2) 4"	108

A-Frame Carts

If you need to move bulky sheets of material such as drywall, plywood, paneling, or sheets of metal, you need the heavy-duty A-Frame Cart. A 7/8" high lip along the length of the cart prevents materials from sliding off. A convenient parts tray is included between the A-frame uprights. Unit is easily secured for loading and unloading by using the foot operated caster lock. Includes two (2) rigid and two (2) swivel casters. All steel construction with a baked-in powder-coated toughness. Ships knockdown, assembly required.

OFF-ROAD HAND TRUCK model ORHT-SNP-55

Off-Road Hand Truck

The Off-Road Hand Truck is a great asset when moving material over rough terrain. The strong steel construction with a bright yellow finish provides durability, while still maintaining its lightweight functionality for a variety of users. The large loading base allows products, both big and small, to be transported from one work area to another. The unique structural design of four 16" x 4" foam-filled wheels directly behind the base, with two 8" x 2" phenolic additional casters utilized when in motion, provide superb stability throughout use. The extended handle helps the user maintain an ergonomically friendly posture.

Fifth Wheel Steer Trailers

Fifth Wheel Steer Trailers feature steering that resembles children's little red wagons. These industrial workhorses move heavy loads around plants and distribution centers. 14" square steel plates sandwich a UHMW disk, secured by a 1-1/4" kingpin, comprising the massive fifth-wheel assembly. Equipped with proper couplers, fifth wheel steer trailers can be connected into "trains" to move even larger loads of merchandise. Front and rear axles are precisely located for optimal steering and load accommodation. Custom deck sizes and hardwood decks available, contact factory.

Open Deck Machinery Dollies

Dollies have six abrasion-resistant, high-capacity, cast iron steel wheels on fixed axles to move heavy machinery, containers, and other equipment. The center wheels project lower than end wheels for easier pivoting. Welded steel construction. 6,000 lb. models have a 3" channel steel frame; 5" x 2" cast iron wheels have roller bearings. 10,000 lb. models have a 6" channel steel frame; 8" x 3" cast iron wheels have roller bearings. Yellow baked-in powder-coated toughness.

Heavy-Duty Cradle Carts

Move and store pipe, channel, bar stock, barrels, or drums with these Heavy-Duty Cradle Carts. A large open design that makes loading and unloading by fork trucks and slings easy. All welded construction. Wheels are mounted in a diamond pattern to allow the truck to tilt when going over thresholds and turn about on its own center. The 4,000 pound units roll on two (2) rigid and two (2) swivel glass filled nylon casters with the exception of model *DCC-80*, which rolls on four (4) swivel glass filled nylon casters. The 10,000 pound carts roll on two (2) rigid steel and two (2) swivel phenolic casters. The *DCC-17* rolls on four (4) swivel hard rubber casters. Baked-in powder-coated toughness standard on steel carts.

Machinery Lifts

These Machinery Lifts are the ideal method to move bulky and hard to handle loads. Move large, awkward objects or heavy equipment that is difficult to maneuver or position like refrigerators, safes, furniture, or machines. Yet they are versatile enough to safely handle fragile, sensitive equipment like glass and computers. Lift height is 6" (model MFM-2-RAL has a 5½" lift height). Optional side straps secure loads for stable moving. Large wheels allow smooth movement over bumps and cracks of factory floors. Forks are adjustable with mounting pegs to allow for positioning of forks to accommodate different width loads.

Cast Aluminum Dollies

These are easy to use and provide efficient moving time. Box-like frames have integral sides and deeply fluted tops. Dollies include 3½" diameter x 3" wide phenolic rollers. They are excellent for moving heavy crates and machinery. Note: Except when used individually, corners should be turned by lifting the load and rotating each dolly individually. Overall height 4¼".

Machinery Skates

These skates are designed to move heavy equipment and machinery. Nylon wheels are strong and will not mark floors. The top of each skate includes a rubber surface for extra grip. Steel construction with handle to carry and position. Three styles to choose from.

Fixed: Dolly size is non-adjustable and wheels are rigid. Designed for moving in straight lines.

Adjustable: Includes two dollies connected with a slider bar to form one larger dolly. Slider bar allows for adjustable overall dolly width. Designed for moving in straight lines.

Steerable: Each dolly includes a swivel top plate and a pulling bar to allow for easy maneuvering around turns and corners.

Steel Machine Rollers & Accessories

Made of high-strength annealed ductile iron, these Steel Machine Rollers have swivel tops that rotate 360° on chrome steel ball bearings to allow for easier turning. The rollers form a "tank track" to revolve around a center load bearing plate in the frame to provide maximum maneuverability. The weight of the load is transferred directly from the load bearing plate to the rollers, eliminating axle friction and requiring less power to start and move. A spring loaded locking mechanism on the swivel tops, except on model VHMS-2, can be engaged in detents at 45° intervals. These units are virtually maintenance free. Steering bars split in two and connect with sleeve for easy storage.

Mechanical Machinery Jacks

Mechanical Machinery Jacks are good for repairing vehicles, lifting trucks, railway maintenance, construction, mining, and agriculture. Compact design with collapsible lever offers easy operation and simple maintenance. A self locking, anti-kickback operating lever reduces injuries. Standard features include: folding handle, two carrying handles, and a large base plate. Lifting and lowering speed is controllable. No seals to leak. Will not drift down, even after an extended period of time.

Leveling Jacks

Designed for permanent installation, these screw-style jacks hold platforms and other equipment in place and stabilize them at the required height. Drill a 1¹/₄" diameter hole through the platform to be leveled and bolt the platform between the upper and lower flanges of the jack's divided housing. Uniform lifting capacity is 5,000 pounds with a holding capacity of 10,000 pounds. Jacks have an 8¹/₂" long handle that folds down when not in use. 3⁷/₈" diameter swivel base has a slip-resistant rubber pad on the bottom (replacement pads available). Screw diameter is 1¹/₄". Lift rate is 1¹/₄" per crank revolution.

Polyurethane Floor Locks

Floor Locks are ideal for maintenance and construction facilities. These floor locks are designed to create a stable environment, while decreasing the chance of jostling or slight movement. They are constructed of steel with a thermoplastic polyurethane base. To use, place the unit close to a desired wheel or caster and raise until tension is built. Once secured, a simple locking device can be activated by applying pressure to the foot pedal.

Pallet Racking

- Scratch and rust resistance
- Structural uniformity and integrity

Pallet racking solves the storage and retrieval needs faced by most industries today. Adaptability to specific layout installations is just one added feature. Baked-in powder-coated toughness. Units are sold each.

Pallet Support Bars

Cross bars provide economical support for pallets between rack step beams. The model SSB-42 is 1½" high. It is designed to sit flush with the top of the rack step beam. The model PSB-42 is 1" high and is designed to be used with ½" plywood or particle board so the board will be flush with the top of the beam. The boxed steel bars fit our standard 42" rack. 14 gauge material. Uniform capacity is 1,000 pounds.

MODEL NUMBER	WIDTH	LENGTH	HEIGHT	WEIGHT (POUND)
PSB-42 [Ⓢ]	3"	38½"	1"	6
SSB-42 [Ⓢ]	3"	38½"	1½"	9

Pallet Rack Wire Decking

Provide maximum support at minimum cost. The three 13 gauge "U" channels keep pallet and products from falling through rack beams. Fits 1½" step beam. Welded wire construction with under-supports. Requires two sections for use in bay. Uniform load capacity is 2,500 pounds.

MODEL NUMBER	DECKING DEPTH	DECKING LENGTH	(2) PIECES REQUIRED FOR BEAM WIDTH	WEIGHT (POUND)
WMD-4246 [Ⓢ]	42"	46"	96"	64
WMD-4252 [Ⓢ]	42"	52"	108"	74
WMD-4258 [Ⓢ]	42"	58"	120"	82

Crown Pallet Rack Decking

Add convenience, visibility, and efficiency to your rack. By sloping the decking, you help the user do their job. 6 gauge wire mesh. Uniform load capacity is 650 pounds. Slope is 4½" over 21". Designed for our 42" deep x 1½" step type pallet rack beam.

MODEL NUMBER	DECKING DEPTH	DECKING LENGTH	(2) PIECES REQUIRED FOR BEAM WIDTH	WEIGHT (POUND)
SWMD-4246 [Ⓢ]	42"	46"	96"	67

SWMD-4258 [Ⓢ]	47 ⁹ / ₁₆ "	58"	120"	82

Open Area Rack Decking

Ideal for storing furniture, carpet, record files, or products that require a uniform support. Fire protection friendly with 50% open design. Designed for pallet rack beam with 42" deep racking. The bright galvanized finish makes the 22 gauge steel rack appear more industrial. Fits 1½" beam offset. The top hats are 3½" wide with top slotted holes 1¼" x 2½" and the valleys are 2½" wide with slotted holes 1" x 3". Custom sizes available, contact factory.

MODEL NUMBER	BEAM LENGTH	FRAME DEPTH	SPAN	UNIFORM CAPACITY	WEIGHT (POUND)

Gravity Flow Inserts

Convert your pallet rack into flow rack simply by inserting our Gravity Flow Inserts between pallet rack beams. Inserts measure 38⅝" long for use in 42" deep pallet rack frames. Aluminum roller diameter is ¾" on 2" centers. Side frames are constructed of galvanized steel with aluminum end hangers. Uniform capacity is 50 pounds per foot.

MODEL NUMBER	WIDTH	LENGTH	UNIFORM CAPACITY PER FOOT	WEIGHT (POUND)

Pallet Rack Gravity Flow Shelves

Pallet Rack Gravity Flow Shelves allow users to easily convert pallet racking into gravity flow racking. Each model includes all components for one shelf level: frame, roller tracks, and box dividers. Roller track and box divider spacing is adjustable. Uniform capacity is 25 pounds per square foot. Steel construction with painted finish. Ships knocked down and includes mounting hardware for attachment to frames.

Back Guards for Pallet Rack

Contain and minimize the potential hazard of falling items with Pallet Rack Back Guards. Modular sized panels mount directly to pallet rack system, which installs quickly and provides safety. System is made of 2" x 2" x 10 gauge steel welded wire mesh, welded into a 1¼" x 1¼" x 13 gauge steel angle frame. Panels have mounting holes on 6" centers. Options of flush mount or offset brackets allow for material or pallets that overhang the beams. See RBG survey sheet on page 402 (K28).

Nylon Pallet Rack Netting

Minimize the potential of racked products falling off the back of pallet racks. The nylon mesh rope is ⅜" thick with 4" x 4" holes and is edged with polypropylene rope. Black nylon zip ties are included for attaching netting to pallet racking. This netting is designed for flush mounting on pallet racking. 96" high models consist of two 48" high units and zip ties to connect them together. The holding capacity is rated at 2,500 lb.

Pallet Rack Sump

Polyethylene Pallet Rack Sump keeps dangerous and costly spills off floors, equipment, and inventory. Allows direct forklift access to wooden pallet - sump unit stays positioned in the rack when removing pallet and drums. Low profile design fits into warehouse racking with minimal obstruction to adjacent storage areas. Unit holds up to four (4) 55-gallon drums on a standard shipping pallet. Inside dimensions for a pallet are 49" x 49". Model PRS-51-D comes with drain/ball valve assembly for draining liquids.

MODEL NUMBER	DESCRIPTION	OVERALL SIZE (W x L x H)	UNIFORM CONTAINMENT CAPACITY	WEIGHT (POUND)

model PRTD-TB-BK

Pallet Rack Trash Bags

Control warehouse waste without using valuable floor space! Manufactured from rugged, black, waterproof polyester material, the unit has three handles to help with emptying. "S" hooks are included for hanging the bag on pallet rack end frames. Other colors and printed messages available, contact factory.

MODEL NUMBER	BAG SIZE AT TOP (W x H)	BAG SIZE AT BOTTOM (W x H)	WEIGHT (POUND)
PRTD-TB-BK	37" x 40"	25" x 40"	2
PRTD-TB-BK-5PK	37" x 40"	25" x 40"	9

Structural Rack Guards

Economical way to protect against damage to pallet racking and wall corners. Constructed of 6" or 8" steel "C" channel for durability. Available with or without a rubber bumper. Easy to install to concrete surface. Four mounting holes for maximum stability. Safety yellow, baked-in powder-coated toughness.

Models G6 require 1/2" anchor bolts. Models G8 require 3/4" anchor bolts. Installation hardware sold separately.

Racking Place Card Labels

Keep your pallet and flow racks organized, easy-to-identify, and cleaned up without the time and cost involved with painting. Product is designed for easy removal and replacement of labels or barcodes on pallet racks, flow racks, and shelving. The Rack Place Card Labels adhere permanently to metal surfaces in a wide range of temperatures and accepts most standard label adhesives. The Industrial labels have a better service and application temperature, as well as better adhesive formulation than the economy labels.

Cantilever Rack Kits

Cantilever Racks are ideal for eliminating storage problems. The steel constructed design allows for quick and efficient handling by forklift or by hand. The rack includes pre-drilled holes, adjustable arms for access to variable heights, and front lipped arms to prevent items from falling. Available in both single sided and double sided units with the option of standard, medium, or heavy duty construction. Baked-in powder-coated toughness. *Capacity is per level.

Galvanized Cantilever Rack Kits

Galvanized Cantilever Rack systems are ideal for distributing and industrial settings. The galvanized steel design minimizes rust while providing a strong construction. The adjustable rack arms can be adapted to a customized position allowing the unit to fit the needs of individual circumstances.

*Capacity is per level.

Standard-Duty Cantilever Racking

Standard Duty Cantilever Rack Systems are great for manufacturing and distributing facilities. The steel construction provides strength and durability, which allows the unit to withstand the harshest of environments. The adjustable arms allow the unit to be customized to fit the needs of individual circumstances. Individual components are sold separately to accommodate your requirements. *Capacity listed is per upright.

Medium-Duty Cantilever Racking

Medium-Duty Cantilever Racks are ideal for manual loading; open design allows easy forklift accessibility. Store bar stock, pipe, tubing, lumber, and other hard-to-stock items that must be kept off the floor. Arms are adjustable up and down the full length of the upright. There is 3½" between arm slots. To adjust, align arms with pre-drilled slots and secure with key lock (included). All arms feature 2¾" lips to prevent product from falling off. Uprights and arms are sold each, not in pairs. Custom rack systems can be designed for your special application. Baked-in powder-coated toughness. *Capacity listed is per upright.

Heavy-Duty Cantilever Racking

Heavy-Duty Cantilever Racks are completely adjustable for application specific design flexibility. Long, unwelded stock is handled quickly and efficiently by forklift; instant accessibility to one piece or a full load. Arms are adjustable up and down the length of the upright. Pre-drilled holes on the uprights are spaced every 3½" for bolt-on arm placement (hardware included). All arms feature lips to prevent product from falling off. Standard arms have a 3½" lip. Heavy-duty and extra heavy-duty have a 3¼" lip. Uprights and arms are sold each, not in pairs. Custom rack systems can be designed for your special application. *Capacity listed is per upright.

Cantilever Carts

Portable Cantilever Carts for storage of bar stock type items. Each cart includes three pairs of arms. Arm height adjustable in 6" increments. Arms are secured to cart with a bolt and nut and each arm features two holes so that it may be attached in the level or inclined position. Height of lowest arm position is 18¾", while the highest position is 60¾". The 10" high base includes built-in fork pockets that are 5¾"W x 2"H usable. Units roll on two (2) rigid and two (2) locking swivel 6" x 2" casters. All steel construction with blue, baked-in powder-coated toughness.

Heavy Duty Roll-Out Shelving

Roll-out shelving racks store heavy dies, fixtures, and machinery. Capacity per shelf is 1,500 pounds evenly distributed with a total uniform capacity of 6,000 pounds. Shelves roll out for convenient loading and retrieving. Can be easily loaded and unloaded with a crane, overhead hoist, forklift, or stacker. Individual shelf heights are adjustable on 2¾" centers. Features 10 gauge steel shelves that can extend 20", one (1) at a time, and locked in the extended position for maximum safety. Top shelf is fixed, non-adjustable. Add on units are available. All steel construction with baked-in powder-coated toughness. Ships unassembled. Three (3) shelves per side of the VRSOR-114.

model BAR-R-84-D

Double Sided Horizontal Bar Rack

Ideal for use in maintenance departments, tool rooms, machine shops, and storage areas. Arms extend and act as dividers creating bays of storage. Nine arm levels can store material up to 10 feet long. Aligning two units next to each other will allow for the storage of longer material. Arm edges are sloped upward to prevent roll off's. Arms are welded at 6" increments with 6" between levels. Total uniform rack capacity is 2,600 pounds evenly distributed. Unit is supplied with lag down points and ships knocked down. Steel construction with baked-in powder-coated toughness.

Versa Racks

Versa Racks are great for transporting or storing items. Steel construction provides versatility, efficiency, and durability. Baked-in powder-coated toughness. Corner posts can be removed or changed to fit the needs of various applications. Double post pins provide support up to 4,000 uniform pounds. All models contain a four way fork entry for simple transference and can be stacked five (5) units high, while models using the 24" and 36" posts can be stacked three (3) high, during use. The overall model size is 49-7/16" W x 43-7/16" L. Custom sizes and configurations are available upon request.

Model V-1 has four adjustable-height non-removable posts, fixed base targets, 4-way fork entry, and solid steel deck. The usable height is adjustable in 1" increments from 11¹/₄" to 17¹/₄".

Model V-3 is ideal for transporting long, oversized loads of material. The model is a stand/cart which has 8" glass-filled nylon wheels and a floor lock. 12" high non-removable fixed-height corner posts secure loads. Overall height is 30".

Model V-4 is a versa rack pallet with no posts or sockets. Solid deck steel pallet is a durable way to transfer products. The model has 4-way fork entrance for convenient portability. Usable fork opening is 8" W x 2¹/₂" H.

Model V-2 is a versa rack base, with no posts. Sockets included. The V-2 and V-3 can be used together by stacking a single V-2 onto a V-3 to create a larger, more versatile, model. A four way fork entrance enables the unit to be quickly transferred from workstation to workstation.

SECURELY
STACKABLE

Internestable Stackable Racks

Space saving storage is what this rack is all about. The 3/4" underclearance allows for easy fork truck accessibility. Units can stack up to 20 feet high. Sturdy, welded construction gives these units an abundance of strength and stability. (A) Special redundant stacking systems allow units to be internested for space saving storage when not in use. (B) Flared posts, pintle, and target, make it easy to line up units for stacking. (C) Optional fold down post available upon request.

Galvanized Storage Cabinets

Galvanized Storage Cabinets are manufactured from high-quality galvanized steel. Lockable solid panel double hinged doors (two keys are included). The door frames include magnets to hold the doors closed without locking. The flush finger wells allow for easy door opening. The full-width shelves adjust on 4" centers for flexibility. Material thickness is 26 gauge. Ships knocked down, assembly required.

Bin Storage Cabinets

Bin Storage Cabinets are designed for high density storage and organization of parts. These cabinets offer easy accessibility to contents while maintaining cleanliness and security. Available in three sizes: 60" wide, 48" wide and 36" wide, each with different configurations of bins and/or shelves. Bins are made of a durable polyethylene with molded-in back hook for secure hanging. Front edges are lowered for better visibility and easier part picking. When not in use bins can be stacked on shelves, worktables, carts, or other flat surfaces. *Back and door feature louvered panels for customized configurations.

Keyed Handle Lock comes standard with models VSC-3501 and VSC-JC.

Padlock Handle comes standard with model VSC-SSC. Padlock is not included.

Security Cabinets

Stand-Alone Security Cabinets are specifically designed to secure small to medium sized products where they are stored - on the sales floor, in the back room, or in the receiving area. Open mesh design allows for quick visual inspection and will not deter sprinkler systems. Units are not to exceed 1,000 pounds. Shelves are sold separately. Panels are constructed of 8 gauge galvanized welded wire grid with 1½" x 3" openings. The frame is constructed of 2" x 2" 14 gauge galvanized steel frame. Industrial graded hinged doors feature built-in cylinder lock. Shelves are 4 gauge galvanized welded wire grid with 1½" x 3" openings or 20 gauge galvanized steel panels. Uniform capacity per shelf is 200 pounds.

Wire Cages

Modular system offers security, storage, and safety for many applications. Stackable panel design allows for easy installation and results in a clean finish. Wire partitions can save in inventory costs, are alternatives to modular offices and drywall, and can increase safety. Constructed of 2" x 2" mesh, 10 gauge welded wire with baked-in powder-coated toughness.

Driver Cages

Driver Cages are an application that is placed around an entrance in a warehouse. This is used to keep truck driver, and delivery personnel secluded in one place when entering the warehouse or making a delivery. Each driver cage includes a key lock on the driver side (48" side), a push bar on the warehouse side, and a 2' x 1' 8" slide up service window with shelf. Helps prevent people from wandering throughout the warehouse, as well as additional security. Cages consists of rectangular 2" x 1" mesh, 10 gauge wire, with a wet enamel gray finish.

Plastic Bulk Shelving & Storage

Largest all-purpose industrial-grade plastic shelving system in the industry. Our unique leg stacker system lets you choose whether to build up, out, or both. Our rigid high-density polyethylene panels are a stout 2⅝" thick with a grid top that allows liquids to flow through, promotes air circulation, and prevents dust build up. Optional drip trays available for different applications. Drip trays hold up to 2.5 gallons. The entire system is chemically resistant, making it an ideal choice for HAZMAT storage or any other applications, corrosive or not.

Fiberglass Storage Cases

These lockable Fiberglass Storage Cases are constructed of heavy-duty white fiberglass with an off-white interior finish. Cases are perfect for storage of hundreds of items. UV gel coat topcoat provides long-lasting protection and prevents fading. Gas cylinders are included to help lift the lid and prevent the lid from over-rotating and damaging the hinges. The hinges are stainless steel piano hinges attached with adhesive and rust-proof rivets. Fiberglass nominal thickness is 3/16". Latch shackle thickness is 5/16".

Multi-Height Container

Increase flexibility and accessibility with our Multi-Height Container. As the user loads or unloads the height can be increased or decreased. Includes one pallet base (with four way entry) and four side sections. Pallet base measures 47³/₁₆"W x 31³/₈"L x 5⁷/₈"H with fork openings: 8⁵/₁₆"W x 3⁷/₈"H on 14¹/₈" centers and 13¹/₈"W x 3⁷/₈"H on 19" centers. Polyethylene construction with steel corner hinges. Multiple units are not stackable.

Wire Containers

All steel construction with galvanized welded wire mesh. Corners have eyelets designed for rigidity and stacking. Legs are wrapped and welded around base to eliminate sharp edges. Containers can be stacked four (4) high and have a 4" clearance underneath to allow movement by fork or pallet trucks. Containers front half drop gate allows speed loading and access to stored goods. The collapsible design allows for efficient storage and transportation.

Storage Buildings

Modular Storage Buildings are ideal for keeping valuable items secure. Constructed of maintenance free galvanized corrugated paneling. The door measures 45"W x 74"H usable and features a right-side hinged lock (padlock not included). Modular design is easy to assemble. Once assembled unit can be moved with a fork lift. Each unit features a wooden floor 5 $\frac{3}{4}$ " high to help keep products dry. Built-in rain gutters for water drainage is standard.

Utility Steel Storage Sheds

Utility Steel Storage Sheds are used for holding all kinds of materials or tools. The hinged door provides access to shed and the slanted roof helps with rain run-off. The shed has an open floor design (floor is not included) and a lockable door latch (padlock not included). Unit has a zinc-plated finish that prevents rust. The easy to assemble design ships knock-down with installation instructions and hardware included. Model SHED-5932-F has a front opening door design that enables the shed to be used in spacious areas, while model SHED-5932 includes a side door design for use in long narrow spaces.

Tote Lifters HAND PUMP OR 12V DC

Designed to lift open bottom skids, boxes, and baskets. Two operations available: hand pump and 12V DC power with rocker switch to raise or lower. Hand pump design features an ergonomic pump handle with two lifting speeds to accommodate light or heavy loads. Side stabilizers lock lift in place when load is raised above 20½". DC power unit includes on-board battery charger. These stainless steel units feature nylon wheels. Units may not be suitable for wash down applications.

model
ULM-HTL-2149-20

High Tote Lifter 12V DC STANDARD

A High Tote Lifter is a perfect asset for any food handling atmosphere. The stainless steel construction is easily cleaned due to its smooth finish. An open fork design allows for simple inspection for overall complete hygiene. Products can be raised or lowered by utilizing the 12V DC powered hand pump. When the unit has been raised, it minimizes the amount of bending and twisting that can occur when products are placed in the improper height location. The wheeled scissor base creates a steady base when in position to load or unload merchandise. The overall compact design is easily stored when not in use.

HYD-5-PSS

Hefti-Lifts

User-friendly portable stainless steel hydraulic lifts provide reliable, powerful lifting when moving and positioning loads. Includes removable platform for operations requiring forks. Manual hydraulic foot pump yields ¾" of platform travel per stroke. Non-slip chain is used for accurate positioning. Units roll easily on two rigid and two swivel poly-on-steel casters and include a foot operated brake. Not for use with pallets. Each fork is 4¾"W x 2½"H, the fork length is the same as the platform length. Overall fork width is 22". Compact, lightweight stackers are capable of a smaller turning radius. Equipped with a built-in automatic load check valve for improved safety. Model HYD-5-SS features a hydraulic foot pump, while model HYD-10-DA-SS comes with a dual acting manual hydraulic hand pump.

DC Powered Hefti-Lift 12V DC STANDARD

This DC powered, medium duty, stainless steel semi-electric lift is user friendly providing reliable, powerful lifting when moving and positioning loads. Ideal for working in confined spaces and eliminates manual handling problems and injuries. Includes a stainless steel removable platform for operations requiring forks. Robust design, 304 grade all stainless steel construction. Hydraulic cylinders (including the piston) are also manufactured from type 304 stainless steel. The stainless steel piston is very important for long-term durability in wash-down environments. This stainless steel lift is non-corrosive and is good for washdown and corrosive acids applications. Ideal for food, pharmaceutical, chemical, and clean room applications. Unit rolls easily on two (2) rigid and two (2) swivel poly-on-steel casters and includes a foot operated brake. Each fork is 4½"W x 2½"H. The fork length is the same as the platform length. Overall fork width is 22". Forks are adjustable to handle different size loads. Runs off one (1) 12V battery. Includes an integral battery charger, battery charge indicator, and an emergency on/off switch. Not for use with pallets.

Manual Load Stacker

A 304L Stainless Steel Manual Load Stacker is a great way to transport products in sanitary settings. The compact 304L stainless steel design not only helps transport heavy loads around the work area, but also fits in a compact area for space saving when not in use. The unit is raised manually for a more precise height positioning, which diminishes bending and twisting when loading/unloading materials. Due to the cradle design, goods can be placed on the stacker from three sides without the need to change the placement of the stacker. Cradle adjusts in 1" increments up to 16" wide. Rolling casters are attached to provide a smooth transfer of products, while the braking system maintains safety once the unit is in place

MODEL NUMBER	CRADLE SIZE (W x L)	MAXIMUM ROLL DIAMETER	SERVICE RANGE	UNIFORM CAPACITY	WEIGHT (POUND)
ULM-WMS-550	16" x 16"	24"	5 ¹ / ₈ " to 62"	440 lb.	195

Electric Work Positioner 24V DC STANDARD

This Stainless Steel Electric Work Positioner is a light weight and compact unit. Ideal for light industrial or commercial applications. Good maneuverability in narrow aisles and confined spaces. Robust design with 304 grade all stainless steel construction. Automatic electric overload protection system ensures safe operation. The stainless steel platform is easy to clean and retains an attractive appearance. Two (2) 3" swivel load casters and two (2) 5" total-locking swivel, polyurethane steering casters. Includes two (2) 12V AGM batteries with an integral battery charger.

MODEL NUMBER	PLATFORM SIZE (W x L)	SERVICE RANGE	OVERALL SIZE (W x L x H)	UNIFORM CAPACITY	WEIGHT (POUND)

Manual Work Positioner

A Stainless Steel Manual Work Positioner is a lightweight lift that is designed to take the strain out of any lifting job. Ideal for use in narrow aisles and confined spaces. The platform height is adjustable with a manual hand winch. An auto-brake system prevents uncontrolled lowering. Robust design - 304 grade all stainless steel construction. Rolls on two (2) 3" swivel load casters and two (2) 5" total-locking swivel, polyurethane steering casters.

MODEL NUMBER	PLATFORM SIZE (W x L)	SERVICE RANGE	OVERALL SIZE (W x L x H)	UNIFORM CAPACITY	WEIGHT (POUND)

Electric Powered Stacker 12V DC STANDARD

An Electric Powered Stacker is an outstanding advantage in the workplace cleanliness. The design promotes accessibility to all surface area for simple washing and drying after or before transferring hygiene safe products. The upright high handle allows the user to maintain the proper posture throughout the moving of the unit, both loaded and unloaded. Front and back caster lets the stacker maneuver throughout the workplace with ease. Once in position the forks are raised and lowered by a 12V DC operation which minimizes productivity by reducing transfer time.

Hydraulic Foot Pump Roll Handler

A 304L Stainless Steel Hydraulic Foot Pump Roll Handler is great for an assortment of areas including the food handling service industries. The design is sleek, smooth, and easily washable for before and after use in hygienic areas. The raising and lowering of the platform to the precise position is made easy by the hydraulic foot pump design, which diminishes needless bending when loading/unloading material. The 304L stainless steel construction, including hydraulic cylinders as well as the piston, provides a strong structure for transferring heavy loads between work areas. A rounded handle style allows for a proper two handed grip when maneuvering around work areas. The open cradle platform lets the user load material from three sides. Cradle adjusts in 1" increments up to 16" wide. The handler rolls smoothly on four (4) swivel casters with two (2) attached rear brakes for safe functionality when in a resting position.

Pallet Trucks

304L Stainless Steel Hydraulic Hand Pump Pallet Trucks are a superb addition to the food handling and other hygienic environments. The 304L stainless steel construction, including hydraulic cylinders as well as the piston, is not only strong, but also simple to clean with its open fork design for thoroughly detailing the unit before/after transferring products. The height of the ergonomically friendly handle diminishes slouching and can be rotated for simple maneuvering of products down narrow corridors and pathways. All bearings are sealed for waterproof protection during both use and cleaning.

Pallet Trucks with Digital Scale

304 Stainless Steel Pallet Trucks with Digital Scale allows you to weigh your load on the spot for maximum efficiency. This model is very user friendly and is suitable for low height lifting. The built-in scale allows you to weigh your load as you are handling it. The scale is selectable in a variety of increments to adjust to the size of your load. It has keyboard calibration and functional setup with automatic zero capabilities. Digital filtering is used to help compensate for vibration and motion to make the Stainless Steel Pallet Truck with Digital Scales smooth and accurate. Forks are 7" wide each. Factory calibrated for shipping destination. Scale is powered with four 4 C batteries. AC adaptor included. NTEP approval also available. Units may not be suitable for wash down applications. Please contact factory.

Electric Pallet Truck 24V DC STANDARD

A 304L Stainless Steel Electric Pallet Truck is an ideal supplement to food service and other sterile settings. The 304L stainless steel construction, including hydraulic cylinders as well as the piston, provides not only a strong structure for transferring heavy loads between work areas, but is also easily washable. An enclosed shelter for electronic components that is simple to access for general upkeep, while the humidity resistant electronics are great for working in difficult conditions. The adjustable height handle with built in horn helps maintain an ergonomic posture of the user during use. The emergency stop is perfectly located near the driving position of the unit for a rapid shut-down in the case of a crisis. During use the unit maneuvers efficiently on its waterproof roll wheels. Unit comes standard in 304 Stainless Steel (316 Stainless Steel is an option, contact factory for pricing). Battery is 24V/240Ah

DC Powered and Manual Scissor Carts (partially stainless steel)

Tables provide unparalleled ergonomic support in lifting, palletizing, loading, and unloading applications. Carts are raised or lowered with either a 12V DC powered motor or a manual two-speed auto-shift foot pump. Units roll smoothly with two (2) rigid and two (2) swivel 4" x 2" phenolic casters with brakes. Push handle is removable. Internal DC powered electric motor and one (1) 12V battery is included on DC units. Electric motor is rated at 1600 watts. Built-in battery charger is included (operated on 115V AC power). Push buttons to raise and lower lift are located on the power unit. Hand control on coil cord standard. Platform is equipped with perimeter pinch-point guard for OSHA compliance. Partially stainless steel tables include a stainless steel platform, base frame, and hydraulic cylinder. Scissor legs are galvanized while the handle is chrome plated.

Hydraulic Post Tables (partially stainless steel)

Foot-operated partially stainless steel Hydraulic Post Tables are built for heavy-duty shop use. They are good for many material handling uses including: lifting dies and castings, moving machine parts, positioning welders' work, leveling feed material for pump presses, conveyors and press brakes, and similar material handling jobs. Posts are telescoping to help stabilize and support loads during operation. Units include four (4) casters; two (2) locking swivel with brakes and two (2) rigid. Light-duty units feature a single-speed foot pump. Heavy-duty units feature a two-speed foot pump for maximum operator convenience. All foot pumps include a down speed control valve for safe platform lowering. Partially stainless steel tables include a stainless steel platform, base frame, handle, caster rigs, and hardware. Pump assembly and leg posts are zinc plated. Poly-on-Poly casters standard.

Spring Scissor Tables (partially stainless steel)

Spring Scissor Tables are ideal for distributing and shipping facilities. These units allow the user to transfer products from work space to work space, while holding an ergonomically friendly position. The frame is designed of steel construction, which allows for strength and durability. The scissor mechanism raises the unit to the desired height, while the internal spring provides support when unit is being loaded and unloaded. The round top can be manually rotated 360° for improved packaging and handling capabilities. Fork pockets measure 6¾"W x 1½"H. Constructed of partially stainless steel base, frame, springs, and legs. Model SST-45-PSS-ST has a solid top.

Air Corner Tilter FACTORY AIR POWERED

A Stainless Steel Air Corner Tilter provides ergonomic loading and unloading of bulk containers, gaylords, or crates. Pallet truck and fork truck accessible. Tilts up to 45°. Activated by a hand operated control lever or foot pedal. By adjusting the air regulator to a predetermined pressure, the air bag inflates tilting the container automatically as it is unloaded. As the container becomes lighter, it automatically tilts and the material shifts to the corner of the container where it can be easily removed by manual or mechanical means. The adjustable regulator is factory preset to begin rotating the container when the weight reaches approximately 900 pounds. Pressure is easily adjustable for the weight of your application.

Thin Spins - pallet truck loadable carousel

Stainless Steel Thin Spins are pallet truck loadable carousels. When confronted with minimum floor space and only a hand pallet truck, the Thin Spin low-profile carousel is ideal for loading and unloading pallet applications. The unit is pallet truck loadable because of its sleek overall height. The detent lock restricts carousel rotation when not in use. The Carousel requires a starting force of approximately thirty-five (35) pounds and a maintaining force of twenty-five (25) pounds. Stainless Steel Thin Spins are constructed of type 304 stainless steel mill finish. Units are not suitable for wash down applications. Please contact factory.

model CA-40-4-SS

Manual Carousels

Stainless Steel Manual Carousels rotate materials with the assistance of an operator. Now loading and unloading operations can be done more efficiently; minimizing fatigue and risk of back injury. The carousel may be added to an existing work bench, scissor table, or simply placed on the floor. A series of sealed ball bearings transfer the load smoothly and evenly to the supporting surface. Guide rollers keep the rings aligned.

model SCALE-LT-44-5K

Wash Down Floor Scales

Ideal for food, chemical, and pharmaceutical applications, these scales can withstand daily washdown. Non-metallic deck insert, type 304 stainless steel frame, feet, and bolts standard. Comes with stainless steel NTEP load cells and junction box. Easiest "clean-in-place" scale on the market. Just lift out the 1" thick polyethylene deck insert, leaving the stainless steel scale frame in place and hose down! Accuracy to NIST H44. The digital display stands 42" high and is powered by 115V AC, cord included. Bases are constructed in the USA with domestic steel.

Winches

Constructed of 304 stainless steel for superior corrosion resistance. Machine-cut spur gears ensure smooth accurate operation, while protective gear covers keep dirt out and help prevent worker injuries. Winches feature a drum clamp for easy attachment of wire rope (not included) and an automatic brake for positive load control during lifting and lowering operations.

Folding Ladders with Wheels

Locking folding design saves on storage space when ladder is not in use. Ladder folds after unlocking one spring-loaded detent pin. Once unit is folded, tilt back on wheels for easy portability. The steps are perforated to provide a non-slip surface. The ladders have 7" deep steps and a climb angle of 58°. Stainless steel construction. Complies with ANSI 14.7 and OSHA 1910.29 specifications.

model AHW-L-2460-SS

Adjustable Work-Mate Stands

Minimizes fatigue by elevating workers to heights that are comfortable and ergonomically correct. Especially useful when multiple shift employees operate the same piece of machinery. Serrated surface ensures safe footing in most wet environments. Ergonomic matting surface provides comfort for the operator who stands all day. The height of each leg can be adjusted individually to ensure proper working height. All sizes have four (4) legs except the 60", 72" and 96" long models, which have six (6) legs. Uniform capacity is 500 pounds each. Welded stainless steel construction.

Cylinder Hand Trucks

Fold-down single and double cylinder stainless steel hand trucks are designed and built to transport gas cylinders with ease. Tilt back design for effortless transportation. Fold-down hand trucks are designed to carry cylinder loads on 4-wheel base, thus minimizing operator fatigue and risk. Gas cylinder hand trucks hold cylinders up to 12" in diameter. Chains and contoured back cradle provide utmost safety. Fold-down trucks are designed for quick, easy, and safe movement of most types of gas cylinders. Units roll on two (2) 8" x 1½" and two (2) 3" x 1½" poly-on-poly wheels with brakes.

Drum Bung Nut Wrench

Bung Nut Wrenches are multipurpose drum tools that not only open and close drum bungs or plugs, they also work as a bung wrench, ring wrench, and faucet wrench all in one! Wrenches are universal because they fit all types of industrial drum plugs and bungs in metal or plastic. Constructed of NSF 51 compliant stainless steel and meets 2009 FDA Food Code requirements for nonfood-contact equipment. These durable wrenches will not bend, break, or chip. Eliminate the need for extra tools with these multifunctional drum wrenches! Patent pending.

Drum Lifter

A stainless steel, adjustable, 3-point drum lifter for lifting, transporting, and stowing 30 and 55 gallon steel or plastic drums. Designed with a 3-point drum contact with stabilizing arms, which reduces damage to the drum and automatically engages the drum rim when lowered. Ideal vertical drum lifting tool which can be used with an overhead crane, hoist, or forklift attachment. Strong and durable 304 grade full stainless steel construction. Designed for quick and easy one person operation.

Drum Trucks

DBT-SS: Tilt and lower drums to a horizontal position for dispensing. Grips all types of steel 30, 55, & 85 gallon drums and most rimmed plastic and fiber drums. Robust, non-corrosive design featuring 304 all stainless steel construction. Adjustable chime hook helps to secure the drum. Kickstand for holding the unit in stand-up position. 4-wheel design offers exceptional maneuverability through tight areas. 4½" ground clearance with four (4) 8" x 2" nylon wheels.

DBT-SS-DLX: Easily, efficiently, and safely lift, move, and maneuver a wide range of steel and plastic drums. Automatic grip can be adjusted manually up and down to suit different heights. Robust design feature 304 all stainless steel construction. 50% less input force is required to lift a 1,000 lb. drum compared to standard drum trucks. To operate, simply push the truck to drum and attach the automatic grip to the drum rim. Rolls simply and smoothly on two (2) 8" x 2" nylon wheels.

Drum & Bin Dumpers

304L Stainless Steel Drum & Bin Dumpers are great for the 'clean' workplace as well as manufacturing facilities. The structure is designed of 304L stainless steel, including hydraulic cylinders as well as the piston, which promotes easy cleaning and long lasting strength. Push button functionality allows the user to move to a precise position and stop the movement completely, in an emergency, with the emergency switch. Batteries are waterproof, making maintenance a breeze. The unit rolls easily on poly wheels, while traversing from area to area. Once folded, the unit becomes more compact for utilizing less storage space. Retrofit drum and bin chutes are available.

Hydraulic Drum Dumpers

115 V 1-PHASE STANDARD

Hydraulic Drum Dumpers works with 30 and 55 gallon plastic, steel, and fiber drums. The units include a stainless steel chute and base plate. Portable units have two (2) rigid and two (2) swivel casters with floor lock screws.

Standard features include: 56 frame, 3/4 HP motor, 115V single phase, 60hz. Upper travel limit switch, emergency safety velocity fuse in cylinder, and vertical adjustment drum restraints are standard. Dumper is operated with a hand held control on a standard 8 ft. long coil cord. Frame has a blue baked-in powder-coated toughness. The chutes are constructed with type 304 Stainless Steel in a mill finish. Structure on back of chute is painted with Steel-It™ coating. Adjustable height clamps are stainless steel.

SPECIALTY POLISHES AND FINISHES

SSC OPTION INCLUDES

- 304 Stainless Steel Chute in mill finish
- Chute includes Steel-It™ coating standard on any mild steel welded to back of chute
- Steel frame, blue baked-in powder-coated toughness
- Adjustable height clamps are stainless steel
- All stainless steel chutes available, contact factory
- Can quote different grades of stainless polishing on chutes
- Optional FDA white powder coat is acceptable for incidental food contact

Quickly and easily dispense drum contents with our Brass Drum Faucets.

MODEL NUMBER	DESCRIPTION	ACCOMMODATES BUNG SIZE	WEIGHT (POUND)
DFT-AL	BRASS-PLATED ALUMINUM (LOCKABLE HANDLE)	3/4"	1
DFT-AS-SC	BRASS-PLATED ZINC (LOCKABLE HANDLE)	3/4"	1
DFT-RIGID	BRASS (LOCKABLE HANDLE)	3/4"	1
DFT-ADJ*	BRASS (SPRING-LOADED HANDLE)	3/4"	2
JDFT-B	BRASS (MANUAL HANDLE)	2"	7

*ADJUSTABLE NOZZLE

Non-Sparking Chain Hoists

Non-sparking brass construction. Brake engages automatically as soon as the hand chain stops moving. Forged load hooks. Low gear ration reduces effort required for lifting. Satisfies relevant ANSI B30.16-2003 requirements.

MODEL NUMBER	UNIFORM CAPACITY	LIFT (FEET)	HEAD ROOM	WEIGHT (POUND)
HCH-NS-1-10	1,000 lb.	10	14"	35
HCH-NS-2-10	2,000 lb.	10	14"	47

BUYER'S GUIDE TO CASTERS & WHEELS

All Casters Are Not Equal . . .

FEATURES & DESIGN

We offer a line of superior industrial casters that are *second to none*. Providing you with the safest, most reliable casters in the industry stems from having the highest quality in raw materials, design, and testing analysis. Our superior casters are rated by the following criteria and valued by the number of ★'s found next to their description. Rating criteria is below.

SUPERIOR CONSTRUCTION GUIDE

- ★★★★★ (5) = Superior Construction (includes 80% or more of the structural features below)
- ★★★★ (4) = Excellent Construction (includes 60% or more of the structural features below)
- ★★★ (3) = Exceptional Construction (includes 50% or more of the structural features below)
- ★★ (2) = Admirable Construction (includes 30% or more of the structural features below)
- ★ (1) = Good Construction (includes 25% or more of the structural features below)

SUPERIOR STRUCTURAL FEATURES INCLUDE

- Strategic Poly Bond: Sand blast and thermal cleaning of steel using a computer-controlled laser, automated adhesive applicator to ensure the same consistency every time, pre-heat mold and center (with more heat on the center to ensure poly bonds to the center first), and/or mechanically bonded together.
- Testing Analysis: May include raw material analysis, abrasion resistance, tread hardness, rotation, swivel of head, temperature resistance, rolling resistance, destructive tests, and/or locking systems (when applicable).
- State of the Art Injection Molding Machines: Equipped with linear robots or multi-lifts.
- Machined or Double Precision Steel Raceways: Offer some of the tightest performance in the industry.
- Bearing Dust Cover Seals or Thread Guards: Assist in protecting the bearings around the raceway (Dust Cover Seals) or the caster bearings (Thread Guard) from dust and debris that could impact the functionality and life of the bearings.
- High Quality Tread: Often provide longer lasting durability and better ergonomic performance than a standard tread of similar material.
- Kingpinless Design: A kingpin in a standard caster absorbs most of the abuse and tension received in a rigorous application. Over time, this can cause the kingpin to fail. Kingpinless casters provide a more even distribution of load offering stronger durability, especially in towing, heavy load, and shock absorbing applications.
- Non-Marking: Tread protects flooring from marks and scuffing.
- Anti-Corrosive Finish: Assists in protecting rigging from corrosion and rust that can inhibit the life of a caster.
- 100% of our Blickle® Casters go through a Debonding Press Test.
- 2-3 Year Warranty.
- Featured Cores:
 - A) Cast Iron or Steel: Provide better durability in high capacity applications.
 - B) Cast Aluminum: Lighter weight and offer maximum heat dissipation in high cycle applications.
 - C) Nylon or Polyolefin: Provide ideal vibration absorption. Especially useful in light capacity, low cycle applications.

SELECTING THE RIGHT MATERIAL

*Each material offers unique qualities for specific applications**

<p>Besthane®: Floor-preserving, non-marking, non-staining, highly abrasion resistant, and resistant to many aggressive substances. It is also water resistant, but not resistant to hot water, hot water vapor, humid air and aromatic solvents. Color brown. Maintenance-Free under standard conditions.</p>	<p>Besthane Soft®: High-quality-elastomer with a dynamic load capacity, non-marking, and non-staining. Also has a very low rolling resistance, good floor preservation, and high abrasion resistance. Color blue. Maintenance-Free under standard conditions.</p>
<p>Cast Iron: Wear-resistant and withstands abrasion. A relatively high floor pressure should be considered for pressure-sensitive floors. Hard tread rolls easily.</p>	<p>Extrathane®: A reaction-injected polyurethane-elastomer. It is floor-preserving, non-marking, non-staining, abrasion-resistant, and resistant to many chemicals. Non-resistant to hot water, hot water vapor, humid air, and aromatic solvents. Color light brown (butterscotch).</p>
<p>Glass Filled Nylon: Strong thermoplastic compound that resists hard impacts. Resistant to most chemicals, salts, solvents, and steam. Does not absorb water and ideal for many industrial and institutional applications. The wheel is non-marking.</p>	<p>Nylon: Impact-resistant nylon has very low rolling and swivel resistance. Provides a smooth roll on even floors and offers paramount chemical resistance to many aggressive substances.</p>
<p>Phenolic: Provides longer wear and handles high load capacities. Good for use in deep freeze temperatures. Hard tread rolls easily. Provides better floor protection and is quieter than steel wheels.</p>	<p>Polyolefin: Lightweight, resists most chemicals and oils, while providing exceptional impact resistance.</p>
<p>Polypropylene: A thermoplastic synthetic material. It is impact-resistant, non-marking, non-staining, corrosion resistant, and odorless. It also offers a low rolling resistance and does not absorb humidity. Color natural white.</p>	<p>Polyurethane: Offers paramount resistance to most oils, chemicals, solvents, and acids.</p>
<p>Rubber: Quiet-rolling, good for corrosive and damp environments. Provides shock absorption and rolls easily over small debris. Offers good floor protection and works well both in and outdoors.</p>	<p>Softthane®: High operational comfort due to an extremely thick elastic tread. Low-noise operation and rolling resistance. It is non-marking, while offering high abrasion and chemical resistance. Color green.</p>
<p>Surelastic Rubber: Characterized by a special rubber compound. This tread provides incredible floor-preserving qualities. It also offers a high load capacity, high operational comfort, and is resistant to many aggressive substances except oils. Color black.</p>	<p>Thermoplastic Polyurethane Rubber (TPR): Characterized by a non-marking, non-staining, good floor preservation. Also has low noise operation, rolling and swivel resistance. Resistant to chemicals, acids, bases, alcohol, salts, and steam. Color gray. Maintenance-free under standard conditions.</p>
<p>Thermoplastic Rubber-Elastomer (TPE): This tread provides a high operational comfort, low-noise operation, and good floor preservation. It is also non-marking. Color gray.</p>	<p>*ALL BENEFITS AND EXPECTATIONS STATED IN CATALOG ARE BASED UNDER STANDARD CONDITIONS.</p> <p>PLEASE CONTACT FACTORY FOR ADDITIONAL CASTER SIZES, MATERIALS AND TYPES.</p>

SUPERIOR QUALITY CASTERS

Made in GERMANY

New

CST-AL-5X2NY-SWTB

model CST-AL-5X2NY-S

High Quality Nylon ★★★★★

Made of **impact-resistant nylon**. Smooth running performance on even floors. Gray tread color. 70 Shore D. Wheel core material is nylon. Made in Germany.

- Impact Resistant
- Bearing Dust Cover Seals
- High Chemical Resistance
- Exceptionally Low Rolling Resistance
- High Abrasion Resistance

2 YEAR WARRANTY

PREMIUM QUALITY CASTERS

Made in
TAIWAN

High-Quality Non-Marking Thermoplastic Rubber ★★★★★

Made of **high-tech thermoplastic rubber, TPR** (Duratek®) mechanically bonded to core. Gray tread color. 65 Shore A. Wheel core is constructed of polyolefin. Made in Taiwan.

- Kingpinless
- Non-Marking
- Smooth Operation
- Exceptional Floor Preservation
- Resists Most Solvents, Oil, Grease, & Water
- Higher Capacity than Standard TPR
- Great for Factory, Institution, and Food Service Environments
- Roller Bearing (available with precision ball bearings) - contact factory

TAIWAN

High-Tech Non-Marking Polyurethane ★★★★★

Made of **100% pure polyurethane tread** (Duratough®). Designed with a new liquid cast flow affusion that ensures a 100% bond and "zero" trapped air. Green tread color. 90 ±5 Shore A. Wheel center is constructed of polyolefin. Made in Taiwan.

- Kingpinless
- Non-Marking
- Smooth Roll
- 100% Bond of Tread to Core
- Resists Oil, Grease, Water, and Most Solvents
- Roller Bearing (available with precision ball bearings) - contact factory

Premium Heavy Duty Polyurethane ★★★★★

Made of exclusive **premium grade proprietary polyurethane** with donut tread (Sirius Heavy Duty®). Ideal for applications where superior strength and high ergonomic performance is required. Orange tread color. 85 ±5 Shore A. Wheel core is constructed of aluminum. Made in Taiwan.

- Kingpinless
- High Capacity
- Non-Marking
- Precision Sealed Ball Bearing
- Ideal for TOWLINE Applications (3/8" diameter steel ball bearings absorb thrust and load)
- Donut Tread Allows for Easier Roll Ability
- Precision Machined and Induction Hardened Raceway

USA MADE CASTERS

High-Quality Polyurethane-Elastomer ★★★★★

Made of proprietary polyurethane-elastomer that allows tread to **retain its shape, reject debris**, and **increase its stored energy** to boost **ergonomic performance**. This superior caster is designed to **reduce the force exerted** to turn or start rolling, even when all wheels are not parallel. It also features **neoprene sealed precision ball bearings** and hardened raceways, providing a smooth rotation with less effort. Caramel tread color. 83+/-5 Shore A. Wheel core is constructed of aluminum. Made in the USA*.

- Kingpinless
- 100% Mechanical Bond to Core
- Reduce Push/Pull Effort Up to 50%
- Non-Marking
- Sealed Neoprene Precision Ball Bearing
- Noise Reduction
- Polyurethane Tread is Nearly 2" Thick
- Thicker, Heavier Duty Core for Long Lasting Durability
- Bearings are Off-Set for Greater Ergonomics and Load Distribution
- Crown Tread Reduces Push/Pull Effort
- Thicker Top Hat Bushings for Extended Life

CASTERS FEATURE . . .

- ★ Chrome Finish (swivel caster)
- ★ Double Precision Raceway for one of the tightest swivels in the industry

Thermoplastic Rubber ★★★★★

Made of high-tech thermoplastic rubber, TPR (Duratek®) mechanically bonded to core. Tread has been matched with a **double precision rigging** that offers one of the smoothest rotations in the industry. Swivel sports a high-class **three layered finish: brass, nickel, and chrome**. Rigid comes standard in zinc. Gray tread color. 65 Shore A. Wheel core is constructed of polyolefin.

- Axle Wheel Zerk Fitting • Non-Marking • Resists Most Solvents • Precision Sealed Bearing

SPECIALTY CASTERS

Japanese Engineered Spring Loaded Towing Casters (SLT) ★★ ★

These Japanese engineered casters are one of the only in the market specially designed for **spring-loading AND towing** applications. Its **high-performance polyurethane** is **abrasion resistant and tolerates longer distances, while providing great absorption.** The *state-of-the-art* caster raceway is made up of **both a radial bearing that allows for smooth operation for towing applications, and a thrust bearing, which provides paramount absorption for heavy loads.** The **springs provide extra support** for sensitive product. Yellow tread color. 92 ±5 Shore A. Made in China.

- Radial Bearing Supports Horizontal Force (Towing)
- Spring Loaded Supports Shock Absorption
- Thrust Bearing Supports Vertical Force (Load Impact)
- Non-Marking
- Noise Reduction
- Dust Cover Seals
- Abrasion Resistant Polyurethane

High Capacity Non-Marking Glass Filled Nylon ★★ ★

Made of high-tech proprietary glass filled nylon (ROLLX™). Designed to be ergonomically efficient. **Resists most chemicals, solvents, gases, acids and steam cleaning. Provides a higher capacity than most glass filled nylon and phenolic casters, while weighing less.** It also **does not absorb water.** Top plate measures 4 1/2" x 6 1/4". Black tread color. 85 Shore D. Wheel core material is glass filled nylon (ROLLX™). Made in Canada.

- Kingpinless
- Environmentally Friendly
- Roller Bearing
- Higher capacity than steel or phenolic with less weight
- High impact resistance, absorbs impact without chipping or cracking
- Non-Marking

WHEELS

Made in GERMANY

model WHL-AVLE-10SR-ZZ

model WHL-AVLE-10SR-RB

New

Solid Rubber (Never Flat Rubber Wheels)

These high-quality wheels are composed of two components: super elastic solid rubber and a hard rubber core. The **tread is abrasion resistant with reinforced steel wire**. These wheels provide great operational comfort, good floor preservation, and resists many aggressive chemical substances. The advantage of these wheels compared to standard pneumatic is they are puncture proof, maintenance-free, and allow for precise steering. With a reduced load capacity, maximum speeds of up to 15 mph are permissible. 70 Shore A. Made in Germany.

- Hub Type: Offset
- Hub Color: Silver
- Hub Finish: Zinc
- Hub Length: 2¼"
- Hub Material: Steel
- Zerk Fittings

2 YEAR WARRANTY

model SAW-10

Shock-Absorbing Wheels

The special design for **shock absorption properties** prevents wheels from bouncing like standard pneumatic wheels. Ideal for transporting loads down stairs. Solid black molded rubber tread **will never go flat**. Steel hubs for maximum strength. Precision bearings with ⅝" inside diameter.

- Great for Rough Terrain & Uneven Surfaces
- Large Capacity Capable of Moving Heavy Loads
- Rolls Quietly in Noise Sensitive Areas
- Long Lasting Throughout Adverse Condition

MODEL NUMBER	DIAMETER	HUB STYLE	CAPACITY	WEIGHT (POUND)
SAW-10	10"	OFFSET - FOR HAND TRUCKS	330 lb.	6

URETHANE SOLID FOAM

48 Hours to Ship

Urethane Solid Foam Wheels

The wheel is made of polyurethane, which has a greater load-bearing capacity than rubber. These **won't puncture or go flat** and are **resistant to corrosion and wear**. The sawtooth tread pattern provides traction. This wheel is intended for use in professional and industrial environments.

- Solid Urethane Foam Wheel will Never Go Flat
- Good for Any Terrain or Uneven Surface
- Offset Steel Hub is Great for use on Hand Trucks
- Resistant to Water, Oil, Dirt, Acid & Alkali

CASTER ACCESSORIES

Adjustable Height Floor Locks

These one of a kind floor locks include an adjustable height foot pad that will work on carts with different caster heights. The adjustable height feature provides uniform locking and safety unlocking force for better ergonomic operation. This feature also keeps the floor lock working properly as spring and pads wear over time. Height is adjustable by turning the bottom pad. The bottom pad includes suction-cups for extra grip.

General Purpose Floor Locks

Floor Locks may be used on platform trucks, fixture dollies, or equipment with casters. Simple foot pressure immobilizes equipment. Locks when large friction face is pressed against the floor. To release; simply kick release rod. Brake is independent of casters and can be installed to any convenient location on the cart.

Vertical mounting plate designed to mount to sides of carts and other portable products. The spring loaded pad accommodates uneven floors. Units mount with pad 1½" off the floor when retracted.

Economical Floor Locks

Our economical floor locks help to stabilize mobile equipment during loading and unloading. They are perfect for keeping carts, trucks, work benches, and other portable equipment stationary. All of these floor locks are spring loaded and offer a non-skid rubber foot pad to keep equipment in place. The heavy-duty steel construction has a bright zinc plated finish. 2,000 pounds maximum capacity.

Polyurethane Floor Locks

Floor Locks are ideal for maintenance and construction facilities. These floor locks are designed to create a stable environment, while decreasing the chance of jostling or slight movement. They are constructed of steel with a thermoplastic polyurethane base. To use, place the unit close to a desired wheel or caster and raise until tension is built. Once secured, a simple locking device can be activated by applying pressure to the foot pedal.

Corner, Surface Guards, and Bumpers

Reduce damage to walls, furniture, and machinery from cart and platform truck impact. Thermoplastic rubber construction with steel insert provides impact absorption. Easily attaches to any steel, aluminum, wood, or plastic surface. Mounting hardware not included.

Powder Coat Finishes

Optional colors are now available in our baked-on Powder Coated Finish. Simply add "SPO" paint code to your purchase order to customize and coordinate your new equipment. Note: product must currently be available in powder coat for upgrade. Look for the PC symbol next to the product for option compatibility. Please contact factory for lead time and pricing for this value added feature.

Touch-Up Paints for Powder Coat Finishes

Water Base Enamel Finishes

Optional colors are now available in our Water Based Enamel Spray on Liquid Finishes. Simply add the "SPO" paint code to your purchase order to customize your new equipment. The option can be added to most of our products. Please contact factory for pricing and lead time.

Touch-Up Paints for Water Base Enamel Finishes

Specialty Liquid Coatings

Steel-It Polyurethane Coating option provides a cost-effective alternative when equipment has to have incidental food contact rating. Coating can be used in some mild wash-down applications.

LINE-X spray on Polyurea/Polyurethane Coatings. Coating applications extend into a wide range uses in automotive, construction, agricultural, military/defense & industrial applications. Polyurea has high impact, abrasion and mild chemical resistance. Check with factory for chemical compatibility.

ZRC Cold Galvanized Compound Coating provides good corrosion resistance and protection in most common wash-down applications. ZRC Coating produces a zinc-rich finish.

New

Fully Powered Vertical Drum Gripper/Rotator **24V DC STANDARD**

A fully powered vertical drum gripper/rotator is a great asset for the manufacturing and distributing industries. A walk behind design with a max unloaded speed of over 3 mph and a single handle control makes maneuvering into the desired position easy. The shortened length allows the unit to get into very tight areas where other lifting devices can't reach. An 800 lb. lifting capacity lets users transfer more material in fewer trips, maximizing efficiency. Long term battery charge allows for constant daily use without needless downtime. Two (2) 12V lead acid batteries. Integral battery charger and level gauge included.

MODEL NUMBER	DISPENSING HEIGHT	UNIFORM CAPACITY	ACCEPTABLE DRUM TYPES	WEIGHT (POUND)
S-MU-VDGR-64	64"	800 lb.	STEEL 55 GAL.	1694

New

Drum Tie Down

This drum tie down is a great asset for both work and home. The tie-down has a 24" diameter creating a snug fit over the top of a 55 gallon drum. Once in place, the two attachment points can be utilized to help secure the drum to the bed of a truck or other transporting vehicles with assistance of cables or straps. Cables and straps not included. The strong steel construction withstands the wear and tear of daily use, while the highly visible yellow finish provides a smooth surface for safe handling. When not in use the unit is simple storable due to its low profile, compact design. Baked-in powder-coated toughness.

MODEL NUMBER	DRUM TYPES	FINISH	WEIGHT (POUND)
DTD-24-2P	55 GALLON	YELLOW	22

New

Semi-Electric Pallet Truck **48V DC STANDARD**

The best-value electric pallet truck with reduced cost is a perfect alternative to manual hand pallet jack. Compact design with light service weight and small turning radius allows this pallet truck to be used in confined spaces such as elevators, trailers, containers, retail stores and warehouses. Low noise, high quality 500W AC drive motor with excellent speed and efficiency. Low maintenance cost and smooth acceleration. All parts are easily accessible and easy to maintain. Ergonomic handle with battery indicator, key switch and dual lift buttons for both right-handed or left-handed operators. Smart design with powered lift-up and manual lower. This Electric Pallet Truck is equipped with 4 powerful maintenance-free AGM batteries. 48V system for high efficiency. Battery pack is interchangeable for continuous usage (optional battery packs are available). Fast & easy battery exchange. Storage bins on both side of the truck.

MODEL NUMBER	UNIFORM CAPACITY	FORK SIZE	SERVICE RANGE	OVERALL SIZE (W x L x H)	WEIGHT (POUND)
EPT-2748-33-E	3,300 lb.	27" x 48"	3.2" x 7.75"	69" x 27" x 51"	363

DC Powered & Manual Partially Stainless Steel Scissor Carts

Tables provide unparalleled ergonomic support in lifting, palletizing, loading, and unloading applications. Carts are raised or lowered with either a 12V DC powered motor or a manual two-speed auto shift foot pump. Units roll smoothly with two (2) rigid and two (2) swivel 4" x 2" phenolic casters with brakes. Push handle is removable. Internal DC powered electric motor and one (1) 12V battery is included on DC units. Built-in battery charger is included (115V AC power). Push buttons to raise and lower lift are located on the power unit. Hand control on coil cord is also standard. Platform is equipped with perimeter pinch-point guard for OSHA compliance. Partially stainless steel finish with galvanized scissor legs.

High Strength Fork Extensions

Fork extensions are the perfect accessory for new or existing forks. The high strength material provides extra support needed to lift large heavy objects with a fork lift. A 3/16" thickness and included lifting handle for simple placement of the extension onto the lifting fork. These models are almost 40% lighter than standard fork extensions. Capacity is 4,000 pounds. A powder coat finish is included to diminish scraps and minimize abrasion during use. Baked-in powder-coated toughness.

Square Bar Stock Lifter

A block lifter minimizes manual labor and increases work place efficiency. The lifter allows the user to lift heavy awkward sized blocks to a preferred height. By securely attaching the adjustable lifting bale to a separate lifting device, the unit is ready for product placement. Once the beam/block is in the lower jaw of the lift and is resting alongside the back wall, the wheel can then be turned to firmly press the clamp pad against the block. As the product is secured and is within the limits of capacity, it can then be transferred to the desired location. The robust steel construction maximizes longevity of unit and painted finish diminishes excess damage during daily use. Baked-in powder-coated toughness.

MODEL NUMBER	LIFTING CAPACITY	MAXIMUM BLOCK HEIGHT	WEIGHT (POUND)
CH-200-20	200 lb.	10"	21
CH-200-30	200 lb.	20"	23

Flat Open Side Hopper

A flat open-side hopper is an asset to a number of facilities, from manufacturing to maintenance. Constructed of steel for long term use throughout the harsh environment of material handling. An open sided design allows the users to load and unload from 3 sides. The unit is easily attachable to a forklift by utilizing the fork pockets. Once in position the hopper may be tilted to unload by a simple pull of the cable. This easy unloadable design maximizes productivity by eliminating the manual unloading labor.

MODEL NUMBER	DECK OPTIONS	CAPACITY	OVERALL SIZE (W x L x H)	WEIGHT (POUND)
H-FBOD-4896-2	OPEN	2,000 lb.	97½" x 56" x 36"	470
H-FBSD-4896-2	SOLID	2,000 lb.	97½" x 56" x 36"	590

Heavy Duty Work Bench

A heavy duty workbench is perfect for the manufacturing facility or in the personal workshop. A robust steel construction with a hefty 8000 lbs. capacity allows the user to work on a variety of items that are both big and small. The total platform height allows the user to work with the correct ergonomic posture which diminishes workplace slouching. The bottom shelf with a raised back can be utilized as simple convenient storage of items that can be easily gathered as needed. A blue painted finish diminishes abrasions while maintaining a smooth finish for an effortlessly cleanable work surface. The straight tabletop edge allows the workbench to be maneuvered against walls and other platforms evenly without wasted, unused space.

MODEL NUMBER	PLATFORM SIZE (W x L x H)	UNIFORM CAPACITY	WEIGHT (POUND)
WBT-S-HD-BS-3072	30" x 72" x 35½"	8,000 lb.	364

Ladder Transporter

Moving large, heavy maintenance ladders has always been time consuming and labor intensive... until now. The maintenance ladder transporter helps maneuver ladders side to side and workstation to workstation. With the simple bolt-on adjustable mounting plate attached to the bottom step, the user can then roll the unit into position to place the pin into the hitch point. Once secured, ladder and transporter can be moved as needed. The long handle allows the operator to maintain proper posture during use. For ladders with 5 steps and more, an included hook can be attached to the backside of the ladder for safe keeping of the transporter while it is not in use. Baked-in powder-coated toughness helps diminish scratches and abrasion that may happen throughout daily use.

MODEL NUMBER	DESCRIPTION	CASTERS	OVERALL SIZE (W x L x H)	WEIGHT (POUND)
LAD-MM-LTO	LADDER TRANSPORTER	4" POLY	32" x 12" x 41"	24
LAD-RAF-LTO	LADDER TRANSPORTER	4" POLY	32" x 12" x 41"	24

STORED POSITION

Traffic Cone Barrier

A traffic cone barrier is an excellent addition to new or existing traffic cones. The barrier is designed of a PVC construction for its lightweight and constant durability. Two loops are included on each end for simple mounting on the top of each cone. Unit is extendable to fit a variety of lengths between cones. A bright colored finish interchanging between black and yellow for contrast. Cones sold separately, see page 270.

TRAFFIC CONES SOLD SEPARATELY

MODEL NUMBER	ADJUSTABLE HEIGHT	PIECES PER CARTON	WEIGHT (POUND)
TC-BBDS-80	4 ft. TO 7 ft.	1	3

Single Fork Pallet Lifter

A single fork pallet lifter is a new design of an old classic. Instead of the usual two skinny forks to lift pallets, this model has one large centered fork. The fork is open on 3 sides for easy loading and unloading of products. The high handle not only allows for steering, but as the pumping mechanism to raise and lower the height of the fork. Unit rolls on casters and includes a foot brake for secured positioning during transition periods. The compact design takes up minimal storage space, when not in use.

MODEL NUMBER	FORK SIZE (W x L)	CAPACITY	SERVICE RANGE	WEIGHT (POUND)
PM1-600-1032-39	10½ x 32"	600 lb.	4" to 40¼"	200
PM1-800-1032-39	10½ x 32"	800 lb.	3¼" to 12"	245

DC Powered Tilt Master 12V DC STANDARD

The battery operated electric lifter and tilter is designed to give the user an ergonomically correct position to reach loads easily without the need for bending down or excessively reaching over. Lift, tilt and transport crates, boxes, and pallets with an open bottom. Forks can be tilted to 90°. Rolls smoothly on 6" x 2" nylon swivel casters with brake and foot protectors. Width between forks is 9½". The overall fork width is 22". The individual fork width is 6¼". Handle can be turned and locked in position away for the work area. Features include hand control for the tilt and emergency on/off switch. 12V battery and external battery charger included.

MODEL NUMBER	FORK LENGTH	UNIFORM CAPACITY	VERTICAL LIFT HEIGHT	LOWERED FORK HEIGHT	WEIGHT (POUND)
TM-22-DC	31½"	2,200 lb.	11¼"	3½"	435

Steel Container Ramps

A CRS container ramp is the perfect asset for loading and unloading products over uneven surfaces. The steel construction is long lasting and durable throughout harsh working conditions and inclement weather. The raised tread plate platform surface enables the user to have sure footing and minimize worker injury during use. The beveled edges on both ends allow smooth entry/exit by limiting the surface of height difference during transition. Side curbs also play a large role in the user safety by helping to maintain a safe alignment of goods as they pass from one area to another. Pick-up chains are included for simple transference of unit to different areas around the workplace. A range of large capacity designs are available to best suit your specific needs.

MODEL NUMBER	DESCRIPTION	RAMP SIZE (W x L)	CAPACITY	WEIGHT (POUND)
CRS-6060-15	STEEL CONTAINER RAMP	60" x 60"	15,000 lb.	448
CRS-6060-20	STEEL CONTAINER RAMP	60" x 60"	20,000 lb.	458
CRS-7272-20	STEEL CONTAINER RAMP	72" x 72"	20,000 lb.	787
CRS-8472-20	STEEL CONTAINER RAMP	84" x 72"	20,000 lb.	797

Occasionally you will find that an off-the-shelf product will not work for your application. Our flexible engineering and manufacturing processes allow us to make design changes and customize our products to meet your specific needs.

Prop 65 Warnings

ATTENTION CALIFORNIA RESIDENTS!

You have been referred to this page to read a warning that applies to a product in this catalog. You are entitled to receive this warning by operation of a California law commonly known as Proposition 65 ("Prop. 65"). Officially known as the Safe Drinking Water and Toxic Enforcement Act of 1986, Prop.65 was passed as a ballot initiative. The intent of the law is to provide Californians with enough information to make informed choices about products in the marketplace. To accomplish this goal, Prop. 65 is concerned with 2 kinds of activities: 1) knowingly discharging toxic chemicals into the state's drinking water; and 2) knowingly and intentionally exposing California residents to known carcinogens (substances that cause cancer) and/or reproductive toxins (substances that cause birth defects or other reproductive harm) without providing "clear and reasonable" warnings.

Prop. 65 requires the governor of California to publish and update a list of chemicals "known to the State of California to cause cancer or reproductive toxicity." The list is updated at least once a year. It currently includes almost 1,000 substances. The complete list can be found on the California Office of Environmental Health Hazard Assessment (OEHHA) website. OEHHA implements Proposition 65 and compiles the list of substances that cause cancer or reproductive harm.

Businesses selling products to consumers in California must provide "clear and reasonable" warnings before knowingly exposing people to any chemical on the list. However, warnings are not required just because a listed chemical is present. OEHHA developed what are referred to as safe harbor levels for many Proposition 65 chemicals. A safe harbor level is a level of exposure to a listed chemical that does not require a Proposition 65 warning. For instance, a warning about a listed carcinogen is not required if the exposure occurs at a level that poses "no significant risk". This means that exposure results in not more than one excess case of cancer in 100,000 individuals exposed over a 70-year lifetime. The most current list of no significant risk levels for carcinogens is published on the OEHHA website at <http://www.oehha.ca.gov/prop65/getNSRLs.html>. Similarly, a warning about exposure to a reproductive toxicant is required unless exposure at 1,000 times the level present causes "no observable effect". In other words, a warning is required unless the level of exposure below the no observable effect level (NOEL), divided by 1,000. The NOEL is the highest dose level that has not been associated with observable adverse reproductive or developmental effects. OEHHA refers to the calculated value of NOEL/1000 as the maximum allowable dose level. The most recent list of maximum allowable dose levels can be found here: <http://www.oehha.ca.gov/prop65/getNSRLs.html>.

Just because a product bears a Proposition 65 warning does not mean that the product itself is unsafe. Proposition 65 is a "right to know" law rather than a product safety law. That is, the intent of the law is simply to inform Californians before they possibly are exposed to chemicals that cause cancer or reproductive harm. We hope the following information helps you make well-informed decisions.
